In meeting the proprietors, on the occasion of the 26th annual general meeting of the bank, the directors have much pleasure in laying before them the usual audited accounts for the twelve months ended the 31st of Dec. last. After writing off any balances which were deemed irrecoverable, and making adequate provision for doubtful accounts, the directors have been enabled from the profits of this period to declare (free of income-tax) two half-yearly dividends, at the rate of 10 per cent. per annum each, and to add to the last a bonus of £1 per share, thus making the return equivalent to 12 per cent. per annum. There remaining an available balance of £30,302 0s. 2d., the directors have placed £15,000 thereof to credit of the reserve fund, thus increasing that fund to £190,000, and have carried forward £12,302 0s. 2d. to credit of the present year. With the further sum of £3,000 they have, with reference to clause 55 of the deed of settlement, opened a superannuation fund account, considering that provision for this eventual liability should be gradually made by moderate appropriations from the yearly profits. In order to provide further for the heavy and fast-increasing duties of the head office, the directors have recently nominated Mr. William Shipman, late a manager of the National Discount Company, as their London manager, and they are glad to avail themselves of this opportunity of expressing their confident belief that favourable results will follow this appointment. The directors regret to announce the deaths at Bombay, in May last, and at Agra, in January, of Mr. J. G. H. Brown, and Mr. A. H. Matthews, respectively managers of those branches, and the resignation of Mr. David Allardice, their manager at Madras; in succession to whom Mr. Hugh Bowie Macculloch, Mr. William Birks, and Mr. Edward Morris, have been named to officiate in those several charges. Mr. Alexander Kimington, one of your directors, having in the course of last year had occasion to return to India, the board, under the 45th clause of the deed, had much pleasure in inviting Mr. John Carrington Palmer, a former colleague, to fill the vacancy, and under his re-appointment he solicits, on the present occasion, his re-election from the proprietary.

The report and accounts were adopted, and the four retiring directors re-elected. A resolution was also passed, expressing the regret of the meeting at the loss of the services of their general manager, Mr. Francis Robert Neilson, whose decease at Boulogne, within the last week, was announced.

A gigantic fraud has been committed on the Union Bank of London, extending over several years, amounting in the aggregate to £263,000, by Mr. W. G. Pullinger, the chief cashier. It is supposed that he must have been speculating in conjunction with certain stockbrokers, and that he was a heavy loser at the time of the panic at the Stock Exchange last year. The shares fell five pounds. The directors propose at once to write off £2 per share (£120,000) from the capital, and £100,000 from the reserve fund, and the remainder from the profits for the year ending 30th June next. This will leave the concern with its original capital intact, and also with a sufficient surplus to declare a 5 per cent. dividend at the next meeting, which, with the 7½ per cent. already paid, will make 12½ per cent. for the year. The culprit is in custody, and will take his trial at the next sessions. One of the clerks have been detected in a deficiency of £1,200 also.

In joint stock banks the quotations are as follows:—Agra and United Service, 75 to 77; Chartered Mercantile of India and China, 31 to 33 ex div.; Chartered Bank of India, Australia, and China, 19½ to 20½; London Joint Stock, not quoted; London and Westminster, ditto; Oriental Bank Cor-

poration, ditto; Union of London, 24 to 25. Miscellaneous shares:—Atlantic Telegraph, not quoted; Great Ship, ¾ to ¾ pm., ex div.; Mediterranean Extension Telegraph Company, 3 to 4; P. and O. Steam, 79 to 80; ditto, new, 13 to 14 pm.; Red Sea and India Telegraph Company, ½ pm.

The exchange on Amsterdam short, 11, 14½ to 15; ditto, 3 months, 11, 16½ to 17; Hamburg, ditto, 13, 6½ to 7; Paris, short, 25, 12½ to 20; ditto, 3 months, 25, 35 to 42½; Vienna, ditto, 13, 55 to 65; St. Petersburg, ditto, 34½ to 35.

The present mail takes £476,395, the following being the particulars:—For Madras, gold, £12,937; silver, £30,151; Calcutta, £165,800; Singapore, £22,700; Hong Kong, £169,069; Foo-Chow-Foo, £3,610; Shanghai, £72,128.

ARTICLES OF IMPORT.

TEA.—Low and fair common Congous have been in request, and prices show an advance of about 1d. per lb. Good common remains quoted about 1s. 4½d. per lb. Fair to good flavoury kinds have sold to a moderate extent, later sales showing a rise of about ¼d. per lb. Common to fair Ho Hows and Ning Chows have been sold from 1s. 6½d. to 1s. 8d. per lb., and are in request at the same prices. Kaisows from 1s. 9d. per lb. upwards are wanted, and former rates have been maintained. Second-class Monings and Wopacks, after having been sold rather easier, are now quoted ¼d. per lb. advance. Fine are only in limited demand. Large sales of Tayshan kinds were made at a decline of 1d. per lb., which has since been more than recovered. Oolongs and Souchongs show no material change. In flowery Pekoes business has been limited, buyers waiting for the cargo of the *Lucy Harriet*, which is now in dock. Scented teas have met with but little inquiry, and the few sales have been at rather easier rates. Green teas have not been much in demand; the arrivals continue in excess of immediate requirements, and where sales have been pressed lower prices have been submitted to. The medium kinds of Gunpowder continue to be interfered with by indirect arrivals. The public sales of the 18th inst. comprised 36,947 packages, of which 3,696 were Assam teas. Of these the great bulk of the Assam teas, and 7,300 packages China teas, were sold, of which 5,045 packages were sold without reserve. Assam teas generally sold 2d. to 3d. per lb. lower, but flowery Pekoes 6d. per lb. China teas without change.

SILK.—A notice will be found in our postscript in latest intelligence of this market.

SUGAR.—The market has remained in a dull state, and although holders have submitted to a further decline of 6d. to 1s. per cwt. on the common descriptions, only a partial disposition to operate has been shown, and the business done is again of limited amount; middling and good qualities also have been barely supported, but for the fine and superior grocery sorts, full prices have in some instances been realized. The private contract transactions reported are 5,500 bags Muscovade Manila at 32s. 3d. to 32s. 6d.; 1,000 bags brown Siam at 31s. 6d.; 350 hogs. Surinam and Guadeloupe Muscovades at 38s. to 41s.; 108 bags fine brown and low yellow Penang were realized at 36s. 6d. to 39s.

COFFEE.—The partial heaviness referred to has, with a rather plentiful supply, been more decided as regards Colonial kinds, and in the transactions effected a reduction of 1s. per cwt. has generally been established. The parcels of plantation Ceylon in auction have been extensive, amounting to 1,296 casks, 684 barrels and bags, and the portion offered went off languidly at the decline above quoted, but rather more steadiness has since been apparent, and nearly the whole quantity brought forward has been realised, viz., fine ordinary to low middling, 67s. to 70s. 6d.; middling to good middling, 72s. to 76s.; fine, 80s. 6d. to 81s. Native, likewise, has undergone a similar depreciation in value, at which, however, the bulk of 93 casks, 382 barrels, and 3,386 bags, at public sale, was disposed of; good and fine ordinary, 59s. 6d. to 62s.; superior bold, 62s. 6d. to 64s. 6d.; ordinary, 51s. to 55s. 6d., and brown pickings, 43s. 6d.; private, very little has been done. At auction, 200 bags fine ordinary pale Manila, at 64s. 6d.; and 286 bags good ordinary greenish Singapore Java, at 59s. to 59s. 6d.

TOBACCO.—The circular of Mr. G. J. Rolfe, of Fenchurch-buildings, reports a steady business during the month, the home trade buying mostly for their immediate wants at nearly the previous prices. Holders are however free sellers, and where parcels had been taken, buyers have succeeded in getting a small reduction on ordinary and middling sorts. Java.—Only small lots arrive, which if of good quality, meet quick sale. It is much wanted. Manila.—Bare of stock, and would meet ready sale at higher prices. Manila cheroots, No. 2, wanted, prices higher, 6s. 6d. to 7s.; No. 3, 7s. 6d.; Segars, 5s. 6d. to 6s.

TIN.—There has been but little variation, consumers buying only for immediate wants. Banca, 137-; Straits, 130s. to 131s.; regulus of antimony, French, and bar, £52 per ton.

HEMP has become more firm and animated; and of 3,641 bales at auction, two-thirds sold at £14 to £20 2s. 6d. per ton for ordinary to good, being from par to 15s. dearer; 403 bales Manila at auction, chiefly sold at £23 to £23 10s. per ton for ordinary roving; good white retired at £40.

RUM.—East India has been more inquired for, and about 350 casks Penang have been placed at 1s. 7d., being steady.

RICE.—For two or three days after the 13th ult. there was an improved demand, and operations to some extent were concluded at stiff prices; since when, however, the firmness of holders has tended to check business. Fully 50,000 bags have been sold on the spot privately; low middling old to fair new Necranzie, 9s. to 10s. 6d.; common old and middling new Moulmein (with much paddy), 8s. 9d. to 9s. 4½d.; common Ran,oon, 8s. 6d.; Java, 11s. 6d. to 12s. 6d.; Madras, 9s. 9d. to 10s.; low middling to good middling white Bengal, 10s. 6d. to 12s.; and afloat, a cargo of 1,400 tons, at 10s. 9d., for Necranzie, open charter. 446 bags low middling Bengal, at auction, were bought in at 10s. 9d.; 824 bags damaged Moulmein sold from 7s. to 8s. 6d.

PEPPER.—This market exhibits the same languor as previously observed, and home trade sorts have materially given way. Fair to good bright, 4½d.

to 4½d.; 540 bags Penang were also realised rather cheaper; very common to fair dusty, 3½d. to 3½d. Privately, some further business has been transacted in Singapore at 4d. cash. White is difficult of sale; 704 bags Penang, in auction, were withdrawn at 6½d. to 6½d., and only 100 bags fair Singapore sold at the latter price.

CORROD.—Extreme depression exists for this article, and a forced sale has been made for cash at a material fall, viz., fully fair Dhollera at 4d.

JAPAN WAX.—Nothing moving—the price may be called 68s.; and, for Japan cake, firm at 70s. 6d.

DRUGS AND SPICES.—Camphor, China, and Japan, 160s. to 170s.; Cassia lignea, in bond, 90s. to 100s.; do. in buds, 185s. to 190s.; do. oil, 13s. 6d. to 14s.; cinnamon, Ceylon, 9d. to 2s. 3d.; cloves, Amboyna and Penang, 4½d. to 1s. 5d.; Galangal root, 28s. to 32s.; ginger, Calicut and Cochin, £3 10s. to £6 10s.; gum Benjamin, first quality, £13 to £15; 2nd quality, £10 to £13; 3rd quality, £4 to £9; do. droasy, £1 to £3; damer, 26s. to 45s.; gamboge, picked, £7 to £8; do. in sorts, £4 to £6; mace, first quality, 2s. to 2s. 9d.; do. 2nd quality, 1s. 0d. to 1s. 4d.; nutmegs, first quality, parbled, fine, bold, even, and heavy, 2s. 6d. to 3s. 9d.; do. unparbled, 1s. 3d. to 2s. 3d.; oil, aniseed, 8s. 0d. to 8s. 3d. per lb.; Cajeputa, 1d. to 1½d. per oz.; cinnamon, 2s. to 4s. 3d. per oz.; mace and nutmegs, 2½d. to 3d. per oz.; rhubarb, Dutch, trimmed, sound heavy breaking, bright and fresh, 5s. to 6s.; common flat, not dark coated, spongy, or wormy, 1s. 4d. to 3s. 3d.; common sound, 1s. 2d. to 3s.; star aniseed, fresh, bright, bold, unbroken, not grey, 95s. to 100s.; sticklac, Siam, fine black, 60s. to 87s. 6d.; Terra Japonica, Dutch pegue, 26s. to 27s.; gambier, in squares, 16s. to 16s. 9d.; turmeric, sound, bright, and bold, 12s. to 17s.; vermilion, bright, deep colour, and pure, 2s. 9d. to 3s.; black lead, 10s. to 31s.

MISCELLANEOUS.—Gutta percha, not adulterated or closely packed, 1s. 3d. to 2s.; india-rubber, pure, not drossy, 2s. to 2s. 1d.; rattans, 2s. to 5s. 9d. per 100; sapan-wood, Bemah, £6 to £8 10s.; Siam, £8 to £9 10s.; Singapore mother-o'-pearl shells, 125s. to 140s.; Manila, 105s. to 125s.; soy, thick and clear, dark red, good flavour, 4s. 3d. to 5s. per lb.; lac dye C. M. ½ ½ 6d. to 10d., chiefly taken in.

EXPORTS OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from England during the present year by the P. and O. Company's mail steamers:—

	Gold.	Silver.
Shanghai	—	£385,854
Foo-Chow-Foo	—	15,239
Hong Kong	£20,870	624,521
Manila	—	—
Singapore	—	56,375
Penang	—	14,910

ARTICLES OF EXPORT.

IRON.—In pig iron the market is flatter. Nail rods, £7 2s. 6d. to £8 5s. Staffordshire best bars, £8 5s. to £8 10s.; sheets, £9 10s. to £10 5s.; hoops, £9 5s. to £9 10s.; and all other sorts in proportion. The prices at Liverpool are from 5s. to 7s. 6d. per ton less.

TIN.—The market is quiet.

TIN PLATES.—For best brands of tin plates there is more demand.

LEAD.—Market is quiet, and prices remain unaltered.

SPELTER.—On the spot, £20 1½s.; for arrival, £20 10s.

SALT.—White common, 7s. per ton; butter, 9s.; stoved 10s. 6d.; hardened, 11s.; bagged, 13s. to 17s.; rock Prussian, 3s.; large lumps, 3s. 3d. to 5s.; Irish, 3s. to 4s. 6d. 3s. per ton lighterage must be added.

MANCHESTER MARKET.—Better accounts to hand from Bombay and Calcutta, with an easier feeling in the money-market, have led to an improved tone in both yarn and cloths. Buyers of cloths have manifested more disposition to give out orders than for some weeks past, but still the operations have not been extensive, owing to prices. A considerable business could be done at the rates of last week, but manufacturers are demanding extreme prices, and this has checked business for India. We have had more business in yarns for India, China, Germany, and the home trade, and the market closes stronger, prices having advanced ½d. to ¼d. per lb. higher than this day week.

AVOCA, Shanghai to London, 84 days out, 23 N., 44 W.

SURPRISE, Shanghai to New York, Feb. 16, 34 S., 17 E.

CASUALTIES.

The Adele, Jaski, from Batavia to Amsterdam, which arrived at Portsmouth 10th April, has been towed into harbour there to repair damages. She is to be surveyed.

ANTWERP, 18th April.—The E. W. Van Dum Van Isselt, Kolm, from Pasaroeng to Amsterdam, which put back to Sourabaya about the 10th Jan. very leaky, has been condemned at that port.

Nabob, Baxter, arrived at New York April 9th, with loss of mainmast and other damage.

PLYMOUTH, 21st April.—The Havering, Rickaby, from London to Hong Kong, which drove on shore on Batten Reach 31st March, has been floated off and brought into the harbour, where she now lies on soft ground.

CALLAO, 11th March.—The J. F. L. (Peruvian ship) Saul, from Callao to China, via the Sandwich Islands, sprung a leak and foundered 1st March, when two days out and about 300 miles from land, in lat. 11 S., long. 82 W. Two boats, with fourteen persons, and part of the specie that was on board, reached the coast of Peru near Lambeyeque. Another boat, with nine persons on board, had not been heard of.

FREIGHTS AND CHARTERS.

The general features of the freight market continue without material variation, the north-easterly winds having checked arrivals, but without occasioning any favourable influence at present upon outward freights. In the long trades tonnage offers abundantly, and as the demand is very weak, outward rates continue to droop. For general cargoes, chiefly dead weight, 35s. per ton Calcutta, 42s. 6d. Bombay, 47s. 6d. Kurrachee, are the average rates current here; and for coals, engagements have been made this week at 40s. Cardiff to Singapore, 42s. 6d. Calcutta, 40s. Sunderland to Bombay, about 38s. Liverpool to Calcutta (salt), &c. From Glasgow to Madras 48s. per ton is offered for iron, including insurance, and 44s. to Bombay.

For China the Government continues to advertise large parcels of stores, which keeps the berth in London tolerably active; but for coals, 50s. Cardiff to Hong Kong, 55s. Shanghai, are the quotations by the Government contractor. A small lot of iron for Shanghai is offered at 75s. from the Bristol Channel. The Australian trade continues depressed, the inquiry for tonnage being very limited. The most recent engagements are at 50s. per ton dead weight Sunderland to Melbourne, and at a similar rate from London. Foreign ships for general cargo for Melbourne or Sydney are offered at £3 10s. per ton N.N.M.; and small vessels for the outports at £3 15s. to £4; Cadiz to Melbourne 90s. wine, for a small vessel. In the Pacific trade rates are much the same, outward business being rather more depressed. Homewards the rate for guano to United Kingdom or Continent is maintained at 60s. and 95s. for French ships to Havre, Bordeaux, Nantes, or Dunkirk.

Rates of freight current for vessels on berth to Shanghai 60s. per ton dead weight; 45s. per ton of 40-feet measurement. To Hong Kong, 50s. weight, 45s. measurement. To Singapore, 35s. to 40s. weight or measurement. To Manila, 35s. and 40s. To Japan, 25 weight, 90s. measurement. To Batavia, 50s. weight, 40s. measurement. At the United States:—To Shanghai, coal and measurement goods, 9 to 10 dols.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Jeddo, 70s. to 80s.

At Hamburg, for Batavia and Singapore, 35s. to 40s. China and Manila, 50s.

THE GREAT EASTERN.—The announcement made in a previous issue that Capt. Vine Hall would be appointed to the command of this vessel is now verified officially by the company. The vessel is proceeding with her refit, and will proceed in about a month for New York, where she will be made a show ship for some time. Her final and permanent employment has not been decided on yet. It is under consideration to send her to Jersey to have her bottom cleaned.

THE P. AND O. COMPANY.—It is the intention of this company to despatch during next month the *China* and *Belar* round the Cape to Bombay, to be engaged either on the China or Australian lines, as may be most suitable. The only boat now building is the *Montan*, and fitting the *Ellora* and *Orissa*. In consequence of the increased cost of coals laid down abroad, it is probable that an increase may be made in the company's tariff for passengers.

SUBMARINE TELEGRAPH COMPANY.

MESSAGES are now received for the LEVANT, Charge for 20 words as follows:—

Athens, 41s. 9d. | Piræus, 41s. 9d. | Syra, 39s. 6d.
Chios, 37s. 6d. | Smyrna, 41s. 9d.

Messages must be marked "via Belgrade."

MESSAGES for INDIA, China, and Australia can now be sent through this Company, via Malta, Marseilles, or Trieste, and the Red Sea Telegraph. Charge for 20 words, to India, via Malta, £3 18s. 3d.; via Marseilles, £2 17s.; and via Trieste, £2 18s. To China and Australia, via Malta, and post from Aden, £3 15s. 3d.; via Marseilles, £2 14s.; and via Trieste, £2 15s.

Charge to Malta, via Sicily, £1 12s. for 20 words.

Further information to be obtained at the Company's offices.

By order, L. WALTER COURTENAY, Sec.
No. 58, Threadneedle-street (removed from 30, Cornhill.)

THE CANADIAN NEWS and BRITISH COLUMBIAN INTELLIGENCER gives the latest intelligence from all parts of Canada and the new Gold Fields, also Original Correspondence from Canada, &c. Price, post free, 5d.

London: Mr. F. ALGAR, 11, Clement's-lane, City.

CAPE and NATAL NEWS; a monthly journal, published on the arrival of the Cape Mail, giving the latest information from the South African Colonies. Price 3d., post free 6d.

London: Mr. F. ALGAR, 11, Clement's-lane, City.

TWINBERRY'S DANDELION, CAMO-

MILE, and RHEUMATISM PILLS, an effectual cure of indigestion, all stomach complaints and liver affections. In cases of constipation these pills never fail in producing a healthy and permanent action of the bowels, so that in a short time aperients will not be required, and, being quite as innocent as castor oil, they may be given to children.

From Dr. Dick, Lansdown-terrace, Kensington.

"Sir,—Send me another bottle of your Dandelion, Camomile, and Rhubarb Pills for my own use. I have no occasion of recommending these Pills, as I can conscientiously do so."

Prepared by **TWINBERRY**, Operating and Dispensing Chemist, 2, Edwards-street, Portman-square, London; and may be had of all Patent Medicine Vendors.

GALVANISM.—PERSONS desirous of

availing themselves of the MODERN DISCOVERIES in ELECTRO-MAGNETISM and GALVANISM as a curative agent in the treatment of various forms of Paralysis, Muscular and Nervous Debility, Chronic Rheumatism, Spasmodic Asthma, &c., can have it applied by properly-qualified medical men of experience at the Galvanic Institution, No. 52, Euston-road, every day (except Sunday), from 12 to 4 o'clock. Accommodation for board and attendance of a first-class character for those coming from a distance.

BLAIR'S GOUT and RHEUMATIC PILLS.

Price 1s 1d. and 2s. 6d. per box.

This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century to demonstrate by unsolicited testimonials from persons speak of a cure for the Gout was considered a romance; but now the efficacy and safety of this medicine is so fully in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age.

These Pills require no restraint of diet or confinement during their use, and are certain to prevent the disease attacking any vital part.

Sold by all medicine vendors. Observe "Thomas Pratt, 229, Strand, London," on the Government Stamp.

NELSON'S MEDICATED BELT.

(Ed. Nelson, Naval Surgeon from 1832 to 1857.)

Gentlemen who are subject to pains in the back or loins, Rheumatism, Lumbago, or who are given to corpulence, are advised to wear **NELSON'S MEDICATED BELT**, as it gives a great support to the entire frame, and a comfortable and great warmth to the back and abdomen, promoting health and digestion. Gentlemen who ride for business or pleasure should wear this belt as a preventive of Rupture, &c.

NELSON'S MEDICATED MARINE BELT for the prevention of Sea Sickness and the support of the back and loins during a long voyage.

"All those whose duty or pleasure calls them to sea should possess this Belt, for, putting aside its use on board ship, it is invaluable as a riding belt, sitting easily, and supporting the back."

—MARK PERCIVAL.

—Lower Parade, Leamington, August 3, 1858.
These Belts are sold by Mr. WHITBURN, Chemist, 174, Regent-street, price 21s. each, or direct from the Maker, Wm. ELSTON, 12, Avery-row, New Bond-street. Circulars from. Orders from the country must have the sum of waist and hips, and a post-office order for 21s., payable to Wm. ELSTON, at Cavendish-street.

These belts can be had of any tailor in the Kingdom.

St. Paul's Export Scented Soap Works.

ROBSON and SOUL, EXPORT PERFUMERS and FANCY SOAP MAKERS. Merchants can be supplied with sample cases from ten pounds and upwards on the shortest notice.

PUMPING MACHINERY.

GWYNNE and CO., ENGINEERS, LONDON, manufacture and supply the following machinery, of the most improved construction, and with all the latest improvements:—Portable and Fixed Steam Engines and Boilers of every description; Water-wheels, Windmills, Horse and Hand-power Machines; Pumping Machinery for the supply of towns, cities, and districts, and for the irrigation of coffee, cotton, indigo, sugar-cane, and rice estates, for pumping out collier dams, canals, dry docks, reservoirs, &c. They also manufacture and supply the Pumping and other machinery for paper, pulp, and falling mills, breweries, distilleries, tanneries, starch works, bleaching, dyeing, and calico-printing works, chemical works, silk, cotton, and flax mills, and manufactories in general.

Price Lists and further particulars obtained on application to **GWYNNE and CO.**, Hydraulic and Mechanical Engineers, Essex-street Wharves, Strand, London.

For Dock work, and large Pumping operations, Gwynne and Co.'s Machinery stands unequalled.

TO THE NERVOUS and DEBILITATED.

CHLORATE OF POTASSA (discovered, introduced, and extensively prescribed, by Dr. HALL) is an infallible remedy for nervousness, debility, indigestion, stomach and liver complaints. Sold solely by **ANDREWS**, Chemist, Store-street, Bedford-square, London; or to order of any druggist. Price 2s. 9d., 4s. 6d., 11s., and 22s.

EPILEPSY, FITS, and NERVOUS COM-

PLAINTS.—Dr. HALL'S NEW CHEMICAL PREPARATION, **CHLORATE OF POTASSA**, is an infallible remedy for epilepsy, and has proved singularly efficacious in every case wherein it has been tried. It is confidently believed there is no case, however severe or complicated the malady may be, but that (provided there is no organic disease) it will yield to the treatment proposed, the efficacy of which has been confirmed by practical experience in the cure of numerous cases, the particulars of which can be had on receipt of 12 stamps. All nervous affections soon yield to the beneficial effects of this medicine, and it dispels, in an incredibly short space of time, all that distressing train of symptoms so dreadfully adhesive to the human frame, which up to this period have baffled and rendered nugatory the skill of the most eminent practitioners of the civilised world. Sold wholesale and retail in bottles at 2s. 9d., 4s. 6d., 11s., and 22s., and in cases of 45 and 10 guineas, by **ANDREWS**, Chemist, Store-street, Bedford-square; or order of any druggist.

GREY HAIR.—CLEVELANDS WAL-

NUT POMADE will change grey hair to the original colour, darken red or light hair, prevent its falling off, and improve its appearance. Price 1s. 6d., 2s. 6d., and 3s. 6d., by post 24 stamps. **ANDREWS**, Chemist, Store-street, Bedford-square, W.C.; and all chemists and perfumers.

BALDNESS.—LUXURIANT HAIR.—

CLEVELAND'S GLYCERINE EXTRACT, for the production of whiskers, strengthening the hair, and preventing its falling off, is unrivalled; it removes scurf and dandruff, cleanses the skin of the head, and keeps the hair beautifully moist and glossy; one trial will satisfy the most sceptical. Price 1s. 6d., 2s. 6d., and 3s. 6d., by post 24 stamps. **ANDREWS**, Chemist, Store-street, Bedford-square; and all chemists and perfumers.

DR. SARGEANT, M.R.C.S., and L.S.A.,

has REMOVED from 45, King-street, Long-acre, to No. 8, Store-street, Bedford-square. Dr. Sargeant's new work, published by Gilbert, "Quackery Unmasked," (with prescriptions in English) sent free for two stamps. Dr. Sargeant will shortly have a vacancy for an Indoor Nervous or Electric sufferer, or one mentally afflicted. Consultation to the poor gratis on Saturday evening.

QUACKERY UNMASKED, with Prescriptions in

English.

Now ready, sent free for 2 stamps,

QUACKS, QUACKERY, and the NEW

MEDICAL ACT, forming a complete exposure of the extortions, impositions, and deceptions practised by quacks under their various forms, guises, and designations, with hints and suggestions for their complete suppression. By Dr. SARGEANT, M.R.C.S., L.S.A., late of King-street, Long-acre, and now of 8, Store-street, Bedford-square, London; J. Gilbert; and of the Author, 8, Store-street, Bedford-square.

COUGHS, ASTHMA, CONSUMPTION,

&c.—**DR. SARGEANT'S CHARCOAL COUGH PILLS** have proved an infallible remedy for hoarseness, coughs, asthma, consumption, difficulty of breathing, and all diseases of the chest and lungs. Charcoal has long been known to be superior for these disorders to the ordinary remedies, and Dr. SARGEANT (a regularly qualified member of the College of Surgeons) has combined all its tonic, soothing, and expectorating qualities in the form of a pill, so that children or adults may take them with perfect safety and certainty of success; one trial is sufficient. Sold in boxes at 1s. 1d., 2s. 6d., or 4s. 6d., or sent free on receipt of 18 postage stamps, by Dr. SARGEANT, 8, Store-street, Bedford-square, London.

QUACKERY UNMASKED: its extortions,

impositions, and deceptions fully exposed. Sent free for 2 stamps, by Dr. SARGEANT, 8, Store-street, Bedford-square, London.

Mill Owners, Iron Masters, &c., &c.

The Anti-Corrosion Paint is now used extensively

FOR ALL KINDS OF OUT-DOOR WORK.

Such as **WOOD, STONE, BRICK, COMPO, CEMENT, &c.** Also **IRON STEAM VESSELS, BRIDGES, PIERS**, or any description of Iron, and from its being expressly manufactured for exterior purposes, is peculiarly adapted for tropical Climates, resisting the rays of the sun more effectually than any other Paint. It can be easily applied by any Labourer, being sent in various Colours, requiring simply to be mixed (no grinding is needed).

Merchants and Shippers' attention is particularly drawn to it as a most serviceable article for exportation.

A List of Colours, Prices, &c., also Copy of Testimonials, will be sent.

KAYE'S WORSDELL'S PILLS cannot be equalled as a Family Medicine.—Testimonials are constantly arriving from all parts of the world as to their astonishing efficacy in destroying the cause, and removing the effects of disease. They purify the blood and correct such derangements of the stomach, liver, and other organs as are the primary causes of disease, bring all the bodily functions into healthful exercise, and strengthen and invigorate the entire system.

Hundreds of cases of cure accompany each box.

Sold by all Druggists and Medicine Vendors, in boxes at 1s. 1d., 3s. 9d., and 4s. 6d. Wholesale Depot, 22, Broad-street, London.

HOLLOWAY'S OINTMENT & PILLS.—**GLANDULAR DISEASE, KERNELS, DERBYSHIRE NECK**—Any affections of the glands of the throat demand instant attention, they indicate seeds of disease in the circulation, which, if neglected, will grow their roots will reach the vital organs, and death be the inevitable doom. By Holloway's preparations these disastrous results are prevented; they check the disease at its onset, or, used at a later period, render it milder in its progress. If properly employed these remedies will remove both symptoms and disease. They expel the virus from the blood, quicken the action of the lymphatics, cleanse the glands, and excite the skin to healthy action. If the disease be hereditary, severe, and incurable, these medicines apply defer the fatal issue.

OVERLAND ROUTE.

COMMUNICATION by STEAM TO INDIA, AUSTRALIA, &c., via EGYPT.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY book Passengers and receive Cargo and Parcels for Gibraltar, Malta, Corfu, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers, leaving Southampton on the 4th and 20th of every month. For Gibraltar, Malta, Egypt, Aden, and Bombay by those of the 12th and 27th of each month; and for Gibraltar, Malta, Egypt, Aden, Bombay, Mauritius, Reunion, Ceylon, King George's Sound, Kangaroo Island (for Adelaide), Melbourne, and Sydney, by the steamers leaving Southampton on the 13th of every month.

For further particulars apply at the Company's Offices, 122, Leadenhall-street, London, E.C.; or Oriental-place, Southampton.

WITH DISPATCH.

FOR SHANGHAI, direct, the splendid American clipper ship, FLORENCE, A 1 New York register, 1,015 tons, E. D. WADSWORTH, Commander, lying in the London docks. This beautiful ship was built expressly for the China trade in 1856, and has just arrived from Whampoa in 99 days.

For freight or passage apply to Phillips, Shaw, and Lowther, 2, Royal Exchange-buildings, E.C.

FOR HONG KONG AND WHAMPOA, the fast-sailing, Thames-built clipper ship LAUDERDALE, A 1 13 years, 850 tons register, ALEX. BOWERS, Commander, loading in the East India Docks. This magnificent vessel has lately arrived from Foo-Chow in 101 days—her first voyage—beating all her competitors, several of which were noted China clippers, thus proving her admirable sailing power. She is confidently recommended to shippers and passengers.

Apply to the owners, Messrs. John Willis and Son, East India Chambers, Leadenhall-street, E.C.; or to W. O. Young, Newmarket-court, 74, Cornhill, E.C.

REGULAR LINE OF PACKET SHIP. To sail on the 20th of April. Last Shipping Day the 18th. For HONG KONG and CANTON, the celebrated clipper ship LORD OF THE ISLES, A 1, 691 tons register, William Jameson, Commander, lying in the East India Docks. This fine ship is not excelled in speed by any vessel in the China trade, and delivers her cargoes in perfect order. Has good accommodation for passengers.

For Freight or Passage, apply to PHILLIPS, SHAW, & LOWTHER, 2, Royal Exchange-buildings, E.C.

WITH IMMEDIATE DISPATCH.—FOR SINGAPORE, the fine fast-sailing barque ELIZA THORNTON, A 1, 13 years, 471 tons per register, coppered and copper fastened throughout, THOMAS MAXWELL, Commander, lying in the St. Katharine Dock. Has superior accommodation for passengers.

For freight or passage apply to the owners, Messrs. THORNTON and WESTS, Old Swan Wharf; or to RANGEL, WOLLETT & Co., 1, Lime-street-square.

REGULAR LINE OF PACKETS.—FOR BATAVIA, the fine, fast-sailing barque RICHARD THORNTON, A 1, 348 tons per register, coppered and copper fastened throughout, JOHN ROWLAND SINCLAIR, Commander, lying in the St. Katharine Dock. Has superior accommodation for passengers.

For freight or passage apply to the owners, Messrs. THORNTON and WESTS, Old Swan Wharf; or to RANGEL, WOLLETT, and Co., 1, Lime-street-square.

TRIESTE ROUTE to INDIA.—The Steamers of the AUSTRALIAN LLOYD'S STEAM NAVIGATION COMPANY leave TRIESTE for ALEXANDRIA on the 11th and 27th of every month, at 10 A.M., in correspondence with the P. and O. Company's steamers leaving Southampton on the 4th and 20th, and Suez on the 21st and 6th of each month. Passengers' baggage may be shipped at Southampton for Alexandria.

For further information apply at 127, Leadenhall-street, London; or Oriental-place, Southampton.—HICKIE, BORMAN, and Co., Agents.

ELLIS, SON, and FICKLING will dispatch the following high class, British-built, clipper vessels:—

LEA AND PERRINS' CELEBRATED

WORCESTERSHIRE SAUCE.
PRONOUNCED BY CONNOISSEURS TO BE THE "ONLY GOOD SAUCE," AND APPLICABLE TO EVERY VARIETY OF DISH.
EXTRACT OF A LETTER from a MEDICAL GENTLEMAN, at Madras, to his Brother, at WORCESTER, May, 1851. "Tell LEA and PERRINS that their Sauce is highly esteemed in India, and is, in my opinion, the most palatable as well as the most wholesome Sauce that is made."

EXTENSIVE FRAUDS.—Lea and Perrins having discovered that several of the Foreign Markets have been supplied with spurious imitations of their "Worcestershire Sauce," the labels of which closely resemble those of the genuine Sauce, and in one or more instances with the name of L. and P. forged, they have deemed it their duty to caution the public, and request purchasers to see that the names of Lea and Perrins are upon the Wrapper, Label, Stopper, and Bottle.

L. and P. further give notice that they will proceed against any one who may infringe upon their right, either by manufacturing or vending such imitations, and have instructed their correspondents in the various parts of the world to advise them of such infringements.

Wholesale and for Exportation by the Proprietors, Lea and Perrins, Worcester; Crosbie and Blackwell, and other Oilmen and Merchants, London.

Atkinson, Browne, Gray, and Day, Assist.-Surgeon McCartney, Lieut. Templar, I.N.; 850 of H.M. 21st Foot, with Major Dogbarden, Captain Dunn, Lieuts. Grenville and Sooty, Ensigns Stamford and Warn, Assist.-Surgeon Allen, Major Swaffield, Captains Mitchell and McGregor, Lieuts. Drain and Gardiner, Assist.-Surg. Gerand, Major Hegar, Captains Harcott and Christian, Lieuts. Jebb, Hamilton, and Daniels, Dr. Jervoe, Ensign Wood; 589 of the 3rd and 5th B.N.I. The *Simoom*, from England, had the following officers on board:—Captain S. W. Blackiston, Lieuts. H. M. Moorsom and L. Tottenham, Assist.-Surg. Samuel Argent, of the Royal Artillery; Lieut. F. W. R. Clements, R.E.; Rev. F. J. Abbott, chaplain of the forces; Staff Surgeons R. Lewins and J. Galbraith; James Johnson, purveyor's clerk; J. M. Lloyd, store clerk; Major G. Cooper, Captains W. R. Gray, Goodhall, Hornby, Willan; Lieuts. R. Bruer, Sewell, Jervis, Applin, Williams; Ensigns F. McKenzie, D. McMahon; Paymaster M. Reeve, Adj. J. Briggs, Quarter-master W. Lambert, Surgeon O. C. D'Arcy, Veterinary Surgeon G. Fleming.

Sir Hope Grant had appointed Lieut. W. F. Johnson, R.N., of the *Pioneer*, to be his naval aide-de-camp. He intended proceeding North with his colleague, the French general Montauban, about the 3rd of April, in the P. and O. steamer *Granada*, chartered for the purpose. The following vessels have been taken up by Government at 22s. per ton per month, and higher rates were expected:—*Albert*, *Edward*, *Eleanor* (Dan.), *Game Cock* (Am.), *Zouave*, *Pioneer* (Am.), *Glendower*, *Harkaway*,

Macduff, *Miles Barton*, *Queensberry*, *Shantung*, *Westminster*, *Stately*, *Virginie* (Dan.), *Tasmania*, in all 16,000 tons. Three of these vessels were on the point of starting when the mail left, and it was believed would rendezvous at Chusan. The *Assistance* troop-ship sailed on the 18th with troops. That the French have intentions on Chusan seems to be shown by the fact of their chartering vessels for coal with the option of ordering them there. They have bought for their use in the expedition the steamer *Peiho* (American), at 200,000 dolls.; the *Tooy-wan*, 46,000 dolls.; the *Duncan Hogle*, 48,000 dolls., and the *Hong Kong*, at 30,000 dolls. A slip of Chinese territory on the Kowloon side opposite to the town of Hong Kong, has been leased from the local authorities, and encampments formed. The whole of the troops are said to be healthy. The French troops had not arrived, but were daily expected. At Singapore the following vessels had arrived from England; March the 22nd, *Cen-Gur* and *Cockchafer*; 30th, *Beagle*. The French steam-frigate *taironde*, *L'Entreprenante*, have also arrived from France with troops, and the whole proceeded to Hong Kong. Ten transport vessels have arrived from India with detachments of the 44th, 99th, 60th rifles Artillery and Native Cavalry. No confirmation had been received of the report of last mail of the destruction of the gunboats *Dove* and *Algerine*, at the *Peiho*. No reply has been received to the ultimatum which was forwarded by Mr. Bruce to the Government at Peking, and there is every reason to believe that they intend resistance, and are making all needful preparations.

JAPAN.

KANAGAWA.

The advices by this mail announce that the two Dutch captains who were murdered at Yokohama suffered in private revenge for the execution of three Japanese on the ground of complaints made by some Dutchmen. The foreign consuls called on the Japanese authorities and demanded that every step should immediately be taken that would lead to the apprehension of the murderers, and this was eagerly promised by the authorities themselves. A guard of twenty-five men had been landed at Kanagawa from a Russian corvette for the protection of foreigners. The British minister at Jeddo is said himself to go about armed. It is very singular that while the Dutch and English have thus so much difficulty in getting on with the Japanese; the Americans appear to be on the most amicable terms with them.

CHINA.

SHANGHAI.

The English mails of 26 Jan. arrived on the 17th March. Nothing has transpired as to the intentions of the allies, nor has Mr. Bruce given any official instruction for the guidance of merchants. The principal topic was the vicinity of the rebels; it is just possible that the Chinese Government would make use of them against foreigners. The road to Peking is almost blocked, and no intelligence has been received of the intentions of the Emperor and his Government, but it is fully believed that resistance is intended.

A report has been current to the effect that there has been a collision between the Russians and Chinese, and that the former were on their way to Peking to claim indemnity for the massacre of a number of their own countrymen upon the Chinese frontier.

The Bishop of Victoria delivered a charge in Trinity Church to the Anglican clergy, eight in number, now assembled at Shanghai. After the Litany had been read by the British chaplain, the Rev. John Hobson, M.A., the Bishop took his seat within the chancel, and delivered an address on the present aspect of affairs as affecting the prospects of Christianity and the means of giving increased efficiency to the Church of England mission in China.

H. M.'s gunboat *Bustard*, Lieut. Com. Hallows, which left this port on the morning of the 12th of March, returned from a cruise up the Yang-Tze-Kiang. The gunboat grounded on an unknown shoal, marked "deep water" on the charts, and every effort exerted to get her off proved unsuccessful. The consequence of this misadventure was the forced abandonment of the most interesting part of the cruise; nevertheless the expedition cannot be considered a total failure, for we learn that many useful observations were made and some suggestive facts collected.

The *North China Herald* publishes the returns of trade for

the port of Foo-chow-Foo, the details of which we must defer until our next. H.M.S. *Roebeck*, Commander Marten, has left for Kanagawa and Yedo, she will call at Nagasaki on her return which is expected in about three weeks. She conveys a large amount of treasure for the purchase of horses, in which, it is said, the British Commissariat Officers have been pretty successful.

FOO-CHOW-FOO.

Various unpleasant rumours continue to arrive as to the movement of the rebels, and native traders are thereby prevented entering into transactions.

Official notice has been received that the Nankingites were gathering courage, overrunning certain departments south of that capital, encroaching into Chihkiang province, and indeed already had laid waste some towns in its silk-growing department (Hoochowfoo). As Chihkiang province is also under the rule of the same Viceroy over Fukkien, there is naturally some concern at head-quarters regarding this move of the insurgents. Troops of Chihkiang are concentrating at Hangchow to protect that capital, and officials of high rank are being despatched to the frontiers of Fukkien to watch and report. Great consternation was thrown into the mandarin circles by the tidings, apparently authentic, that Chapoo was lost, a point of consequence, as it is a strong military defence of Tartar troops.

An important case, involving 90,000 taels, has been tried in the Consular Court by a number of teamen against Mr. Larken, the agent for Messrs. Jardine, Matheson, and Co. The trial occupied six days, and the Consul was assisted by Messrs. Pyke, Green, and Stuart as assessors. The decision was that "The defendant is liable to the plaintiffs for the whole price of the teas as stated and claimed, save the amounts received by them on account, the calculations in the accounts, rendered by the plaintiffs, and laid before the Court, to be previously worked out and corrected if found in error."

In consequence of several acts of piracy the gunboat *Leven* had been on a cruise and succeeded in capturing and destroying about a dozen junks. One English lorch and a part of her crew was rescued. The captain, an Englishman, was killed.

A proclamation has been issued imposing a duty of 30 taels per picul on opium.

AMOY.

We referred in our last to the coolie trade at Amoy; it appears from the following that the Chinese authorities have equalled in their brutal punishments the famous Yeh himself. It appears that two American vessels, the *Ann* and *Staghound*, have been most conspicuous in procuring coolies, and the cruelties narrated are principally in connection with them. A Chinese female, aged eighteen years, has been sent to the village of Tong Wha, there to be crucified, while on the cross to have her breasts cut off and to be publicly skinned alive, for having cohabited with thirteen Chinamen, all of whom she had kidnapped and sold as coolies to foreign vessels. The female's name is Pek-it-leang. Two Chinamen have had their ankles burnt, hung for three days by their toes, and received 1,000 cuts with the bamboo during that time; and, lastly, decapitated and their hearts cut out and carried on salvors to their parents and families. Five other Chinese, one a woman, are under sentence of torture and death for dealing in coolies. A Chinaman was crucified on suspicion of having assisted to procure coolies for foreign vessels. Two other men charged with the same offence are confined in cages and made to stand continually in an upright position without food or water until death ends their suffering. These atrocities the poor creatures have to thank the civilised natives of western countries for.

A supplement to the *North China Herald* was received by last mail, containing tabular statements of the number of arrivals and departures at Amoy, as also the tonnage and import and export dues levied on those vessels and their cargoes for the year 1859. It shows the total number of vessels which arrived during that year to be 515, of the amount of tonnage 162,702. Out of this there were 233 British, and only 23 American ships. The departures were 520, of tonnage 169,092: British vessels, 236; American, 25; Hamburg, 62 arrivals, 61 departures; Dutch, 40 arrivals, 41 departures. The value of merchandise imported into Amoy is figured at 4,512,651 dolls. Out of this that imported from Hong Kong alone amounts to 1,951,221 dolls.; and from the Straits, 974,616 dolls. The sum of 1,760,005 dolls. was from opium alone. The value of exports of native produce and treasure amounted to 2,894,393 dolls. Treasure was despatched to Hong Kong to the value of 1,347,434 dolls. The

tonnage dues levied on vessels of all nations amounted to 4,835 tls., and the import and export duties to 38,228 tls.: that is, imports, 13,435 tls.; exports, 24,793 tls., summing a revenue, in these three particulars, of 43,065 tls.

HONG KONG.

The mails of the 10th February arrived on the 24th March, forty-three days *en route*. All is activity for the coming campaign at the North, and business has been considerably checked.

The Government *Gazette* contains a notification that the peninsula on the Kowloon side has been leased by the local government from the Chinese authorities. Colonel MacMahon, of the 44th Regiment, has been placed in charge of it and the troops located there.

The Havana coolie traders, finding that kidnapping has been effectually stopped, have modified their contracts and fallen into the plans of the free emigration manager.

The plan of Mr. Rawling, of the Royal Engineers, for supplying the town with water, has gained the price of 1,000 dollars, which was offered by the Government a short time since. It proposes the construction of a large reservoir at Pok-foo-lum, connected with two smaller ones above the Tai-ping-shan. It is reported that the Governor has suggested that he should proceed to England to procure the necessary material for carrying out the same.

The *China Mail* has the following remarks on our present relations with China:—"The ultimatum forwarded to the Chinese Government is a convincing proof how dissatisfied the English people and Government are with the course which has lately been pursued in China. No retribution is demanded for the slaughter at the mouth of the Peiho; no compensation for the gunboats destroyed, or indemnity for the expensive expedition sent forth. A full apology, the passage of a British vessel of war to Tientsin, and provision for honourable conveyance of our minister to Peking, are the only demands made. England will bear the loss of prestige caused by the Peiho disaster, and will defray the millions already expended on the expeditionary force, rather than sully its humanity and affront its sense of justice by making more decided demands in a dubious if not unrighteous cause."

The *Overland Trade Report* says:—"The repulse of the allies is a contingency that hardly need enter the calculations of probabilities—the flight of the Emperor is the result which is generally considered the most probable, and yet the last for which a remedy is provided—whilst the best result that can be hoped for, namely the pressure of the allied forces and the subsequent success of diplomacy, will certainly leave the Emperor with a damaged prestige, a bankrupt exchequer, and an empire teeming with rebellion, distress, and anarchy, to rest his remedy on."

The *Marchioness of Londonderry* was to leave in a few days for England with military invalids, and a full cargo in her lower hold. The *Runnymede* also takes home invalids.

Capt. Saunders of the barque *Chin Chin*, has been tried at the Supreme Court for the murder of one of the crew of the Custom-house boat at Swatow, the particulars of which have been noticed in previous issues, and acquitted. It is the intention of the owners, Messrs. Carnajee and Co., to enter an action against Mr. Lay, the chief inspector, to the amount of 3,500 dolls. for the detention of the vessel. Some curious revelations by Mr. Lay as to Lord Elgin's part in the Chinese customs, are noticed below.

We regret to notice that Mr. Tarrant, the editor of the *Friend of China* was, on being released from the criminal side of the gaol, placed on the debtor side, owing to his inability, in consequence of his confinement, to meet the enormous law expenses to which he has been placed. We have received a great deal of correspondence on this subject, the publication of which we defer until our next.

The chartered French steamer *Shanghai* left Saigon on the 21st March, with fifty-eight Manila men who had belonged to the French navy, with whom she called at Turon in expectation of finding a vessel there to take them to Manila, but was disappointed, the place being entirely evacuated, and the Annamese busily employed destroying the abandoned French works. The fifty-eight men were accordingly brought up here. Saigon river is represented as a deep navigable stream with six and seven fathoms of water, about eighty miles long with mud banks. The place is represented as being unhealthy. A large fleet of foreign ships were anchored there.

A case of interest connected with the coolie traffic has

been acted upon in the Supreme Court of this colony. A Chinese shopkeeper, resident in Hong Kong, was charged with "kidnapping and slave dealing." After a little consultation the jury returned a verdict that the prisoner was guilty of everything charged against him in the indictment. The judge then pronounced his sentence, which was, that he should be subjected to four years' penal servitude.

In connection with the Hong Kong races, it should have been mentioned that a very sporting race came off for five hundred dollars a side, between the American gelding *Impetus*, named by General Koenan, and Mr. Cooper Turner's horse the *Muff*, an Australian gelding. The distance was five times round the Hong Kong course—or four miles and three furlongs. The Australian came in the winner, with plenty of "go" remaining in him.

In the preliminary examination into the case of Captain Saunders and the customs at Swatow, it appears that Mr. Lay made the following important statement, which, considering that his lordship's secretary obtained one of the appointments, is most likely true. That the Earl of Elgin had arranged the custom-house affair at Teen-tsin—that notwithstanding the violation of the treaty, the British minister sanctioned the custom-house arrangement being carried into effect—that he, the witness, held a commission as Inspector-General of Customs from the Imperial Commissioner Ho; and that, although there was no consul at Swatow, Mr. Bruce sanctioned a custom-house being opened there, and all other acts that he, Mr. Lay, had done.

We subjoin a very useful and temperate article from the *Daily Press*, and would gladly welcome a few more of the same sort, in place of local squabbles and actions for libel.

A few days ago, and but a very few, the prospects of this colony, in a commercial point of view, had sunk to a very low ebb. The majority of the British firms in the south of China had been induced to erect establishments here at a great outlay, partly with the idea of averting such high handed measures as Commissioner Lin had resorted to at Canton, in making prisoners of the whole foreign community; partly for the purpose of having a place of refuge in case of political events rendering Canton unsafe, and partly with the intention of availing of the place as a depot for imported goods wherewith to supply the newly opened ports in the North. It must be recollected that the parties who thus embarked their capital in the colony were the more easily induced to do so from the circumstance of their having been sufferers, both in pocket and in person, by the political occurrences which had preceded the cession of this island to the British Crown. They had been made captives at Canton, until by the threats of the Chinese officials, and the entreaties of the British superintendent of trade, they had surrendered all the opium they held on consignment, they had sought a temporary asylum at Macao, whence they had been suddenly driven by the relentless Chinese commissioner, they became refugees on ship board, enduring the most acute inconvenience, and personal discomforts. Property assigned to their care had to be transhipped elsewhere—duties, decay, transshipping charges, and demurrage ate up a great portion of it. Even after the war was over and peace proclaimed, neither trade nor confidence returned to Canton for some years. The open ports at the North did not attract enterprise to the extent which might have been anticipated. "China opened" under the Nankin treaty was gazed at from Macao for some time by the British mercantile community with apathy and distrust, as if it were either too good news to be true, or a matter unworthy of serious attention. Captain Elliot, the British Plenipotentiary, had in the mean time declared this island ceded to the British Crown, and without waiting for the approval of her Majesty's Government regarding its occupancy, he had held a land sale, which he had induced the community to attend, by promises and representations which would have done credit to George Robins. There was nothing to be paid down, not a farthing—the biddings were upon the yearly rental which the purchasers might be willing to bid. Dick, Tom, and Harry became excited. John was as good as his master—and one man as good as another, without regard to the length of his purse or his pedigree. Some of the British firms bought lots from a feeling of self-protection, but the majority eschewed the affair as a bubble. When, however, the Home Government had determined upon retaining the island, and held out every inducement to foreigners to reside here, the community were in a measure driven to construct places of business here, at a very great outlay, under the considerations already named. Splendid edifices rose in every direction—many firms vied with each other as to the magnificence of their establishments, and it was not until these had been finished and vast sums expended, that a suspicion crossed the minds of the victims that they had been guilty of precipitancy and imprudence. The place appeared to have no resources for trade whatever. The malpractices of certain Government servants caused it to be looked upon with such dread and aversion by the natives, that no respectable Chinese could be induced to settle here. The Home Government did nothing whatever, either to alleviate the abuses under which the place had sunk, or to develop its untried resources. It was a midden of patronage, and stunk in the nostrils of all honest men who ventured near it. Things became worse and worse. The lots Dick, Tom, and Ned had run up at the Elliot Robins' sale had princely mansions built on them, some costing five, ten, and even fifteen thousand pounds. The Crown rents, which were thought lightly of in perspective, became sad bi-annual realities. The buildings were useless, and were gradually vacated. The two houses of Montagu and Capulet remained, or the colony would surely have been entirely deserted by the British mercantile community. Many parties wished to abandon the splendid monuments of their folly into the hands of the Government to save the payment of Crown rent. These terms the Government flatly refused—they relied upon these rents to pay the recipients of Downing-street patronage, and clung to them as Shylock did to his pound of

flesh. Great was the wail, and well cursed was the colony in those days, but there seemed no chance of improvement or relief, until the P. and O. Company extended their line to China, and made Hong Kong their head quarters. This caused a little life to be instilled into the place. The parties who had deserted it were compelled to appoint agents, and to come down occasionally and view the marble halls they had expended so much money and taste upon. The white ants had then a glorious time of it, and it was indeed an effort for human nature, after witnessing their ravages, to send a check for the Crown rent. Every resource from which it was hoped a trade would be developed had utterly failed, and nothing but a miracle appeared likely to make the port a place of importance, when suddenly following on the heels of the gold discoveries, the first symptom of *bona fide* commerce dawned, and a source of trade became developed which had never been prognosticated. We refer to the free emigration trade, a branch of commerce more peculiarly adapted to the resources of this place than any other which could possibly have been conceived. Well, what has been the action of the British Government regarding this trade? One emigration officer will permit houses on deck—another will not—one measures a vessel one way, his successor another way. Considering that the mortality of the free emigration trade of this colony is under one quarter per cent., we do maintain that these mutable official freaks are most contemptible. It is rather too bad that the Home Government should tell us that we must pay our own expenses, yet still have no voice in our own affairs, and have the best branch of our trade spoiled by absurd and impracticable legislation!

The following may be considered an authentic report of the acting Chief Justice on the case of Tam Achoy and his employes after they had pleaded guilty to the charge of buccaneering:—

The Acting Chief Justice said, that the defendants had acted wisely in adopting the advice of their counsel, it being quite impossible to deny that a breach of the law had been committed. Having done an illegal act, the only proper course which was open to them was to confess their fault, and to bring forward such circumstances as they were able in extenuation or mitigation of their offence. It would be a gross violation of international law, if persons—whether natural born subjects or foreigners—domiciled in one state, were to be permitted to levy war or fit out hostile expeditions against the subjects of another state, against whom no declaration of war had been made by the sovereign authority. If such proceedings were tolerated, peace between any two nations would soon become impossible, as there are always to be found persons who, for the gratification of private animosities,—revenge of individual wrongs, real or imaginary—the hope of plunder—or even the love of excitement and adventure—who would not hesitate to embark their property, and induce the more needy to risk their lives, in hostile expeditions against the persons and property of subjects of friendly powers. All such acts were contrary to the spirit and the letter of the English law, which would be found sufficiently strong, when duly administered, to restrain and punish those who might offend. It was not to be endured that acts, such as the defendants had been guilty of, should be perpetrated in a British colony; and all persons must be taught that not only the subjects of the Queen of England, but foreigners also, resident on this island, where they receive the protection of the British law, must in return submit to the authority of that law, and not avail themselves of the asylum which they here enjoy to equip and send forth hostile expeditions, by which just cause of offence would be given to the sovereign of a neighbouring country. It was the duty of every state to enforce obedience to its own laws, and to protect its own subjects; and if, unhappily, injury and wrong resulted from the weakness of the Government, and the inefficiency of the officials of the Chinese empire, those who were aggrieved were entitled to call for the intervention and protection of their own rulers, but they must not seek to right themselves by the strong hand, and invade the territory of a Power against whom no declaration of war had been made by the only authority legally competent to do so. In the present case, the extenuating circumstances were exceedingly strong—stronger, he thought, than he had ever before known—for the defendants had evidently acted under the impression that they had a right to do as they had done; they had made no secret of their intentions, and (which was most important) they had, as appeared from the affidavits which had been handed in, been applied to, in the most formal manner, by a Chinese mandarin, to assist him, with men and materials, to attack a large number of his own fellow-subjects, against whom complaints had been made, but who were strong enough to treat with contempt the efforts of officials who had the will, but not the necessary forces, to suppress evil practices, and inflict merited punishment upon the evil-doers. It was evident that Tam Achoy was anxious to carry on a campaign, and had availed himself of the appeal for assistance which was made to him, in order to exterminate, if possible, the enemies of the clan to which he belonged; but no expeditions, such as he had organised, would be tolerated, or escape the vigilance of the authorities of this island, and although he (the Acting Chief Justice) felt justified, under all the peculiar circumstances of this case, in dealing leniently with the defendants, he wished them, and all others who might hear him, distinctly to understand, that if an offence of a like nature should again be committed, the offenders would most assuredly be punished with great severity. He desired to afford the defendants an opportunity of proving that they sincerely regretted the illegal and mischievous transaction in which they had been engaged, and he would therefore abstain from passing sentence on the present occasion. The principal offender, Tam Achoy, would enter into recognizances, himself in £1,000, and two sufficient sureties in £500 each, to appear when called on, and abide the judgment of the Court; the defendant, Baker, would enter into his own recognizances in £500, and two sureties in £250 each; and the remainder of the defendants in the sum of £250 each.

The Chinese Coolie Corps is to consist of forty head men at ten, forty assistants at seven, and four thousand coolies at five dollars a month, with an increase of one dollar while serving in the North, and two dollars while engaged in hostile operations. Every six months they will receive a cotton jacket, and every year a cane hat, in addition to free rations. The corps will be distributed into ten companies, under the command of the following European staff, viz., a commandant, with pay (command money), at 400 rupees a month, a second command-

ant with extra pay at 250 rupees a month, twelve subaltern officers at 9s. 6d. per diem, one companies' sergeants, including commandant's clerk, at 1s. 6d., and two hundred and eighty orderlies (privates) at 9d. Brevet Major Temple, 12th N. I., has been appointed commandant, and Capt. Evans, R.M.I., second commandant. The dress of the officers does not seem yet to have been decided upon, and they appear accordingly in numberless fancy dresses.

Capt. Rowland, 1st Royals, started for Manila. His object in visiting this Spanish settlement is to purchase and superintend the transport of ponies for the Light Cavalry and Military Train. Bombay and Manila, it seems, will suffice to supply the demand.

The opposite peninsula of Cowloon, including the adjoining island, is to be taken possession of by the English, and a camp is to be formed there. This is a most judicious step, and was recommended by Admiral Seymour.

The following is a statement of the result of the operation of the British Free Emigration Society for the year 1859, which may be divided between Hong Kong and Canton thus:—Hong Kong, 1,087; Canton, 887:—

Vessels.	Men.	Women.	Boys.	Girls.	Infants.	Total.
Whirlwind	302	56	9	4	1	372
Dora	208	115	37	20	11	391

MR. TARRANT AND THE HONG KONG MARKET.

We had overlooked the following reference to the statement made by the *Daily Press* as to Mr. Tarrant's share in the market, but as we have reason to believe it to be a correct version of the case, and are glad to observe our contemporary has thus rendered the *amende honorable*.

"We wish to set ourselves right with the public on a point relative to the criminal procedure instituted by Colonel Caine, against Mr. Tarrant, the editor of the *Friend of China*. We stated, on what we deemed undoubted information, that our contemporary had possessed a "red letter share" in the market during the time that he was in Government employ—that he had paid nothing for such share—and that his profit on it was commuted to 150 dollars per month. This insinuation laid him open to a charge of corruption, and it certainly appeared to us, as it must have done to every one who read what we wrote, that it was a case of the "pot calling the kettle black." Right sure are we that our informant believed what he said, and had what he thought good authority for the statement he made. It is however entirely untrue, and we think Mr. Tarrant's friends are much to blame for allowing the matter to go uncontradicted for such a length of time. The following are the facts of the case. Why-a-qui, the lessee of the market died on the 4th December, 1846. Why-a-foon, his brother, administered to his estate—owing to the acts of extortion committed on the market in the name of Colonel Caine it proved a losing concern, and Why-a-foon becoming involved, was put into jail for debt in the month of October, 1847. He had not the means to pay the expense of going through the insolvent act, and by the advice of his solicitor, Mr. Coley, he sold the equity of redemption of the market, which being heavily mortgaged and appearing a losing concern, was knocked down at auction by Mr. Geo. Norris in October, 1847, to Mr. William Tarrant, for 130 dollars. Mr. Tarrant left the Government employ in July 1847, therefore this occurrence took place three months afterwards. Mr. Tarrant well knew the system of extortion which had been practised, and was of course determined to put a stop to it—which as he was acquainted with the imposts for which the market was liable, he easily effected—for the sale above named, made him the lessee, and therefore entitled him to keep the books. He set about making endeavours to pay off the mortgages, and finally succeeded in persuading Hong chock and others to liquidate these liabilities, giving him one-fourth share for his purchase, in consideration of his keeping the books. The market thus relieved of Caine's compradore, paid remarkably well. Mr. Tarrant's share came to about 80 dollars per month. When the lease had but three or four more months to run, Hong chock and the others were desirous to renew it. This they could not arrange as long as they were connected with Mr. Tarrant, so they induced him to retire, commuting his share of the profit for the unexpired few months at the previous average yield, and no more. This is the true history of the *Red Letter Share*."

COCHIN CHINA.

The French authorities appear to have decided on postponing operations against Hue, the capital city, until the termination of the Chinese expedition, and in the mean time to endeavour to draw a trade to the port of Saigon. Several vessels have been fixed by Chinese merchants at Hong Kong, to load there with rice, &c.; and offers continue to charter vessels at 40 cents per picul.

BORNEO.

LABUAN.

This settlement had been visited with an unusual amount of rain for the time of the year. The rice crop on the west coast of Borneo was a good one, and the price of grain had fallen in

consequence nearly one half. Eight slave debtors had made their escape from Bruni and the rivers adjacent, and reached Labuan. A native of Sarawak, who had committed a murder on Christmas eve, was convicted and executed.

JAVA.

On the 13th Feb., a treaty between Holland and Boni was signed, by which the latter acknowledges the sovereignty of Holland, renounces all unjust claims on some parts of Celebes, and restores to the government the islands of Bonerate and Kalao formerly granted as fiefs to Boni, cedes a part of the kingdom of Boni to the Netherlands India government, and gives further guarantees for continued quiet and peace. A separate act defines the territory ceded to the government, consisting of the districts of Sinjai, Kajang, Old Bulekamba to the river Tangha, which forms the boundary on the north, and the islands Balunrue, Liang-liang, Kambow, Kading-aring, Poi-poi, Kanalo, Kanalo-dua and Lanre-aurang. Possession of the islands of Bonerate and Kalao are resumed by the Dutch Government, these places having under Boni afforded asylum to pirates. The new King of Boni is to take up his residence at Tipulue, an islet near the mouth of the river Chinrana, and only separated by a small channel from the main land.

MALACCA STRAITS.

SINGAPORE.

Numerous vessels with troops have arrived from England and India *en route* to China, details of which will be found elsewhere.

It is rumoured that the Spanish Government has it in contemplation to follow in the wake of France, and make some alteration in their general fiscal system. The fact is that such a result must necessarily follow as a matter of course; and not only on the part of Spain, but also on the part of every wine-growing country in Europe, which has extensive dealings with England. The import duty on colonial wines will then of necessity come off, so that the wine produce of every country in the world will then be admitted into England on equal terms.

We hear that the local authorities are in treaty for purchasing the Mount Harriet Estate at Tangling, belonging to Mr. Whampoa, as a site for the European barracks.

The first day of the races came off on the 27th March, and although it had been raining a great portion of the day, the course was not so heavy as was to be expected. In the Club Cup for ponies Walkover won the prize with the greatest ease in both heats, and Charlie (late Si Goyong) made a good second. For the Governor's Cup six horses started, Antelope carrying off the prize by a considerable distance. The next race was for the Johore plate, presented by H. H. the Tomongong, and for which three horses started, one being withdrawn. This last race was twice round the course, and was prettily contested for, Gas (late Lamplighter) winning by about three lengths, and Bobtail coming in second. The second day's races for 1860, came off on the 29th. It had been raining the whole day, and the course was rather heavy; the rain did not discontinue until the termination of the sports. In the Club Cup Bobtail carried off the prize; owing to some impropriety occasioned by the rider of Gas, he was distanced. Charlie won the Ladies' Purse, and Skinny the Buenos Ayrian Cup. In the last race, Antelope won the Merchants' Cup.

The captain and crew of the *Fiery Cross* lost on a reef in the China Sea, have arrived here; the wreck has been sold for 110 dolls., and the cargo for 310 dolls.

The fund for a testimonial to Captain Bate, R.N., who was killed at Canton, has reached £200, and has been paid over to the directors of the Royal Seamen and Marines Orphan School at Portsmouth, on the condition of their establishing a nomination to the school, to be called the "Bate Scholar," to perpetuate the memory of that gallant and lamented officer. Vice-Admiral Wm. Hy. Bruce, the naval commander-in-chief at Portsmouth, has accepted for himself and successors the right of nomination of the "Bate Scholar."

COMMERCIAL REPORT.

The advices by the present mail, which brings dates from Hong Kong to the 30th March, 42 days *en route*, report an almost entire stoppage of trade, owing, however, more to the presence of rebels, than to the coming war. Of course the accounts are exaggerated according to people's ideas, as correct information from the interior is almost impossible to obtain. Chinese traders, however, report it very probable that Canton may be taken. Business in imports and exports at Canton

and Shanghai is almost at a stand. In consequence of the requirements of Government, freights have improved for vessels of 600 to 1,000 tons, but all smaller vessels find employment difficult, owing to the general suspension of coast and Japan freights. The business of Messrs. Wardley and Co., of Hong Kong and Shanghai, is to be continued under the firm of Johnson and Co.

EXPORTS.

TEA.—The accounts from all ports advise a great scarcity of stock and uncertainty as to the next season's crop. Several dealers had abandoned their journeys inland, owing to the disturbed state of the country; the exports for the remaining three months of the season must be very trifling. At Shanghai the settlements have been 2,000 chests of Ningchows at 28 to 31 taels; 500 chests of Hohon, at 22 to 25 taels; 5,000 chests Shanghai, packed, at 14 to 20 taels. In green teas, 20,000 chests, principally for the United States. Advanced rates are asked for the small stock unsold, which is only about 5,000 chests. At Foo-chow-foo, 5,000 chests at 18 to 22 taels, for middling. At Canton, 6 chops of Oonams at 20 to 30 taels.

SILK.—Settlements about 3,000 bales No. 2; Tsatlee taels, 430 to 440; and 1 Tysam, 375 to 385. The settlements for the season, 58,000 bales, being about 10,000 less than last season. Unsold stock, 6,000 bales. At Canton rates continue high, and no settlements are reported.

DRUGS AND OTHER EXPORTS.—Canton: The *Anna* for London and *Felix* for Hamburg have been despatched. The *Runnymede* and *Marchioness of Londonderry*, chartered to take invalids, will likewise carry a quantity. Cassia lignea: sales of the fortnight, 1,000 piculs at 17-25 dols. to 18 dols; stock remaining, 1,500 piculs. Cassia buds: none left. Cassia oil: 15 piculs reported at 310 dols. to 315 dols. Star anniseed: market cleared at 18 dols. to 18-50 dols. Anniseed oil: 5 piculs reported at 180 dols. to 185 dols. Galls are quoted 14-50 dols. to 15 dols. Rhubarb: none good at market—50 piculs reported of second quality, at 32 dols. to 45 dols. Matting grass still scarce and prices high. White, 11 cents. 12½ to 13½ cents. and 14½ to 16½ cents., and checked, 12 to 13 cents. 15½ at 16½ and 18½ cents. Vermillion, 40 dols. per box.

IMPORTS.

COTTON YARNS.—Small sales at 29 dollars for No. 16 to 26 Stock large.

SHIRTINGS.—Deliveries at Shanghai consist of former purchases. At Canton sales have been only 12,000 pieces.

WOOLLENS.—Shanghai: dull; deliveries 200 pieces of long ells, 500 pieces of Spanish stripes, 400 pieces of camlets, and 50 pieces of lastings. Canton: sales 500 pieces of long ells, 800 pieces of habit cloths, 96 pieces of medium cloth, 120 pieces of camlets, and 100 pieces of lastings. At Hong Kong, sales 380 pieces of Spanish stripes, 500 pieces of camlets, and 320 pieces of lastings.

METALS.—Shanghai: dull and heavy of sale, with the exception of lead, which has advanced. Canton: sales 1,600 piculs of lead, 500 piculs of bar iron, and 117 piculs of iron wire. Hong Kong: iron in excessive stock, in other kinds little doing.

AMERICAN SHEETINGS AND DRILLS.—Stock at Shanghai about 60,000 pieces, principally drills. A few thousand pieces have been sold.

COALS.—Best English steam 18 dollars per ton. Market nearly bare.

MANILA.—The market for import goods was active. In Hemp purchases at 4-43 dollars for current. Sugar contracts for 80,000 piculs at 5-75 dollars to 5-90 dollars for current charges. CIGARS.—Supply insufficient. Sales at a premium.

SINGAPORE.—The demand for European imports has been fair during the past fortnight, and clearances made to some extent, but without material change in prices. The amount of transactions in imports has been moderate, owing to the paucity of supplies of articles mostly on demand. Prices remain as previously quoted.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From London: March 21, Lady Elizabeth. From Liverpool: 14, Constantia; 21, Berwick Walls. From Cardiff: 10, Forrest Eagle.

At HONG KONG, MACAO, and CANTON.—From London: March 16;

Westminster, 21; str. Thunder, 24; Golconde, 27; Southern Cross. From Liverpool: 16, St. Helena. From Newcastle: 18, Argo.

At SINGAPORE.—From England: Marcé 22, Centaur, Cockchafer; 30, H. M. str. Beagle. From London: April 5, Nile.

At PENANG.—From London: April 4, Pilgrim.

SAILED.

From SHANGHAI.—For London: March 19; Kamehameha IV. For New York: 17, Beaver; 21, Sir W. F. Williams. For Cronstadt: 20, Sophia Adelaide.

From SINGAPORE.—For New York, March 29: Raven.

From Foo-chow-Foo.—For London: March 16, Antagonist.

From Hong Kong, MACAO, and CANTON.—For London: March 24, Anna. For New York: 17, Intrepid.

At MANILA.—For England: Mar. 10, J. Victoria; 14, City of Boston; 22, Spitfire. For New York: 17, Nestorian. For Boston: 22, Belle of the West.

LOADING.

At SHANGHAI.—For London: Benvoirlich, Constantia, Countess of Seafield, Sir Geo. Pollock, Sir W. F. Williams. For New York: Red Gauntlet, Eureka.

At HONG KONG, MACAO, and CANTON.—For England: Runnymede. For London: Alchymist, Corea, Sir Ralph Abercromby Osprey. For Havana: J. Wakefield, Live Yankee, Maria Elizabeth, Sigisbert Cezard, Governor Morton, Santa Lucia. For Sydney: Petronella, St. Helena, Jan van Brakel Leonidas. For Sydney and Melbourne: Aquila. For San Francisco: Lizzie Spalding, Bellona, Black Warrior, Barly Bird, Viking.

At SINGAPORE.—For London: Caroline, Agnes, Hiawatha, Wild Flower. For Liverpool: Endymion, G'engarriff. For Marseilles: Ger rude. For New York: C. C. Dow, Resolute. For Boston: Andes, Rocket.

At PENANG.—For London: Mayola, Pilgrim. For New York: Raven.

At MANILA.—For England: Britannia, Julia, Prince Charlie. For New York: Ringleader.

FREIGHTS AND CHARTERS.

At MANILA.—For London the following engagements have been made—Prince Charlie, current and unclayed sugar at £2 10s., and hemp at £3 5s. per 20 cwt.; Britannia, current sugar and hemp at £2 17s. 6d. For New York, the Ringleader takes 500 tons sugar at 7 dols. per 20 cwt., filling up with hemp at same rate per 4 bales (40 cubic feet).

At SHANGHAI.—The rates to London are still at £1 10s. and £2 for tea, and £3 10s. and £4 for silk. For New York the business of the season is drawing fast to a close. The tonnage market is considerably effected, owing to the stoppage of business.

At HONG KONG, MACAO, and CANTON.—The number of vessels in China waters at the date of the last advices disengaged, exclusive of coasters, was of an aggregate tonnage of 16,000 tons, after deducting those lately engaged by Government as transports and store ships at 21s. to 22s. per register ton per month. The number of vessels on their way from Europe, America, India, &c., was of an aggregate tonnage of 40,000 to 45,000 tons.

The rates for London are £3, and New York there are no vessels on the berth. For Sydney, the rates are 25 dols. net for passengers. Tonnage has improved in value, owing to the Chinese free emigration, the opening of Saigon, and the wants of Government. The Corea and Sir Ralph Abercrombie are both full of tea, for London. Four vessels have been chartered to load at Saigon, at 60 cents. per picul.

The Government require vessels of 600 to 1,000 tons, with good between decks and scuttles or port-holes, so that a large number of vessels are not available, and it is expected that higher rates must be paid for suitable craft. The French have purchased the Peiho, Toeywau, Tahu Wau, and the Hong Kong steamers.

At SINGAPORE.—The rates to London are £4 to £4 10s. respectivel. To New York there is only the *Resolute* in harbour, which is loading on owners' account. Shipping from the Western ports to Europe is still in inquiry for. The *Wild Flower* has been laid on from Sarawak for London at £3 10s. light freight and measurement.

PASSED STRAITS OF SUNDA.

From England and Continent to China: March 21, Albion, Ardenraig; 28, McLeod, Gerardus Jacobus. To Bangkok: 12, Gwalior. From China to England and Continent: 17, Sophie; 19, Bio Bio; 20, Westburn; 21, Lawrence Brown, Cornubia. To New York: 19, Edward Forrest, Golden Rule. To Sydney: 19, Eagle; 21, Elias. To Havana: 18, Messenger; 21, Kitty Simpson. From England and Continent to Singapore: 12, Anistedes; 21, Cataragui; 23, Albert Cezard. From Singapore to England and Continent: 12, Timandra; 14, Potose, Guyon. To New York: 19, Azan. From Manila to New York: 20, Sweepstakes. From Cadiz to Manila: 21, Cervantes. From Batavia for Cork: 21, Edward and Julie.

CASUALTIES.

NINGPO.—The Hamburg brig *Esmeralda* was lost on the 8th March by striking on a rock of reef where the Mariner's Hope was wrecked in 1857. The reef bears N. ½ W. from Skead Island, distant 3 miles. It has 5 to 5½ water all round, and is not laid down in many charts. It is right in the way of a vessel.

HONG KONG.—The *Maria Louisa*, from hence bound to Amoy, ran into Haw-e-tow bay by mistake, taking Ded's Island for Chapel Island; she grounded on a spit near Tawa Island. On sending to Amoy for assistance, the *Opossum* gunboat, with a boat from the *Acorn*, went out and succeeded in getting her off. She jettisoned a part of her cargo. The British barque *Statesman* left Hong Kong March 25, bound to Foo-chow, but anchored again some little distance from Hong Kong. In heaving up the anchor the chain parted, and the vessel drifted on the rocks. The passengers arrived in Hong Kong yesterday, reporting the vessel half full of water. The master has not yet arrived.

The *Talca* was lost on the Paracels on the 6th of March, crew saved, and arrived at Macao. The American ship *Esthermay* already reported, sunk in seven f. thoms of water.

The Bremen bark *Condor* struck on a rock on her passage to Siam in lat. 10.47 N., long. 102.47 E. Crew saved, and arrived at Bankok.

JAPAN.—The P. and O. steamer *Asoff* experienced very heavy weather between Nagasaki and Kanagawa. On the voyage up had the port cutter stove in by the heavy sea, and coming back had the starboard life-boat carried away during a very strong gale from the N.E.

The *Melina* and *Excelsior* experienced severe gales. The brig *Schiller* lost, main topmast sprung, and fore and main topsails blown away in working off shore in the gale.

SINGAPORE.—The loss of the ship *Fiery Cross*, from London to Hong Kong, was reported by Lizzy Webber, which arrived from Labuan on the 1st of April.

EXPORTS FROM MANILA.

Per J. Victoria, to London: sugar, 7,405 piculs; hides and cuttings, 324; sapanwood, 243; cigars, 2,445 mila.

Per Spitfire: sugar, 5,608 piculs; hempo, 1,600; sapanwood, 195; hides and cuttings, 192; cigars, 5 mila.

Per City of Boston, to Liverpool: Sugar, 3,700 piculs; hemp, 2,838; sapanwood, 465; cigars, 43 mila.

Per Nestorian, to New York: Hemp, 10,352 piculs; sapanwood, 350; cigars, 20 mila.

Per Belle of the West, to Boston: sugar, 7,995 piculs; hemp, 5,720; hides and cuttings, 742; cigars, 512 mila.

The picul is 133½ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

Continental Intelligence.

FRANCE.

PARIS, MAY 10.

There is not much intelligence of importance to forward you for this mail. The debate upon the new tariff and the treaty with Great Britain is proceeding in the French Chamber of Deputies, and, remarkably enough, the speakers abuse both and declare that England is going to get all the benefit, and France will be ruined. This singular transposition of the *verba* proceedings of a portion of the English House of Commons would lead to the supposition that either the treaty must be a most mystical and incomprehensible document, or that the great traders and manufacturers of both countries are very backward with their political economy.

Communications continue to take place between the diplomatic representatives at Paris of the various European Powers, with respect to the suggested conference upon the neutral provinces of Savoy, but nothing has been definitely settled. It has been intimated, however, that there is an evident desire to arrange the matter by ministerial negotiation, inasmuch as, arguing upon the treaty of 1815, would raise some awkward questions for more than one royal member of the conference.

The *Debats* has a very long article on the late fight between Sayers and Heenan. The following passage from the peroration will show how that disgusting contest is regarded from a French point of view:—

"We would specially remark that this Englishman (Sayers) is the faithful representative of his nation. Endurance, patience, latent energy—but violent and ungovernable—invincible obstinacy, the tacit oath to die rather than yield, are the attributes of the English. Do we offend delicate sensibilities when we say that the dumb and inflexible resolution with which the Englishman, in spite of the wounded condition of one arm, supported for two hours the shock of the terrible human avalanche which fell upon him, is in our eyes a triumph of moral force and a miracle of strong will? Thrown twenty times into the dust, and always rising again, he is the type of England on the field of battle. History tells us that the English are always beaten in first campaigns; they are only formed, like well-seasoned characters, by misfortune. One may say that, like Anteus, they must embrace the earth to recover their power; but at the end of all their defeats we see them remain last on the field. Whenever they are not vanquished by the first blow, it takes a long time to conquer them."

The writer in question explains why, in his opinion, so much interest was displayed by England in the revolting encounter:—

"England has for her first shield what she calls her wooden walls; for her second safeguard she looks to those vast chestnut formidable arms which are exhibited in struggles like that we have related; they are, in her mind, a provision for the national defence. Such is the philosophy of this pugilistic encounter, such is the explanation of the ardent interest which it has excited in all classes of the English nation, and such is our excuse for having occupied our readers' attention with it."

Another journalist also treats us to an account of the fight, and talks of the "white daughters of Albion, with the fair hair, rushing to witness it." He believes, or affects to believe, that the ring was half surrounded by ladies; as the ring at Bayonne (in civilised France) is whenever men, horses, and bulls mutually torment and gore each other.

In reply to the proposals of France, it is said England consents to adopt, as the basis of the Conference, Article 92 of the Final Act of Vienna, which refers to the neutralization of the districts of Chablais and Faucigny. England reserves, however, the right of making at the said Conference proposals relative to the mode of this neutralization.

The shipowners of Dieppe have presented a petition to the Emperor, praying him to maintain the differential duties on articles imported into France in foreign ships. The shipowners of Marseilles are preparing a petition to the same effect, in which they state that the adoption of Mr. Lindsay's proposition would inflict fatal injury on all the French seaports.

It is said that the departure of the Emperor for Nice is postponed until the treaty between Sardinia and France shall be ratified.

Defensive works on an extensive scale are still carried on with great activity on the coast of Brittany and Normandy. I am assured that the official returns show that the number of seamen inscribed in the maritime inscription is 68,000.

The *Moniteur* publishes an Imperial decree promulgating the law passed by the Legislative Chambers for abolishing, and in certain cases modifying, the duties hitherto levied on cotton, wool, and other articles of primary necessity used in manufactures.

A funeral service commemorative of the death of the Emperor Napoleon I. was celebrated on Saturday at the chapel of the Tuileries, in presence of their Majesties, the Princes and

Princesses of the Imperial family, and the Princes and Princesses of the family of the Emperor having rank at Court.

Saigon and Cambodia which, while the public eye has been turned in another direction, have been so quietly annexing themselves to France, have need of a governor, and one is to be sent out. It is supposed that the post will be bestowed on a military officer, and that the establishments will be conducted on a vast military scale. Already have large shipments of clothing and military stores been made from Marseilles, and much increase of importance to the settlement is expected from the treaty of peace about to be signed by Baron Gros with the Emperor of Annam.

A very extensive and augmented camp is forming at Chalons. Engineers and military workmen have left various depots to complete the arrangements. The Emperor will visit Chalons during the summer. I hear there is to be a grand naval review this year. Preparations are being made at Toulon and Marseilles to receive the siege artillery of the army of Italy, originally intended to reduce the strong places of Venetia.

The rise in all quoted property at the Parisian Bourse appears to be now consolidated. We look forward to a period of tranquillity for some time to come. Political questions no longer influence our money market. Italy, Switzerland, and the East are no longer regarded as material for influencing the Stock Exchange. If we take the month of April, 1859, and compare the value of quoted property in April, 1860, the rise is very considerable.

Accounts from the Red Sea of a recent date (says the *Journal du Havre*) state that Captain de Russel, of the French navy, had signed at Gondar with the King of Abyssinia a treaty of commerce and friendship, very advantageous for France.

The official account of the revision of the conscription lists has been published, by which it appears there are but 306,930 apparently eligible youths to supply the 100,000 recruits demanded for the army; or, in other words, the conscription sweeps off nearly one-third of the whole of the young men of France!

The *Semaphore* of Marseilles prints a private letter from Palermo, stating that the insurrection has taken a thorough hold upon the Sicilians; that the peasants are aroused and paid by unknown hands; and that there is little hope of the Government gaining the victory in the end. At Palermo matters are said to be in such a state that a man cannot visit a friend's house without a permit from the police. Nearly the whole of the nobles are in confinement, and some who desire to leave the country are refused passports. Advices from Turin declare that Garibaldi has not left for Sicily as stated, but some assert that he is certain to go sooner or later. It is said that he had hired a vessel for the expedition, but that Count Cavour persuaded him to give up the project, for the present at any rate. That he is in constant communication with the Sicilians, and that they call aloud on him for aid, is not doubted.

An Englishman named John Rivers has been condemned to five years' imprisonment and ten years' surveillance by the police for a most audacious robbery committed at a jeweller's in the Palais Royal at mid-day. It seems that he had already been six months in prison for theft here. His advocate could plead nothing in extenuation, for the fellow was taken in the very act, but he tried hard to get the punishment reduced, in consequence of the much greater severity which he declared had recently been introduced into the criminal prisons here. The President of the Tribunal replied in the following grandiloquent fashion. He said: "If severity is ever to be exercised, it is assuredly against this stranger who crosses the sea, like too many of his compatriots, in the spring, to invade us and possess themselves of Parisian purses. No! there can be no indulgence for such malefactors; they must be struck with vigour. Happily we have long been able to repel the invasions of such Normans."

The rumour which is stirring up every foreign embassy in Paris, and which has been silently creeping through the air for the last few days, is that of the approaching abdication of the Emperor of Austria, founded upon the utter weariness and disgust which have seized upon him, in consequence of the suicide of Baron de Bruck, and the conviction of the hopeless state of the Austrian finances, which have been subjected to the most barefaced pillage by the very men to whom they were given to hold in trust.

The French Emperor is said to be occupied just now with experiments relating to a new motive power, which, although

not independent of steam altogether, will diminish almost to nothing the importance of that hitherto universal agent. It is imagined to consist of the application of the gas generated by steam instead of the steam itself, and to possess a mightier power of action in its condensed form than that produced from the vast quantity of coal hitherto in use. A vessel is now fitting out in Arman's dockyard, at Bordeaux, where the experiment is to be tried in ten days from this time.

RUSSIA.

St. Petersburg, May 3.

The *Marine Journal* states that the following ships of war have sailed for China, where important events, not only for England and France, but also for the interests of Russia, are about to take place:—The screw steam frigate *Svetlana*, the corvette *Possadnik*, and the steam-clipper transports *Rasboinik* and *Najesdnik*.

The *Gazette of the Senate* publishes officially the text at full length of the Treaty of Commerce between Russia and Japan, concluded on the 19th August, 1858, as the amplification and completion of the treaties of Simoda (7 February, 1855,) and Nagasaki (24 October, 1857). In this new treaty Russia obtains the right to send either a permanent or an extraordinary mission to H. M. the Tycoon of Japan, either in the quality of ambassador, minister plenipotentiary, or simple resident. This diplomatic representative shall reside at Jeddo, and shall be at liberty to travel over the whole of the Japanese dominions as often as he pleases. This concession is also extended to the Russian Consul General. In addition to the ports already opened by the previous treaties to Russian trade, those of Kanagawa, in the Bay of Bussin, and Chiogo, in the Bay of Sessin, are added, whilst in the course of the present year (1860) a new port on the western coast of Nipon will be opened to them, but Simoda will then be closed. In all these places Russia has obtained the privilege of appointing permanent consuls, whilst Japan promises to provide the needful buildings for their offices, together with schools, hospitals, and habitations for the officials. It is further stipulated that at Jeddo and Ossiaka Russians shall not reside permanently, but may proceed thither on their commercial affairs, during which period they shall inhabit a certain quarter specially set apart for that purpose, but be prohibited from visiting other parts of those cities. Freedom of religion is granted to the Russians, and the Japanese Government is bound to prohibit, under heavy penalties, any profanation or mockery of their religious ceremonies. Annexed to the treaty are the stipulations respecting the land boundaries for the traffic of the Russians in Japan, which are extended to a distance of ten Japanese *Ri*, or thirty wersts (equal to twenty English miles); as well as respecting the free right of trading, the tariff on imports and exports, and the regulations to be observed by Russian merchant vessels on their arrival and departure from Japanese ports. The importation of opium is prohibited, and that of firearms only permitted when purchased by the Government. Gold and silver coins of any country shall be taken in Japan according to weight and their proportion to the currency of the country, and may be freely imported and exported, with the single exception of the Japanese coins. Should circumstances arise to make a revision of the treaty and the tariff desirable, either of the high contracting parties is at liberty to require it on giving the other Government one year's previous notice.

AMSTERDAM.

The Netherlands Trading Company have been again making inquiries for tonnage, with the view of chartering a third batch of vessels for Java and Sumatra. They required either newly-built vessels, or such as were chartered by them in September, 1858. Ships now on their passage out, if tendered and accepted, must be placed at the disposal of the factory at Batavia on or before the 10th September next. They further give notice that vessels arriving in Holland subsequently to the middle of last month will not be required to load coals. Ships direct from Holland to Java are however bound, if so required by the company, to load 250 stone of coals for each measured last of two tons, at a fixed freight of fifteen florins without primage per 1,000 stone, besides about thirty lasts of piece-goods at thirty florins per last in full.

ALEXANDRIA.

An important claim, in which her Majesty's Consul-General is somewhat implicated, has been made on the Government of Egypt. It appears that on the death of Abbas Pasha, his son El Hami Pasha succeeded to the property he had amassed during his reign. The young Prince claimed more over the Alexandria and Cairo Railway, which it was argued was part of his father's estate, having been constructed out of the funds which were equally his private property as those which had served for other investments. The claim was disallowed, and the matter dropped. El Hami Pasha was then a mere child, and shortly afterwards he left for Constanti-

nople. Now, however, he has returned to Egypt, making claims upon the Government to the amount of £2,000,000 sterling, the chief item consisting of the Alexandria and Cairo Railway. As it would be hopeless for him to contend, single-handed, with the despotic Government of Egypt, he has made over his claims to three Europeans, who demand the intervention of the representatives of their respective Governments to see justice done to them. One of these claims to be a British subject, and her Majesty's agent and Consul-General thus also become involved in the dispute. But a technical question has arisen—namely, whether the party in question is in this instance entitled to the protection he demands; and Mr. Colquhoun has, we are informed, refused to interfere. The claim has been referred to Constantinople; but, as we have said before, it is the question of principle which is the main point; for, whichever of the two constructions might be placed upon the claim, the result to Egypt would be equally disastrous.

A correspondent of the *Times* writes:—"By advices just received from that quarter I understand that a French steam transport, laden with the requisites for forming a new settlement, had reached La Réunion, and a steam-frigate was expected to join her in a few days. The destination of these two vessels is avowed to be Adoolis, on the coast of Abyssinia, though there can be little doubt that the island of Dissee will be the first point in the Red Sea occupied by our allies. It will be interesting to note the reasons which will be advanced for this new move on the part of France in this region. As a counterpart of what is going forward on the other side of the water, the *tableau* will in all probability represent Dissee and Adoolis as the slopes of the Alps; the rebel Dejal Nagoosi will stand in the place of Victor Emmanuel, and the acquiescence of forty families of poor fishermen who at present occupy the island of Dissee will answer well enough for the votes of Nice and Savoy. The necessity, too, for the appropriation will not be unrepresented. England possesses Aden, and has occupied Perim; so, to keep the Red Sea open for the world, France takes Dissee. Turkey, like Switzerland, may protest; but, like Switzerland, she may as well keep her breath to cool her pillow. Intelligence arrived yesterday that the French corvette *La Cordeliere*, which left Aden on the 6th ult., was aground on an island between Zanzibar and La Réunion. There was hope of saving the ship, but it is believed that she will be found seriously damaged."

UNITED STATES.

No arrangements have yet been agreed upon for the reception of the Japanese Embassy by the government. It is for this reason, and not that the Potomac is too shallow, that they will visit Washington via New York. The government does not wish to be taken by surprise, preferring that New York should endeavour to create a favourable impression upon these famous Orientals, without knowing exactly when the effort will be required. The agent of the government is endeavouring to obtain half of an hotel for their exclusive use. Should he fail in this, then he will secure a large private residence capable of furnishing ample accommodation.

In the United States Senate, Mr. Wilson had introduced his bill for the more effectual suppression of the slave trade. It provides for the construction of five steam screw sloops of war adapted to the African coast; increases the bounty from 25 dols. to 100 dols.; offers a reward of 100 dols. for delivery to the United States Marshal of any slave landed in the country.

In the House of Representatives, the committee having under consideration the expediency of prohibiting by law all American vessels from engaging in the coolie trade, had presented an interesting report on the subject. The report concludes by saying that the committee believe it to be within the power of Congress so to legislate, and that the time has fully arrived when such legislation is demanded; they therefore recommend the passage of a bill in accordance with these views. A bill on the subject was forthwith introduced by Mr. Eliot, of Massachusetts.

COMMERCIAL.

East India goods, after having advanced with active sales, induced by the advance in freights at Calcutta, have again become quiet.

Limited sales of gunny cloth were making at 13½c. cash, less three per cent.

Jute sells at 92c. to 95c. six months. Gunny bags are steady at 8½c. to 9c. per lb.

Linseed has become quiet; 1,000 bags Calcutta, per *Meteor*, to arrive at Boston, have been sold at 1 dol. 71 c. per bushel.

Saltpetre is quiet and sales limited; 10 to 10½ asked.

Teas are firmly held, but sales are moderate, the firmness of holders checking transactions. Two public sales were held last week, one on the 18th, and the other on the 20th inst. The first went off at fair prices, while the last drew a large company and passed off with much spirit, and at an advance of 1 c. per lb. for greens, while the blacks were heavy, and a considerable number of lots were withdrawn.

RAW SILK.—Sales of 40 cases Canton at 4 dols. 50c., to 4 dols. 75c., and some Japan silk, of fine quality, on private terms. Prices firmer. The late arrivals of China Silk are held out of the Market. Tin: Pig remains very quiet, and is not favourably affected by the decline in the European markets; we have but to notice sales of 500 slabs Straits on private terms; and 100 do. Banca, 31½c. cash. Plates are steady; 200 boxes I. C. coke, and 500 do. 3d. wasters sold on private terms; and 400 do., second quality, 7 dols. 25c. 6 mos. India Rubber is without change. The sales are small, but at full rates. There have been no arrivals since our last. Spices: Sales have been made of 4,000 mats Cassia, for export, and 50 bags African ginger on private terms; 61 cases No. 1 nutmeg, part 45c.; 5,000 lb. rice ginger, 0½; 700 mats Cassia, 18; 250 bags pepper, 8½ to 8½ 6 mos., and 60 do. Pimento, 6½ cash.

The money-market continues easy and the supply good, at 5 to 6 on call and for short loans with satisfactory securities.

No one regards the tariff introduced into the Lower House of Congress with any interest. It proposes the substitution of specific duties for *ad valorem*, with a heavy increase in the amount on iron and other articles. It stands no chance of passing. Should it succeed in the House of Representatives it will certainly fail in the Senate. It has been brought forward by the Republicans for political effect.

The last clearance from this port for Hong Kong was the *Scord Fish*. She had 750 packages of American cotton, piece goods, &c., included in her cargo.

I shall supply you with further details of the exports to the East in my next, mails closing earlier than expected to-day.

The following shows the arrivals and departures of vessels from and to the East, at the ports of the United States, for the past two weeks:—

ARRIVALS.—Benares, Hinckley, at New Orleans, April 10, from Calcutta. Skylark, Bursley, at New York, April 12, from Shanghai. Ebbi Brahe, Owen, at Mobile, April 6, from Aden. Guiding Star, Hall, at Boston, April 18, from Calcutta; Maury, Paul, at New York, April 23, from Amoy; Persian, Savage, at Mobile, April 17, from Aden.

DEPARTURES AND CLEARANCES.—Inez, Page, from Boston, April 11, for Madras and Calcutta; Isaac Walton, Smalley, from New York, April 13, for Sydney, N.S.W.; Wild Gazelle, Crowell, from New York, April 13, for Melbourne; Pochahontas, Wooderson, from Boston, April 12, for Ceylon and Calcutta; Warren Hallett, Hallett, from Boston, April 12, for Zanzibar and Muscat; Cossack, Gray, from Boston, April 17, for Hong Kong; Windward, Hamlin, from New York, April 19, for Melbourne; Zingara, Newbegin, from New York, April 19, for Cape Town and Calcutta; Swordfish, Crandall, from New York, April 21, for Hong Kong; Western Star, Knowlton, from Boston, April 20, for Calcutta; Versailles, Sherburne, from Boston, April 21, for British East Indies.

FRANCE IN THE CHINA SEAS.

In our Paris correspondence will be found a reference to the occupation of Saigon by the French. It seems evidently the intention of the Emperor to establish a settlement in the China seas if practicable, and the only question that arises upon that circumstance, is as to his sincerity towards ourselves. If he be as true in his professions of friendship as he has declared, the vicinity of his forces may be of advantage to us, having in view the advances made by the Russians, and the necessary distrust engendered by the conduct of the natives in past times. Shall we then fix our faith upon the Bonaparte, or shall we suspect him also? Such is the question that forces itself upon us. Why is it that a great man—a great man as Louis Napoleon undoubtedly is—should continually expose himself to the charge of creating misgivings on the part of those who are disposed, if they can, to regard all his actions with friendly-indulgence and candid admiration?

Parliamentary Intelligence.

HOUSE OF LORDS.

STATE OF THE NAVY.—(May 1.) Lord LYNDHURST called attention to the state of the naval reserve, and asked the Government for some account of its present condition and probable future progress. He alluded to the generally entertained opinion that since the last great war the English navy had been neglected until the beginning of 1859, while the French had been continually strengthened and improved until it acquired a dangerous superiority, and he expressed his opinion that even at the present time the strength of the English navy exceeded that of France only in a very slight degree. He urged the necessity of maintaining a Channel fleet sufficiently strong to maintain our supremacy, as the only means of preserving our commerce and keeping our ports free from blockade. He dwelt upon the difficulty of manning the fleet in case of any sudden emergency, and inquired how far the recommendations of the commissioners had been carried out, with the view of providing a permanent supply of men equal to any demand that might arise.—The Duke of SOMERSET defended the Government from any charge of inattention to the naval requirements of the country, asserting that during the last eight months more men had been employed in the dockyards than for years past, and contrasting the strength of the English navy with that of France. In conclusion, he gave explanations upon the subject of the naval reserve similar to those given by Lord C. Paget in the other House.—After a brief discussion, the subject was allowed to drop.

THE STATE OF INDIA.—(May 7.) The Marquis of CLANRICARDE said that before coming to the House that evening he had received a note from his right hon. friend the Secretary of State for India, informing him that about half the papers relating to the state of affairs between the indigenous planters and the ryots of Bengal had just reached the India Office, and that he was promised that the remaining portion would arrive by the incoming Calcutta mail. His right hon. friend, therefore, suggested that he should postpone the discussion till those papers arrived, and her Majesty's Government were in possession of their contents, and could speak fully on the subject. The petition which he had to present referred to other subjects besides that. At the same time, as that was the pressing subject of the moment, and as he thought it would weary their lordships to enter into what was called an Indian debate, while they were precluded from approaching one of the most important points, he should postpone the entire matter till the 15th inst.—The Earl of ELLENBOROUGH thought it impossible for the noble marquis to have adopted any other course. At the same time he must express his extreme regret that it was necessary for him to adopt that course. The state of things in India were of the gravest character. There was an agricultural insurrection and a coercion act, and the Government of Madras was in direct open variance with the Supreme Government of India. Under those circumstances it certainly was much to be regretted that it should be necessary for the next mail to leave this country without carrying with it any expression of opinion on the part of either House. (Hear, hear.)

HOUSE OF COMMONS.

OUR COMMERCIAL RELATIONS WITH JAPAN.—(May 4.) Mr. B. COCHRANE rose to ask the Secretary of State for Foreign Affairs what steps had been taken by her Majesty's Government to protect our commercial interests in Japan. He said that in putting his question he should take the liberty of making a few observations. He knew that questions such as his failed very frequently to excite any interest in the House; but the circumstances of this case were

very important, and that must be his apology for the course which he was about to adopt. Hon. gentlemen who had not perused the papers relating to Japan might not be aware that there was at present a great risk of a massacre of the whole of the European inhabitants. But as this appeared to be the case, it was right that the House should know what means the Government intended to adopt in order to protect the interests of those persons who, in consequence of the policy of the Government, had been induced to make Japan their place of residence. In 1854 Admiral Stirling, a distinguished officer in the British service, entered into a convention with the Government of Japan with regard to certain harbours in that country, and obtained by virtue of that convention the privilege of access to the country by our merchants. Very little result was produced by that convention; but it was a striking circumstance, because it was the first instance in which the Emperor of Japan had abandoned the restrictive policy of the empire since the great massacre of Christians which took place there two centuries ago, which massacre was followed by laws so stringent that no Japanese, on pain of death, could leave the country, or, having left it, could return to it. Admiral Stirling having entered into that convention, Lord Elgin, in 1858, during the progress of the negotiations which were carried on in China, went to Japan for the purpose of making another commercial treaty with that country, and at the same time to present to the Emperor, or the Tycoon of Japan, a yacht, the gift of her Majesty to the Emperor. Hon. members who had taken the trouble to read the despatches on the table must have been struck with the interesting account given of this visit by Lord Elgin. Many hon. members must also have perused the able and admirable works of Mr. Oliphant and Captain Sherard Osborn on the same subject. With all the admiration that he felt for Lord Elgin, he must say that his lordship appeared to have fallen into the same error in Japan as we had fallen into with regard to our relations in China, and which had led to all those calamities, involving the loss of he did not know what amount of blood and treasure. We had treated the Japanese in the same manner as the Chinese—at one moment as barbarians, in the next demanding from them all that conduct which pertained to the highest civilisation. And while we demanded of them the strictest execution of the treaties entered into with them, we were the first to violate those treaties. For instance, Lord Elgin, in opposition to the convention of Admiral Stirling in 1854, and in opposition to all the remonstrances that were made by the authorities of Japan, drove through the harbour of Yeddo, into the inner harbour, in defiance of all treaty obligations. On the former occasion, and in another place, Lord Elgin had blamed him for having used harsh language towards him. He assured the noble lord, and he trusted that the assurance would reach him in due time, that he felt the greatest admiration for him. He thought the noble lord exhibited the greatest self-denial and patriotism in again going out to China as ambassador. It could have been nothing less than real love of his country which had been his actuating motive. Still, he differed from some of the views which Lord Elgin had carried into effect, and which had been well described by the right hon. baron below him (Sir Bulwer Lytton) as the pre-determined system which we had pursued in the East. The noble lord having arrived at Yeddo, bore testimony, and most touching testimony, to the gentle, generous, amiable, and kindly qualities of the Japanese. Here was a country, more densely populated than any country in Europe, in which, owing to the admirable system of legislation there pursued, there were actually no poor. There were cities of enormous population, as Lord Elgin testified, the populations crowding the streets to see the foreigners in their capital for the first time, and yet kept back only by a packthread stretched from end to end of the streets. Mr. Oliphant said that during the whole period they were in Japan nothing occurred to mar the pleasure and the happiness they derived from their visit to the Japanese. Now, then, such having been the case, it became a question what it was that had given rise to the sudden change in the relations between the two countries. A gentleman of very excellent ability, and of very great influence in the East. Mr. Alcock, was appointed to the post of consul-general at Yeddo, and other gentlemen, also of great ability, were made vice consuls. Mr. Alcock was subsequently named minister plenipotentiary. But as he (Mr. Cochrane) said before, unhappily we fell into the same error as we had done in China. There were two demands made on the Japanese. One was, that we were to have a minister resident in Yeddo; the other, that all the vice consuls were to be so situated as to be placed in immediate and convenient relations with the Government of Japan. The whole feelings of the people in eastern countries were opposed to such close intercourse. The noble lord in one of his despatches suggested that another port should be substituted for that on which Mr. Alcock had insisted. From the moment we insisted on those demands, from that moment a bitter feeling arose in the minds of the people of Japan, and this had been shown in a manner that would interest the Chancellor of the Exchequer, for it showed very great and wonderful ingenuity in dealing with questions of finance, so as to place us in a position of very great difficulty and embarrassment. One article of the treaty stipulated that the Mexican dollar should be taken by the Japanese in exchange for Japanese silver at an equal weight. At that time the Mexican dollar was equal to three Japanese coins. The Japanese, therefore, called in all their silver, and recoined it in such a state that it was equal in weight to the Mexican dollar, and the result was, that the English lost two-thirds of exchange in the value of money. There was a prohibition on the export of gold from Japan; and the Europeans could not buy the produce of the country except with Japanese money, but they could buy the gold at 100 per cent. premium. The Japanese met that by declaring that they would issue no more silver, and the people even burnt down the Emperor's palace, in order that they might be able to say that under the melancholy circumstances the public offices would not be opened. And so the public offices were closed. The hon. gentleman proceeded to call the attention of the House to what had been the conduct of our merchants there. They wished to get possession of the gold coinage, in order to smuggle it out of the country. He should explain that the Government had announced that they would only issue silver in proportion to the demands that were made on them for it. The result was that the European houses began to make absurd demands. Thus one house, Tella by name, asked for 250,000,000 dollars' worth of Japanese silver; the house of William Jones asked for silver to the amount of 1,000,000,000 dols. And so in many other cases. This went on so quietly, that the demands became still more absurd; and he held in his hand a list of the houses of "Doodle-do," "Nonsense," "Is it Not?" "Snooks," and others, which had sent claims for silver to large amounts, making a total of upwards of 355,000,000,000 dols.

The first question which has been addressed to me has reference to our relations with the empire of Japan. Since the papers upon that subject have been laid before the House other despatches have been received, which are certainly of considerable interest and importance. Great difficulties have unavoidably arisen in the establishment of an intercourse between British subjects and the inhabitants of a country with which we have hitherto been prevented from entering into any communication whatever. One of those difficulties was caused by the state of the currency in Japan, because while the proportion in the value of gold to silver in this country has been as 1 to 15, it has been in Japan as only 1 to 5; and it was therefore a very profitable transaction for British merchants to obtain a quantity of silver, and with that silver to purchase gold in Japan and then export it from that country. But that operation had naturally excited a good deal of apprehension and dislike on the part of the Japanese Government. I am happy, however, to be able to say that they have taken the sensible course in this matter, and have made the relation between the value of gold and silver the same as that which prevails in other nations. Several other differences have arisen between the Japanese and the Englishmen who have lately, for the first time, been admitted into that country, and more than one of those occurrences, I am sorry to say, was of a very sanguinary nature. For instance, there was a case of a servant of the British mission, who was a native of Japan, and had spent many years in the United States of America, so that he was a master of the Japanese and the English languages. He had by his conduct excited the animosity of the Japanese, and when he was assailed by a number of them he had got one of the offenders placed in the hands of the police. The result was that he further provoked their resentment, and one day, as he was standing close to the doors of the mission-house, three persons attacked him unawares, and stabbed him mortally. Mr. Alcock afterwards insisted that the assassins should be prosecuted, and that the murdered man should receive a public funeral. In the last accounts which the Government had received from Mr. Alcock he had expressed a stronger hope than he had previously done that great as were the difficulties with which he had still to contend he should be able to overcome them, and that a considerable trade might be established between this country and Japan. But that trade must consist almost entirely in the export of Japanese products, which we must purchase with silver, for there had hitherto been hardly any demand at all in that country for British manufactured goods. Our ships of war visit the neighbourhood of Yedo from time to time, but they cannot go nearer than within four or five miles of that city, and are therefore unable to be on the spot to prevent any sudden act of violence. I agree with the hon. gentleman that we should take every possible care that British merchants and their agents commit no offence against the natives; and unless we do so we cannot maintain our relations with them upon a satisfactory footing.

THE DISTURBANCES AT NAPLES.—(April 26.) In reply to Mr. SHERIDAN, Lord J. RUSSELL said he had received no complaints from British subjects in the kingdom of Naples, and in the immediate vicinity of the disturbances in Sicily, of inefficient protection on the part of the English representative, or of the English men-of-war on the station. The noble lord also said he had received no information of Austrian troops having been employed in suppressing the insurrection, and that he did not think such an event at all probable.

REPORTED DESTRUCTION OF ENGLISH VESSELS IN CHINA.—(April 27.) In answer to a question from Mr. DALGLISH, Lord C. PAGET said he did not believe that there was any truth in the telegram announcing the destruction of the *Sampson* and some other vessels by the Chinese batteries at the mouth of the Peiho. According to despatches recently received from Admiral Hope, those vessels were at some other place.

THE OUTRAGE BY ENGLISHMEN IN THE MOSQUE AT CAIRO.—(April 27.) Sir C. WOOD said, in answer to Mr. MILDWAY, that he had received an account of an outrage by Englishmen in the mosque at Cairo, of a most gross character, and no one could more regret it than himself. It was reported to him by the English Consul, and what had been stated by his hon. friend as to that occurrence was, on the whole, correct. These persons were not satisfied with being admitted into the body of the mosque, but intruded themselves into the viceroy's private apartments, where there were several ladies, and there mimicked their ceremonies and genuflections. Seeing that, the Viceroy sent to them and requested them to leave the place, but on their refusing to do so he sent a body of janissaries to remove them from the Mosque; and, what was more difficult, to protect them from the fury of the mob. The officers of the ship by which these persons arrived apologised the next day, but the passengers went on by the railway; but he believed they were not officers of the Indian army. As his hon. friend had brought this matter under his (Sir C. Wood's) notice, and as the mail was going out to India yesterday, he had taken the opportunity of writing to the Governors of Madras and Calcutta to call on the officers of the packet to report to the respective Governments all the circumstances, and the names of those persons, if they belong to the Indian service, or in any way connected with it, so that they might be called to account for their conduct. A similar notice would also be sent out by the next mail to Bombay.

SLAVE TRADE IN COOLIES.—(April 27.) Lord J. RUSSELL (in reply to Mr. Buxton) said the most stringent measures had been taken, both by the Imperial authorities and the allied commissioners at Canton, to put a stop to the slave trade in coolies between China and Cuba, and that it had been decided by the Spanish Government, that after the 1st July 1861, no Asiatic labourers should be introduced into Cuba.

ANNEXATION OF SAVOY.—(April 30.) In reply to the Marquis of CLANRICARNE, Lord WODHOUSE said a conference of the great Powers upon the annexation of the neutralised portions of Savoy had been proposed, but the time when, and the place where it was to meet, were not yet settled.

THE CHINESE EXPEDITION.—(May 4.) Mr. H. BAILLIE wished to be informed by her Majesty's Government whether it was true that a telegraphic despatch had been sent out to stop the Chinese expedition until the arrival of Lord Elgin, because if that was the case, the expedition would not be able to commence operations before July, the very worst season at which they could be commenced. (Hear, hear.) Lord JOHN RUSSELL: I have been further asked whether an order has been sent out by the Government for the purpose of preventing the military and naval expedition despatched to China from undertaking any operations; and I have to state that there is no truth in any such report. On the contrary, Lord Elgin was very desirous that if there were to be military and naval operations, they should

be begun before his arrival in China, so that the responsibility of ordering them should not be imposed upon him. I take it for granted that if there are to be such operations, they must commence long before he can reach China.

TROOPS FOR CHINA.—(May 7.)—Sir S. NORTHGOTE asked the Secretary of State for War whether any additional number of troops had been sent to or placed under orders for China beyond the number stated in this House by the Secretary of State for India on the 24th of February last; what was the amount of the addition, if any; and whether it had been made by the despatch of troops from India or from this country; also, what arrangements had been made for the wives and families of the troops despatched from India to China; and whether, in consequence of any addition that might have been made to the number of troops, it would be necessary for the Government to apply to Parliament in the present session for an additional vote of credit on account of the Chinese expedition.—Mr. S. HERBERT, in answer to the question of the hon. baronet, would first state what was the amount of force stated by his right hon. friend the Secretary of State, on the 24th of February last, as about to be despatched from India to China. There were five regiments of European infantry, and probably two additional regiments, the first numbering 5,500, the second 1,984—a total of 7,484 men. He said there were also five regiments of native infantry, consisting of 4,000 men, one regiment of native cavalry, consisting of 400 men, and two companies of Madras Sappers, of 200 men—making together 4,684 men. So that the total of the British forces, 7,484 men, and of the native forces, 4,600, made a total of 12,084. But his right hon. friend did not mention, owing to the form in which the question was put to him, what he (Mr. S. Herbert) would mention now, that there were likewise going to India four battalions of Royal Artillery, consisting of 814 men, one company of Royal Engineers, of 122 men; and two squadrons of Dragoon Guards, consisting of 328 men, making together 1,266, which, added to the 12,084, gave a gross total of 13,350 men. One regiment, however, of the native forces, as they had heard by the last mail, had been stopped; and it was possible that other regiments also might be stopped. Only the day before yesterday the Government heard that one regiment had been detained in consequence of counter orders. He would add now the numbers of the troops despatched from England. It consisted of a battalion of military train of 289 men; two battalions of Royal Artillery (Armstrong guns), 444 men; 2nd Foot, from the Cape, 845 men—together 1,578. That added to the previous number gave a total of 14,928 men. From that there must be deducted for over estimate of the forces about 1,000. Of course, if any other regiment had been stopped that would have to be deducted also. The whole available force was, therefore, about 14,000 men, irrespective, of course, of the garrison at Hong Kong. Then, with respect to the wives and children of men belonging to those regiments which had been sent from India to China, the moment the Government here heard that the Indian Government intended to despatch them home to England, they telegraphed a desire that they should be kept in India till further orders. With respect to any additional forces to China it was impossible to say what would be the course of events; but if it should be such as to lead to a recommencement of hostilities or protracted operations, then, certainly in that case, due notice would be given to the House before making a motion for such additional vote of credit as might become necessary.

DISTURBANCES IN NEW ZEALAND.—(May 8.) Lord A. CHURCHILL asked the Under Secretary of State for the Colonies whether any authentic intelligence had been received with respect to the disturbances in New Zealand.—Mr. FORTESCUE said that no disturbances had taken place. The fact was, that certain persons had purchased some land from a native chief, who was willing and desirous to sell it to them; and, on proceeding to survey the land, the surveyors had been interrupted by another chief, who had no claim to the land whatever. The Governor, therefore, at once proceeded to Plymouth, with a strong detachment of troops; and, by a letter received from him that day, it appeared that he was meeting the difficulty with great prudence, and there was every reason to hope, that the disturbances would not spread any further.

MARINES AND SAILORS ON THE CHINA STATIONS.—Sir DE LACY EVANS asked the Secretary to the Admiralty the number of marines and sailors now on the China stations.—Lord C. PAGET said he would be happy to give the gallant officer the numbers in private.]

CHINESE GARRISONS.—Sir DE LACY EVANS inquired what was the strength of our garrisons at Hong Kong and China.—Mr. S. HERBERT replied that the garrisons of Hong Kong and Canton comprised three batteries of artillery consisting of 292 men, three companies of Royal Engineers containing 268 men, and a battalion of European troops 735 strong. There were also three battalions of native troops containing 1,639 men, who were to be relieved by an equivalent force; and orders had been given that the English soldiers who were sick should be sent home, unless urgent affairs required that they should be retained there some time longer.

Spirit of the Press.

JAPAN.

It is almost hopeless to expect that the exertions of Mr. Alcock will be successful, in the face of Lord J. Russell's announcement that a naval force is to be sent to Japan to protect those whom he has rebuked. Documents published six years ago, relating to Japan, and to affairs which were touched upon, but apparently with an imperfect understanding of them, by Mr. Baillie Cochrane, read now like the beginning of a preconceived chain of events which have not yet reached their termination, and which associate themselves in the mind with the policy pursued for some years past towards China. The negotiation of a treaty of commerce with Japan by Admiral Stirling without authority, the thanks given to him by Lord Clarendon for this act of insubordination, the pretence of Lord Clarendon to ratify the treaty himself without reference to the Queen, and the contemporaneous articles in the leading journal lamenting the impossibility of civilizing Japan without

sanguinary preliminaries, all point to an impending catastrophe. Paraphrase Lord John Russell's words, "when ships can be spared," into "when we have coerced China into a treaty more in our favour than the last, and into paying the cost of the coercion," and we have the date of the commencement of this new illustration of our justice in dealing with States other than the Great Powers of Europe.—*Liverpool Albion*.

THE JAPANESE EMBASSY TO THE UNITED STATES.

When the first Embassy departed from these shores to the unknown city of Peking the expedition created almost as much sensation as would have been occasioned by a voyage to the moon. We are now despatching an ambassador to the same country under very different conditions; but it happens that at this moment an embassy is on its way, probably to London, which is at least as extraordinary as the first British mission to China. Never from the earliest periods of history has a diplomatic mission been sent out from the Empire of Japan until the present day; but now nearly a hundred Japanese have started on what is likely to be a tour of the world, and perhaps before the London season is over we may see genuine specimens of this wonderful people in the Crystal Palace or on the banks of the Serpentine. The prospect is due to the Americans, who have got the first visit for themselves, and who, as even their official publications show, are not a little pleased at their success. When the treaty of amity between the Americans and the Japanese had been followed by a commercial treaty, it was agreed that the ratifications of the latter instrument should be exchanged in the city of Washington, an understanding which necessarily involved the appearance of a Japanese Envoy at the American capital. Shortly afterwards the Government of Japan applied to Mr. Harris, the American Consul-General at Simda, for a vessel of war in which the proposed Embassy might make the voyage, seeing that the Emperor had no ship fit to cross the Pacific, while the ordinary passenger steamers would not afford agreeable means of conveyance. This request was promptly communicated by Mr. Harris to the American Secretary of State at Washington, and favourably received; in fact, the Embassy would have started a twelvemonth sooner but for a remarkable impediment. We have explained on a former occasion the circumstances which induced the Japanese to emerge from their political seclusion, and accept terms of commercial intercourse with the United States. The result was the effect of terror only, not of enlightenment, and as such, therefore, as the American squadron had disappeared from the bay of Jeddo the traditional principles of Japanese policy resumed their sway. However, as the treaty was signed, there was no help for it; but the obstructive party in the Imperial Council, composed of the hereditary princes of the country, hit upon an ingenious device for nullifying the convention, and especially that clause of it which provided for the Embassy to Washington. By the ancient laws of Japan death was the penalty awaiting any Japanese who left his native shores, and this statute the princes obstinately refused to repeal. "They look," writes Mr. Harris of these aristocratic malcontents, "on the treaties recently made as unavoidable evils, and accept them as such, but, in their Conservative spirit, they wish to preserve as much as possible of their ancient institutions." The Japanese Liberals were naturally indisposed to leave their "Conservative" opponents with so very strong a hold over them, and, consequently, application was made to Mr. Harris for a year's delay in the matter of the ratifications, so that the unpleasant liability attaching to the voyage might be removed. This proposition also the Americans graciously received, being apparently solicitous about one point only—viz., that the honour of a first visit from the Japanese should be theirs, and theirs alone. Especially were they jealous of our own interference in the business, and proportionately elated when it seemed clear that we must be left to play the second fiddle. "Our countrymen," writes the commander of the American flagship to Mr. Harris, "were quite gratified at your having anticipated John Bull in the treaty, and the latter is sadly mortified, as is shown in a publication in a Shanghai paper, made, it is said, by one of Lord Elgin's attaches." Resolved to secure so favourable a position, the Consul-General, in according the postponement desired by the Japanese, stipulated by a formal article in the new convention that "no Embassy should leave Japan for any foreign nation before the mission bearing the Japanese ratification should have arrived at Washington." This patriotic anxiety, however, will not be very substantially rewarded, if, as appears probable, the Japanese, when once on their travels, should determine on making a clean sweep of the matter, and going over half the world. Mr. Harris himself remarks that there is no need to provide for the return voyage of the Embassy, since "the ambassador will doubtless proceed from the United States to England, Holland, and Russia, and probably to France also. I am inclined to think that he will prefer returning *via* Egypt and China, in place of the Pacific route." The Americans, therefore, could hardly come otherwise than first on the Japanese visiting list, even had the affair been left to choice, but in the incidental arrangements the Consul-General displayed considerable sagacity. Two things struck Mr. Harris as particularly desirable in providing for a first impression of a favourable kind on the minds of the strangers. He wished that they should be received "at a place less excitable and tumultuous than any of our large sea ports," and that they should get their first sight of America, not during the stormy and inclement season of winter, but in "the beautiful month of June." The former of these conditions he seemed to be easily securing by timing their departure from Japan; the second he endeavoured to insure by suggesting that they "should be conveyed from Aspinwall directly to the Potomac, without touching at any other port in the United States." We fear, however, that this manoeuvre has miscarried, for our American intelligence apprises the world that the United States' ship *Powhatan*, with the Japanese Embassy on board, had duly arrived at the chief port of California, so that the first impressions of the illustrious travellers would be derived from San Francisco at the end of March instead of from Washington in the middle of June. Nevertheless, it is said that the envoys and their suite are exceedingly delighted with Californian entertainments, and these displays may gain perhaps in novelty and zest what they may lack in serenity and decorum. The United States' Government, we are told, will bear all the costs and charges of the Embassy, perhaps in conformity with the usages of the Japanese themselves in this respect. The Consul-General informs Mr. Cass that, though he was desirous of putting the Emperor to no expense in his visits to Jeddo, he could not completely succeed in avoiding obligations. The Japanese always insisted on paying his coolies and maintaining his servants and escort; and what they do for others

they may expect to be done for them. We are assured, indeed, by Mr. Harris, that Lord Elgin, in his abortive efforts to procure an Embassy to London, promised to furnish at least conveyances for the ambassadors, and we believe the Californians have voted some thousands of pounds for the charges of gratifying their visitors. Whether the Embassy will be welcomed in every part of the world with the same enthusiasm is another question, but we may assure our American friends that we are not in the least degree jealous of their priority in these arrangements. If their squadron first scared the Japanese into sociability, they had a claim to the first treaty, and their geographical position was a pretty good guarantee for the honour of a first visit. It was no more than natural, indeed, that the first efforts of the Japanese in the way of commerce should be directed to the shores of China or California, instead of being addressed to the more distant regions of Europe. We care little in what way the current flows so long as it flows freely. It is already clear that Japan may become an exporting country of great importance, and it seems now ascertained that, though the shipments to Europe have not been numerous since the opening of the trade, the business transacted with China has been on a very extensive scale. We are quite satisfied with this beginning. The early navigators hugged the shore before they ventured out upon the deep, and the Japanese merchants may feel their way to profit in contiguous ports before they stretch across the great oceans of the world. The Embassy, however, ought to do something in smoothing the road to its course. If a hundred selected Japanese are to travel freely over Europe, Asia, and America, they can hardly fail of getting their ideas expanded, and communicating their impressions to their countrymen at home.—*Times*.

THE NAVY.

If nations settled their wars as schoolboys sometimes gamble for marbles—each of the young disputants emptying his pockets, and he who shows most taking all—this would be all very well. If England and France could tow out their fleets into mid-channel, count their pennants, and decide the victory by arithmetic, this might answer. But we submit that the only use of a ship of war is to fight, and she cannot fight without men. We should have been much better pleased if the Duke of Somerset had carried his comparison into this part of the question, had told us how many seamen the Emperor of the French can assemble within a fortnight, and had shown us that he could assemble double the number at Portsmouth in the same space of time. If the Secretary for War had been asked how many effective soldiers he had for a sudden emergency, and had answered that he could not tell much about the men, but that he had half a million of soldiers' coats in store, either House of Parliament would have resented the impertinence; but, when Lord Lyndhurst seeks to know what our naval capacities for an emergency are, he is told that there are so many empty ships afloat, and he is expected to feel secure. Ships that cannot be manned are only a prodigal waste of public money. How odd it is that we should be obliged to say and re-say, and repeat and reiterate, this plain truism! It is stout hearts and strong arms, and not hollow wooden shells, which decide battles. We ask for seamen, and we are told of the numbers of dockyard artificers employed; we look about for crews, and we read accounts of extensive dissatisfaction, and hear hints about the prerogative of impressment. If a naval man begins to talk about impressment we had better dismiss him, for he evidently does not know his business. If an enemy were in the Channel we will not say what might be done, but no less emergency will ever turn loose a pressgang upon English ground again. Impressment, or an organised naval conscription, which is the same thing in a still more formidable shape, seems to suit the temper of the French, but it will never be tolerated in England, so long as England can defend herself. Our ships must be manned by volunteers, by men fairly hired. The only plan to effect this is to make the Queen's service popular, and to bind our whole maritime population to our navy by the strong bonds of individual interest. At present it would appear that we are lamentably deficient in both these requisites. The great scheme for making all our commercial seamen effective men-of-war men has up to this time given us 1,000 naval volunteers. We were promised 70,000. Having no reserve at present, we might, perhaps, have had some reasonable hope in the popularity of our service; but, by an ingenuity unexampled in its perversity, our Admiralty have managed to make the Queen's service eminently unpopular with the whole race of men who pass their lives upon the water. Let any landsman who has once been to sea recollect for a moment what his own sensations were when he first caught sight of shore, and how eager he was to tumble into the first boat that came alongside; bating, perhaps, the difference of a few sea-sickness sensations, every sailor's desire to get upon *terra firma* was quite as intense and as impatient as was that of the most exhausted landsman on board. Jack's only incentive to go upon a long cruise, and submit himself for many months to the discipline of a man-of-war, is that he may come back and enjoy himself. It is impossible to conceive anything more tantalizing than the condition of a crew with their anchor down at Spithead, full in the sight of their coarse terrestrial paradise, with all the strange knickknacks about them, which they have gathered in labour and in danger, in the single hope of flaunting with them on their return, and then suddenly denied the customary privilege of going on shore on leave. This, however, is now constantly occurring. No one can wonder that men thus imprisoned by caprice, or even perhaps by some better motive, operating in the mind either of their captain or their admiral, should become insubordinate, or even reckless or mutinous. No one can feel surprised that sailors should hesitate to take service which they expect to terminate in so vexatious a manner. There is, however, unfortunately, a matter lying at the bottom of this grievance which will not bear public discussion in the columns of a general newspaper; but it is of so great and so vital an importance that those who are responsible for the health of our men, as well as for the effectiveness of our navy, ought to consider it an imperative duty to grapple with that subject, and to deal with it practically. We may not further open such a question in these columns, but it is essential to the popularity of the service that a sailor's right to his run ashore should be as well defined as his right to his pay and allowances; and something ought to be done to provide that the enjoyment of that right should be as little hurtful as possible to himself and to the public service.—*Times*.

The London & China Telegraph.

LONDON, SATURDAY, MAY 12, 1860.

BRITISH PEGUE—OVERLAND ROUTE TO WESTERN CHINA—FROM RANGOON TO ESMOK.

We have briefly noticed this very important national project as well worthy of the serious consideration of practical men. Since then we have had an opportunity of perusing some of the pamphlets which the projectors (Captain Sprye and his son) have put into private circulation on the subject, and which embody parts of a series of letters which they have written on the project during the last three years to the respective Secretaries of State for Foreign Affairs, to the Indian Council, to the Lords of the Treasury, the Chancellors of the Exchequer, and the Presidents of the Board of Trade. We have also examined the several maps, MS. and printed, which the projectors have constructed to show the geographical part of the project, and perused several of the able leading articles of the London and Provincial press. The writers of these articles, though considering the project in different points of view, singularly agree in commending it as well meriting the support of the manufacturing and trading bodies of the United Kingdom and India, and as calling for the immediate adoption and patronage of the Government as an exceptional case, involving, both as regards telegraphic communication and commerce with China, the most grave imperial interests.

To describe the project more clearly, we will first allude to the telegraph portion of the scheme. Our readers are aware that excepting the break in the Mediterranean, which has been so long a discredit to our Government, the telegraph now exists continuously from London to Tongho, our northern station in eastern Pegue. Midway between Rangoon and Tongho the wires pass through the town of Shoe-Gyen, which is one of our smaller civil and military stations in eastern Pegue. From Shoe-Gyen the projectors (who have every particular of the erection of the telegraph throughout Pegue) propose to carry the wires across the southern spurs of the Karen hills, from the valley of the Sittang river to or beyond the bank of that larger but equally unnavigable stream the Salween, at the north eastern extremity of our frontier. From that point they propose, under arrangements they are prepared to establish with the King of Burmah—who has been long desirous to have the telegraph introduced into his country, and is at present negotiating with a London firm for its extension to Amarapoora from our western Pegue frontier station of Meeaday,—to carry the wires across his Majesty's two south-eastern Shan provinces of Kiang-Tung, and Kiang-Hung, two hundred and fifty miles, to the Chinese frontier city of Esmok, at the south-west extremity of the Yunnan province of China proper. Captain Sprye has, we believe, full information of those two Shan States, their ruling princes, and courts. Though tributary to the King of Burmah, and not allowed to have the white umbrella carried over them, they are independent rulers of their own respective territories, and exhibit the white umbrella on each side of their thrones in their halls of audience. The princes, nobles, and people of both States are known to the projectors to be most favourably disposed towards our country, and anxious to establish a direct commerce from Rangoon with Esmok, across their States. From Esmok the projectors have urged our Foreign Secretary, and we hope not in vain, to provide in our present negotiations with China for continuing the wires along the imperial high road, through the valley of the Pearl river, to Canton; and thence to Hong Kong and the Consular ports of China.

The whole of this seems to us to be not only, as the projectors affirm it to be, capable of easy and rapid realization, but most worthy of the prompt and effective attention of our Ministers, and the support of our manufacturers and merchants, more especially those connected with China. Further, the realisation of the project appears to us to be called for, in

order to support our prestige against Russian and American influence with that country; apart from which the geography of the globe indicates this route to be pre-eminently advantageous in point of distance.

As respects "Commerce with western and inland China," the project is limited, at present, to a cheap single line rail or tramway, to be also laid from Rangoon across eastern Pegue to our extreme north-eastern frontier towards Esmok—in all about 250 miles. The line to run, as a survey of the country may show to be most desirable in regard to facility and economy of construction, from Rangoon to the ancient city of Pegue, which is sixty-two miles: thence, by the right of the river Sittang to Shoe-Gyen: thence up the left side of the Shoe-Gyen river (a tributary of the Sittang) across the watershed, between it and the upper Young-Zaleen river; crossing which river at the best point for the most easy line from it across the intervening country to the Salween, up to our frontier by the right or left bank of that river, as the Siamese Shan Chief of Zimmai may or may not be permitted by us in negotiation with his Suzerain the King of Siam, to retain his usurpation of the western slopes of the Tanen-Taung-Ghee mountains down to the left bank of the Salween river; which tract was heretofore indubitably Burman territory, and by the annexation of Pegue and Martaban became as unquestionably British. The terminus of this eastern Pegue line would thus, in either case, be on British ground, at the eastern base of the Karen Hill ranges, the valleys and plateaus of which have been reported by the British Commissioner of Tongho, who has several times traversed them, to be beautiful in scenery and climate, rich in products of every description, and inhabited by an industrious, peaceful people, disposed to friendly intercourse with us. It is there that the projectors propose that a frontier Commercial Emporium should also be formed, not only to take the rich products of that part of Burmah and of the surrounding Shan States, but also as being within the distance the Chinese caravans from Esmok can reach, which now traverse that country to the utmost limit their cattle will permit, exchanging Chinese produce and manufactures for those of Burmah, the Shan and Karen States. Perhaps, as the *Bristol Mercury* has recently observed hereon, if the project involved a war, the sacrifice therein of thousands of our countrymen, and the wasteful outlay of millions of the national treasure, Ministers might deem it not unworthy of their attention, and would be prompt to enter into it, hand over head, caring for nothing but the fighting "prestige" of our country, the continuous extension of our military rule in the East, and the increase of patronage such wars, spoliations, and annexations always bring to them for their family and political dependants. But surely the occurrences there during recent years—our never-ending wars with Afghanistan, Sindh, Persia, Burmah, China, &c.; the rebellion of the very army on which we heretofore mainly depended for the sustentation of our rule, and *must again* depend for it when involved in a European war; and the financial embarrassments such a course of profligate war expenditure has entailed upon British India,—should teach, if not our statesmen, our representatives in Parliament, the expediency of now trying the effect of the opposite system—that of peace and friendliness with the yet independent States of Asia, and of the promotion of active commerce with them through channels capable of being opened up *peacefully*, if our Ministers choose.

JAPAN.

Mr. Alcock's well-known penchant for writing despatches, although a source of discomfort, doubtless, to heads of departments, affords journalists so much aid, that it ill becomes us to wish that he were more laconic, particularly as he is "monarch of all he surveys," in a land from which the world requires information. A Blue-book of over one hundred pages, bringing us through a period of six months, will do to commence with. It is only just to Mr. Alcock to say that he does more than indite garrulous despatches. He is an intelligent vigilant officer, than whom no man living is better fitted for the post than he occupies. It is well for the country that the inauguration of a new order of things in Japan should have been entrusted to one who earned the distinction of being the best of our consuls in China. In conferring on him the title of Envoy Extraordinary and Minister Plenipotentiary, the Government not only acted in a politic manner, enabling him to meet the princes of Japan on the same footing, and therefore entitled to the same privileges as the American minister, but they fitly rewarded a meritorious officer.

We shall best understand the state of affairs in Yedo and in Japan generally, by following the new Consul-General in his first official entry into that huge metropolis. We say his first official entry—for he paid a furtive visit to several temples, from which he was allowed to select a residence. The one chosen is pleasantly situated in the midst of well kept grounds, and withal well shaded on the edge of the bay. On the occasion of the official visit, the ratifications of Lord Elgin's treaty were exchanged, and conformably to instructions from Lord Malmesbury the ceremony was performed in such a manner as to impress the Japanese authorities and people with a due sense of the importance of the proceeding as being the formal inauguration of peace and friendship between the two countries. It was a hot day in July when the *cortège* provided by the "Sampson" made its march of four miles through the streets of Yedo to the Foreign Minister's residence in the heart of the official quarter. Gaping crowds, restrained by a slight cord drawn across the streets, and kept in awe by officers carrying iron staves, having rings at the top, were entertained by glimpses at the canopy, draped with flags and evergreens, which covered the treaty. That mysterious instrument rested on a silk cushion, and attracted great attention. The ratification accomplished—with no event of note save that two of the "Sampsons" were knocked up by the heat—it should seem that diplomacy had done its work, and it only remained for Plutus to enjoy the fruition thereof. Alas! although that day's proceedings had cost the Consul-General an indescribable amount of labour and sleepless nights, his labour had only commenced. His troubles began at home among his refractory countrymen, whose "too provoking and ill-advised proceedings created the greatest obstacles" after all. That is to say, foreign merchants generally, and the Japanese officials, made choice of a site for the seat of trade different from that decided upon by the Consuls-General Alcock and Harris. With such odds against them, the English and American consuls found themselves at great disadvantage in corresponding on the subject with the native officers. Since the appearance of the Blue-book, our intelligence from Japan shows that the merchants still consider themselves in the right in preferring Yakuhamu to Kanagawa, two places closely adjacent, situated on the south side of the bay, seventeen miles from Yedo. Against Yakuhamu it is urged that it places the foreign trader in nearly the same position as that of the Dutch at Desima; on the other hand, it is better situated for communication with the shipping. If both places be secured—as is likely to be the case—this will prove a transient difficulty. The circumstance most inauspicious to the dawning commerce of the Japanese islands was the treatment to which the diplomatic body found themselves exposed. We do not refer to the wanton murder of the two Russians, nor to the apparently unprovoked attack upon a Chinese servant in foreign employ, but to the hooting, hustling, and stoning of the diplomatic body in the streets of the capital, under the walls of the Tycoon's Palace, in broad daylight, and in the presence of Japanese officers! Day after day were these insults offered to the five or six individuals composing the diplomatic missions. In answer to remonstrances on this subject, the Japanese Minister for Foreign Affairs says, "It is to be wondered at that the officers of the different powers should be molested in their walks! As soon as we heard of it, we gave strict orders to prevent it; but as our nation has not been accustomed to foreigners until lately, they are astonished when they see them, and confusion ensues. It was very likely for this reason that a stipulation was made to defer the residence at Yedo of the ministers of the different Powers." So much for the explanation (absurdly expressed, owing to double translations) which Maube Simoosano Kami and Wakisaka Nakatu Kano Tayu conjointly presented to Rutherford Alcock, Esq., but from one of our minister's recent despatches we find that he himself narrowly escaped being hewn down in the streets in attempting to rescue his unoffending attendant from the swords of officials in the streets. Notwithstanding the perfection of the espial system and of the police, the murderers of the Russians could not be apprehended. Besides demanding the discovery and death of the criminals, we find Captain Ounkovsky negotiating for a mortuary chapel, to be erected by the Japanese at the place of the murder, which is promised to be "fulfilled with all exactitude." No small difficulty arose from the attempts of the Government to restrict intercourse between the Embassy at Yedo and the Consulate at Kanagawa. Mr. Alcock's firmness alone kept him from being made almost as much a prisoner as ever was the Oppenhaff at Derima. It seems now to be conceded that

English officers may pass to and fro between the two offices at pleasure, a supply of passports being deposited with Mr. Alcock for facilitating such travel.

It is, however, in the currency, and in their adherence to monopolies that the chief obstacles to commerce lie among the Japanese. On these subjects, however, we find nothing that we have not already laid before our readers. They depreciate dollars by declining to receive them at the treasury at their full value. They refuse to provide Japanese currency in adequate quantity for exchange for dollars. Practically they set at nought the treaty by hindering the export of various commodities, sustaining, in fact, the monopolies which they stipulated in such an underhand manner that our consuls, even if Argus-eyed, cannot with certainty, detect the agency which thwarts the course of trade. The vexatious proceedings that we have described took place at the capital, and at Kanagawa, the port of the capital. It need not excite surprise that Nagasaki in the south, and Hakodadi in the north, send their complaints to our Foreign Office through our minister at Yedo. We shall confine our review to the latter, partly because information is wanted respecting that hitherto unheard-of port, and partly because the complaints of one consul sounds like the echoes of his distant colleague. Ten days' steaming in the beginning of October—there being a current of over five knots against him—conveyed Mr. Alcock from Kanagawa to Hakodadi, the return passage being made in four days. Hakodadi, with its English and Russian consuls and American commercial agent, is, it seems, little more than a large and very poor village. The main street extends nearly a mile along the edge of the bay, at the base of a high promontory, and wide enough to look imposing, with houses and shops in sufficient number to gratify high expectations, proved, on closer inspection, to be little more than a collection of shops and huts—a thousand houses, perhaps, all told, with about 6,000 inhabitants, but these are of the poorest class. The houses of this promising port are next to roofless. "Thin shingle, laid upon a few rafters, and kept in their place by a plentiful allowance of pebbles and boulders, may be very effective against high winds, but can hardly serve any useful purpose in rain."

As regards the products of this interesting place we find the following enumerated:—Lead, which is not produced in larger quantities than is required for home consumption; it contains about 10 per cent. of silver. Sulphur in quantities for exportation; edibles for the Chinese market, such as dried mushrooms, bich de mar, or "trico," and "pangon," another kind of sea-slug—"arabee" in Japanese. Salmon and other fish are abundant. Irish potatoes have been recently introduced, and are cheap and good. A limited quantity of furs and skins, those of the bear, sea-otter, and deer, but so badly dressed as to be unfit, without re-dressing, for the foreign market. The skins, however, are cheap. Pheasants, wild duck, and wild boars, as well as bears, seem to be abundant in Tesso. What the imports are to be is not so clear, except that bullion is likely to be called for. The harbour is a fine one, and easily accessible. The people are without hostility, and of a quiet habit, differing in this respect from the Nagasakians. Thirty whalers, one of them French, the others American, anchored there last year. A census of the mercantile body of Hakodadi gives "one British resident as a merchant, and two Americans, one of whom has been a commercial agent of the United States, but is about to leave for San Francisco." The diplomatic force, statistically, is rather more imposing. A British Consul, his family, interpreter, and constable, a Russian Consul and three subordinates—all having families, and the American already counted.

On quitting Hakodadi, Mr. Alcock felicitates himself, in a despatch to the Foreign Office, on the success that attended his efforts, after much opposition, to plant a consulate at that port. But he had no sooner steamed out of the harbour than "a continued series of bootless conversations took place, attended with no good result." Just what we should expect from "bootless" talk. A bullock, a hen, or even a bag of charcoal, the most trifling articles, in fact, can be purchased only through a custom-house official at exorbitant prices. Are they cold? They must go to the Custom-house to buy a stove. Do they want hay for the luckless sheep they took with them? "To the Custom-house." Are carpenters or masons wanted? application must be made to the same bureau; and when the consul asked to have money changed, an almost insolent refusal was the reply. Finally, the consulate was robbed, the robbers escaped, and on its being represented to the governor that the lives and

property of her Majesty's subjects were in peril, that officer never deigned a reply.

"All the treaties recently concluded with Japan are virtually annulled. As regards their most important provisions, they might as well have never been signed, so completely have they been disregarded by the Japanese authorities. Trade is stopped at Kanagawa, the port nearest the capital, as effectually as if an edict to that end had gone forth, and at all the ports its development had been simply inadmissible, and designedly so, by prohibitions affecting the sale of the most accessible products for export, and notably *erico* and *amabee* (dried edibles for the Chinese market), by limitations obtainable of other goods; and, finally, by the persistent denial of those facilities for the exchange of foreign money into Japanese currency, or the free circulation of the latter at its just value, without which trade is obviously impossible." We should think so, the more especially as there are some minor items to be added to the foregoing, such as the absence of all adequate measures for the protection of life and property, and consequent insecurity of both, at all the ports; the perpetual interference, covert or avowed, of officials in the transactions between buyer and seller; and the refusal, under a thousand pretexts, of the necessary facilities for determining the sites of foreign locations, and obtaining building ground. In a word, the Elgin Treaty of Japan is as inoperative as that of China, and through a process far more provoking, those astute politicians sedulously avoid giving a clear *casus belli*. As the case now stands, we find that to letters of remonstrance they oppose endless delays in answering, or put forward in their replies reasons so puerile, so ludicrously inapt or disproportioned to the effects assigned, that to combat or answer them is evidently time and labour thrown away. Mr. Alcock has intimated to the Japanese minister that war is the only alternative, if the grievances complained of are not rectified, and the provisions of the treaty more faithfully carried out. But just as he was compelled to restrain Consul Vyse, who, in Horse Guards' English, had counselled the free use of revolvers to the foreign residents in Kanagawa, so Lord John Russell considered it necessary to draw in the reins of Consul-General Alcock. His Lordship says that "if war is made to enforce the observance of a commercial treaty we run the risk of engaging in protracted hostilities, and of earning a reputation for quarrelling with every nation in the east." Perhaps, as Lord John Russell says, "Time and patience may remove many of the difficulties," but we are apprehensive that sanguinary collisions are inevitable. For, not only is hostility exhibited towards sailors and merchants, but as we have seen, the diplomatic functionaries at the capital—men who surely have given no cause of offence, are in peril of their lives. When we consider the absolute sway of the rulers of that empire, we can easily understand how they can covertly nullify every treaty obligation.

We are sorry that we can give no brighter colouring to our picture of Japan. Our Blue-book is sombre enough, especially for traders. Mark the case of the American who took sixty thousand dollars worth of goods to Hakodadi—cottons, woollens, &c.—a quantity so great for the place that it checked what little demand existed. The Japanese jumped to the conclusion that they must be sold at any sacrifice, and would not bid for them according to their value; the greater part are being re-exported to China. To those young men who mean to "go in for Japan" we commend the following picture for consolation, in the event of their being "plucked." The diplomatic agents occupy posts neither very agreeable nor free from danger, and full of anxious responsibility. Similar rumours of a general massacre of the foreigners are put in circulation; while the warnings from Government officers to foreign officials about being almost certainly burned out, looks ominously like a foregone conclusion. "With a perpetual menace of assassination on the one hand, and of incendiarism on the other; while earthquakes almost weekly shake the houses to their foundations, I cannot," says Mr. Alcock, "say the post of diplomatic agent is to be recommended for nervous people." Add to this catalogue one's privations—poor beef and no mutton—and stores from Shanghai, at Shanghai prices, and we fancy that those who are destined never to see Japan are not in need of our commiseration. In conclusion, we would counsel Lord Elgin to keep his Japanese Treaty in view while he is indoctrinating the Chinese in the duty of observing treaty obligations.

THE NEW ROUTE TO CHINA.—The route from Pegue to Esmok continues to engage attention.

RUSSIA.—The treaty with Japan has been published. The screw steam frigate *Svetlana*, the corvette *Posadnik*, and the steam-clipper transports *Rasboinik* and *Najesdnik*, will proceed to China.

RANGOON AND SINGAPORE TELEGRAPH.—The cable will leave in September. It was proposed that the *Great Eastern* should convey the same, but the suggestion is not to be carried out.

SINGAPORE.—The arrangements for placing this Settlement under the administration of the Colonial Office have not been finally made. They are, however, expected to take effect by the end of the year.

COLONIAL POST-OFFICE.—The expediency of calling upon the colonies to manage their own post-offices has been affirmed. After the 1st of May the British Post-office will no longer have direction of any Colonial post-office, except those at the military stations at Gibraltar and Malta.

SUSPENSION OF TROOPS TO CHINA.—In the *London and China Telegraph* of the 26th March it was announced in a leading article that the embarkation of troops from India to China had been suspended. In confirmation of this, we give the following received from Bombay:—"It is reported, on the authority of letters received from Bombay to the 11th ult., that orders had been given in Bombay and Madras to suspend the despatch of troops to China, hopes being entertained of an amicable arrangement of the pending difficulties."

THE ACCELERATED CONTINENTAL MAIL SERVICES.—The accelerated mail services, at fixed hours, between London, Paris, Brussels, &c., commenced on the 1st instant. The train started from London-bridge at seven A.M., reached Dover at 9.2, and the mail-packet, *Prince Frederick William*, was steaming out of harbour with mails, passengers, and baggage at 9.15. Against a fresh breeze and swell she made a rapid passage across, and the train left Calais for Paris and Brussels at the appointed time, so that under the most unfavourable circumstances of wind and weather the object of the change of hours and acceleration of despatch has been accomplished. This will reduce the time of transit for the India and China mails from 36 to 31 hours between Marseilles and London.

LORD ELGIN'S SECOND MISSION.—It is a significant fact that Lord Elgin's appointment to China, together with his two secretaries and other members of the mission, has not been announced in the *London Gazette*. The following extracts, however, from the *Morning Post* and *Globe* throw some light on the subject:—"We understand that for the present the Duke of Argyll, Lord Privy Seal, will take the duties of the Post-office in the absence of the Earl of Elgin. This temporary arrangement is made in consequence of an uncertainty as to the duration of the noble earl's absence. The most recent advices from China bring the intelligence that an ultimatum has been sent in by the English and French representatives on the spot to the Emperor, giving the Court of Peking thirty days to determine whether it will accept and execute the treaty in its entirety, and comply with such other conditions arising out of the late outrage as the Allies judge fitting. If the news of the acceptance of our terms meets Lord Elgin on his road, he will return to England to resume his office. If, on the contrary, our demands should not be complied with, his lordship will proceed to China on his arduous mission, and a successor will be appointed to the office, which the public convenience will require to be provided for." The *Globe* thus confirms the announcement of our morning contemporary:—"It is not impossible that the Earl of Elgin may find on his arrival at Suez a communication which will render his further progress to China unnecessary, a proposal having been made by the Allies to the Chinese Government which, assented to promptly, will, it is hoped, avert war. Meantime, Lord Elgin's place in the Government will not be filled up, and the Duke of Argyll, Lord Privy Seal, who was formerly Postmaster-General, will discharge the duties until either Lord Elgin returns, or his departure onwards from Suez will render it necessary to make a new appointment to the office of Postmaster-General."

OUR COLONIAL EMPIRE.—We have at present no fewer than 50 colonies—viz., South Australia, obtained by settlement in 1836; Western Australia, obtained by settlement in 1829; Antigua, obtained by settlement in 1632; Ascension, obtained by settlement in 1827; Barbados, obtained by settlement in 1625; Bermuda, obtained by settlement in 1609; the Bahamas, obtained by settlement in 1629; Ceylon, obtained by capture in 1795; Canada (East and West), obtained by capture in 1759-60; the Cape of Good Hope, obtained by capture in 1806; Colombia, obtained by settlement in 1858; St. Christopher, obtained by settlement in 1623; Dominica, obtained by cession in 1763; the Falkland Islands, obtained by settlement in 1842; Guiana, obtained by cession in 1803; Gambia, obtained by settlement in 1631; Gibraltar (military), obtained by capture in 1704; Gold Coast, obtained by settlement in 1661; Grenada, obtained by cession in 1763; St. Helena, obtained by cession in 1673; Heligoland, obtained by cession in 1814; Honduras, obtained by cession in 1670 and settlement in 1742; Hong Kong, obtained by cession in 1842; the three Indian Presidencies, placed under the direct dominion of the Crown in 1659; the Ionian Islands, obtained by cession in 1814; Jamaica, obtained by capture in 1655; Labuan, obtained by cession in 1846; St. Lucia, obtained by capture in 1803; Malta, obtained by capture in 1800; the Mauritius, obtained by capture in 1810; Montserrat, obtained by settlement in 1632; Natal, obtained by settlement in 1824; New Brunswick, separated from Nova Scotia in 1784; Nova Scotia, obtained by settlement and capture; Newfoundland, obtained by settlement in 1608; Nevis, obtained by settlement in 1623; New South Wales, obtained by settlement in 1788; New Zealand, obtained by settlement in 1839; Prince Edward's Island, obtained by settlement; Queensland, separated from New South Wales in 1859; Sierra Leone, obtained by settlement in 1787; Ta-pania, obtained by settlement in 1804; Tobago, obtained by cession in 1763; Trinidad, obtained by capture in 1797; Turks and Caicos Islands, formerly included in the Bahamas; St. Vincent, obtained by cession in 1763; Victoria, separated from New South Wales in 1850; and the Virgin Islands, obtained by settlement in 1666.

LOLA FERNANDEZ AGAIN.—This frail fair one, who so wickedly deceived the ladies' special champion, Sir Robert Carden, and obtained through his influence a free passage to Hong Kong in the *Sir William Peel*, has been landed at the Cape,—instructions having been received to the effect that, as she was an impostor, she was not to be taken on to China. On her way to Cape Town in the mail cart, she fell into the society of a noted procuress, from whose clutches she was rescued by the superintendent of police. She has been lodged in comfortable quarters, and an effort is to be made to secure her, somehow or other, a passage to Hong Kong—the Cape colonists being, it appears, alike insensible to her attractions and unconvinced of her virtues.

THE JAPANESE EMBASSY IN CALIFORNIA.—The United States steamer *Ponakatan* arrived at San Francisco on the 27th March, from Japan, via Honolulu. She had on board the Japanese embassy, consisting of two principal ambassadors, princes of the highest rank among the nobility of the empire, and two associates, who are nobles of nearly equal rank. These four are of the Emperor's council. They are accompanied by a suite of sixteen officers (including three interpreters), and fifty-two subordinates, making seventy-two in all. A cordial reception was accorded to the strangers by the authorities and citizens of California. The party would soon leave for Washington, via the Isthmus of Panama. Congress had appropriated 50,000 dollars to meet the expenses of the embassy at Washington. It is stated that Lord Lyons, under instructions from the British Government, will extend to the ambassadors a cordial invitation to visit Great Britain.

A BURIAL IN YEDO.—Our contemporary the *Daily News* has been furnished by a correspondent at Yedo with a graphic and interesting account of a public funeral which had just taken place there. The occasion was the burial of a Japanese attached to the British consulate, who had been barbarously murdered by one of his countrymen. Having passed some years in America and China, and acquired a fair knowledge of English, he was obviously a most valuable servant to any foreign mission, and the British Consul-General brought him from China in the capacity of a linguist to the consulate. It was a fatal position for any one to occupy, and he had been for some time a subject of anxiety to his master. He was warned to be cautious and never to stir out at night—the danger anticipated being his assassination in the dark. His enemies determined, however, to go more boldly to work, and in broad daylight, on a Sunday afternoon, an assassin stole behind him unperceived by his victim, and burying a short sword up to the hilt in his body, left it there, making his escape, without let or hindrance. The British Consul-General demanded that by a public funeral a disavowal of all sanction of the murder should be made by the Japanese authorities. We are told by the correspondent that if decorum and impressiveness could give any value to a funeral service, there was nothing wanting in this.

ST. HELENA CORRESPONDENCE.—The slave trade must be sadly on the increase. You are aware that this is the great depot for the slavers to be condemned at, and within four months not less than five slavers have been brought in. There were 450 slaves on board of one, 750 on board of another, and 580 in the third. One was sent here with the captain and mate on board. Before her arrival the *Mystic*, American war steamer, came to meet the slaver. She had been sailing under American colours. After having had a hearing before the magistrates they were given up to the American commanding officer, and were taken away heavily ironed. Were this barbarous and cruel trade made a reciprocal treaty between the nations, and slavery treated as piracy, we should not have our senses shocked at the sights and horrid stenches so often witnessed of late. We have frequently been told that the slave trade has been immensely over-rated. Good God! it would indeed make your heart ache and freeze your blood to see the wretched creatures land, being absolutely living, but filthy skeletons, their festering bodies covered with sickening sores, and in a few days nearly 200 died out of 600. We are well informed that at the present moment there are scores of vessels on the African coast engaged in this hateful traffic. The American captains here make an open boast of what they do, and the profits are so enormous that it is worth their running any amount of risk. I suppose you have heard so much of the French since the 1st of January, 1859, that you are tired of the subject. I must, however, administer a homeopathic dose. You know they have purchased the house Napoleon the Great died in, and the tomb he was buried in some distance away. The house is being newly done up. Of course, like all Government property here, it was entirely in ruins. It is now being renovated in conformity to an old engraving taken at the time of exile. Mons. de Rougement is the conservator of the tomb. Napoleon III. sent him, a few days since, a couple of horses as a present, which, we are told, were ridden by the Emperor through the Italian campaign. There are several French soldiers and engineers here measuring and sketching. What does all this mean? Coupled with the uneasy feeling almost visible in the various journals, it makes us suspicious.

THE HONG KONG BLUES BOOK.—The following is a copy of a letter forwarded to the Duke of Newcastle from the Foreign Affairs Association. It is intended to bring the subject forward in Parliament:—"The voluminous 'papers relating to Hong Kong' recently presented to Parliament have been read and considered by this committee, and I am requested to communicate with your grace thereupon. The committee have had no communication whatever with Mr. Anstey, nor have they any personal acquaintance with him. Neither have they any personal knowledge of Sir J. Bowring, with whom, however, they have communicated since his return to England, and whom they have convicted of falsehood on another subject. They cannot, therefore, defile themselves with any further notice of him than this. The committee find it recorded in a despatch from Mr. Under-Secretary Fortescue to Mr. Anstey, dated July 26th, 1859, and printed at p. 444 of the papers, that your grace, after considering the case, concurred in the decision of Sir E. B. Lytton, dismissing Mr. Anstey from office. The committee are wholly unable to perceive the justness of this decision. In their judgment it is a very grave and serious injustice, and can only be attributed to your grace not having read the evidence contained in the papers. It is, of course, impossible within the limits of an ordinary letter to give a full and clear statement of the whole case. The committee, therefore, confine themselves to three of its main features. At pp. 12, 13 of the papers is the report of two magistrates who had made an investigation into the conduct of Dr. Bridges, Acting Colonial-Secretary, member of the Legislative, and of the Executive Councils of Hong Kong. In that report, mild though it is compared with his offence, they find him guilty of grave misconduct. No one who reads the whole of the evidence can doubt for a moment that he was guilty of an offence for which, if justice had been done, he ought to

have been indicted, along with the chairman who had bribed him, for conspiracy. Instead of that he continued to fulfil his public offices, and to perpetrate other crimes. At pp. 36, 37, and 38 of the papers appears the report of a commission appointed to investigate the conduct of Mr. Caldwell, J.P., registrar, protector of the Chinese, and licensor of brothels. That report, although far short of meeting the justice of the case, as developed throughout the whole of the evidence, does find Mr. Caldwell guilty of very grave misconduct, and he, too, ought to have taken his place as a criminal at the bar of justice. Instead of that he still continues to exercise his offices as an important servant of the Crown. At p. 362 of the papers, is the verdict of the special jury in the case of the Queen v. Torrant. In the opening of that case the counsel for the Crown said that Sir J. Bowring and Dr. Bridges felt they were on their trial. The verdict of the jury found them, in effect, guilty of a corrupt and damnable trick to defeat the ends of justice—this, too, without hearing a word of the defence. A perusal of the evidence shows that no other verdict was possible. These three remarkable and signal triumphs of justice were owing to the extraordinary ability, undaunted courage, unswerving perseverance, and unimpeachable honour and honesty of Mr. Anstey. Yet he is dismissed, and the criminals enjoy public favours."

Naval and Military.

THE CHINA EXPEDITION.

The intelligence of the loss of the gunboats *Algerine* and *Dove*, described as frigates in the telegram, caused inquiry in the House of Commons, and elicited the following from Lord Clarence Paget:—

"The Admiralty have received a despatch from Admiral Hope, dated the 15th of March, which announced that the two vessels reported to be sunk had arrived the day before in company with the *Simpson*, therefore there was no reason to believe the rumour true."

According to all the advices they had not returned from the north, but were left there by the *Simpson*. In reference to reinforcements it has been stated by Mr. Herbert in the House—whose speech will be found in our Parliamentary intelligence—that as regarded the question of additional forces for China, it was impossible yet to see what would be the course of events; but if it should be such as to lead to a commencement of hostilities, and to a protraction of operations, then certainly due notice would be given to the House of any motion for making provision for that state of things.

The last news from Bombay advises that instructions had been issued to stop the further transport of troops, &c. In reply to a question Lord John Russell stated that it was not true that orders had been sent to China to stop the expedition to the north. On the contrary, they were to be pushed on ready for Lord Elgin, and save his lordship the responsibility of ordering the attack. It has also been announced that it is possible that pacific accounts may reach him at Suez, which will render a visit to China unnecessary, and in that case his lordship will return and resume his office of Postmaster-General, which has been kept open. This, however, we deem very improbable. It is announced here that General Straubenzy returns to England by an early mail. There have been no further announcements in reference to the despatch of recruits for the various regiments now in China, and there is consequently no projected departures to report, and this remark applies also to the navy. There is a rumour that the *Euryalus* will visit China. There have been no further revelations concerning the damaged powder, &c., ex *Himalaya*.

The distribution of prize money to the *Chesapeake* for salvage on the *Avu* commenced on the 3rd inst., as follows:—Commodore, second class, £1,209 15s. 1d. Commander, £604 17s. 6d. Third class, £257 14s., two shares; £128 17s., one share. Fourth class, £165 13s. 2d., two shares; £82 16s. 7d., one share. Fifth class, £92 0s. 6d., two shares; £46 0s. 3d., one share. Sixth class, £82 16s. 8d., two shares; £41 8s. 4d., one share. Seventh class, £55 4s. 6d., two shares; £27 12s. 3d., one share. Eighth class, £27 12s. 3d., two shares; £13 16s. 2d., one share. Ninth class, £9 4s. 1d., one share. Tenth class, £4 12s., one share.

According to a statement just published, the return of British regimental establishments for 1860-61 of all ranks gives a total of 144,148 men. The number of effectives of all ranks on the 1st of April, 1860, was 133,962. The return of Indian establishment for 1860-61 is 83,585 men, and the number of effectives (India) on the 1st of April, 1860, according to returns received in England during the present month, was 94,829. The total number of embodied militia of all ranks on the 1st of April, 1860, was 19,333 men. The officers of the Bengal army are now employed in the following manner:—202 on furlough, 56 on civil and political employ, 21 on the military staff, 104 serving with regular regiments, 22 doing duty with Her Majesty's European regiments, 7 doing duty with other corps of the Bengal army, 59 on duty with discharged soldiers proceeding to England, 15 with police corps, 10 with commissariat and stud, 24 with public works, surveys, &c., 264 doing duty, miscellaneous 10, giving a total of 794. The number of officers wanting to complete the establishment on the 1st of October, 1859, was 131.

We understand that Mr. Baring, M.P. for Falmouth and Penryn, and Secretary to the Council of India, is now giving most vigorous attention to the reorganisation of the Indian army, and other matters connected with his department, and in conducting these measures he is adopting more prac-

tical and expeditious means than usual with his predecessors. We do trust he will show the public that the days of red-tapism are numbered.

The Russian steam frigate *Askold*, Captain Ounkovki, anchored in the Solent, from Plymouth, on her way to Cronstadt, for the purpose of enabling her officers to visit the *Great Eastern* steamship, in Southampton Water.

Rear-Admiral Sir Thomas Maitland, C.B., the newly-appointed Commander-in-Chief of the Pacific station, has hoisted his flag (white at the mizen) on board his flagship, the *Bacchante*, 51, screw frigate, in Portsmouth harbour.

Lord Clyde has been relieved of the command in India, and may be expected in England next July.

The following appears in the *United Service Gazette*:—The names of certain individuals have been sent to us, purporting to be those of the persons who abstracted the examination papers. We withhold them for one week, in the hope that during that time they will be published by the authorities, who are in full possession of the information. We alluded last week to the folly of attempting to ignore cases—cases thoroughly well known to parties who, when called on, pretend the most perfect ignorance on the subject.

The screw steam-frigate *Forte*, Captain E. W. Turnour, bearing the flag of Rear-Admiral the Hon. S. H. Keppel, K.C.B., embarked his Excellency Sir George Grey, Governor of the Cape of Good Hope, and suite, and taking a mail, sailed from Plymouth Sound for Table Bay, where the *Forte* will relieve the *Boscawen*, flag of Rear-Admiral the Hon. Sir Frederick Grey, K.C.B.

Great progress is being made in the building of the *Glasgow*, 51, screw frigate, and the *Chanticleer*, 17, screw corvette, in Nos. 1 and 2 building-sheds in Portsmouth dockyard. The first-named vessel has, with the exception of a portion of her stern, the whole of her framing in position, and a greater portion of her midship flanking on.

The Admiralty order relative to the augmentation of the Royal Marine force has been issued. The augmentation is to consist of an additional company to each division, and one company to the Royal Marine Artillery.

The 18th Company of Royal Engineers will proceed from Weymouth to Aldershot, instead of joining head quarters, as was originally ordered. Captain Longley has proceeded from Chatham to Weymouth to take the company to Aldershot, Captain Hawthorn having been ordered to remain at Weymouth.

The recent debates in the House of Commons on naval matters have placed the warrant and petty officers of the navy in such a conspicuous position that members of all opinions, as well as ministers, have been obliged to pay them some attention. They were acknowledged to be the backbone of the navy.

The *Octavia*, 51, sailing frigate, has been cut asunder in No. 9 dock at Portsmouth, for the purpose of lengthening and conversion to a screw. The *Powerful*, 8½, is found to be too rotten to be fitted as a screw.

The new gunboat *Cormorant* proceeded from Chatham to Woolwich to be laid up in reserve.

A pamphlet, entitled "The Invasion of England, rendered Impossible by a Simple and Practical Mode of Defence," from which we make the following extract, advocates the placing along our open beaches, at the mouths of rivers, all round our great roadsteads, in front of all our sea-coast towns, and wherever insult might be given and defence is necessary, long 32-pounders, at a distance of thirty yards apart from each other, a little above high water-mark:—"It is difficult, without an actual survey, to estimate the extent of coast requiring to be armed, but I have considered the coast from Edinburgh round England to Glasgow to amount to about two thousand miles. We will presume that one-half of this coast line is accessible to an invading force, and requires arming, while the remaining half is defended by its cliffs, rocks, and other natural impediments. The extent of coast, on this presumption, to be defended, would be a thousand miles; which, multiplied by sixty, would give sixty thousand, the number of guns to be provided, say at a cost of £100 per gun, which would amount to £6,000,000, so that at a cost of six millions of money the whole sea coast from Edinburgh to Glasgow might be put into such an efficient state of defence as effectually to forbid the landing of the invading force. Such a proposition, at first sight, may appear extravagant, but when we consider the many towns situated on the east, south, and west coasts of England and Scotland, now exposed to foreign insult, and the many places easy of access to an invading army, I think the extravagance will disappear; and this mode of protecting our shores will be acknowledged to be as both the most effectual and the most economical yet proposed. One great object I have in view, while insisting upon these guns and shot, and all their gear, being kept continually in readiness, is to prevent those panics which sometimes pass through the country, and arise from no other reason than that we are all conscious that we are not prepared to meet an invading force. I would suggest that two millions a year should be spent in this manner, until the whole coast is armed. Of course, the same principle applies to Ireland; but Ireland will never be exposed to the same danger as England."

THE ROTTEN GUNBOATS.—A great deal of correspondence has taken place on the subject of our gunboats. The Portsmouth correspondent of the *Times*, referring to the condition of the gunboats at Haslar yard, alleges that they are built of unseasoned timber, totally unsuited to ship building purposes, and the consequence is, that rot has appeared to a great extent. This statement has of course been impugned, and several letters have appeared from well known ship building firms claiming exoneration from the charge. The correspondent referred to makes the following statement:—"Not only, as I have before stated, are the majority of the timbers liberally marked with 'sap,' but in several instances they have been barely squared, and plainly show the growth of the wood. One is also conspicuous for the slowness of her frame as compared with any other boat now under repair. The planking of nearly all the boats, both under repair and those that have been repaired, is, however, stated to have been more generally affected, and a great number of them have been found faulty from this cause to an extraordinary degree." There is a complete squadron of gun and mortar-boats lying at Chatham, in a state of decay.

CHANGES AND PROMOTIONS IN HER MAJESTY'S ARMY AND NAVY.

WAR OFFICE, PALL-MALL.

2nd Regiment of Life Guards—Cornet and Sub-Lieutenant Richard D. Barre Cunningham to be lieutenant, without purchase, vice Berkeley, promoted; March 28. Cornet C. G. H. Bowley, from the 4th Light Dragoons, to be cornet and sub-lieutenant, without purchase, vice Cunningham, promoted.

2nd Dragoon Guards—Lieut. George Eugene Logan to be captain, without purchase, vice Ling, deceased; Cornet Charles Lever to be lieutenant, without purchase, vice Logan; Feb. 29. Troop Sergeant-Major Benjamin Edmonds to be cornet, without purchase, vice Lever; April 27.

4th Dragoon Guards—Cornet Clement Robert Nuttall Roys to be lieutenant, by purchase, vice Muttelbury, who retires; April 27. Lieut.-Colonel F. O. Aylmer, from half pay Unattached, to be lieutenant-colonel, vice Brevet Colonel A. Low, who exchanges, receiving the difference between infantry and cavalry; Major G. J. Brown to be lieutenant-colonel, by purchase, vice F. C. Aylmer, who retires.

5th Dragoon Guards—Lieut. Augustus William Travers, to be captain, by purchase, vice Hay, who retires; Cornet William James Scarlett, to be lieutenant, by purchase, vice Travers; April 27.

4th Light Dragoons—Captain the Hon. Charles James Keith-Falconer to be major, by purchase, vice Browne, promoted; Lieut. William Chaine, jun., to be captain, by purchase, vice Keith-Falconer; Cornet James Edward Bradshaw to be lieutenant, by purchase, vice Chaine.

18th Light Dragoons—Lieut. William Edward Shaw, from the 12th Light Dragoons, to be lieutenant, vice Saunders, deceased; April 27.

Royal Artillery—Brevet Major Robert Frederick Mountain to be lieutenant-colonel, vice Brandling, deceased; Brevet Major William John Bolton to be captain, vice Mountain; Lieut. Michael Tweedie to be second captain, vice Bolton; April 17. Lieut. Robert Berkeley Butt has been permitted to resign his commission; April 16. Quartermaster Sergeant James Hamilton to be quartermaster, vice Hassall, retired on half-pay; April 12.

Coast Brigade of Artillery—Sergeant Major Samuel Blair to be quartermaster, vice Behenna, placed on the supernumerary list; April 14.

Royal Engineers—Brevet Colonel William E. Delves Broughton to be colonel, vice Hope, deceased; Brevet Major Henry Arthur White, to be lieutenant-colonel, vice Broughton; Second Captain the Hon. John James Bury to be captain, vice White; Lieut. Frederick Mould to be second captain, vice Bury; April 18.

Military Train—Captain C. Hunter, from the 24th Foot, to be captain, vice D. Gibson, who exchanges.

3rd Foot—James Johnston Twining, Gent., to be ensign, by purchase, vice Irvine, promoted; April 27.

6th Foot—Adolphus Randolph Augustus Collis, Gent., to be ensign, without purchase, vice Thomas Armstrong Gough, whose appointment, as stated in the *Gazette* of the 10th of April, 1860, has been cancelled; April 27.

10th Foot—Major-General Thomas Burke to be colonel, vice General Sir Thomas McMahon, Bart., G.C.B., deceased; April 11. Lieut. M. Coke, from the 12th Foot, to be lieutenant, vice Phillips, who exchanges.

11th Foot—Ensign William Miles Maskell has been permitted to resign his commission; April 27.

12th Foot—Lieut. H. L. W. Phillips, from the 10th Foot, to be lieutenant, vice Coke, who exchanges.

15th Foot—Lieut. F. R. Fishbourne to be instructor of musketry, vice Lieut. Cuthbert, promoted.

19th Foot—Captain M. Williams, from the 84th Foot, to be captain, vice T. C. Lloyd, who exchanges.

21st Foot—Lieut. I. T. Coffin to be captain, by purchase, vice J. Henderson, who retires; Ensign J. Blaksley to be lieutenant, by purchase, vice Coffin.

24th Foot—Captain D. Gibson, from the Military Train, to be captain, vice C. Hunter, who exchanges.

26th Foot—Ensign H. J. Harvey to be lieutenant, without purchase; Assistant Surgeon J. T. Milburn, from the Staff, to be assistant surgeon, vice Creasy, who exchanges.

27th Foot—Major-General John Geddes, from the 46th Foot, to be colonel, vice Lieut.-General Edward Flenin, C.B., deceased.

30th Foot—The surname of the gentleman appointed to an ensigncy, by purchase, on the 17th ult., is Bruine and not Brain, as stated in the *Gazette* of that date.

37th Foot—The appointment of Lieut. Hawkes, as adjutant, to be ante-dated to the 20th Dec., 1859.

40th Foot—Major-General Thomas Gerrard Ball to be colonel, vice Major-General Geddes, transferred to the 27th Regiment.

56th Foot—Major-General Henry William Breton to be colonel, vice Lieut.-General John Home Home, deceased.

58th Foot—Cornet Joseph Clark, from half-pay, late Land Transport Corps, to be quartermaster, vice Slattery, appointed to a Depot Battalion; April 27.

60th Foot—Ensign H. R. Treeve to be lieutenant, without purchase, vice J. W. King, deceased. For Lieut. J. S. H. Algar to be lieutenant, &c., which appeared in the *Gazette* of the 27th April, 1860, read Lieut. J. S. H. Algar to be adjutant, &c. Lieut. James Sturgeon Hamilton Algar to be lieutenant, vice Tilford, who resigns the adjutancy only; April 27.

61st Foot—Lieut. Arthur Bailey, from the 38th Foot, to be lieutenant, vice Vickers, promoted, without purchase, in the 18th Foot; Ensign William Edward Ness to be lieutenant, by purchase, vice Sloman, promoted; April 27.

68th Foot—Sergeant H. Sladden, to be quartermaster, vice Tunks, who retires upon half-pay.

69th Foot—Major and Brevet Lieut.-Colonel John Heatly, from the 83rd Foot, to be major, vice Hankey, who exchanges; Feb. 16.

83rd Foot—Major Augustus Barnard Hankey, from the 69th Foot, to be major, vice Brevet Lieut.-Colonel Heatly, who exchanges; Feb. 16.

84th Foot—Captain T. C. Lloyd, from the 19th Foot, to be captain, vice M. Williams, who exchanges.

87th Foot—Lieut. John Rawson Simpson to be captain, by purchase, vice FitzGerald, who retires; Ensign Adrian Augustus Von Beverhoudt to

be lieut., by purchase, vice Simpson; April 27. Ensign J. H. Vowell to be instructor of musketry.

91st Foot—J. T. Rodgers, Gent., to be ensign, by purchase, vice Robert N., appointed to the 3rd Dragoon Guards.

100th Foot—Lieut. F. B. Bleasby, from half-pay, late Land Transport Corps, to be lieut., vice Derbyshire, who resigns.

2nd West India Regiment—Lieut. George William Reade to be adjutant, vice Fogo, who resigns the Adjutancy only; April 27.

Gold Coast Artillery Corps—Ensign G. Horner to be lieut., without purchase, vice C. Hewett, promoted, without purchase, to an Unattached Company.

The undermentioned promotions to take place consequent on the death of Lieut.-General J. H. Home, Colonel of the 56th Foot, on April 22, 1860:—

Major General Sir J. H. Schoedde, K.C.B., Colonel 55th Foot, to be lieut.-general.

Brevet Colonel C. Franklyn, C.B., Lieut.-Colonel half-pay Unattached, serving with the temporary rank of Major-General on Staff of the Army at Gibraltar, to be major-general.

Major and Brevet Lieut.-Colonel G. C. Clarke, 2nd Dragoons, to be colonel.

Major J. P. Mayers, 86th Foot, to be lieut.-colonel.

Captain C. T. Du Platt, Royal Artillery, to be major.

The undermentioned promotions to take place consequent on the death of Lieut.-General E. Fleming, C.B., Colonel of the 27th Foot, on the 23rd April, 1860:—

Major-General Sir H. J. W. Bentinck, K.C.B., Colonel of the 28th Foot, to be lieut.-general.

Brevet Colonel G. C. Munda, lieut.-colonel half-pay, Unattached, Lieut.-Governor of Jersey, with the local rank of Major-General, to be major-general.

Lieut.-Colonel G. V. Mundy, C.B., 19th Foot, to be colonel.

Brevet Major J. R. Heaton, 37th Foot, to be lieut.-colonel.

Captain S. B. Lamb, 10th Foot, to be major.

MEMORANDUM.—Royal London Militia—Her Majesty's Commissioners of Lieutenancy for the City of London have, in conformity with section 79, 42nd George III., cap. 90, been pleased to grant the honorary rank of lieut. to Quartermaster J. Birkin.

NAVY.

PROMOTIONS.

CORPS OF ROYAL MARINES.—First Lieutenants to be Captains: Henry Fallowfield Cooper, Joseph Hamilton Maskery, William Henry Hore West, Henry Colton Mudge, Ambrose Wolrige.—Second Lieutenants to be First Lieutenants: Robert Good Sharpe, Thomas Martin Whale, Edward Owen Browne Gray, William Repton Friend Hopkins, Alfred Emanuel Otter, Frederic Amelius Ogle, Francis Edmund Begbie, George Harrie Thorn Colwell, James Samuel Deriman, Edward Ellice Hill, Hugh William Bamber Herbert Everitt, Henry Evelyn Sturt.

ASSISTANT ENGINEERS.—Second Class: G. T. Gibbs, to the Asia, as supernumerary; J. R. Cooper, to the Cressy; W. Payne, to the Starling; R. Wallace, to the Supply; G. G. Scholée, to the Virago; T. Wilson, to the Ardent; G. Rol, to the Caradoc; W. W. Webber, to the Neptune; Peter Hutchinson, to the Adventure.

ACTING ASSISTANT ENGINEERS.—Second Class: F. W. Henderson, to the Renard. Third Class: A. Bullions, to the Asia, as supernumerary.

APPOINTMENTS.

CAPTAINS.—J. A. Paynter, to the Exmouth, vice Stopford, invalided; W. C. Chamberlain, to the Bacoon, vice Paynter; Lord F. H. Kerr, to the Impregnable, vice Stewart; W. H. Stewart, C.B., to the Marlborough, vice Kerr.

LIEUTENANTS.—C. G. Harvey, to the Mersey; T. M. Magnay, H. M. Carre, E. F. Weld, to the Excellent; A. Tupman, to the Forte, additional for disposal; R. L. Turton and S. Long, to the Edgar; C. W. Thackeray, to the Wrangler; H. A. Trollope, to be Flag Lieutenant to Rear-Admiral Sir Charles Maitland, Commander-in-Chief in the Pacific.

MASTERS.—H. G. Raynes, to the Edinburgh; J. Penn, to the Monarch; B. W. Ward, to be additional to the Dauntless; W. Jeffery, to the Saturn, for service in the Andromache; S. Spain, to the Cornwallis; John W. Reed (additional), to the Fisgard.

SECRETARY.—James W. Ozzard (paymaster), to be secretary to Rear-Admiral Sir T. Maitland.

SURGEON.—J. Wallace (confirmed).

PAYMASTERS.—J. Whittall, to the Ariadne; J. J. G. Simmonds, to the Bacchante; C. L. Cartwright, to be additional to the Cumberland; E. D. Herbert, to be additional to the impregnable; and H. W. Ailidge to be additional to the Wellesley.

MASTER'S ASSISTANT.—A. Carr, to the Melpomene.

ASSISTANT PAYMASTERS.—J. N. Robinsen (supernumerary) and J. M. Wortly, to the Victory; T. S. Chanter, to the Impregnable, as supernumerary.

ACTING ASSISTANT-SURGEON.—D. R. Alcock to the Terrible.

ACTING SECOND MASTER.—J. D. Wiltshire to be additional to the Blenheim.

CHIEF ENGINEERS.—J. Barber, to the James Watt; M. Powell, to the Terrible.

ASSISTANT-ENGINEERS.—First class: J. C. Gruchy, to the Terrible. Second class: T. Wit, to the Fisgard, for service in the Baun; T. J. Sweeney, to the Ranger; Samuel Windley, to the Rhodananthus. Third class: C. H. Pillar, to the Wellington, for temporary charge of the machinery of the Goldfinch; F. Thornton, to the Fisgard, as Supernumerary.

ACTING ASSISTANT ENGINEERS.—First class: G. West, to the Fisgard, for temporary service, for charge of the machinery of the Bustler. Third class: Edwin Gossage, to the Fisgard, as Supernumerary; Henry Fox Stougnell, to the Asia, as Supernumerary; E. W. Pratt, and A. R. Moxham, to the Megara, as Supernumeraries; R. Findlay, to the Terrible.

MIDSHIPMEN.—C. W. Beaumont, to the Hero; L. A. Bell, R. W. Davies, and C. M. Turner, to the Pacchante; C. S. Broome, to the Algiers.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ADAMSON—At Bangkok, Siam, on the 24th March, the wife of Mr. Wm. Adamson, of a son.

CRAWSHAY—On the 27th April, at Hingham, Norfolk, the wife of Charles Crawshay, Esq., of a daughter.

DURRANT—On the 2nd inst., at the Willows, All Saints, Southelham, Suffolk, the wife of G. F. Durrant, Esq., of a daughter.

DORAL—At Singapore, on the 29th March, the wife of Mr. Francis Doral, of a daughter.

ELMSTONE—At Yokuhama, Japan, on the 11th Feb., Mrs. C. T. Elmstone, of a daughter.

ELLISON—On the 30th April, at Windsor, the wife of James Ellison, Esq., M.D., of a daughter.

FAULKNER—On the 25th April, at the Phillippiner, near Sevenoaks, Kent, the wife of Captain H. D. Faulkner, H. M.'s Indian Army, of a son.

LISTER—On the 29th April, at Manningham-hall, the wife of Samuel Cunliffe Lister, Esq., of a son, stillborn.

MCDUGALL—On the 3rd inst., at Blackheath, the wife of G. F. McDougall, Esq., R.N., Admiralty Surveyor, Ceylon, of a son.

WEATHERBY—On the 3rd inst., at York Villas, Campden-hill, Kensington, the wife of Edward Weatherby, Esq., of a son.

WALTER—At Stamford-road, Singapore, on the 25th March, the wife of Mr. S. N. Walter, of a son.

MARRIAGES.

BROWN—HOUGHTON—On the 3rd inst., at St. Mark's, St. John's-wood, by the Rev. James Bolton, Henry Brown, Esq., of Victoria, Australia, youngest son of the late Charles Brown, Esq., R.N., to Louisa, eldest daughter of William Houghton, Esq., of 28, Hamilton-terrace, St. John's-wood.

GAVIN—MCANDREW.—On the 26th April, at the Knoll, Elgin, by the Rev. James Anderson, of Morpeth, John Gavin, Esq., Kandy, Ceylon, to Mary Isabella, second daughter of the late W. D. McAndrew, Esq.

GORDON—JOHNSON.—On the 30th April, at Hannington, Wilts, by the Rev. F. C. Johnson, Alexander Ansdell Gordon, Esq., 7th Madras Cavalry, son of the late Major A. Gordon, to Lucy Catherine, youngest child of Captain Frederic Johnson, late of the 54th regiment.

MATTHEW—HIGGINS.—On the 1st inst., at Alford, Lincolnshire, by the Rev. George Jeans, M.A., vicar, the Rev. David Sutton Matthew, M.A., eldest son of Henry Matthew, Esq., Regent's-park, London, to Mary, eldest daughter of John Higgins, Esq., of Alford; also, at the same time, Arthur, second son of Robert Nelson, Esq., late Judge of Malabar, H.E.I.C.S., to Anna Maria, second daughter of John Higgins, Esq., of Alford.

WHITLOW—LANDER.—At Trinity Church, Shanghai, on the 6th March, by the Rev. John Hobson, British Chaplain, James Whitlow, of Shanghai, to Louisa I. Lander, third daughter of the late Richard Beech Lander, of Manchester.

DEATHS.

BAOON—On the 2nd inst., of consumption, John James, aged 23, and James Smith, aged 20, P. and O. S. N. Co.'s Service, supposed to have been drowned in China in Sept. last:—sons of the late N. H. Bacon, Esq., of Finchley.

CAMPBELL—On the 29th April, the Rev. Colin Campbell, rector of Widdington, Essex, and Brooksby, Leicestershire, fourth son of the late Lieut.-General Colin Campbell, Lieut.-Governor of Gibraltar. Survived his wife, the Hon. Beatrice Charlotte Byng, twelve years.

DICKINSON.—On the 4th inst., at 8, Upper Harley-street, of diphtheria, FROWMAN—At Penang, after a protracted illness, Mrs. Frowman, in her 78th year.

Gertrude, daughter of F. H. Dickinson, Esq., in her 17th year. MACKMURDO—On the 6th inst., at Winchmore-hill, Harriet, wife of G. W. Mackmurdo, Esq., of the above place, and 7, New Broad-street.

RYDER—On the 8th Nov., 1859, at New York, Mr. G. M. Ryder, late of Hong Kong.

ROBINSON—At Mount Erskine, Singapore, on the 4th April, after a lingering illness, Stella Elizabeth, infant daughter of Philip Robinson, Esq., aged two years and ten months.

COMMERCIAL POSTSCRIPT.

SATURDAY AFTERNOON.

The mails for Mauritius will in future close on the 20th, via Southampton, and 26th, via Marseilles, instead of 12th and 18th.

TEA.—The sales commencing on Wednesday comprised 24,642 packages, 6,990 packages of which were offered "without reserve." Of the above quantity 13,346 packages passed, 6,500 finding buyers, 4,760 being offered "without reserve," and 2,600 being boxes; next day 1,296 packages passed; 2,673 sold, of which 2,230 were without reserve. A telegram from China being looked upon as favourable, a large portion of the tea offered was withdrawn. The parcels sold fetched full prices.

Sugar.—There is scarcely any alteration in the market to-day, holders being firm. Of the 15,998 bags Manila offered at auction only a small portion sold at 37s. to 38s. for middling and good current clayed; 142 baskets gray Java were bought in at 42s. 6d. to 44s.

ARRIVALS NOT INCLUDED IN TABLE.—April 30, off Dungeness, from Maulmain, Countess of Yarborough; May 4, from Batavia, Dolphin and Eclipse; 8, off Falmouth from Singapore, Esbern Snare.

DEPARTURES.—May 4, from Newport for Hong Kong, Eva Johanna; 7, for Singapore, Hendrika; 5, from Cardiff for Hong Kong, Bato; 6, for Singapore, Antonia Petronella; 8, from Deal for Batavia, Topsnich; 7, from Plymouth for Batavia, Sarah Huntley; from Cardiff for Hong Kong, Cornelis Anthonie; for Singapore, St. Vincent.

Monetary and Commercial.

¶ We have again to notice a quiet market in the funds and securities generally. Consols have steadily risen to 95½. Discount has been unaltered at the Bank of England; but it is expected that it will be reduced to 4 per cent. The money market is, however, easier outside. The produce markets have also been active.

ELECTRIC INTELLIGENCE.

The laying of the Singapore and Rangoon cable continues to engage the attention of all parties connected with the far east. It appears that the total tonnage of the 1,000 miles of cable and appurtenances amounts to 3,500 tons, and it is probable that owing to the great space which it occupies in a ship's hold, that it will require three large screw steamers. The *Great Eastern* has been in negotiation for the work, but there are many difficulties which will prevent her performing the work, the greatest of which would be the very shallow and intricate navigation of the coast from Rangoon to Singapore, which is beset by strong currents, the tide out of the Gulf of Martaban—as all navigators on that coast know—running like a sluice, and in many parts the *Great Eastern* would find something else than her proper element under her. To send her there would be to send her and the cable to certain destruction; she could no more dodge along that coast, laying a cable, than she could navigate the Mississippi, and we are surprised that the idea was entertained, beyond a passing suggestion by either the Government or the directors of the Company. Considering the tried qualities of the *Imperator*, *Imperatriz*, and *Bahiana*, it is a pity they are not obtainable; the latter vessel, however, is daily expected, being at St. Vincent on the 21st of April, from which port she will come under canvas, her machinery being out of order. The contract with Messrs. Glass, Elliott, and Co. stipulates for the shipment of the cable in September, and no doubt it will be on board in that time. Of the precise route and places which are to be connected with this cable we shall have something to say in our next. We understand the cable under notice, which has been made under the superintendence of Messrs. Glass, Elliott, and Co., has, on testing, been found to admit of less escape of electricity than any cable now in use, in the proportion of twenty to one.

According to the last advices from Aden, the communication by the Red Sea cable with Kurrachee, as well as Suez, had been interrupted, and the precise nature of the injury to the cable in both cases had not been discovered. It is quite possible that on a proper examination of the instruments by a competent person the fault will be found there, those in use for submarine cables being more delicate; and inexperienced operators, who understand the mere manipulation, are hardly fit to be trusted. A case of this sort occurred some time since with one of the instruments in the Dardanelles. The *Imperator* will be detained in the Red Sea to under-run the line, and endeavour to discover the imperfections. These operations will be at the expense of the Company, the contractors, Messrs. Newall and Co., liability having ceased. When this is completed, it is intended that the *Imperator* shall proceed to the Mediterranean, and lay the cable between Candia and Alexandria, which is required to connect London with the Red Sea lines.

THE "IMPERATRIZ."—When noticing the charter of this vessel for China, we omitted to add that our correspondent advised that the rate at which she was engaged was 50s. per register ton per month net, for six months; that is, Government have to find coals, and all fittings; also docking expenses in China, should she require it; not a bad bargain for her owners, but considering that she was the only vessel available in the Red Sea, the agent for the owners, Messrs. Newall and Co., has let Government off pretty cheap. The outlay for the hire of this vessel was entirely owing to the imperfect arrangement of our Government, when sending out the troops, guns, and stores per *Himalaya*.

¶ The shares of the Union Bank of London have been quoted 24½ to 25½, and little business has been done. Pullinger pleaded "Guilty," and was committed for trial. The other prisoner, Lyttleton, was discharged.

The Stock Exchange Committee resumed their investigations in connection with the transactions carried on for Pullinger by members of that house; but it has been arranged that nothing shall transpire while the inquiry is proceeding.

The prospectus has been issued of the British Cotton Company (limited), with a capital of £30,000, to be increased as

required, in shares of £1 each, to be paid in full. It is completely Lancashire in its organisation, and is brought out under respectable auspices. The objects are to grow or purchase cotton in Australia, India, Natal, and Jamaica, and the arrangement of all such things as are incidental or conducive to increasing the supply of cotton.

The *Times* of the 15th has the following:—"The accounts from the East, by the last mail, seem to have created less impression than might have been anticipated. Some of the best informed Europeans in China state that they have no hope that the Imperial Government will consent to an adjustment until they are compelled by force."

The prospectus has been issued of the London and South African Bank, with a capital of £400,000, in £20 shares. The list of directors comprises members of some of the leading houses connected with the Cape trade. The head office is to be in London, and the branches will be in Cape Town, Graham's Town, Port Elizabeth, and the colony of Natal.

The annual meeting of the Assam Company was held on the 4th inst., Mr. H. M. Kemshead in the chair, when the report, proposing a dividend of 12 per cent., free of income-tax, was agreed to. It was stated that the company continues to advance steadily, the yield of tea during the past season amounting to 810,680 lbs., or 43,682 lbs. over the previous year, notwithstanding most unfavourable weather in May and June, and an insufficient supply of labour. A considerable increase in the present season's crop is anticipated. One hundred and thirty-six additional poorahs of land have been brought into cultivation, making a total of 3,479 belonging to the company used in the production of tea. The first sowings in Cachar proved a failure, but subsequent operations have been attended with success. Arrangements have been made to secure a steady supply of hands, and an experimental agency has been established for that purpose. By an invention of Mr. de Mornay, the managing director, mechanical power has been applied with great success to the sorting and sifting of tea, and has produced the important result of economizing labour.

The bar silver brought by the West India packet has been sold for shipment to the Continent at 61½d. per oz., being a decline of ¼d. from the price realized for that by the last mail.

The steamer *Ripon* on the 4th took £219,679 in specie for the East, of which £3,841 is gold, and the rest silver, as follows:—For Calcutta, £102,420; Hong Kong, £62,673; Shanghai, £49,195; Madras, £3,841; and Foo-choo-Foo, £1,550.

The following extract is from the *Times*:—

"The commercial accounts from Japan reach to the 26th Feb., and are much more encouraging with regard to the prospect of the growth of a large export trade than could have been anticipated from the tone of most of the previous reports. An intelligent and highly respectable American merchant, well acquainted with the East, writes, after a residence of two months at the port of Kanagawa, that, although the import trade has been limited, the Japanese having at present few wants which are not supplied by themselves, the shipments of produce have been large, varied, and continuous, and promise steadily to increase. Indeed, it is asserted that, considering the short time that has elapsed since the treaties went into effect, the extent of transactions has been wonderful. The greater portion of the business, however, is with China, and to that circumstance may be attributed the prevailing impression in Europe that it has not been of great magnitude. The tastes of the Chinese and Japanese being very similar, a market is at once found for all that the Japanese may export. The productions of the country are, it is added, perhaps of greater variety than those of any other part of the world of corresponding size, and of many of them the quantity seems inexhaustible. Wheat of fine quality is raised, and excellent flour was in course of shipment to China at a cost equal to about ½d. per lb. Rice is grown in abundance, as also peas, beans, buckwheat, maize and potatoes. The export of the first is prohibited, but pulse is exported in large quantities. Numerous seeds, likewise, are to be had, such as rapeseed, turnip seed, and several valuable oil seeds. From some of these an excellent vegetable oil is made, which costs in Japan about 1s. 2d. per gallon, and sells at Hong Kong for 2s. or 2s. 6d., while in America it would probably bring 4s. Since July last about 440,000 gallons have been exported, chiefly to China. Two cargoes have been sent to San Francisco. Seaweed and dried fish of many kinds, articles much consumed in China, have been shipped to that country in vast quantities. Ginseng, liquorice, and numerous medicinal roots are found, and many valuable dye woods. Copper, iron, lead, and quicksilver are to be had, the former being supplied freely. Tea and silk are expected to constitute important features of the trade. Much of the former is sent to China to be prepared for foreign markets, and probably 3,000 bales of the latter have already been exported—the cost now being about 10 per cent. less than in China. There is a fabric, also—which is used extensively, and which in some degree resembles Morocco leather—which it is thought will prove useful in Europe for fancy articles as well as for bookbinding and shoemakers' purposes. No precise record has yet been kept of trade, but the estimate is that from 100 to 120 full cargoes have been sent from Kanagawa alone, while operations have also been more or less active at Nagasaki and Hakodadi."

Captain Moorsom has published some rather remarkable correspondence regarding the Ceylon Railway. The estimates for that undertaking were furnished by him to the Government in 1857, and the amount contemplated was £1,200,000. Subsequently it was represented by other parties that the line could not be constructed for less than £2,214,000. Captain Moorsom required some conditions from the Government before entering on his plan, and as the Duke of Newcastle could not grant them, the project is in abeyance.

ARTICLES OF IMPORT.

TEA.—Low and fair common Congous, as also broken leaf kinds, have been in demand, and prices show an advance of about 1d. per lb. Good common is quoted 1s. 4d. to 1s. 4½d. per lb., but difficult to buy at the former figure. Fair to good flowery kinds have sold from 1s. 5d. to 1s. 8½d. per lb., and were at one time quoted ½d. per lb. higher. Common to fair Ho-Hows and Ning-Chows have sold from 1s. 6½d. to 1s. 8d. per lb.; later sales have shown rather better value for the price. Second-class Monings and Wopaks have on the whole averaged former prices; fine have been only in moderate demand. Good and fine Kaisows are comparatively scarce, and are firmly supported. Some large sales of Taishan Congous were made early in the month at a decline of fully 1d. per lb., which has, however, since been recovered. Sales of good Oolongs were made at about 1s. 7d. per lb., which was a rather better price; fine remain much as before. In Souchongs there is no material alteration to notice. In flowery Pekoes the attention of the exporters has been directed to the cargo of the *Lucy and Harriet*, which was placed on the market, and owing to the very fine quality and condition of the teas, higher rates than previously obtainable have been paid for those realised—about twelve hundred chests. Scented teas have been difficult of sale, especially common Capers, which are in over supply, and prices must be quoted 1d. per lb. lower, good and fine being better supported. Common to fair orange Pekoes have also sold rather easier, and fine at a decline of about 1d. per lb. Green teas have not been in general demand; the arrivals have been heavy, and freely offered by many holders, and the result has been to establish lower prices for Taiping gunpowders, some sales at public auctions of indirect arrivals selling rather irregularly. Taiping kinds, in boxes, have sold from 1s. 9d. to 1s. 11d. per lb. Ping Sueys continue difficult of sale, but there has been some demand for Moyune kinds at a decline of 1d. to 2d. per lb. Young Hysons remain scarce, and command full prices. Hysons have been in moderate demand for export at fully former prices. Canton young Hysons and Gunpowders remain much as last quoted. There were two public sales, comprising 44,500 packages of China tea and 3,696 packages of Assam, of which nearly all the Assams and 11,900 of China tea were sold, 9,400 packages of the latter being without reserve. Assam teas generally sold 2½d. to 3d. per lb. lower, but fine flowery Pekoes 6d. per lb. lower. The stock at the 1st of May was 62,591 lbs. against 53,538 lbs. last year.

SILK.—We have had another heavy month—the tardy development of the spring trade having added much to the depression of our manufacturers—and the deliveries of April were almost unprecedentedly small for late years. In China silk the pressure upon the market for some days antecedent to the departure of the last overland mail was rather severe, and prices gave way; but, the mail despatched, and the more pressing sellers relieved, matters have gradually improved a little in feeling at least, if not in fact, and there are now rather buyers than sellers at the prices of the lowest moment. It is yet early for the formation of any definite opinion as to the coming European crop, but the latest advices do not hold out any very sanguine expectations. The arrivals of China in April and May have been 8,100 bales.

SUGAR.—The market has assumed a more healthy appearance, and business of good extent has been concluded with facility at stiffer prices, more especially for the brown sorts. Penang has recently forced buyers at firmer rates. The transactions reported are 6,000 bags of Siam, grey and white, 42s. 6d. to 45s. 6d.; yellow, 38s. to 41s. 6d.; 3,000 bags brown and low yellow China, at 36s. to 37s.; 6,000 bags of Penang brown, 32s. to 38s. 6d.; yellow, 39s. to 42s. 6d.; 1,000 bags of clayed Manila, at 37s. 6d.; and 20,000 bags of unclayed Manila, at 31s. 6d. to 33s.

COFFEE.—Extensive parcels of Ceylon, brought forward by auction, have at times exercised a depressing influence on the Colonial market, but at a reduction of 1s. to 1s. 6d. per cwt., both exporters and the home trade have operated pretty freely, and the more moderate supply lately has been cleared off with an improved spirit at some reduction. The public sales of plantation more especially have been large. The quotations are—Ceylon, Native good ordinary to fine 50s. to 64s. 6d.; Plantation ordinary to fine ordinary 58s. to 67s. 6d.; Java, 57s. to 78s.

RUM.—For East India there has been a rather active inquiry, and 1,000 casks Penang and Mauritius have been realized mostly at 1s. 7d.

RICE.—A general dulness has prevailed in this market, and under a pressure to effect sales prices have receded. The transactions are reported as follows:—About 150,000 bags have been sold, chiefly soft grain, Necranzie, 9s. to 10s. 6d.; Moullmain, 8s. 9d. to 9s. 9d.; Rangoon and Bassein, 8s. 6d. to 9s. 9d.; Java, mostly good middling to fine bold, 13s. 6d. to 17s.; common to fair (new) pinky Madras 9s. 6d. to 10s. 6d.; low and middling old white Bengal, 10s. to 11s. 6d.; good middling new, 12s. to 12s. 9d.; also floating, two cargoes of Necranzie, together 2,000 tons, at 10s. 9d. and 11s., one of 600 tons Rangoon at 11s., and lately, one of 800 tons Bassein (a resale) at 10s. 6d., for Liverpool.

PEPPER.—The inactivity which we have lately noticed in this market has continued. During the past few days transactions have been made as follows:—Yellow to superior bright grocery, 44s. to 49s., a few brown, 37s. 6d. to 40s. 6d.; 500 casks Cuba, great part brown, at 37s. 6d. to 40s. 6d.; yellow, 41s. to 42s., also a floating cargo of 630 casks, for an outport, at 26s., landing weights; 800 casks Surinam, Martinique, and Guadeloupe have also been sold at 37s. 6d. to 41s.

CINNAMON.—The quarterly sales passed off very languidly, and not above two-thirds found buyers at a reduction of 1d. to 2d. per lb. Low to fine fetched 1s. 3d. to 2s. 2d.; second quality, 10d. to 1s. 6d.; third and old fourth, 6d. to 1s. 2d.

CASSIA LIGNEA has again met little inquiry, and as no parcels of importance have been offered, only trifling quantities have changed hands.

CLOVES.—A farther extensive supply of Zanzibar, amounting to 3,500 bags, brought forward the week after our last, with a desire to sell, was again disposed of at a depreciation of ½d. per lb., middling to fair 3½d. to 3½d.; since which nothing of consequence has been done. Of Penang, we are still without supplies, and no sales have transpired.

MAOZ.—The more moderate quantities, in auction, have been saleable only at rather easier rates, viz. 100 cases, low to fair red, 10d. to 1s. 3d.; ordinary palish to good, 1s. 4d. to 1s. 11d.

NUTMEGS, which were offered rather freely for some time after our last went off heavily at somewhat lower prices for the common sorts, but the light supply since has been taken at steadier rates: about 250 packages have been sold; small and middling, 1s. 3d. to 1s. 8d.; good middling and good, 1s. 10d. to 2s. 10d.; bold, 3s. 3d. to 3s. 11d.

SAGO.—Fine qualities have fetched comparatively high prices, but other sorts have been in but partial request, more particularly towards the close, when the limited transactions effected have been at some decline: 4,500 boxes pearl have been realized, fine large (Borneo Company's), 20s. to 22s.; common, 15s. 6d. to 16s.; very good medium, 18s. 6d.; common to fair, 16s. to 17s.; fair to good bright small, 16s. 6d. to 18s. 6d. For sago flour, scarcely any inquiries have been made.

HEMP.—Sales of Manila have been difficult, and the principal business reported consists of 1,200 bales, fair average roping at £23 per ton.

COTTON.—Increasing depression exists, and a forced sale of Surat resulted at a material decline, viz., fair Dholera at 4d., cash, and although this was followed by a rally of about ½d. per lb., heaviness has again ensued, the demand being now very languid at prices which, for the inferior qualities, are much lower than at the beginning of the month.

JAPAN WAX.—The only transaction reported is 500 cases sold without reserve at steady prices. Block, 62s.; saucer, 66s.

TIN.—Business has been almost confined to second hands. Banca is quoted at 136s. to 137s.; Sratta, 129s. to 130s. Stock of Banca, 897 tons.

TOBACCO.—Manila still commands inquiry, and arrivals will realise a good price. Java is quoted 7d. to 8d., and 731 bales are in the market imported from Holland. Manila cheroots scarcer, and 6d. to 1s. higher.

MISCELLANEOUS.—Gutta percha sells at full rates, moderate stock. Camphor, China and Japan, 160s. to 170s.; quotation nominal; no transactions. Cubebs, £9 to £10; quotation nominal. Battsans: 3,416 bundles of Singapore and 1,447 bundles of Batavia sold at 2s. 10d. to 4s. 6d. per 100. Sapanwood, £8 to £10, nominal. Soy: 60 bhd. sold at 4s. to 4s. 5d. per gallon. Rhubarb: sales at auction at 1s. 9d. to 1s. 11d. per lb. for fair flat, and 1s. 9d. to 1s. 10d. for round. Mother-of-pearl shells, Singapore, 125s. to 140s.; Manila, 105s. to 125s.

EXCHANGES.

	E. I. Govt. Bills, 60 days' sight.	House Bills, 60 days' sight.
On Calcutta (Co's Rupee) nominal	2s. 2d.	2s. 0½d.

EXPORTS OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from England during the present year by the P. and O. Company's mail steamers:—

	Gold.	Silver.
Shanghai	—	£2435,049
Foo-chow-Foo	—	16,789
Hong Kong	£20,870	687,194
Manila	—	56,375
Singapore	—	14,940
Penang	—	—

ARTICLES OF EXPORT.

IRON.—Mr. Griffiths' circular quotes the following official rates:—Common Staffordshire bars, £7 10s., at the works; best bars, £8 10s.; sheets, £9; doubles, £10 10s.; nail sheets, £8 10s.; latins, £12; boiler plates, £9; best and best best in proportion; common rods, £7 10s.; hoops, £8 10s.; gas strip, £8; Canada plates, £12, and all other sorts in proportion. Purchases can be made considerably under these rates. All depends upon the brand and other circumstances.

STEEL.—Swedish keg, £20; faggott, £21 to £22.

TIN.—English block, 136s.; bar, 137s.; tin plates best I. C., 30s. 6d. per box; more inquiry.

LEAD, &c.—English pig, £22 10s. to £23; less inquiry; sheet, £23 to £23 10s.; zinc, £27; spelter, £20 15s.; regulus of antimony French star, £52; copper sheet and sheathing, 12½ per lb.; yellow metal, 10½.

MANCHESTER MARKETS.—The orders given out for India goods have again placed manufacturers under considerable engagements, and the market closes with a very firm and healthy feeling. This applies chiefly to the lighter makes of 40-inch shirtings, madapollams, T cloths, and jacconets, which range at about the same quotations as they did a month ago. Absence of stock and some fair orders for printing cloths keep prices steady, but the demand for qualities suitable to the home trade in prints has been retarded by the backwardness of the spring. For 36-inch shirtings there is rather more inquiry, though not an active demand by any means, but for long cloths the market is dull. Domestic are in fair request and improving, prices being more favourable also at the present rates for cotton to manufacturers.

CASUALTIES.

The Neckar (Hamb. ship), Brolin, from Sunderland to Hong Kong, put into Portsmouth 26 April, leaky, having struck heavily on Sunderland Bar in coming out. She has been towed into Southampton to discharge.

The Diana, of Greenock, from Manila to Falmouth, was spoken 21 April in lat. 47 N., long. 9 W., leaky, and short of provisions.

The Ballarat, Jones, from London to Shanghai, was spoken 22 March in lat. 1 N., long. 23 W., with one man lost overboard, one man dead, and six men ill, and was supplied with medicine, &c., by the Joseph Steel, Jones, arrived at Liverpool. The Ballarat put into Pernambuco 29 March, and proceeded on 1 April for China.

The Sud, Malchow, from Batavia to Falmouth, put into Mauritius 22 March, leaky, and with loss of foremast, having experienced a hurricane 28 Feb. Cargo had been discharged.

FREIGHTS AND CHARTERS.

Messrs. Seymour, Peacock, and Co., in their circular, mention that the general improvement of the freight market, which has been manifest since the commencement of the year, has continued during the past month. They add that there are now loading in London, for India, China, and the South African ports, upwards of 100 sail of shipping, and at Liverpool about 75 vessels entered, and many others already chartered, but not arrived, besides a large aggregate of tonnage loading at less important outports; and they add that there is no warrant for a reduction in outward freights.

Messrs. W. S. Lindsay and Co.'s circular also confirms the improvement in outward freights and general employment of tonnage.

The rates quoted for coals to India are about £53 Aden, £38 to £40 Bombay, £48 Calcutta (with consignment), £40 Galle, £42 10s. Kurrachee, £65 Suez, £42 Singapore, 40s. Rangoon, 50s. Manila. For China, coal freights have declined considerably, engagements having been made during the last few days at 50s. Hong Kong, 70 francs Woosung, &c.

We have no improvement to report in the Australian trade. For Port Phillip or Sydney £3 10s. per ton N.N.M. for the ordinary run of ships, £3 15s. for large carrying clippers are the rates offered; and for small high classed vessels for Adelaide, Moreton Bay, Geelong, &c., £4 is the extreme figure. For dead weight cargoes (railway materials) 50s. per ton of 20 cwt. has been paid for two or three vessels to load in London or on the East Coast. For guano to the United Kingdom or Continent 60s. is still current; and for French ships to Havre, Dunkirk, Nantes, or Bordeaux, 95 francs for orders, 90 francs for direct port. For Mauritius small A 1 vessels, up to 450 tons, at 60s. to arrive at Callao in the months of November, December, and January next; and for a vessel well advanced, say to be at Callao in July or early in August, 65s. to 67s. 6d.

Rates of freight current for vessels on berth to Shanghai 60s. per ton dead weight; 45s. per ton of 40-feet measurement. To Hong Kong, 50s. weight, 45s. measurement. To Singapore, 35s. to 40s. weight or measurement. To Manila, 35s. and 40s. To Japan, £5 weight, 90s. measurement. To Batavia, 50s. weight, 40s. measurement. At the United States:—To Shanghai, coal and measurement goods, 9 to 10 dols.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Jeddo, 70s. to 80s.

At Hamburg, for Batavia and Singapore, 35s. to 40s. China and Manila, 50s.

At St. Helena, March 2.—Rajah of Sarawak, Taylor, from Hong Kong, and sailed for London; 4, Malta, McQueen, from Manila, and sailed 5th for Queenstown; 14, Trafalgar, Richardson, from Manila, and sailed 15th for London; 17, Queen Margaret, Spence, from Singapore, and sailed 18th for Liverpool; Telegraph, Bolus, from Padang, and sailed 20th for Rotterdam; 18, Chief-in, McMillan, from Singapore, and sailed 19th for Liverpool; Constance, Soderberg, from Sourabaya, and sailed 19th for Falmouth; Cornelia en Gertinda, Hookama, from Batavia, and sailed 20th for Amsterdam; 18, St. Ja, Noall, from Canton, and sailed 19th for London; 19, Hugo Grotius, Zweede, from Batavia, and sailed 21st for Rotterdam; 20, British Tar, Labey, from Penang, and sailed for London; Juanpore,

King, from Macao, and sailed for London; Economist, Olivier, from Batavia, and sailed 21st for Rotterdam; Scheveningen, Annokee, from Banjoewangie, and sailed 21st for Rotterdam; Chryseis, Sayer, from Shanghai, and sailed for London; Zuid Bevelana, va Meulen, from Batavia, and sailed 21st for Rotterdam; 22, Travancore, Johnston, from Batavia, and sailed for London; 26, Lady McDonald, Brumelle, from Hong Kong and Cape of Good Hope, and sailed for Portsmouth; Hermina, M. Elizabeth, from Batavia, and sailed for Amsterdam; 27, Taffarette, Dereix, from Hong Kong, and sailed for Havre; Patna, Smith, from Shanghai, and sailed for London; Emile Pereire, Poirier, from Macao, and sailed 28th for Havana; 29, Marie Elizabeth, from Java, and sailed 30th for Rotterdam.

At TABLE BAY, Feb. 22.—H. F. M. s. Jura and Isere from Toulon, and sailed 1st March for China; 23, Little Eastern, Bruce, from St. Thomas's, and sailed 13th March for Singapore; March 6, Red Riding Hood, Rosaiter, from China, and sailed 8th for Demerara; 9, Augusta May, Banks, from Shanghai, and sailed 13th for Montreal; 19, Villa de Lima, David, from Macao, and sailed 16th for Havana; 10, Reina de los Angeles, Tulon, from Manila, and sailed 16th for Cadiz; Feb. 21, H. F. M. steamer Saronne sailed for China, Icen, Lowe, and Sydpolen, Soderberg, for Batavia; 22, H. F. M. steamers Calvados and Dryade, for China; 23, H. F. M. s. Perseverante, for China; 25, H. F. M. steamers Rhin, Rhone, and Loire, for China; 26, H. F. M. steamer Niever, for China; 28, Annie Archibald, Armstrong, for Batavia; March 18, Reine des Clippers, Pullon, sailed for China.

At SIMON'S BAY, Feb. 20.—H. M. steamer (transport) Powerful, from London, and sailed 2th for Singapore; March 3, Mauritius, (ss.) Cruikshank, from Table Bay, and left 10th for China; 4, Lady McDonald (transport), Brunell, from Hong Kong, and sailed 13th for Portsmouth; 21, Adelaide (ss.), Bird, sailed for China.

At ALGOA BAY, Feb. 21.—H. M. steamer Vulcan, from Simon's Bay, and sailed 22nd for China; March 6, Emily Smith, Watts, from Japan and China; 10, H. M. steamer Urgent, from Simon's Bay, and sailed 11th for East London and China.

At ASCENSION, March 16.—Ironsides, from Foo-choo-foo.

At MAURITIUS, March 21.—Virginie, Moulin, from Sumatra for Marseilles, leaky; 22, City of London, Gardner, from Singapore, &c.; Sud, Malchow, from Batavia; 30, Mona, Cassy, sailed for Singapore.

DEPARTURE OF THE "GREAT EASTERN" FOR NEW YORK.—The directors have at length finally arranged for the "first trip," which will take place from Southampton to New York on the 9th of June. The passengers on this occasion will be limited to the first class. Captain Vine Hall, who has been appointed to the command of the great ship, has had great experience in the command of steamers in the Mediterranean, South America, Australia, and India, and during the Crimean war distinguished himself very much in command of a transport screw.

THE ROTTEN GUNBOATS.—In the *Times* appeared two letters, one from J. Scott Russell, and the other from J. White, of Cowes. Mr. Russell denies that his boats were faultily constructed, though one is among the condemned. Mr. White also denies that his vessels were badly constructed or faulty in material.

TONNAGE STATISTICS.—There has been an increase (British and Foreign) of tonnage entered in March, 1860, of 110,544 against March of 1859; and of 34,899 tons against March of 1858. Looking at the three months' comparison we find an increase, in 1860, of 247,208 against the three months in 1859; and of 312,791 tons against the same period in 1858. Turning to the clearances, we find that those for March, 1859, were in excess of those for March, 1860, by 11,423 tons; but that the month in 1860 exceeded that in 1858 by 159,756 tons. On the returns for the three months we find 1860 in excess of 1859 by 117,402 tons, and of 1858 by 348,972 tons.

THE AMOY DOCKS.—We noticed the completion of these docks a few months since, and we are glad to find that captains of vessels find all the efficiency and convenience, combined with economy, which the managers held out. The testimony of Capt. Bowers, of the *Louderdale* a long vessel of 850 tons, has recently been added to the capability of these docks. During the typhoon last September his vessel was dismasted and put into Amoy, where he refitted and made use of the docks, which he describes as being easy of access and possessing every facility and accommodation for the crew, stores, &c. He obtained spars, rigging, and every requisite at most reasonable charges. The attention of the European foreman and managers and the efficiency of the workmen he speaks most favourably of.

SUPERHEATED STEAM.—The first apparatus was fitted in June, 1859, to the *Alhambra*, belonging to the Peninsular and Oriental Steam Navigation Company; since which time it has been applied to between thirty and forty steamers belonging to that and other companies, and to private individuals. It is, among other advantages, claimed for this invention, that it increases the duration of the boilers—and, as a natural sequence, seeing only that one third of the usual feed-water is required, it lessens the wear of the air-pumps and their valves, as, with one-third less of injection water, a better vacuum is obtained. We may here also reiterate the fact of the saving in coal, coal bunker room, extra cargo, and of course a great reduction of labour in both shipping and firing the coal. The following results are shown:—The average consumption of coal in three voyages to and from Lisbon without the superheater, was 181 tons in 215½ hours, and of one voyage with it 123 tons in 218 hours, showing a saving of 58 tons in each voyage. The *Alhambra* is now running between Corfu and Malta with equally economical results. The apparatus has caused no trouble, and has had no injurious effect on the engines. The economy of fuel alone in this ship caused by use of apparatus is reckoned at two thousand pounds sterling per annum.

P. AND O. COMPANY.—No decision has yet been arrived at in reference to the proposed augmentation to the company's contract of £25,000, for which sum a fortnightly service was promised instead of the present monthly one. The company have received such poor encouragement in the passenger traffic, that it is not expected they will resign their present contract under the prescribed penalties, and in this case the Australian mail service will be again on the sea of trouble, discord, and uncertainty, which has been its element for the past dozen years, a state of things mainly attributable to the want of unanimity on the part of the colonists themselves. The passengers proceeding by the next mail number only 17 at present.

TOULMIN AND GALE

MAKERS OF

PATENT INDIAN DESPATCH BOXES, WRITING DESKS,
DRESSING CASES, TRAVELLING AND TOILETTE BAGS,

7, NEW BOND STREET,

(OPPOSITE THE CLARENDON.)

London: Mr. F. ALGAR, 11, Clement's-lane, City.

THE CANADIAN NEWS and BRITISH COLUMBIAN INTELLIGENCE gives the latest intelligence from all parts of Canada and the new Gold Fields, also Original Correspondence from Canada, &c. Price, post free, 5d.
London: Mr. F. ALGAR, 11, Clement's-lane, City.

CAPE and NATAL NEWS; a monthly journal, published on the arrival of the Cape Mail, giving the latest information from the South African Colonies. Price 6d., post free 6d.
London: Mr. F. ALGAR, 11, Clement's-lane, City.

TWINBERRY'S DANDELION, CAMOMILE, and RHUBARB PILLS, an effectual cure of indigestion, all stomach complaints and liver affections. In cases of constipation these pills never fail in producing a healthy and permanent action of the bowels, so that in a short time aperients will not be required, and, being quite as innocent as castor oil, they may be given to children.

From Dr. Dick, Lansdown-terrace, Kensington.
"Sir,—Send me another bottle of your Dandelion, Camomile, and Rhubarb Pills for my own use. I lose no occasion of recommending these Pills, as I can conscientiously do so."

Prepared by **TWINBERRY**, Operating and Dispensing Chemist, 2, Edwards-street, Portman-square, London; and may be had of all Patent Medicine Vendors.

GALVANISM.—PERSONS desirous of availing themselves of the MODERN DISCOVERIES in ELECTRO-MAGNETISM and GALVANISM as a curative agent in the treatment of various forms of Paralysis, Muscular and Nervous Debility, Chronic Rheumatism, Spasmodic Asthma, &c., can have it applied by properly-qualified medical men of experience at the Galvanic Institution, No. 52, Euston-road, every day (except Sunday), from 12 to 4 o'clock. Accommodation for board and attendance of a first-class character for those coming from a distance.

BLAIR'S GOUT and RHEUMATIC PILLS.

This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century to demonstrated by unsolicited testimonials from persons speak of a cure for the Gout was considered a romance; but now the efficacy and safety of this medicine is so fully in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age.

These Pills require no restraint of diet or confinement during their use, and are certain to prevent the disease attacking any vital part.

Sold by all medicine vendors. Observe "Thomas Prout, 229, Strand, London," on the Government Stamp.

NELSON'S MEDICATED BELT.

(Ed. Nelson, Naval Surgeon from 1832 to 1867.)
Gentlemen who are subject to pains in the back or loins, Rheumatism, Lumbago, or who are given to corpulency, are advised to wear **NELSON'S MEDICATED BELT**, as it gives a great support to the entire frame, and a comfortable and genial warmth to the back and abdomen, promoting health and digestion. Gentlemen who ride for business or pleasure should wear this belt as a preventive of Rupture, &c.

NELSON'S MEDICATED MARINE BELT for the prevention of Sea Sickness and the support of the back and loins during a long voyage.

"All those whose duty or pleasure calls them to sea should possess this Belt, for, putting aside its use on board ship, it is invaluable as a riding belt, fitting easily, and supporting the back."
"MARK PERCIVAL."

Lower Parade, Leamington, August 3, 1858.
These Belts are sold by Mr. WHITBURN, Chemist, 174, Regent-street, price 21s. each, or direct from the Maker, WM. ELSTON, 12, Avery-row, New Bond-street. Circulars free. Orders from the country must have the size of waist and hips, and a post-office order for 21s., payable to Wm. ELSTON, at Cavendish-street.
These belts can be had of any tailor in the kingdom.

Curtis on Manhood.—New Edition.—A Medical Essay on Nervous Diseases.

Just published, the 120th thousand, with numerous plates, in a scaled envelope, price half-a-dollar.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE, with plain directions for perfect restoration to health and vigour. By J. L. CURTIS, 16, Albemarle-street, Piccadilly, London.

CONTENTS:

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhoea and Impotence; Early Vicious Indulgences; Dangers of Neglect.

CHAPTER III.—A Review of the various Disqualifications of Marriage—whether resulting from the Youthful Abuse, the Follicles of Maturity, the Effects of Climate or Infection.

CHAPTER IV.—The Author's plan of Treatment, Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhoea and other Urinary discharges by microscopic examination.

CHAPTER V. and VI. on the modern Treatment of Gonorrhoea and Syphilis.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

"We feel no hesitation in saying, there is no member of society by whom the book will not be found useful—whether such person hold the relation of Parent, Preceptor, or Clergyman."—Sun.

Mr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by letter, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Mr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINNAM, QUEEN'S ROAD, HONG KONG.

HOLLOWAY'S PILLS.—The constant changes of temperature are causing daily derangements in chest, stomach, and liver. For rectifying the slightest or most serious disorders of these organs, nothing has been found so constantly successful as **HOLLOWAY'S PILLS**, which may be taken by any one without fear of injury. These Pills excite so salutary an influence on digestion, that almost any ordinary food may be eaten with impunity, and they strengthen the weakest stomach against acidity, flatulency, and heartburn. They speedily relieve both nausea and biliousness. They remove all obstructions in the system, and healthfully restore its proper function to every organ. They strengthen the nervous system, and renew confidence and energy in shattered and feeble constitutions.

OVERLAND ROUTE.

COMMUNICATION by STEAM TO INDIA, AUSTRALIA, &c., via EGYPT.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY book Passengers and receive Cargo and Parcels for Gibraltar, Malta, Corfu, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers, leaving Southampton on the 14th and 20th of every month. Per Egeria, from New York: Mr. Lockwood.

Summary of News from the Far East.

ARRIVAL OF JAPANESE EMBASSY.

The Japanese Embassy arrived at Washington on the 14th inst., and were received with grand military and civic display, seeming greatly delighted. Their interview with the President was to take place on the 16th inst.

THE THIRD CHINA WAR.

Intelligence has been received by the present mail of the receipt of the reply at Shanghai from the Pekin Government to the ultimatum forwarded by Mr. Bruce. The precise nature of it has not been made public, but it is reported to be unsatisfactory; and from the fact of the French General having returned to Hong Kong, it is therefore assumed that the expedition will at once move to the Gulf of Pecheli. General Hope Grant, the Commander-in-Chief of the British forces, arrived at Shanghai in the P. and O. chartered steamer *Granada* on the 6th of April, with his staff, consisting of Col. Foley, Eng. Com. at Foreign Head-quarters; Col. Wolseley, D.A., Q.M.G.; Major Wilmot, Judge Advocate Gen.; Major Anson, A.D.C.; Major Reboul, Fr. Com. Eng. Head-Quarters; Captain Grant, A.D.C.; Lieut. Biddulph, Mil. Sec.; Lieut. Johnson, R.N., Naval A.D.C.; Rev. J. McGhee, Chaplain; Dr. Home; J. Mongan, Esq., Interpreter Attached to Head-Quarters. The transport *Assistance*, with the Royal Marine Artillery, arrived on the same day. The reinforcements at Hong Kong to report by this mail consist of 202 gunners, drivers, and seven officers, &c., with one 12-pounder Armstrong battery in charge of Lieutenant-Colonel Barry from England by the overland route. From India, 884 men and officers of the 3rd Bengal Native Infantry, 105 officers and men of the Royal Artillery, 838 of the 21st Madras Native Infantry, 517 officers and men of H.M.'s 44th regiment, ten officers of H.M.'s 31st regiment of foot. A great number of these arrivals have been landed on the Kowloon side of Hong Kong, waiting conveyance for the north. The French transport *Renommée* had arrived from France with troops, and the remainder of the British and French expedition had reached Singapore *en route* to Hong Kong, and the next mail should bring us advices of the safe arrival of the whole. Up to the present time no casualty has been reported in either the naval or military portions of the expedition.

CHINA.

SHANGHAI.

The London mail of the 10th of February was received here on the 31st March by Messrs. Dent and Co.'s steamer *Yangtze*.

The English and French forces are now arriving from the south. A party of infantry with artillery are to be stationed here for the protection of the settlement.

The city of Hangchow has been entered by the rebels, but

failing in obtaining possession, they were driven out: much slaughter taking place on both sides. That city is now considered to be safe for the present, the assailants having spread throughout the surrounding country, which continues to be in an agitated state.

On or about the 9th March, the plenipotentiaries of England and France forwarded to the Governor-general of the province, for transmission to the Emperor, an ultimatum, demanding ample apology for the affair at the Peiho in June last, ratification of the treaties of Tientsin, indemnification for the destruction of the vessels at Taku, &c., and a material guarantee for the faithful fulfilment of engagements. Thirty days are allowed for an unequivocal assent to the demands.

From the returns from Shanghai for the past year, it appears that the import trade of that port amounted to the value of £15,124,928, and the export trade to £13,330,055. Of the import trade opium amounted to the value of £5,004,138.

An action had been tried in the Consular Court by Messrs. Smith, Kennedy, and Co., against Messrs. Bowman and Co., for £81 5s. commission on giving up the consignment of the *Chrysolite*, from London, which was decided in favour of the plaintiff. Mr. Schmidt charged Mr. Dallas with the illegal possession of fifty horses which were intended for the use of the French forces. A verdict of "not proven" was returned. Messrs. Wetmore, Williams, and Co., brought an action against Messrs. Shaw, Bland, and Co., for the sum of 9,919 taels, amount of guarantee on certain Chinese bank notes, which ended in a verdict in favour of the plaintiff. The Chinese firm of "Yang-tee-hang" brought an action against Messrs. Holliday, Wise, and Co., for 7,200 taels, the value of a chop of teas alleged to be out of condition. The plaintiff was ordered to refile it at his own cost.

NINGPO.

The following is the letter of a correspondent:—"Quite a panic exists here now not on account of the gathering forces of the English and French, which seems to be regarded with comparative indifference, but on account of the near approach of the "long-haired rebels" to Hangchow, the capital of this province. The rebels, who, no doubt, are through their spies, well posted up, with reference to the hostile preparations of the allies against the Tartar dynasty, seem to have taken the present opportunity to enlarge the borders of their dominions. They are reported to be within a few miles of the walls of Hangchow. Their forces are said to be very strong, numbering, according to some reports, two hundred thousand. Some two thousand soldiers left Ningpo a few days since to join the Imperial army at Hangchow. At the latter place business it is said is stopped, and multitudes are fleeing from the city. The whole province is in consternation, not so much from fear of immediate attack from the rebels, as from fear of the rising of local banditti, who always precede the rebel army for the purpose of plunder. From all accounts it would seem that the cause of the rebels was never on a firmer basis than at the present moment; but what will be the end it is hard to divine. It is suggested by the *North China Herald*, in case Hien-Fung, the present Tartar Emperor, flees from the capital on the approach of the allies, that friendly relations be established with the rebels; and inasmuch as they rule a tract of country rich in teas and silk, a considerable amount of commerce could be carried on with them; and there is reason to believe that their policy, with reference to foreign countries, would be much more liberal than that of the Tartars.

The French are about to occupy Chusan. Several French officers are now reconnoitering the harbour and island. It is the current report that they will take permanent possession of the island; if so it will undoubtedly become the centre of the Roman Catholic missionary operations in China. This the people of the island will not like, for all who continue to adhere to their ancient religions, will be annoyed and persecuted by their Papist neighbours, to a degree beyond endurance. This they know from past experience. A few years since the annoyance experienced by the people from Romish converts (making use of the fear that their connection with foreigners inspired to extort money from their timid neighbours), led the islanders to rise *en masse* and repay the injury by taking the property, and pulling down the houses and chapels of the Romanists. At Finghai, the port of Chusan, there is now a Protestant mission station, and a church of about twenty members gathered, under the patronage of the American Baptist Missionary Union.

SWATOW.

The Chinese merchants at this place have had a serious disturbance with the authorities at the Custom-house, which re-

sulted in the building being entirely demolished. This following so quickly after the affray with the British barque *Chin Chin* indicates a bad system in its organization, which is probably attributable to the renegade seamen and such like men who are engaged on the service. Notwithstanding these serious disturbances, it will be seen from our Parliamentary Intelligence that Lord J. Russell is not yet aware of the existence of the Custom-house at this port. This new outrage will, however, serve to refresh his lordship's memory.

HONG KONG.

The free emigration to the West Indies, under the auspices of Mr. Austin has been very prudently suspended during the S.W. monsoon and typhoon season, from May to September. The interval will be availed of in perfecting arrangements for a large emigration next season.

A few more acting appointments have been added to the already long list. Mr. Huffum, the judge's clerk, is to officiate as Deputy Registrar of the Supreme Court, in place of Mr. Masson, absent on sick leave, and Mr. T. Turner is to act as Clerk of the Court, in place of Mr. Weatherhead, absent on sick leave. No announcement has been made as to the office of Registrar, held by Mr. Alexander, who was lately appointed to the post of Acting Chief Magistrate, vice Mr. Mitchell, absent on sick leave. The office of Auditor General, lately filled by Mr. Rennie, absent on sick leave, is to be held by Mr. Mitchell, the Acting Postmaster.

Mr. Adams, the acting Chief Justice, has been elected a provisional member of the executive council.

Mr. Tarrant is still confined in the debtors' gaol, and we observe the following advertisement in the *Daily Press*. The correspondence alluded to in our last has been laid before the Duke of Newcastle, but no reply has been received up to the present time.

"The proprietor of the *Friend of China* takes this opportunity to express his regret, that in consequence of the proceedings of the Crown officers to coerce him into payment of certain costs allowed to Dr. Bridges for raising his plea of justification in the action for libel on the Acting Governor Caine in September last, and the announcement to the proprietor through the gaol governor of his determination not to allow the publication of the paper during his incarceration, resulting in the loss of the services of the gentleman who had been engaged as sub-editor and manager (who was refused permission to see the proprietor in his cell), followed by the Court's refusal to permit an appeal to the Queen in Privy Council against the charges; it is not in his power at present to say when he will be able to supply subscribers for the year 1859 with the papers due to them for the period paid in advance.—Debtor's Gaol, Hong Kong, 13th April, 1860."

The notorious Amer. ship *Messenger*, which left for Havana with coolies, has been the scene of a fearful tragedy on her passage down the China sea, and it is reported that upwards of 100 were shot. A notice will be found in our Java news of a similar catastrophe."

Mr. J. C. Power has been appointed to perform the duties of Colonial Treasurer during the absence of Mr. Forth, who proceeds to England on medical certificate. Mr. J. Lowe, R.N., has been appointed Marine Surveyor to Government, in the place of Mr. Loney, who also proceeds to England.

Mr. Murrow, the editor of the *Daily Press*, has been committed to take his trial at the criminal sessions for a libel on Mr. Caldwell, arising out of the publication of the following:—"If his acts were reconcileable to probity, or if his conduct could be explained, there might be a difference of opinion regarding him. This we submit to be almost impossible. 'The employment of such a man has naturally cast a stigma on the Government which sustains him.' 'His acts have been blended with extortion and perjury.' 'His great power of offence consists in the thralldom in which he holds the Chinese population who bear him in such dread that they cannot be induced to give evidence against him. The secret of this power has been attributed to his adroitness in trumping up cases against such as may fly in his face, and in obtaining false testimony to convict them of some crime real or imaginary. Over and over again has the magistrate's court of this Colony been the arena for these practices.'"

Messrs. Lyad, Sull & Co., have started a new steamer called the *Pei San* on the Canton river. She has been built at Whampoa by Mr. Cowen, and is constructed of molave, teak,

and Oregon pine. Length over all being 180 feet, beam 27 feet, depth of hold 9 feet. Total new measurement 350 tons, with a carrying capacity of 250. Draught of water 4 feet 3 in. forward, and 4 feet 10 in. aft. Her engines are a pair of "steeples," of 130 horse power nominal, from Messrs. J. and G. Thompson, of Glasgow. Her speed on the trial trip is announced to have been fifteen miles an hour, taking the average of a fair and adverse tide.

The Bishop of Victoria has conferred priest's orders on the Rev. W. H. Collins of Shanghai, and the Revs. T. S. Fleming of Ningpo, and G. Smith of Fuhchau, missionaries of the Church Missionary Society.

CANTON.

The Custom-house steamer *Cumfa*, manned by Europeans, fired on a Chinese boat, killing four men.

The price of rice at this port, and all others in the south of China, has risen nearly 100 per cent.

It is reported that the French have received from the Chinese about two millions of dollars. No further particulars are given.

MACAO.

The case of the *Emma* has been brought to the following conclusion by the umpire, Baron Cercal. The *Daily Press* says:—The matter was viewed upon its broad grounds as a wanton, illegal, and unjustifiable arrest admitting of no excuse nor clemency. Facts, estimates, and figures were allowed to settle the matter, and the award is, that the owners take the vessel back, and that Chun Ahoy pays 19,000 dols. damages, besides all the law expenses on both sides, together with consular fees, &c. The *idea* will cost the poor man 30,000 dollars at least, in addition to a world of anxiety and annoyance. At the same time, considering that the ship was nearly laden when she was arrested; that the owner and the master have been in Macao ever since, and that it will cost at least 10,000 dols. to put her to rights again, we consider the award a most righteous one, reflecting great credit on the umpire.

The coolie ships *Guadaloupe*, *Sigisbert Cezard*, *Brave Lourdmel*, and *Alexandre Delphine*, have all left for Havana with a great many coolies short of what they could carry.

COCHIN CHINA.

Vessels continue to arrive for cargoes of rice for China. There is no news of any further hostilities.

JAVA.

BATAVIA.

Most of the troops engaged in the expedition to Boni had returned to Java. There had been considerable mortality amongst these troops from the climate; and the hardships of the campaign. The greatest tranquility prevailed in Celebes and the treaties with Luwu and Wajo were expected to be concluded very soon. The accounts from Banjermassing represent affairs in that quarter as being still in a very unsatisfactory state, although it is thought that the rebels are rather losing ground. Well-informed persons are of opinion that the whole affair would soon be ended, if the chiefs at Banjermassing known to be favourable to Pangeran Hydayat were expelled, as little doubt is entertained that these chiefs keep him well informed of all that goes on at Banjermassing and of the intended operations against him. By an ordinance of the Governor-General in Council, dated 31st March, the importation of muskets and gunpowder into the ports of Sampit and Banjermassing is prohibited for one year. A Surabaya paper asserts that a proclamation has been issued at Banjermassing, by which the Sultan Tamjied Illah is declared to have forfeited his throne, and the Sultan's territories to have passed into the possession of the Dutch Government. Reinforcements of troops continued to be sent from Java to Banjermassing.

The Singapore and Batavia electric cable continues to work satisfactorily.

AFFRAY ON BOARD A COOLIE SHIP.

While the American ship *Staghound*, from China to Havana with coolies, was lying at anchor off Anjer, a disturbance broke out amongst the crew, the chief mate being mortally wounded, while other serious injuries were inflicted. The master, who was very unwell, applied to the English war steamer *Odin*, Captain Lord John Hay, for assistance, which was promptly given, a party being sent on board the *Staghound* which placed the mutineers in irons. Intelligence of the occurrence having been conveyed to Batavia, the steamer *Merapi* proceeded to

Anjer, and, taking the *Staghound* in tow, brought her to Batavia, where the affair is being investigated. The Batavia papers point out that it is desirable there should be a guard ship stationed at Anjer, where so many vessels of different nations touch on their way through the Straits of Sunda.

We regret to announce that notwithstanding the favourable memorial sent in by the merchants, Government has ordered the incarceration of Mr. Lion, editor of the *Handelsblad*, for a period of eighteen months.

MALACCA STRAITS.

SINGAPORE.

The *Singapore Free Press* says:—"Orders have recently been received for pushing on the completion of the barracks on Government-hill, and steps are being taken for acquiring a large piece of ground about two miles from town on which it is intended to form a cantonment for European troops. We should be glad to learn that similar measures were about to be taken for making this a permanent naval station. The central position of Singapore as a place of rendezvous seems to be recognised, but its utility would have been much increased had there been more adequate means for the refit and coaling of men-of-war and transports. The jetty which was taken from Mr. Clunis does not admit of vessels of large size going alongside of it, and they have therefore to be coaled in the stream or at one of the P. and O. Co.'s wharves. A very moderate outlay would have made the Government independent of all such assistance, and the enlargement and completion of the dry dock, commenced by Mr. Clunis, would have furnished the means of overhauling vessels coming off the long voyage round the Cape, or repairing ships on the station, instead of being obliged to send them to Batavia, like the *Esk*, or to avail of a private establishment, as in the case of the *Saracen*."

The Chinese pepper and gambier planters in Johore make great complaints of the increasing inconvenience to which they are subjected owing to the numbers of their coolies carried off by tigers. They say they have now great difficulty in procuring coolies in sufficient numbers, and we do not wonder at this, when we are assured by a respectable planter, that since 1st January, 1859, at least 1,500 Chinese have been killed by tigers in those parts of Johore where pepper and gambier plantations have been opened. On one river alone, inhabited by Chinese, no less than 400 men were killed during the above period. This far exceeds the rate of mortality occasioned by tigers in Singapore.

Another petition to Parliament for the transfer of the Straits Settlements to the Secretary of State for India is in course of signature.

A fresh importation of convicts had taken place from Ceylon, at which great complaints are made by the community.

PENANG.

His Honour the Governor has, during his short stay at this station, won golden opinions from all sorts of men, by the trouble he has taken in travelling over different parts of the Island and Province Wellesley and personally inspecting the various public institutions, the Government and Municipal works and public roads, by the improvements he has ordered or projected, and by his attention to representations made to him, whether official or non-official.

COMMERCIAL REPORT.

The mails arrived this morning bring dates from Hong Kong to 14th April; forty-three days *en route*.

Business continues to be in the same unsettled state as announced in our last. The rebels about Canton have very seriously increased their incursions, as also into the silk and tea districts in the neighbourhood of Shanghai, and everything indicates scarcity and increased cost of all China produce.

From Japan the advices continue to be unsatisfactory, and we have no advices of the shipment of silk or any other produce.

EXPORTS.

TEA.—It will appear by the above remarks that the tea districts are all somewhat interrupted. Foo-Chow, however, seems to form some exception; but even at this port the new teas will probably be 15 to 20 per cent. higher. They may be expected to reach Canton in the present month, provided the teamen consent to pay the black mail levied by the rebels. At Shanghai the settlements are announced at 12,000 chests Congou (say 2,500 chests Hohow, at 16 to 21 taels; 2,000 chests Ningchow, at

25 to 30 taels; and the rest contract teas). The stock remaining unsold is composed almost entirely of re-fired and repacked teas (say 4,000 chests Ningchow, and 3,000 packages trashy and common). Of Flowery Pekoe, 400 packages have been taken for shipment to London at 35 taels, leaving 1,000 packages in stock. Green Teas: the settlements of the fortnight have been upon a small scale (say 1,500 half chests and 1,000 boxes, one half being for London and the other half for New York. The stock unsold of country teas is reduced to 10,000 packages. A large quantity of Japan tea has been imported for the purpose of being manipulated and packed for export. The quality of the leaf is described as very poor indeed. At Foo-chow-Foo the settlements of the fortnight are confined to 1,000 chests and 3,000 half chests of Congou at fully previous rates. The remaining unsold stock is hardly five thousand chests of Congou, and one thousand half chests of Oolong, very little of which is fit for shipment. The *Star of the North* and *Troaz*, were expected to load for England, and will probably be the last ships for the season. At Canton, the following sales are announced. Congou: 2 chops (one a fine Oopack at 35 taels, and the other a good Oonam at 29 taels.) Oolong: 1,500 half chests at 26 to 27 taels. Souchong: 1,500 chests at 18 to 20 taels. Scented Teas: 1,500 boxes Orange Pekoe at 20 to 24 taels, and 2,000 boxes at 15½ to 17 taels. Canton Gunpowder: 2,500 boxes at 16½ to 21 taels. Leaving unsold upon the market, 5 chops Congou; 500 boxes plain orange Pekoe; 1,000 half chests Oolong; 150 chests flowery Pekoe, and 4,000 packages Canton greens.

RAW SILK.—In consequence of the unsettled state of the interior, the silk men have sent forward supplies which were intended for native use; but owing to the expected scarcity during the next season higher prices were demanded. Foreigners, however, were not inclined to meet this. The settlements of the fortnight are reported at only 1,500 bales. The unsold stock is estimated at 5,000 bales against 6,500 bales same time last year. The total settlements to date are 58,500 bales, or 13,000 bales less than at corresponding period last season, although this season's export includes 3,500 bales Japan. The following are the current quotations:—Tsatlee, No. 1 taels, 440 to 450 picul; 2, 415 to 430; 3, 395 to 410; 4, 370 to 385; 5, 350 to 360. Taysam No 1, 370 to 380; 2, 350 to 360; 3, 325 to 340; 4, 305 to 315; 5, 295 to 305. Throwns, best, 380 to 400; Layings, 380 to 395; Hong Tsatlee, 370 to 385; Shuhings, 290 to 320. At Canton: The demand is very limited, and movements of the marauders have caused the silkmen to remove their property to Canton for safety; prices have become much easier. The coming yield will be large, if not interfered with by the marauders, who have overrun the districts of production. Some rereeled Kumchook, suitable for shipment to the United States, has been settled at 450 dols. Other kinds can be had at a reduction, but no settlements are reported.

Drugs, &c., Canton: The transactions generally have been very limited. Cassia Ligna: 400 piculs have been taken at 17.75 to 18 dols., leaving 1,000 on the market; cassia Buds, nominal, at 35 to 36 dols.; cassia oil, nominal, at 325 dols.; star anniseed, no stock; anniseed oil, nominal, at 1.90 dols.; ve million: nominal, at 40 dols. Shanghai: Wool, scarce and wanted; rhubarb, none good to be had; camphor, none on the market and wanted.

IMPORTS.

AT SHANGHAI.—there is little change to notice in the import market, the bankers not yet having resumed the issue of money orders; the dealers are consequently unable to clear the goods which they had bought, to arrive, some time since. There has been some inquiry for English shirtings at 1.9.4 to 1.9.6 taels per piece for 6½ catty goods, but in the present unsettled state of our political relations, we cannot look for a steady demand for any description of manufactured goods. Stocks in the hands of importers are accumulating, as the deliveries are now falling off considerably, whilst three vessels with further supplies have arrived during the fortnight. A considerable quantity of goods out of the arrivals has been landed in a sea-damaged state, and will require to be sold by auction, which will further tend to depress the market. Coloured and fancy goods are quite unsaleable, with large stocks in first and second hands; for woollens, long ells, and camlets, there is no inquiry. Metals, also, are neglected, and iron is not likely to improve, the quantity on the way out being considerable. The deliveries of the fortnight are as under:—Shirtings:

25,000 pieces grey and 4,500 pieces white; T-cloths, 5,500 pieces. American goods: 7,000 pieces drill and 1,000 pieces sheetings. These goods were sold previously to the panic. The quotations given are the rates at which last sales were made, and are decidedly nominal.

AT CANTON.—Under the pressure of circumstances there has been more business done than might have been expected; but the contiguity of Hong Kong as a depot eases the Canton market, and prevents its being forced. The following are the sales of the fortnight:—Cotton yarn, 450 bales; shirtings, 3,500 pieces grey, and 500 pieces white; T-cloths, 1,300 pieces; American goods, 2,000 pieces drills; Woollens, 60 pieces long ells and 200 pieces lastings. Metals: iron—1,700 piculs nail rod, 500 piculs bar and bolt, 250 piculs hoop, and 200 piculs wire; Tin plates, 100 boxes; and quicksilver, 250 flasks. Straits produce: Rattans, 500 piculs; betel nut, 1,500 piculs; sandal wood, 100 piculs.

AMOI.—Sales for the month: Cotton yarn, 200 bales (stock, 500 bales); shirtings, 4,500 pieces grey and 1,500 pieces white; T-cloths, 2,000 pieces; woollens, 180 pieces Spanish stripe and 100 pieces camlets: metals, lead is wanted.

FOO-CHOW-FOO.—Sales of the fortnight: 4,000 pieces T-cloths, at 1.85 to 1.95 dols., and 1,000 piculs lead at 8.20 to 8.30 dols.

AT MANILA.—The expected direct supplies of British manufactures still kept out—stocks consequently continued small, and sales to arrive had been made to a fair extent at remunerating rates. The small stock on the market, and the usual interruption to business caused by the Easter holidays had naturally resulted in the transactions in imports being restricted. The demand was, however, considered buoyant, and prospects encouraging. The Export market.—Sugar: Current clayed. The only transaction reported since last mail is a contract for 4,000 piculs, deliverable within two months, at 5.75 dols per picul, and at this price dealers are sellers of a considerable quantity, but shippers generally hold off. Last sales of province sugars show a small decline, say Taal, 3.50 dols., and Zebu and Yloylo 3.81½ dols. per picul. Coffee.—A small sale is reported at 14.28 per picul. Hemp.—Receipts continue large, those to 31st ult. having been 153,251 piculs against 135,180 piculs in the same period of last year, quotations are rather lower, say 4.25 dols. and 4.31½ dols. per picul for current quality, and 4.65 dols. and 4.75 dols. for good.

AT SINGAPORE.—The transactions in European manufactures have been on an unusually small scale during the fortnight, and the Junk traders do not appear to have commenced their purchases as yet. Stocks generally are not very heavy, as will be seen from the annexed list, and importers are not disposed to give way in prices in face of the high cost of goods in the home markets, so that prices have undergone little change. In exports during the early part of the fortnight little business was done in produce, the expected rise in exchange, and extreme scarcity of money preventing operations at late prices. Within the last few days, rates have given way, and purchases to fair extent have been made of most of the principal articles.

EXPORTS FROM MANILA.

Per *Julia*, to London: sugar, 5,836 piculs; hemp, 1,900: sapan wood, 193 coffee, 10.
Per *Prince of Wales*, to London: sugar, 4,239 piculs; hemp, 3,728; coffee, 211; cigar, 195 mila.
Per *Etius*, to Liverpool: sugar, 7,625 piculs; hemp, 1,924; sapan wood, 366; M. O. P. shells, 253.
Per *At night*, to New York: sugar, 8,733 piculs; hemp, 8,370; sapan wood, 550; coffee, 400; cigar, 610 mila; indigo, 88 qqls.

The following shows the intended departures of mails, by the P. and O. Co.'s steamers, &c. From Shanghai, Foo-chow-foo, Amoy, and Manila, the

mails are despatched from four to seven days before the date of departure from Hong Kong. The mails from Java, Siam, and Borneo, are despatched via Singapore, and the mails from the latter place leave from six to eight days later than Hong Kong. The departures from Hong Kong for the ensuing year will be:—

Feb. 15 and 27 ..	June 5 and 22 ..	Oct. 13 and 29
March 15 and 30 ..	July 5 and 22 ..	Nov. 15 and 28
April 13 and 23 ..	Aug. 10 and 24 ..	Dec. 15 and 30
May 5 and 22 ..	Sept. 12 and 28	

Arriving in London, via Marseilles on the 12th to 15th, and 26th to 29th of each month, and via Southampton five days later.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From Liverpool, April 5, Hurricane. From London; March 23, Heroes of Alma.

At Hong Kong, MACAO, and CANTON, from London, April 6, Lincelles; 14th, Mary Shepherd. From Liverpool, 10th, Ellen Rogers. From Cardiff, 14th, E. D. Stringer; 13th, Free Trade. From Newcastle, 9th, Maria Frederick. From Sunderland, March 31, J. Vinnicombe. From New York, 6th, Benefactor, Egeria. From Boston, 9th, Reliance; 14, Mary Shepherd.

At SINGAPORE, from London, April 9, Balaklava, H.M.'s steamer Odin; 14th, steamer Mauritius; 17th, H.M.'s steamer Vulcan. From Liverpool, 10th, Sebastian Cabot. From Cardiff, 6th, Aristidis. From Swansea, 20th, Albert Cezard. From Portsmouth, 7th, H.M.'s steamer Sphinx; 12th, H.M.'s ship Encounter. From New York, Dolphin.

SAILED.

From SHANGHAI.—For London: March 29, Countess of Seafield. For New York: 26, Red Gauntlet.

From Hong Kong, MACAO, and CANTON.—For London: April 4, Marchioness of Londonderry; 6, Alchymist. For England: 4, Rannymede. For Liverpool: March 28, Corea. For Hamburg: April 5, Felix. For Cowes: 6, Gem of the Nile; For London: 29, Sir R. Abercrombie.

From MANILA.—For London: March 28, Julia; April 3, Prince Charlie. For New York: March 30, Hingleader.

From SINGAPORE.—For London: April 7, C. Agnes; 16, Wild Flower. For Liverpool: 9, Glengariff, Eudymion. For Marseilles: Gerunda. For Boston: 10, Andes.

LOADING.

At SHANGHAI.—For London: Beauvoir, Berwick Walls, Constantia, Sir G. Pollock. For New York: Bureka, Urania.

At Hong Kong, MACAO, and CANTON. For London: Alchymist, Carnatic, Carica, Sir Ralph Abercromby. For Europe: Malacca. For Havana: J. Wakefield, Live Yankee, Governor Moron, Santa Lucia. For Sydney: Fides, Petronella. For San Francisco: Early Bird, Lizzie Spalding, Leonidas, Benown, St. Helena, Viking.

At MANILA.—For London: Britannia. For Liverpool: Elias, Oshawa.

At SINGAPORE.—For London: Blawatha, Zambia. For Liverpool: Sebastian Cabot. For New York: C. C. Dow, Resolute. For Boston: Rocket.

PASSED STRAITS OF SUNDA.

From China to England and Continent: March 25, Maori; 26, Osprey; 27, Yaratilda, Saxon Ville; 31, Dominion; April 3, Bantam; 6, Kamehameha, IV. To New York: Beaver. To Sydney: March 29, Continent; April 1, Collingwood; 2, Juverna; 5, Minehaha. To Havana, March 30, Stag Hound. From Singapore to England and Continent: 28 Oceania; 31, Caledonia. From Manila to London: April 1, Ewaretta; 3, Joquina. To Boston: 6, Belle of the West. To Havana: Carmencia. To Melbourne: 3, Olympia. From Melbourne to Hong Kong: March 25, Benjamin Heape.

FREIGHTS AND CHARTERS.

At SHANGHAI.—For London, cargo scarce. £2 10s. for tea, and £3 10s for silk. For New York: 20 dollars for tea, and 20 dollars for silk. Tonnage is in demand, but there has been little done in coasting, owing to the want of vessels and the increased rates. The few large ships unsettled are withdrawn from the market, expecting not to be chartered by Government.

At Hong Kong, MACAO, and CANTON.—For London, £3 to £3 5s. For New York, 10 dollars. For Sydney and Melbourne, £3, and passage money to San Francisco about 32 dollars net. Every vessel is employed either by Government, or for the rice trade, principally for Saigon and Amoy at 60 to 80c. Charters are still open for Government at 22s. per ton per month, and ships are required at all ports. The Carnatic and Carica are loading for London at the above rates from Whampoa. No ships are on the berth for New York. The Fides is chartered for Sydney and Melbourne for £2,300. Should the war not be continued the amount of tonnage in the market will be very considerable, and with the S. W. monsoon rates will run low.

At MANILA.—The Malay is the only vessel on the berth, and there have been no transactions for Europe or United States since our last.

At SINGAPORE.—For England: £2 10s. dead weight, and £3 light goods. Rice charters to Hong Kong at 62 to 70 cents. Very few disengaged vessels in port.

CASUALTIES.

The following is a description of the reef in the China sea on which the clipper ship Fiery Cross, of Glasgow, struck, on the night of the 4th of March last. It lies in lat. 9 deg. 32 m. N., and long. 112 deg. 47 m. E., and is about a mile in extent, with the direction north-east and south-west. When the vessel struck there was no broken water, nor any appearance to indicate a shoal. At low-water several small rocks or stones were a-wash, one about two or three feet above water. The Fiery Cross struck near the north-east end of the reef.

HONG KONG.—The steamer Shamrock, of Macao, on her passage from Amoy to Hong Kong, was run on shore through the incapacity of a Chinese pilot, on "said bar," under Black Head, near Namoa, on the 23rd of March, and was abandoned. Crew rescued by the gun-boat Kestrel.

NINGPO.—Mr. Davidson's lorch, Silvery Cross, has been taken by pirates in Bullock Harbour, the master and other Europeans, and one

Chinaman, who were on board, have been murdered, the rest escaped. There many pirates cruising between Ningpo and the Yang-tz-kiang.

SINGAPORE.—The American ship *Marion*, for Hong Kong, sprung a leak when a considerable way up the China Sea. She is also stranded, and all her sails having been blown away the commander deemed it prudent to put back.

The steamer *Carthage*, whilst coming out of New Harbour, bound to China, got unfortunately into collision with H. M.'s ship *Sphinx* (which vessel was lying at anchor in the middle of the stream), and did some damage to the ship of war. The *s.s.* *Carthage* left with the ship *Votign* in tow.

The *Westminster* on her passage from London to Hong Kong, when nearing the Straits of Sunda, on the 31st Dec., experienced bad weather, the report of which is as follows:—"At six the gale was increasing, and two reefs were taken in the topsails and furling the jib, expecting some sudden change from the barometer falling suddenly, it having fell to 29.60 in a short time. At eight hauled up the main course, thinking to have it set in liberty, but before the men had time to get off the decks a terrific squall struck the vessel at N. by W. She was kept right before the wind, or the whole of the masts must inevitably have been carried away by the terrific force of the blast as it passed over the ship and was immediately followed by a flash of lightning, with a deafening peal of thunder, and in less than three minutes the ship was a wreck. The three masts and foretop-mast, and foretop-mast staysail were completely blown away, and the foresail split to ribbons, main royal mast and foretop-mast stay-sail blown away, also the cross-jack yard and mizen topsail yard, fore-tack and fore-topsail sheet, fore list, cross-jack brace, maintop-sail brace, bitt line, and topsail bunt tie, and a few fathoms of some of the sails, the gear being quite new, all snapped like whip-cord with the force of the wind. Had the squall been five minutes later, the whole crew would have been on the yard when it was carried away, or five minutes sooner, the square mainsail would have been set. The most astonishing thing was, that the whole of the masts were not taken clean out of her. At noon, the same day, the sea had increased, and a very confused sea was running; the ship laboured and rolled tremendously in consequence of no canvas being set to steady her. The pumps were promptly attended to, the main deck being completely deluged with water, tearing every moveable on deck away."

THE FILIBUSTERING EXPEDITION OF TAM ACHOY AND CAPTAIN BAKER FROM HONG KONG TO THE CHINESE VILLAGE OF SUN-NING.

Our readers may perhaps have forgotten this affair, which occurred in January last, but as we believe there is some intention of bringing the matter before Parliament, we give the three articles on the subject published in the *China Mail*, at Hong Kong, which throw considerable light on the matter. The narrative of the expedition, gained from other sources, is as follows:—The British steamer *Sir Jamsetjee Jeejeebhoy*, of Hong Kong, accompanied by about a dozen lorchas, manned by foreigners and Chinese, proceeded to the village called Chou Chin, a few miles down the west coast. The villagers, or alleged pirates, mustered some 4,000 strong, and on the landing of a portion of the crews they were met and driven back to their boats, losing three Europeans; viz., George Millican, an Australian; George Robinson, and George Levet, Englishmen, and thirty-seven Manilamen and Chinese. After this the villagers proceeded to inflict cruel chastisement on the surrounding villages which were suspected of having aided and abetted the attack, and it is said killed men, women, and children, and burned their homesteads. These are the facts of the case; comment must be reserved:—

We have frequently called the attention of our readers to the system of clan fights which exists on the mainland. Something of this kind had been going on for a long time in some villages to the west of Macao, between the Hakkas and Puntis; Tam Achoy, one of the latter, is a noted resident of Hong Kong, and he lately took it into his head to charter a steamer flying the British flag and to engage a number of European sailors, Manilamen and Portuguese, in order to attack the Hakkas, under the allegation that they were pirates. His party were repulsed, and three of the Europeans, with a number of the others, were killed. He intended to organise a larger expedition, but fortunately the Hong Kong Government got intelligence of it, and Tam Achoy, with the captain of the steamer and the men who had engaged in fighting, were arrested and brought to trial for violation of the foreign enlistment act. They all appear to have acted in ignorance, and are not to be harshly judged; but it is evident that this buccaneering interference with the affairs of China cannot be allowed, even though the example has been set by some of her Majesty's gunboats under the direction of the so-called Protector of Chinese. — *China Mail*, Jan. 30.

Tam Achoy, with the captain and mate of the steamer *Sir Jamsetjee Jeejeebhoy*, and nearly a dozen seamen accused of participating in the attack on the villagers at Sun-ning, have been committed for trial at the Supreme Court, on a charge of misdemeanour, that of murder having fallen through; but it will remain for the acting Attorney-General to determine on the precise character of the charge to be brought against them. Great credit is due to Mr. Jarman and the police department for the manner in which this case has been investigated and brought before the Attorney-General. There were great difficulties in the way of obtaining evidence, but no time appears to have been lost in inquiring into the affair and following up every clue which could be availed of in the interests of justice and of public safety. Messrs. Bridges and P. H. appeared for the prisoners, and Mr. Kingsmill did not strain his legal acumen in arguing against them, so they have had every opportunity of fair play, as they will, doubtless, have every reasonable

all chance made in consideration of the pecuniary position. The expedition against Sun-ning was only the natural development of the system of attacking alleged pirate fleets and villages with English gunboats, on very insufficient information as to the real facts of the case, and of interfering with Chinese quarrels, which can be far better settled by the natives themselves. Mr. Caldwell was the official here best fitted to discriminate between pirates and others; yet even he had the almost incredible stupidity to direct Captain Bythesea against Nantow, because of acts committed by a junk in the legitimate action of the Chinese customs. The Nantow people came to Hong Kong and engaged a lawyer to prosecute in this matter; but they must have been bought off, for when everything was clear before them, and judgment in their favour, they suddenly left the place and gave up the prosecution. Under most governments Mr. Caldwell's conduct in this affair would have met with strict investigation and severe reproof, but so far as the public are aware he may have been praised for it. When an unfortunate newspaper editor in this place makes a mistake, the authorities come down upon him with all the rigour of law, but they appear to take no notice of the misconduct of their own servants, even should such extend to something very like piracy. When gunboats attack the agents of the Chinese Government on the plea that they were pirates, it is not to be wondered at that other vessels should follow in their wake, and that Tam Achoy should seek to avail himself of European aid in his village quarrels. On the part of the coast from which he comes there has been long-standing feud between the Hakkas and Puntis. The former are the "Strangers" in the land, having come down at different periods mostly from Fokien, and cultivated waste lands. They are ruder and more savage than the Puntis, but are generally blameless in the origin of quarrels, as the latter have a bad habit of claiming the land which the Hakkas have brought into a state of cultivation. It is impossible for Europeans to determine who is right and who is wrong in these quarrels; even the Chinese Government allows them to be worked out by the people themselves. Tam Achoy did not act blindly in chartering the *Sir Jamsetjee* and in fitting out his expedition, for he was warned against it before he engaged the steamer, though he may have got advice from another quarter in support of his proceedings. It has transpired that the engagements made (if there were any, for we do not wish to prejudge the case) with a man in Hong Kong were concluded by an Italian and a Chinese man, both of whom, perhaps fortunately for Tam Achoy, were killed in the fight, but whether or not they were in the first rank we cannot undertake to say. Morally speaking, this case is in no way different from that on account of which Eli Boggs was condemned to ten years' imprisonment. — *China Mail*, Feb. 2.

TRIAL AT THE SUPREME COURT.

The case of Tam Achoy, Captain Baker, and a number of American and European sailors who had engaged in a raid against a Chinese village near Macao, came before the Supreme Court on Tuesday last (21st Feb.), and resulted in their pleading guilty of the misdemeanour with which they were charged. The Court, on consideration of the circumstances, took a lenient view of the case, and only bound them over to appear for judgment should they be required by their again engaging in an undertaking of the same kind. To this judgment we have no objection to make; it is well that the offenders have not been further punished; but there are some undeniable aspects of the case which are worthy of a little publicity and notice. A contemporary has stated that the case "was quashed on law points;" but if it was, that has not appeared; while more important facts, which have been long known to us privately, were brought out in court. This act of misdemeanour, to which the parties pleaded guilty, with the more serious buccaneering raid in which they were engaged, were not conducted in an unscrupulous manner, nor with any encouragement which many men would consider sufficient. Before starting his expedition, Tam Achoy, like a good citizen, consulted through Mr. Caldwell, the Government of this Colony on the subject, and received no warning or information which might have kept him out of the scrape. It is difficult to say whether or not he received any actual encouragement. This fact was put forward by the prisoners in their affidavit in mitigation of punishment, and an affidavit of similar tenor was made by the protector of Chinese himself! It is difficult to say exactly how far these affidavits affected the Government, for unfortunately, both for himself and for the Government, Mr. Adams, the Acting Chief Justice, departed so far from the usual ruling in such cases as to refuse copies of these affidavits, when application was made to him, although they had been put in by the prisoners in mitigation of punishment, and had been read in open court! We feel assured that Tam Achoy's application was never referred to his Excellency the Governor, and also that if it had been, his Excellency would never have been so actuated by dread of doing anything in Hong Kong as to allow respectable men to all into crime, rather than commit himself in any way, nor by such an insane desire to meddle with Chinese affairs as to give a slightest countenance to European interference in disputes on the mainland. To the best of our belief Mr. Hercules Robinson has conducted himself in this matter in a manner worthy of his high position; and if, as these affidavits appeared to assert, certain officials have compromised the Government to some extent, and given encouragement to lawless and illegal acts, we can only trust that their official superiors will see exactly what their qualifications are, and how far their experience is to be relied on in this place. So far from having been quashed on legal points, the prosecution in this case has been carried through many difficulties to a successful, and, on the whole, a satisfactory, issue. These affidavits leave the matter in a very dubious and suspicious light as regards Mr. Caldwell and one of his superiors, while the refusal of Judge Adams to give copies of the affidavits, even if there were good reasons for such a departure from ordinary rule, does not serve to enlighten the aspect of the scene; but these are matters of more importance to the Government service than to the public, which, we trust, has now seen the beginning of the end of ignorant and illegal raids upon Chinese villages. — *China Mail*, Feb. 28.

RE-INFORCEMENTS FOR CHINA.

Since our naval and military intelligence was in type tenders have been announced for the conveyance of nearly 1,000 troops for Hong Kong from Cork and the Thames. Four officers and 192 men of the 2nd battalion 60th Rifles form part of the same.

Continental Intelligence.

FRANCE.

PARIS, May 25.

There are three political questions that now occupy the public mind in France. Each of these three questions is as unanswerable as it is important, and is difficult of probable solution exactly in ratio to the mystery and love for unexpected and surprising effects which have for some time past characterized the diplomacy of the Emperor upon all occasions. The first of the three is—what is the real meaning of his newly-born desire for a *rapprochement* towards Prussia and Austria? Secondly—what is he about to do in conjunction with Russia, and probably other Powers, respecting Turkey? and thirdly—what are his intentions with regard to Garibaldi and the Sicilian business?

Upon the first point, were he anybody else but Louis Napoleon, the world would at once say he was a wise and prudent sovereign, using all the influence of his high position for the benefit of his people. Somehow or other there are many who cannot yet get rid of the habit of always suspecting him of ulterior motives, and so he gets invidiously talked about, even in his best moments.

It appears that the Cabinet of the Tuileries recently made overtures to the Courts of Vienna and Berlin, based on the interests of France, and testifying the now ardent desire on the part of that State to come to an understanding with Germany and its two Great Powers. After giving the most positive assurance that France had not the least idea of obtaining any modification of her eastern frontier, great stress was laid on the numerous interests, political and material, which rendered a good accord between France and Germany most desirable for both parties, and hopes were expressed that Austria and Prussia would duly appreciate this advance on the part of France, and meet it in a friendly spirit. It is probable that the overtures at Berlin were still more precise, for while all that passed with Vienna was between the Cabinets, the advances were made at Berlin by an autograph letter from the Emperor Napoleon. The answer from the Cabinet of Vienna to these communications was given in very general terms, expressing satisfaction at having received them, and stating that the propositions as to the manner of establishing and developing closer relations between France and Austria were awaited with great interest. At Berlin the Prussian Cabinet declared that it highly appreciated the overtures of France, based on relations already established, and further indicated the starting points for a free extension of commercial relations, which Prussia would hail with satisfaction. The Cabinets of Vienna and Berlin sent their respective answers without communicating on the subject.

The rest is in the future, but all sorts of motives are imputed. Time must show what it all means.

Upon the second point it has long been noticed that a much closer intimacy has been springing up between the Courts of the Tuileries and St. Petersburg, and it has been known that a correspondence has been going on respecting the conduct of Turkey, and how far she has kept or utterly disregarded the treaty by which she bound herself at the close of the Crimean war in 1856, to behave better to the Christian population inhabiting her territories. There is no question that in many respects the treaty has been to the poor "infidel dogs" (as the mild Turks call us) nothing but a cruel delusion. It has therefore been determined to hold a conference upon the subject, and it is reported that Lord John Russell, to the great satisfaction of both France and Russia, has intimated, on the part of the British Government, that he sees no objection to such an inquiry taking place. There is no doubt that the Russian war took place, not for the preservation of Turkey, so much as for keeping back Russian aggression. Something will, therefore, probably be done to ensure the Turks behaving a little better in future. They have hitherto shown themselves a terribly bad principled lot from high to low, and it is not surprising that their former friends should be getting ashamed of the acquaintance. Certain it is, that a French and Russian squadron are going round to the Bosphorus.

Upon the third question, Louis Napoleon is said to maintain a solemn silence. It is said that he is aiding the patriots, in order to make a throne for the Murats; that he is going to smother the revolution as soon as it suits his purpose; that—but it is useless repeating all the vague rumours abroad. The probability is, that he is just waiting quietly to see what course will best answer his purpose, and that at the present moment he knows no more for certain than the rest of the world.

Prince's Clothilde is announced, by the *Gazette de Sarajevo*, to be en route. The first general meeting of the shareholders of the Suez Canal Company was held in Paris, at which M. de Lesseps, president of the board of directors, presented a very long report, stating all the facts which have taken place from the commencement of the undertaking up to the present time. He quoted official documents to show that opposition had been shown by the English Government to the execution of the canal, and accused English diplomatists of intrigues against the undertaking, both in Constantinople and in Egypt. To that policy M. de Lesseps was able, he declared,

to oppose the firm language made use of by the French Government with regard to the undertaking. The report met with the unanimous approbation of the meeting.

A show of carrying on works in the Suez Desert is still kept up; but everyone is agreed that it is nothing more than a mere pretence, and that not the slightest real progress is made.

The destination of the *Casard* is at length made public. She is to proceed forthwith to Canada and New York, with Prince Napoleon on board.

The *Gazette du Midi*, of Marseilles, publishes the particulars of the mail service to be started between Toulon and China. The Government has determined not to form any establishment on neutral ground, but to a range the service as follows:—A vessel is to be moored in the harbour of Alexandria, and is to serve both as a magazine and temporary hospital. The captain in command of this ship is to have three lieutenants under him, one of whom is to have charge of a second vessel, to be stationed at Suez; a naval commissary is to be attached to the Alexandria station and an assistant commissary to the other; a number of clerks, two medical officers, and two priests, are to form part of the service. This organization, it is said, will not only enable everything that is required for the army in China to be done with facility, but will afford accommodation for invalids, who may repose at either on both of the stations referred to; it will also allow a stock of provisions equal to several months' consumption of the expedition to be always on the road. The mail service is to be performed by two vessels in the Mediterranean, and four in the Red Sea and Indian Ocean.

RUSSIA.

The Emperor Alexander is expected in Warsaw in the course of the month, and it is believed his majesty will go afterwards to Berlin. An army of 150,000 men is marching to occupy the kingdom of Poland, and the provinces nearest to Turkey. Since the war in the Crimea Russia has paid great attention to Asia. She is attentively watching all that is passing both in the north of Asia, in China, in Tartary, and even in Central Asia. The internal disputes between Dost Mahomed Khan of Cabul on the one hand, and the inhabitants of Khiva and the Turcomans on the other, facilitate the intervention of the cabinet of St. Petersburg in the internal affairs of that country. The Khan of Khiva will shortly enter into intimate relations with our Government, which will, probably, protect him against the invasion of the Turcomans, those wandering robbers who plunder and burn the property of the inhabitants of Khiva, and lay waste that fine country. An envoy from the Khan of Khiva is expected at St. Petersburg, where he will establish himself permanently.

EGYPT.

In consequence of the late heavy rains serious damage has been done to the railway. A portion of the embankment in the Desert over an extent of about six miles has been more or less washed away, and telegraph posts have come down, thereby interrupting the communication with Suez. This part will soon be remedied, but the injury done to the embankment will be more difficult to repair, and it is said will require at least fifteen days' labour of some 2,000 men.

WEST INDIES.

DEMERARA.—There have been numerous arrivals of immigrant vessels since the departure of the last mail. The *Red Riding Hood* has arrived in 71 days from China, with 811 Chinese; the *baque St. Croix*, 94 days from Calcutta, with 172 coolies; the *barque Priam*, 69 days from Madras, with 257 coolies. These immigrants were in reality from Calcutta, having been taken from the *Devonshire*, which was dismantled on her voyage; the ship *Ca tiepe*, 91 days from Calcutta, with 325 coolies and 30 captured Africans; and the ship *Colgrain*, 86 days from Madras, with 291 coolies, making a total of 1,886 immigrants who had arrived in a fortnight.

UNITED STATES.

NEW YORK, May 12.

ARRIVAL OF THE JAPANESE EMBASSY.

The United States' frigate *Roanoke*, with the embassy dispatched by the Court of Jeddo to Washington, arrived at Sandy Hook on the 9th inst. Her commander was then intercepted by dispatches from the Navy Department, directing him to proceed to Hampton Roads, Virginia, where a vessel would be in readiness to convey them to their destination. The Japanese party appear to be gratified with the courtesy and respect with which it is treated, and with the novelty of its surroundings. The officers of the ship express themselves as greatly pleased with the strangers, whose manners are the perfection of politeness and dignity.

The city authorities have appropriated 30,000 dols. for their reception. The reported decease of Consul General Harris at Japan is not credited. The Messrs. Leland, of the Metropolitan Hotel, are to come in for their share of the 30,000 dols. which the municipal authorities have appropriated to defray the expenses of the reception of the Japanese Embassy. The first floor of the Metropolitan will be set apart for the use of the distinguished guests as long as they may remain in the city. It is intended that the reception shall be more brilliant than any ever extended by the city to those who have been its guests in times gone by.

On the Coolie traffic, the *New York Times* has the following:—

"Our only present rivals of importance in the nefarious traffic are the Portuguese, Chinese and North German vessels, in 1856, followed the example of China and England, and made the trade illegal. But so long as

the marine flag covers this cruel and cowardly commerce, it must continue to be carried on with all its actual incidents of a crime and sin. Immediate and vigorous action on the part of Congress must result in its almost instantaneous suppression; and that action should clothe our civil agents in China with authority to put the enormity down with all the power of our naval forces in those seas. Circumstances having finally shifted the responsibility of this great wrong mainly upon our shoulders, it rests with ourselves to vindicate our national reputation, by acting at once in the premises as becomes our Christianity and our civilisation."

COMMERCIAL.

Since the date of our last letter, the movements in East India and China produce have been on a moderate scale.

TEAS.—The market at both public and private sales have been active. The auction sale of the 2nd inst. drew a good attendance, and went off with spirit, nearly all the lots on the catalogue were sold. Another public sale was held on the 4th inst., at which all the goods were sold at better prices, while the blacks were largely withdrawn. The late news from Shanghai of limited supplies with some increase in the rebellion, has had the effect of causing increased firmness on the part of holders. At private sales during the past week, the sales embraced 2,500 packages of green, and 5,300 packages of black Oolong, Anka, and Souchong. The blacks chiefly, per *Mauny*, at all prices.

MANILA HEMP.—There has been considerable movement in this article during the past week. The sales embraced about 7,844 bales to arrive here per *Aurora*, at about 6c. per lb., and 1,810 ditto now lan from the *Tsar* at 6½, and 250 ditto from store, at 6½c., and 1,000 ditto, at private terms. At Boston 3,000 bales were sold, to arrive 6½c., 8 months. The imports from foreign ports into New York, from January 1st to April 30th, have reached 52,934 bales; ditto coastwise, 3,531 bales; total, 56,465 bales.

SALT PETR.—The market is firmer, while sales are limited. Sales of nitrate so a w r ma ing at 4½, 6 months.

SUGARS. Calcutta limited is quiet, while prices are firmly maintained; 5,000 to 6,000 bags of the *Guinea Star's* cargo sold in Boston, at about 17½c in cash.

GUNNY BAGS are in good demand, with an advancing tendency in prices. The sales at Boston comprised 1,200 bales of 420 to 440 lbs., at 10½ to 11c., and 600 ditto; 430 of 440 lbs at 10½c., 6 months.

GUNNY CLOTH continues quite firm, and 410 bales have been sold in Boston on the spot, and to arrive at 13½ to 14c. less 3 per cent. for cash. At the close none were to be had under 14c.; and to arrive it was held at a higher figure.

FIRE CRACKERS are in full supply; sales 3,000 boxes. Canton No. 1, 40 packets sold at 1 do. 40 c. to 1 dol. 45 c., 4 and 6 mos.

INDIGO.—The market continues firm for all descriptions, and Gantania and Caracas are scarce; sales, 25 cases. Manila, 42½ to 120 c. 6 mos.

SPICES continue in very moderate request, with sales of 25 cases; nutmegs at 45 c.; 1,200 mats Cassia, 17½ to 18; 103 bags pepper, 8½ 6 m.

SUGAR.—An active demand during the past week both from refiners and the trade, and closed at 3 to 3½, an advance on the sale of the market. The sales reached 9,000 to 10,000 hhls., chiefly Cuba and Porto Rica. The stock of Manila in first hands is reduced. The export of cotton domestic piece goods exported from New York to China the past week ending the 5th inst. embraced 4,720 bales of the value of 246,106 dols.

The high tariff introduced by the Republican party for political effect is undergoing discussion, but there is no hope of its passing this session. It has been got up to catch the votes of the iron and coal interest in Pennsylvania, and if it should pass the House it will stand no chance to go through the Senate. Among other provisions, it proposes to largely increase the duties on gunny bags and cloth, and on jute and Manila hemp.

The home market keeps easy with an ample supply on call at five per cent., while first-class short paper is sought at six to seven per cent.

EXCHANGE.—The quotation on London 9½ to 9¾ per cent. premium.

ARRIVALS.—Poston Light Crowell, at New York, April 28, from Whampoa. Veteor, Melville, at Boston, April 28, from Calcutta. Emma Jane, Wood, at New York, April 29, from Calcutta. Tsar, Jenkins, at New York, April 29, from Manila. Digby, Creer, at New Orleans, April 30 from Aden. Eliza, Oble at New York, May 6, from Bombay. Philomela, Barry, at Boston, May 7, from Singapore.

DEPARTURES.—Revely, Plumer, from New York, April 25, for Penang. Fruiterer, Stone, from Boston, April 25, for Bombay. Granada, Dreyer, from Boston, April 26, for Port de Galle. Evangeline, Bartlett, from New York, April 30, for Melbourne. Daniel Sharp, Cushing, from Boston, May 4, for Melbourne. Brewster, Clark, from Boston, May 7, for Bombay and a market.

LOADING.—For Shanghai: Horatio, Western Continent. For Shanghai and Hong Kong: Onwa, Surprise. For Hong Kong: Barque Maury, Norway.

Parliamentary Intelligence.

HOUSE OF LORDS.

PROTESTANTISM IN TURKEY.—THE OUTRAGES IN ONE OF THE MOSQUES IN EGYPT.—(11.) Lord STRAIFORD DE REDCLIFFE, in presenting a petition, drew attention to the state of Protestants in some parts of the Sultan's dominions on which some remarks were made by Lord Wodehouse and the Archbishop of Canterbury.—In reply to a question by Lord BROUGHAM, Lord WODEHOUSE strongly denounced the conduct of certain English travellers at a mosque in Cairo and stated that her Majesty's Government had authorised the consuls in case of a repetition of such outrages at once to bring the offenders to justice.

THE DELAYED GUNBOATS.—(14.) In granting some returns moved for by Lord HARDWICKE, the Duke of SOMERSET gave similar information to that communicated on the 12th inst. by Lord C. PAGET to the House of Commons.

INDIA.—(15.) The Marquis of CLANRICARDE, in a lengthy speech, called the attention of the House to various subjects in connection with our Indian Government. He proceeded to consider the constitution of the legislative

body, and contended that the present state of our finances in India imperatively called for improvement in it. He then briefly adverted to Mr. Wilson's financial schemes, and the recall of Sir Charles Trevelyan from the governorship of Madras. Lords Ellenborough, Lyveden, Stanley of Alderley, and the Duke of Argyll took part in the debate.

THE EXPEDITION TO CHINA.—(21.) Earl GREY wished, before the business of the evening commenced, to put some questions to the noble Earl (Granville), of which he had given him notice. He wanted to know, first, whether or not the expedition sent to China would be at the charge of the British Government from the date of embarkation; next, whether the English regiments sent to China would be entitled to Indian pay and allowances while serving in China with troops from India; and, thirdly, whether any provision had been made for placing the expenses of the Indian regiments and the extra pay of British regiments serving in China in any estimate laid before Parliament.—Earl GRANVILLE, replying in a low tone from a written document amid some confusion, was understood to say that the troops serving in China would be entitled to Indian pay and allowances, and that there was no such estimate as the noble Earl had referred to.

HOUSE OF COMMONS.

MARINES AND SAILORS ON THE CHINESE STATIONS.—Sir DE LAOY EVANS asked the Secretary to the Admiralty the number of marines and sailors now on the Chinese stations.—Lord C. PAGET said he would be happy to give the gentleman the number in private.

CHINESE GARRISONS.—Sir DE LAOY EVANS inquired what was the strength of our garrisons at Hong Kong and China.—Mr. S. HERBERT replied that the garrisons of Hong Kong and Canton comprised three batteries of artillery consisting of 292 men, three companies of Royal Engineers containing 268 men, and a battalion of European troops 735 strong. There were also three battalions of native troops containing 1,639 men, who were to be relieved by an equivalent force; and orders had been given that the English soldiers who were sick should be sent home, unless urgent affairs required that they should be retained there some time longer.

THE DELAYED GUNBOATS.—Lord C. PAGET, in reply to Mr. W. Ewart and Sir J. Pakington, gave a detailed statement of the number of the contract gunboats and mortar boats decayed, the extent of the decay, the number of boats repaired, and the number afloat (40) which had not shown symptoms of decay, adding that defects had been discovered in some of the Government boats which had to undergo repair. He then referred to the inspection, and the system of check provided against bad materials or bad workmanship, and added, that the Admiralty were most anxious to bring to justice any parties guilty of fraud, and were taking legal advice as to whether they had power to prosecute.—Sir C. NAPIER asked indignantly for the name of the builder who had used short bolts, and the name of the inspector.—Admiral DUNCOMBE observed that two years ago he could poke his umbrella through the bottom of these gunboats.—Mr. Duncombe, Sir F. Smith, and other members took part in the discussion.

THE GOVERNORSHIP OF MADRAS.—RECALL OF SIR C. TREVELYAN.—Mr. Danby Seymour made a statement eulogising the character of Sir C. Trevelyan and inquired whether it was true that he had been recalled from the Governorship of Madras. Sir C. WOOD stated that the Government had felt it their duty to recall him, a duty which they performed with regret. The ground for his recall was quite independent of the merits of his scheme, it was simply on account of his most improper act in publishing his minute. Mr. BRIGHT and other speakers bore testimony to Sir Charles Trevelyan's character and abilities, but concurred with the Government on the necessity of recalling him.

CHINESE CUSTOMS.—Mr. WYLD asked the Secretary of State for Foreign Affairs whether the Earl of Elgin, while at Tien-tsin, made any arrangements with the Chinese authorities for the appointment of foreign inspectors of Customs at the open ports, and reserved the right of filling eleven such appointments; and, if so, why the correspondence relating to those appointments were not printed in the Blue-book of his mission; if there was any objection to lay this correspondence upon the table of the House, together with the despatch from Lord Elgin, announcing the appointment to the Chinese Customs of the secretary to his lordship's embassy; and if there was any objection to lay upon the table of the House copies of the correspondence from Mr. Bruce on the subject of the Chinese Customs' foreign inspectorship, especially as regarded the ports of Canton and Swatow.—Lord J. RUSSELL said there was no such correspondence in regard to the appointment of foreign inspectors of customs, as far as Lord Elgin was concerned, to be found in the Foreign-office. There had been a correspondence with Mr. Bruce on the subject, but as it related chiefly to the objections raised by the American Minister at Canton it would not be right to give it. There had been no correspondence with regard to the appointment of Lord Elgin's secretary. The system was now at work at Canton and Shanghai, and was understood to work satisfactorily, but it was not at work at Swatow, because the trade was not opened there. No doubt, however, it would be established there when the trade was opened.

FRANCE AND ITALY.—(15.) In reply to an inquiry by Mr. Griffith, Lord JOHN RUSSELL said that no intimation had been given to Lord Cowley that in case of contingencies affecting the distribution of power in Southern Italy France would claim further territorial compensation.

MALTA HARBOUR.—(24.) The House having resolved itself into a committee of supply, among several votes, one was taken of £2,500 for the extension of Malta harbour, in pursuance of an agreement with the Maltese Government.

RUSSIA AND TURKEY.—Lord JOHN RUSSELL stated, in reply to Mr. John Locke, that the Government had no intelligence of a Russian army being concentrated on the Pruth, or of a Turkish corps being assembled at Widdin. They had, however, received official intelligence of a meditated action of Russia, in conjunction with the other great Powers, on the subject of the condition of the Christians in the Ottoman dominions.

Spirit of the Press.

RECALL OF SIR CHARLES TREVELYAN.

Sir Charles Trevelyan seems to take his stand on the old traditions and theories on which India has been governed for the last hundred years. His cause is strengthened by the adhesion of Lord Ellenborough, who said emphatically on Tuesday evening that the evil would be, not the publication of Sir Charles Trevelyan's opinions, but the neglect to follow his advice. Sir Charles Trevelyan seems thoroughly imbued with the notion, so familiar to the mind of old Indians, that no increase of the revenue is to be looked for in India, at least to any considerable extent. It is, in fact, a constant quantity, which may fluctuate a little between the two extremes, but not so high as to throw poor land out of condition, and a rent so low as to make the tenant a proprietor with the Government. Between the two poles the revenue may oscillate, but beyond that, according to him, it can never go. It is surprising that the Government has lived during the past share of life, and upon land, with a little aid from the opium and the salt monopolies, from a tax on workmen's tool and spirituous liquors, the Government must continue to live. There is a deficit, certainly, but that deficit must be met and subdued by greater economy. Taxation is, according to this school, the greatest of all mischiefs, and anything short of the dissolution of the Government is to be submitted to rather than incur it; but, if we are to have taxation, then we ought, according to Sir Charles Trevelyan, to dismiss from us as fatal and delusive the idea of making it uniform. India is a vast continent, covered by races of different creeds, languages and manners. The taxation which would be fair to one would be crushing and overpowering to another people. Bengal would submit to that which would make the Punjab fly to arms. The same measure cannot be dealt out to Tajore and Rajpootana. If we are to try any system of taxation which has not hitherto been attempted, we ought financially to divide the country, and apportion the load to the ability which each province may possess to bear it. Thus speaks the voice of Indian experience and tradition in the minute of Sir Charles Trevelyan. Mr. Wilson, on the other hand, takes his stand, not on ancient Indian traditions, but on the principles of financial science as understood and practised in England. So far from admitting the notion of a financial subdivision, Mr. Wilson declares the greatest fault of the Indian system to be the want of a central check on departmental expenditure. He believes, moreover, that it is vain to look for a financial equilibrium if the revenue be not placed under the same control as the expenditure. He would no more dream of making a distinction in the matter of taxation between Bengal and the Punjab than between Kent and Yorkshire. With equal strictness he repudiates the idea of exceptional and local taxes, and raises an income-tax, a trade-tax, and a tobacco-tax with as little compunction as Mr. Thackeray experiences when he makes a shilling rate on the householders of the metropolis. If some people have less than others, they will have less to pay; the saddle will sit itself to the back of every horse. Mr. Wilson allows nothing for the superior fierceness or independence of different races. We are strong enough, he believes, to coerce the most refractory, and there is no occasion for us to remit through fear that which we are well able to take by force. To him a division into districts for the purpose of taxation would be a gross and palpable injustice, which would create, by its obvious inequality, more discontent than it removed by its deference for the prejudice of the less manageable races. Mr. Wilson does not believe in filling up the deficit by economy; nor does he consider the revenue as exclusively derivable from land, and therefore as incapable of increase. He believes in the possibility of stimulating the trade, developing the resources, calling forth the industry, and increasing the revenue of India; and these things he can only do through a greatly increased expenditure on railroads, irrigation, education, the administration of justice, and the improvement of the police. Between these two antagonists our readers must choose as information or inclination leads them; but Mr. Wilson has this decided advantage—that the Government of India is distinctly pledged in his favour, and that it has thus become the duty even of those who least agree in his views zealously to support them.—*Times*.

THE USE AND ABUSE OF COLONELCIES.

The rehabilitation of the British army has been mainly the work of the nation itself, speaking through the press. There has, we admit, been little cause of complaint of late. The authorities seem to have seen the rottenness of "the system," and to have been converted to the opinions which were at first so unpopular with the military world. But we must not expect to advance too quickly. The "old Adam" of favouritism and jobbing has evidently not yet been entirely put off, and we have to animadvert on a backsliding which deserves a temperate but firm admonition. The regenerate Horse Guards has fallen back into its old practices. Nothing that was done in the bad days before 1854 could be more reprehensible than the appointment of Major General Grey to the command of a regiment. In commenting on these cases we know that we must necessarily excite a great deal of bitterness and animosity. Among those who abuse the *Times* probably not one in a hundred owes his prejudice to any conduct of ours on a public question. We may say, then, that to appoint to the command of a regiment a gentleman who for many years past has been a mere nominal soldier is a gross injustice to deserving officers, and an injury to the profession. A while ago the same *Gazette* which announced that the Order of the Bath had been conferred upon Sir H. Havelock for his heroic services, announced also that the same honour had been conferred on Colonel Phipps, a gentleman known only as holding a subordinate office in the Royal household. Now we have Sir John Inglis, the undaunted defender of Lucknow bracketed with Major-General Grey, private secretary to Prince Albert—the man who has risked his life under a tropical climate and against ferocious and implacable foes coupled with a gentleman who in the ease of English palaces has wielded no weapon more formidable than the pen. The contrast affords scope for disparaging remarks as respects General Grey, not because the General's services are unimportant or his position other than honourable, but because he has been unjustly, and, as we think, unjustly, rewarded. It is quite right that the Prince Consort should have a secretary to conduct the large correspondence which necessarily falls upon him, nor do we deny that the secretary may be properly appointed to any civil office which he is capable of filling. But military emoluments should be reserved for those who are

as valiant soldiers. It cannot be admitted that a man, because he has been at one time in active service, and has by the custom of the army attained a certain rank, should step in and grasp the few prizes which of right belong to those who have borne the burden and heat of war. The pay of £600 a-year which General Grey will receive as honorary Colonel of the Buffs would compensate many a Crimean or Indian officer for fatigue, wounds, sickness, long separation from friends, and all the other hardships of a soldier's life. A colonelcy is a military security, and the only ground for retaining such appointments is that which has been often urged—that they form the best means of conferring a justly earned pension on distinguished officers. Those who by devoting the flower of their age to the service of the country in every part of the globe have attained to the rank of Major-General have a claim to the colonelcies, and it is an abuse of the powers belonging to the Horse-Guards when these appointments are made to reward civil or courtly services.—*Times*.

Literature.

Friends for the Fireside. By MRS. MATTHEWS. 2 vols.
T. C. Newby.

There have been so many scores of men who, although able to write "like an angel," have nevertheless talked "like poor Poll," that it is always with many misgivings we open a new volume of "Table Talk." It is pretty well understood that literary men are no more entitled than the Pharisee was to thank God that they are "not as other men are," and that a poet, when "a night-cap binds his brow instead of bay," is neither much handsomer nor much more agreeable than an ordinary mortal. Pope was not always apostrophising the "Nymphs of Solyma," but was sometimes like other peevish valetudinarians, crouching over the fire cased in half a dozen flannel vests, and Heaven knows how many pairs of stockings. Richard Steele was not always engaged on moral essays, but was often to be found writing paltry excuses to his "darling Prue" from a tavern or a sponging-house, and the correct Mr. Joseph Addison himself was not for ever looking at the stars and "singing as they shine," but was (alas, that we should have to write it—sometimes singing over his cups. Authors are not entirely occupied in climbing "the steep where Fame's proud temple shines afar," but are occasionally to be found romping with their children or quarrelling with the helpmates, and we are quite certain that if a Boswell were always at hand, many sayings would be recorded as coarse as Johnson's, as ill-natured as Humboldt's, and even as silly as any of Boswell's own. We have all heard of the delights of a breakfast at the table of the poet Rogers, but for our part if the dish of "Table Talk" which Mr. Moxon has since served up be a fair sample of the delicacies, we see no great reason to lament our absence from the repasts. At any rate we should not have cared to dine on the same day with Mr. Thomas Moore if he was in the habit of saying the very stupid things Lord John Russell has given him credit for. *Nemo mortalium omnibus horis sapit* is an aphorism that belongs to the true as well as to the trite, and it is really too much to expect us to fall down and worship every time a great man opens his mouth. Experience has taught us that the witticisms of the wits require much pruning and very careful selection—there is generally more shell than kernel—the wheat to be gathered into the garner is as nothing compared with the chaff to be swept away. But it is just on account of the reason which renders us ordinarily averse to books of "Table Talk" that we are able to record our admiration of the volumes before us. They do not contain, mixed in a heap, the witty and the silly sayings of any one writer; but to use a homely, though as our younger readers will admit an expressive simile, the plums have been picked out of a hundred other literary puddings to enrich that of Mrs. Matthews'. "The Friends for the Fireside" have left both their spitefulness and their twaddle at home, and he is very fastidious who can find much fault with their company. Here and there we have a good thing a little too stale—an oft-quoted Sidney Smith or an undeniable Joe Miller—indeed, when once again we stumbled over *Punch's* advice to persons about to marry, we half expected Macaulay's New Zealander would turn up in the next page, but, on the whole, we are bound to say that Mrs. Matthews has executed her task with taste and judgment, and that it has seldom been our lot to read a book of "Table Talk" with higher gratification.

An Old Road and an Old River. By WILLIAM A. ROSS. 2 vols.
T. C. Newby.

We recommend readers of this work not to dwell too long on the title page, and to "skip" the dedication and preface. The first is pretentious with its Latin and Greek quotations—the

second spasmodic, and the third involved. Here, however, we are happy to say our strictures end, for the book itself is a very entertaining one. Of course along "An Old Road and an Old River" we did not expect much novelty, more particularly when we found that the "Old Road" was a German one, and the "Old River" meant the Rhine. Mr. Ross is by no means deficient in descriptive power, and the character sketches are for the most part felicitously done. It is a pleasant chatty book, and worthy the perusal of those who are not surfeited with the subject.

The Story of a Lost Life. By WILLIAM PLATT. 3 vols. T. C. Newby.

This is something more than a readable novel. It has been written with talent and care, and though it would perhaps be too much to say that the success is quite commensurate with the pains the author has evidently taken, still the result is a work superior to nine-tenths of the intellectual food with which circulating library readers are supplied. The story is interesting, the characters are lifelike, and the moral tone of the work unexceptionable.

Recollections of Baron Gros's Embassy to China and Japan in 1857—58. By the Marquis DE MOYES. R. Griffin and Co.

We have so recently* noticed the *Souvenirs d'une Ambassade en Chine et au Japon par M. de Moyes*, that it is unnecessary to repeat our estimate of the work, but we may state that the translation before us has received every advantage which an admirable translator, a good printer, a clever artist, a tasteful binder, and last, not least, a liberal publisher, could confer upon it.

NOTES.

Colonel Herbert Edwards is said to be engaged on a *Life of Sir Henry Lawrence*.

"Memorials of Thomas Hood," collected, arranged, and edited by his daughter—preface and notes by his son—are in the press of Mr. Moxon.

Mr. Murray is about to publish "The Five Great Monarchies of the Ancient World—Chaldean, Assyria, Babylonia, Media, and Persia," by the Rev. George Rawlinson, the editor of "Herodotus."

Mr. Fry, of Bristol, is preparing an edition of Tyndal's New Testament, printed at Worms in 1525. It is an exact transcript of the original now preserved at the Baptist Museum, Bristol, and believed to be the only perfect copy of this oldest of English Bibles.

Messrs. Trübner and Co. will publish immediately an English edition of the story entitled "Sir Rohan's host."

Mr. Bentley has in the press "The Corsair and his Conqueror, a Tour in Algeria," by H. E. Pope; and "Stories from the Sandhills," by Hans Christian Andersen.

Messrs. Griffin and Co. will publish this season "The Jacobite Ballads of Scotland," by Charles Mackay; "The Liber Albus, or Whit Book of the City of London," translated from the original Latin and Anglo-Norman, by H. T. Riley; and "Contemporary Biography: a Handbook of the Peerage of Rank, Worth, and Influence."

Mr. James Blackwood announces "Old-fashioned Wit and Humour, in Verse," by William Jackson.

Mr. Timbs is preparing or publication a second series of "Curiosities of Science," completing the series of "Things Not Generally Known." Of this work upwards of 50,000 copies have been sold.

Mr. Ho ten announces "The Brownie Papers," by the late Douglas Jerrold, who, it may be remembered, for some time wrote under the signature of "Brownie."

Messrs. W. Blackwood and Sons are about to publish a work by the late J. C. Symonds, Her Majesty's Inspector of Schools, entitled "Rough Types of English Life."

The first part of a great "Russian Encyclopædia" has been published at St. Petersburg.

Messrs. Smith, Elder, and Co., promise a new book, by Holme Lee, to be called "The Wortlebank Diary." They have just issued a work by Capt. Shakspeare, on "The Wild Sports of India."

We understand, says the Spectator, that Mr. J. H. Simpson has received permission to translate all the writings of the Emperor of the French, and that the translation will in due time be published "by authority" through the house of Messrs. Saunders, Otley, and Co.

Messrs. Asher and Co., of Berlin, have purchased Humboldt's library, consisting of upwards of 10,000 volumes, and comprising many rare and valuable works, which are to be offered for sale. Our Prince Consort's "gift horse" (which the great philosopher examined in the mouth) doubtless among the rest.

A monument in honour of Camoens has just been erected in Lisbon.

Mr. Guinness, of Dublin has given £15,000 for the restoration of the nave of St. Patrick's, in that city.

A most noble gift has just been made to the department of art and science, at South Kensington, by Mrs. Elizabeth Eliott, of Sudbrooke-house, county of Lincoln. It consists for the present of fifty splendid original water-colour paintings by British artists, and fifty more are promised at some future time. The gift has been formally accepted by Lord Granville on behalf of the public.

Raphael's famous picture, "The Archangel and Satan," has been replaced in the Louvre.

Nabal and Military.

We have no movements to record in connection with the China expedition, excepting the engagement of more vessels to convey stores. It is of course believed now that Lord Elgin and his suite have proceeded to their destination, and that this Government now leave the matter in his hands, and the respective naval and military chiefs. It will be seen in our French news that a line of steamers is to be established for the conveyance of despatches, stores, and invalids, in connection with the French contingent. It has been a subject of congratulation that our naval and military forces reached their destination so promptly—so far as the latest advices inform us. In connection with the re-inforcements for India already noticed, the following officers have been named, viz.:—

Lieut. C. J. Backus, Ensign C. G. B. Tribe, and Ensign H. Stokes, 1st battalion, 19th Regiment; Lieut. C. H. Webster, Lieut. C. Enys, Ensign T. A. Davies, and Ensign Z. Macaulay, 1st battalion, 20th Regiment; Ensign V. P. Hutchinson and Ensign W. H. Adams, 1st battalion, 28th Royal Welsh Fusiliers; Lieut. H. C. Marsack, Ensign W. M. Brander, and Ensign H. F. Broucker, 24th Regiment; Ensign W. Poste and Ensign W. Tolson, 35th Regiment; Lieut. H. Gorton, Ensign E. Villiers, and Ensign R. M. 1st 43rd Light Infantry; Ensign E. Pakenham, Ensign V. E. Knox, Ensign E. S. Ker, Ensign H. F. Barker, and Ensign T. E. Dawler, 52nd Light Infantry; Lieut. W. Clarke, Ensign B. J. A. Mossell, Ensign H. Synges, and Ensign C. W. H. Richardson, 78th Regiment; Ensign H. P. Dawson and Ensign A. S. Leatham, 75th Regiment; Capt. W. J. Carden, Lieut. A. T. Butts, Ensign O. H. Blount, and Ensign E. N. Mosley, 77th Regiment; Capt. S. J. Lowe, Ensign H. Maturin, and Ensign R. J. Macdonnell, 81st Regiment; and Ensign R. B. Wesley, 91st Regiment.

The appointment of Lieut.-General Mansfield to a command in China has been cancelled in the Gazette, and his appointment announced as Commander-in-Chief at Bombay. Sir Hugh Rose has been a nominated Commander-in-Chief in India, and Lord Clyde is expected home early in June.

The hired transport *Lady Macdonald* has arrived at Spithead, from Hong Kong, with naval invalids. She has experienced fine weather the whole passage home. The invalids, amounting to 131, were all dysentery on board, and many of them of a serious character, requiring to be hoisted on board in cots; thirty other invalids were received on board at the Cape. Twenty deaths occurred on the passage home, which may be considered a small percentage from the number of severe cases on board. Acting Lieut. Blount, R.N., was he appointed Admiral's agent on board. Surgeon Ramsay and Asst.-Surg. Higgin have had medical charge of the invalids during the voyage. The following gentlemen have also arrived home as passengers by the ship:—Mr. Burniston, R.N.; Mr. Barratt, R.N.; Mr. Thompson, R.N.; and Capt. P. M. C. Parker, from the Royal Marine Brigade.

The store ship *Elb*, connected with the Prussian expedition to China, touched at Funchal on the 16th ult., and Santa Cruz on the 20th, from which she proceeded on to Mon e Video. The *Thetis* frigate was at Funchal a fortnight, and left on the 13th.

The *Hermes* has arrived from the Cape, and reports the frigate *Forté*, Capt. R. Turnour, bearing the flag of Rear-Admiral the Hon. Sir J. Keppell, K.C.B., arrived at Madeira on the 8th inst. from England, on her way to the Cape of Good Hope.

The *Wonderer*, a screw gun vessel, one of the contract steam gunboats built during the Russian war, which, on being surveyed, was found to be very rotten and defective, is ordered to be sent from Chatham to Sheerness, to be repaired; but the general opinion appears to be that, from the state she is in, she is not worth the expense of repairing. The survey of two more of the contract mortar vessels, numbers 31 and 48, built for the Admiralty towards the close of the Russian war, has just been completed at Chatham Dockyard, the vessels having been hauled up out of the river on the slip, in order to facilitate the survey. The result of the inspection has shown that both the vessels are as rotten as those first inspected, and utterly unfit for further service indeed, so rotten were they found to be that after a portion of the planking had been removed enough was exhibited to satisfy the officers appointed to inspect them that it was unnecessary to extend the survey, and they were accordingly closed up and sent aloft to await an Admiralty order for them to be broken up.

It is stated that the tremendous recoil from the Armstrong gun during recent trials on board the *R. d'ur* gunboat rendered it imperatively necessary that some other form of carriage should be substituted for the one at present in use, should the smaller class of gunboats be armed with these weapons.

The contractors for the construction of No. 10 dock, in Portsmouth Dockyard, and for the work necessary to form its junction with No. 7 dock, are erecting a retaining wall in the latter dock for the purpose of withstanding the pressure of the water when ships are docked or undocked during the time the present works are in progress, and also to enable them to excavate the ground between Nos. 7 and 10 docks, and form the granite communication between them. When the work is complete the whole, from the bar entrance to the steam basin, will equal the *Great Eastern* steamship in length, but, from its want of depth and breadth, would be of course unable to take in that ship.

The screw steam ore-ship *Himalaya*, Capt. Seccombe, in consequence of damage she received by ground in Portsmouth harbour, was towed to Plymouth by the paddlewheel steam-sloop *Virgo*.

The examination of candidates for admission to the Royal Military College, Sandhurst, will commence on June 4, and extend over five days; that of candidates for admission to the Royal Military Academy, Woolwich, on June 30; and the candidates for direct commissions on the 20th proximo, and will occupy six days. The several examinations are held before the Council of Military Education at the Royal Hospital, Chelsea.

TRIAL TRIP OF THE LY-EE-MOON.

There seems to be scarcely any limit to the progress of steam navigation; in the most distant parts where European civilization has penetrated there quickly follows this great practical annihilator of distances. While public attention has been drawn of late to the steamers constructed for Indian river navigation, we are called upon to record the equipment of steamers for even more distant parts; and while in the one part of our present impression we give the progress of war about to be waged against the Chinese Government, we have to announce the intended departure of as fine a specimen of naval architecture as was ever produced in this country; and to the Thames Iron and Ship Building Company, together with the architect, Mr. James Ash, and Captain Norman Hill, who has superintended and directed her construction, belong the credit of this really handsome craft, which resembles, in many respects, the steam yacht of Her Majesty. It must be cheering to the uninitiated in this country to see that our merchants have sufficient confidence in the early restoration of peace and trade to enable them to despatch a vessel at this time. It serves, perhaps, to illustrate the anomaly with which our relations with the Chinese are invested, and also the progress of that wedge which the civilized countries of the West, are driving into the great empire of China, and which the great trading classes in that country are not slow to appreciate.

The Ly-ee-Moon is the property of Messrs. Dent and Co., of China, and is intended to run on the coast between Hong Kong and Shanghai. Her dimensions and particulars of engine, &c., are as follows:—Length of water line, 270 feet; breadth moulded, 27 feet 3 inches; draught of water, mean, 12 feet 6 inches; register tonnage, 1,003 tons; actual displacement, 1,394.14 tons; oscillating engines, diameter of cylinders, 70 in., stroke, 5 ft. 6 in.; maximum revolutions per minute, 33—34; diameter of paddle-wheels outside, 22 ft.; consumption of fuel per 24 hours about 40 tons; nominal horse power, 350; indicated horse power 1,420; fire-box surface in boilers, 350 sq. ft.; tube surface, 7,200 sq. ft.; 16 furnaces; 4 boilers; 2 funnels, each 6 ft. diameter and 30 ft. high; superheating apparatus, Bearmore and Galloway's patent; tube surface in superheaters, 1,400 sq. ft.; temperature of superheated steam, 350°; Silver's governor for controlling engines at sea (first paddlewheel steamer so fitted in Great Britain); Suffolk's engine-room telegraph, communicating with engine-room as to speed, fitted to pilot bridge and steering house; Linsey's apparatus for sealing the boilers with superheated steam, lately approved and adopted by the Admiralty, and is the first merchant vessel so fitted; Dell's condensing apparatus making 600 gallons water per day. The engines were designed by Mr. W. G. Taylor, of London; finished and fitted by Messrs. Seaward and Co., from drawings prepared by an engineer directed by Captain Hill. The boiler and superheaters were tested to double the working pressure; and manufactured by Mr. Mitchell, of Deptford. The engine-room is fitted with a powerful donkey engine and boiler. A winch is on the deck which can be worked either from the donkey or main boilers. The coal bunkers will hold about 320 tons of fuel. The smoke-holes are ventilated by large shafts at either end, and everything is done for the comfort and convenience of the stokers. The engines and boilers are supplied with a complete set of spare gear, each part having been fitted to its place.

On deck the fittings are as complete as below, and great regard for a clear deck is apparent, there being no obstruction beyond a very useful house over the companion aft, as a shelter from sun or rain, and one forward, made to include a Captain's navigating cabin, bath room, and wheel house. The officers' cabins are all below, as also the berths for the sailors and firemen. A light top-gallant forecabin is fitted up for live stock. The anchors are Trotman's patent, and are lifted by a patent capstan. The after saloon is extremely neat and compact, the panelling containing papier mache views, representing the domestic incidents of England, Ireland, Scotland, and Wales. In addition to a captain's cabin, there is accommodation for about ten passengers; there is also a cabin for ladies, and an excellent bath-room, &c. Large ports are fitted with scuttles for bad weather, and by apertures cut in the iron masts, ventilation is given into the engine-room. The masts are slight and graceful, and with the funnels have a moderate rake; the foremast carries lower, topsail, and topgallant yards. The tri-sails reach to the topmast-head, and give her a good spread of canvas. Her four boats are each fitted with the patent lowering apparatus of Clifford and others, a satisfactory trial of which was exhibited, with the vessel going eighteen miles. Her decks, stanchions, houses, &c., are all of teak. Her armament consists of two 32-pounder guns (56 cwt.), four 2-pounder ditto (swivels on rail), two Congreve rocket carriages, stand of rifles, revolvers, boarding pikes, axes, &c. The sponsons have been fitted to work the guns on when required. We have omitted to state that she has hawse holes fitted abaft for anchoring, and, among the very many improvements, both useful and ornamental, it is probable we have omitted others; for in every part of the vessel something suggests the unwearied care and intellect which has been bestowed in her construction, and, for model and speed, she is a most signal

success—second to none—and does great credit to her enterprising owners, captain, and builders.

The Ly-ee-Moon is now in the Victoria Docks, and will proceed to Hong Kong in about two weeks, calling at St. Vincent's, Cape of Good Hope, and Singapore; and we wish her a safe and speedy passage, and profitable employment on her arrival in China waters.

The visitors who accompanied her on the trip proceeded by the 9.30 train from the city for Tilbury, where a tug was provided for their conveyance to the vessel lying with her steam up in the stream. At 11.30 she proceeded with a flood tide slowly down, clearing the numerous craft, and gradually progressed towards full speed, making twenty-four to twenty-six revolutions and increasing up to thirty-two or thirty-three. At ten minutes before one she passed the Nore light vessel, and at 22.0 past, or in 32 min. she was abreast of the Mouse, a distance of 9 miles, the tide being quite equal to one against her. After proceeding down to the Girdle light vessel, a distance of about 40 miles from Gravesend, she turned and ran the 9 miles from the Mouse to the Nore in a few seconds under 30 min., thus giving a speed of 18 miles per hour, with 32 to 33 revolutions; and there is no doubt that with a few day's run, the engines will improve to 36, and give another mile. No canvas was set, the wind being too light.

Of the company assembled we observed Mr. Thomas Dent, the senior partner in the firm of Messrs. Dent, Palmer and Co.; Mr. W. Dent, East India Director; Captain Thomas Dent, Madras Army; Mr. Alexander Messrs. Rolt, Ford, and Edwards, Directors; and Mr. Ash, Architect of the Thames Iron Works and Ship Building Company; Messrs. Cornet and Watkins, of Messrs. Seaward and Co., Engineers, Messrs. Galloway and Gladstone, Board of Trade surveyors, Mr. Davy, surveyor to Lloyd's, Captain Nelson, R.N., Captain Guthrie, Captain McDermott, and Captain Macnamara, of the P. and O. Company's service. Captain St. Croix, Reynell, Wade, Macfarlane, Roper, Gibson, Grosvenor, and Macmillan. Messrs. J. D. Gibb, W. W. Dale, W. O. Young, Thomas Lane, J. Dudgeon, and several gentlemen connected with the metropolitan press. An elegant luncheon was provided on board, which was, with the vessel's performance and the brightness of the day, fully appreciated. The usual toast for the success of the cause, captain, and owners was drunk. At 5.30 some of the visitors disembarked off Tilbury and several proceeded on to Blackwall uttowing to the intricate and crowded state of the river nearly two hours were occupied in this. Not the slightest accident occurred during the whole time, and all on board enjoyed a most agreeable day.

THE LATE DR. HARLAND, OF HONG KONG.—In another part of our impression a notice will be seen of a testimonial to the late Captain Bate, who was killed at Canton. A correspondent suggests that a similar testimonial might be raised to the memory of the late Dr. Harland. The suggestion, we trust, will be taken up by residents in China. Our correspondent says, "I beg to suggest that committees be formed in China and in this country for the purpose of raising funds for the establishment of a 'Harland Scholarship,' to be in connection with the London University, where the late estimable doctor studied for some time, and took such high honours. Further, if it were made a *sine qua non* that the young men holding this scholarship should study Chinese, and also, if practicable, that he should be the son of some person connected with China. This would, I think, in all respects, be a suitable testimonial, and one, moreover, the only one in consonance with the late doctor's views. In such a wealthy community as that of Hong Kong, a day where the late Dr. Harland's memory is so highly revered, there could be no difficulty in carrying out this idea, and I know that his numerous admirers in this country would only be too happy to have the privilege of assisting in so excellent a plan of perpetuating the memory of one so much beloved, and so universally regretted."

DR. MACGOWAN AT MANCHESTER.—Dr. Macgowan has delivered at Manchester Athenæum his highly interesting and instructive lecture on the arts, sciences, and commerce of the Japanese. E. Potter, Esq., the president of the Chamber of Commerce, took the chair. In the course of his very able lecture Dr. Macgowan remarked that the language and literature of the Japanese gave the best possible evidence that they were not members of the Chinese family. The names of many of their places reminded one of the Indian names which they met with in Hiawatha. The Japanese language, more than any other language in Asia, resembled the Greek. The Japanese were not an original people, but were very imitative. They had produced no original thinker. Everything in which they excelled came from abroad. This was a remarkable feature, on which the lecturer built his hopes for the future of Japan, although he must say that their attainments in civilization and power would be limited compared with those of China, because, though the Chinese were inert and lifeless, there were amongst them profound thinkers, and when they once got the impetus they would go on, if not with great rapidity, yet in an amply further than the Japanese, a superficial people, could ever hope to attain to by sudden and impulsive advances. (Hear, hear.) The Japanese were very ambitious of acquiring English; and he had literally seen shiploads of new publications going up to Yokohama; and he believed that the next generation would become as well versed in Milton and Shakespeare, and he hoped also in our version of the Sacred Scriptures, as the present generation were in the classics of China. (Hear, hear.) The lecturer next adverted to their progress in the science, and more especially the science of medicine. He further observed that they are the greatest liars in all the East, which is surely saying something. Their morals were gross in the extreme; the voluptuous Chinese were fastidiously decorous compared with the Japanese. He hoped, in considering the prospects and claims of this people, that they would not be poisoned by the introduction of opium. Dr. Macgowan, who was frequently applauded in the course of his lecture, concluded by thanking his Manchester friends for the kindest reception they had given him. Don Tien-ang, who accompanied Dr. Macgowan, and was attired in his native Chinese costume, then addressed the audience in his own language. His remarks were interpreted by Dr. Macgowan.

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

Suggestions for the insertion of information required by our subscribers will have due attention and acknowledgment.

R. S.—It is probable that the next mail will bring advices on the subject.

G. T.—We cannot insert anything so lengthy.

J. S.—You should apply to the Secretary of State for the Colonies.

A. G.—We thank you for the suggestion, and will instruct our correspondent accordingly.

All applications for Advertisements, Subscriptions, and general business of the Paper to be addressed to the Manager, and not to the Editor. Post-office orders to be made payable at the Strand Office, to MORTIMER WRIGHT.

The London & China Telegraph.

LONDON, MONDAY, MAY 28, 1860.

AMERICAN TRADE WITH CHINA.

AFTER Great Britain the United States carry on the largest trade with China, but with them the balance of trade is also adverse, as there is little that they can supply to the Chinese, while they are large customers for tea. It will be interesting to our merchants to trace down the course of trade, and to mark the progress of American shipping and commerce in that quarter; and as by their treaty they have liberty to trade under neutral privileges at all the open ports, the present war is not likely to interfere with their commerce, but may possibly promote it.

"Commercial relations between the United States and China date from a period as early as 1784. In the month of February of that year the *Empress of China*, a ship of three hundred and sixty tons, sailed from New York for Canton, and returned the following year with a rich and valuable cargo. The success, as well as the novelty of this adventure, attracted no little attention throughout the country. The ensuing year another voyage was made in a small vessel of only eighty four tons burden, with equal success. Merchants were soon induced to engage in an enterprise which promised the most flattering results; and as early as 1789, five years after the American flag had first entered the Chinese seas, fifteen American ships had arrived at Canton. A commercial treaty with China was concluded July 3, 1844, and proclamation was made by the President April 18, 1846. It was not limited as to duration; the United States, however, reserving the right, after the expiration of twelve years from the date of the convention, to open negotiations, should it be deemed necessary to do so, for such modifications in the articles relating to commerce and navigation as may be requisite. By that treaty vessels of the United States could enter any of the five ports open to foreign commerce, viz., Canton, Amoy, Foo-chow-Foo, Ningpo, and Shanghai, but no other ports, under penalty of confiscation of vessel and cargo. It was provided, however, that vessels forced in any way to take refuge in any port other than the free ports, shall receive friendly treatment and the means of safety and security. The tonnage duties were, on vessels of over 150 tons, 5 mace (70 cents) per ton; 150 or under, 1 mace (14 4-5 cents), paid only at one port. The importation of opium was prohibited, but a large contraband trade was regularly carried on in that article through the connivance of Chinese officials, both English and American vessels being engaged in this trade, but principally the former."

By the last American treaty, signed at Tien-tsin in June, 1858, consuls may be appointed at each of the ports open to trade, and the Minister of the United States may visit and sojourn once in a year at the capital when he has any important business, and confer with the members of the Privy Council. He may go by land or by the Peiho, but must not take in American vessels of war; boats will be sent to convey him. The tariff duties to be paid on imports and exports are the same as agreed to by the former treaty of Whanghi, except as these may be modified by treaties with other nations. The tonnage dues are reduced to four mace (56 cents) per ton on vessels over 150 tons, and one mace per ton if under that tonnage, payable only at one port. Duties payable by merchants of the United States are to be received either in sycee silver or in foreign money at the exchange of the day. Art. 26 provides for the neutral rights of American ships to enter ports in time of war. The religious rights and freedom of missionary teaching are conceded to Protestants and Catholics. The extortion of all legal fees is prohibited.

It will be seen from the following return of the general commerce of the United States with China since 1821, that while the exports fell off from one-third to one-half in value (with the exception of the latest years given, 1857 and 1858, when it recovered), the imports have more than trebled.

"It should be remarked, however, that the trade between the United States and China is of two kinds; direct, carried on generally on American account, and constituting the basis of the treasury reports as respects American trade with China; and indirect, or that carried on by the Americans between China and other parts of the world. Of this latter trade no official accounts are returned to the treasury department—a fact that will account for the apparent large balances of trade against the United States, given in the annual reports from that department.

1839	1,533,601		

In 1789 there were only fifteen American ships engaged in the China trade out of 86 foreign vessels. In 1834, 70 out of 253 arrived at Canton. In 1844, 57 of 23,273 tons; and in 1845, 83 of 38,658 tons. In 1852 the American tonnage in Shanghai exceeded that of any other nation. The number of British vessels was 102, with a tonnage of 32,700 tons, and of American vessels 72, with a tonnage of 40,365 tons. The whole amount of tonnage was 76,900, and the number of vessels 187. The value of the imports in American vessels at Shanghai, in 1855, was £272,708, and of the exports, £5,396,417. In 1856 there were 68 American vessels engaged in the trade at Shanghai, which took away exports valued at £871,000, of which there was 21,000,000 lbs in tea, and 1,188 bales of silk. In 1857 the tonnage which cleared from the United States for Chinese ports was 59,549 tons. As tea is so important an article of supply to the United States, we shall trace down the progress of the trade. Taking decennial periods we find that the imports of tea into the United States from China have been as follows:—

	lbs.		lbs.
In 1790	3,074,224	In 1830	8,609,415
1800	3,797,694	1840	20,006,595
1810	6,647,726	1850	28,752,817
1820	4,891,447	1860 estimated	32,000,000

The above figures are from the official Treasury returns.

From the circular of Messrs. Nott and Co., of China, we compile the annexed table of shipments of tea from China to the United States:—

Season.	Black.	Green.	Total lbs.
1850-51, 65 vessels	13,564,746	15,215,707	28,780,453
1851-52, 68 "	13,361,518	20,965,915	34,327,427
1852-53, 73 "	14,431,596	26,529,161	40,960,730
1853-54, 54 "	11,365,693	21,900,155	33,345,841
1854-55, 46 "	8,022,939	21,351,922	29,377,861
1855-56, 55 "	14,956,304	24,358,434	39,314,738
1856-57	12,181,391	18,689,826	30,871,217

The Americans, it will be seen, have a great preference for the coloured or green teas. Among the black teas included in the above figures are Congou and Souchong, Caper, Pouchong, Oolong and Vongyong, Flowery Pekoe, Orange Pekoe, &c., and

among the green teas are enumerated Twankay, Hyson Skin, Hyson, Young Hyson, Imperial, and Gunpowder. In 1831 the importation of tea into the United States amounted to 5,182,867 lbs., valued at 2,788,353 dollars; in the following years, when tea was admitted duty free, the price fell gradually from 37½ cents per lb. to 23½ cents, and now the rates speak for themselves. The importation, after the reduction of duty, rose as follows:—

	lbs.	Value D. lbs.
1832	9,906,606	2,788,353
1833	14,699,822	5,484,603
1834	16,282,977	6,217,949

Since 1844 there is an ad valorem duty charged on teas imported from other countries than the place of production, but the quantity so imported is not large. Let us now glance at the consumption in the States, which is, however, pretty fairly shown by the average imports, for there is not much stock held on hand. The Americans are the largest consumers of coffee and tea (principally coffee) of any other nation. In the nine years ending with 1858, the aggregate consumption of tea in the United States was 285,309,280 lbs.; in the United Kingdom in the same period, it was 549,656,806 lbs. It is not probable that the consumption of tea in the United States, where it pays no duty, and is a cheap article as compared with other countries, is much affected in ordinary years by price. It will therefore approximate very near to the truth to apportion this aggregate consumption according to population. By the census of the United States the ratio of increase in each decade has been very uniform, varying only between 32 and 36 per cent., and averaging 34½. Assuming the mean ratio from 1850, we have the following result:—

	Population.	Assumed Consumption.
		lb.
1850	23,200,000	27,858,482
1851	24,000,000	28,819,120
1852	24,800,000	29,779,756
1853	25,600,000	30,700,393
1854	26,400,000	31,791,023
1855	27,200,000	32,661,668
1856	28,000,000	33,622,306
1857	28,800,000	34,582,943
1858	29,600,000	35,543,580
Total		285,309,280
1859	30,400,000	36,504,218

While the consumption of Great Britain and the United States has been constantly increasing, with scarcely any check from the Crimean war or the panic of 1857, the power of production in China, as shown by the imports of the last five years, would seem to be diminished, notwithstanding the stimulus of high prices in 1857. The exports of tea have been—

	Great Britain.	United States.	Total.
1854	80,694,788	33,046,599	113,741,417
1855	80,306,623	30,250,898	110,557,521
1856	90,388,470	39,635,878	130,024,348
1857	60,098,392	25,300,299	85,398,691
1858	75,439,263	26,735,268	102,174,531
1859 Estimated..	75,000,000	28,000,000	103,000,000

Of the exports of 1858, 12,000,000 lbs. were the production of the previous year, detained in Canton by the war and blockade. We have looked at the subject more in a commercial than in a fiscal and economic point of view, but some curious deductions would arise from an investigation of the effect of duty and price in influencing consumption of coffee and tea—dietetic beverages which enter so largely into use in North America generally, as well as in Great Britain.

THE CHINA EXPEDITION.—There have been no movements and no Parliamentary discussions. Lord Elgin will now be left to decide all questions under his instructions.

THE CHINESE CUSTOMS.—This matter has been noticed in Parliament, and elicited a reply from Lord John Russell that no foreign inspectors had been appointed at Swatow.

DEATH OF ALBERT SMITH.—This gentleman was attacked with bronchitis on the 21st, after his performance, and died on the morning of the 23rd.

STEAMER LY-EE-MOON.—This vessel made her trial trip on the 24th, and attained a speed of eighteen miles per hour. She is to proceed to China in about a fortnight.

RANGOON AND SINGAPORE CABLE.—The laying of this cable has been postponed until February. Three steamers are building for its conveyance.

EAST INDIA COMPANY.

A special general meeting of this company was held on the 16th inst., at the India-house, Leadenhall-street, for the purpose of taking into consideration the correspondence between the Secretary of State for India in Council and the Court of Directors relative to the future management of the affairs of the Company; Colonel Skyes, Chairman of the Board of Directors, in the chair.

The Chairman said the meeting had been specially called for the purpose of taking into consideration a subject of vital importance to the Company. A correspondence had taken place between the Board of Directors and the Secretary of State in Council for India on the subject of a Bill which the Secretary of State had signified it to be his intention to bring into Parliament, in order to take out of the hands of the East India Company the power of managing its own affairs and to transfer that power to the Government. It was expected that the Bill would have been already introduced, or at least that a copy of it would have been sent to the Board of Directors; but as neither of these things have taken place it was not in the power of the present meeting to argue upon facts; they were left, therefore, to speak simply according to what might be their own impressions. After a brief review of the provisions of the Act of 1833, by which the monopoly of the China trade possessed by the Company was abolished, and of the provisions of the Act of 1855, which altered the constitution of the Board of Directors, the hon. and gallant gentleman referred to the Act of 1857 by which the government of India was taken out of the hands of the East India Company altogether. The whole property of the Company was taken from them, the very house in which they were then assembled itself included. His impression had always been that the India-house was part of the assets of the Company and he was confirmed in that belief by Sir Charles Grey, who was of opinion that so long as the Company continued a corporate body it could not be left without a domicile. Nevertheless, the Company was at present in this condition:—they were a corporate body with a capital of 12 millions of money; which 12 millions they might within one twelvemonth of the passing of the Act have demanded from the Government, and have carried on trade with it; they had though proper to do so; but they had agreed to accept £630,000 per annum, together with the guardianship of the security fund. In case of a failure in the revenue of India, the Court of Directors had a right to go to the security fund wherewith to pay the dividends. That was a vast power, for between this and the year 1874 nobody could tell what would be the state of India, or whether there would be any revenue from India out of which to pay their dividends. But by way of economy—a species of economy which a more huckster would repudiate—and in order to save the paltry sum of £1,800 per annum, the Secretary of State for India was going to bring in a Bill to remove the last vestige of power out of the hands of the Company, and to wipe out its very name, leaving it nothing but a nominal existence under the charter. Such was the arrangement that was now contemplated.

Mr. Crawshaw was of opinion that the Court were in a position to come to a determination as to the course they ought to take without waiting for any further information. The Secretary of State for India had given them no notice that he should apply to Parliament for power to transfer certain affairs connected with the East India Company to the Bank of England. Now, the proposition he should submit to the Court was that that proposal constituted an unnecessary and indefensible interference with their private affairs. He could not but apprehend that the object of making such a proposal as that which was contemplated was to strike a blow at the very existence of the Company. The hon. proprietor concluded by moving—

"That the proposal of the Secretary of State in Council for India to apply to Parliament for powers to interfere with the arrangement of the private affairs of this Company is wholly unnecessary and indefensible."

Dr. Beattie seconded the motion, which was agreed to unanimously.

Mr. Crawshaw then moved,—

"That it is requisite for the safe management of the Company's affairs that the functions of the Court of Directors be vigilantly preserved and exercised."

The motion was seconded by Captain Shea, and also unanimously agreed to.

Mr. Crawshaw further moved,—

"That notice having been given by the Secretary of State in Council for India of the termination of the existing arrangement between the Council and the Company, it is necessary that the directors should prepare proposals for the future management of the Company's affairs, such proposals to be submitted to a general Court of the East India Company."

Captain Shea seconded the motion. General Everest said one important point ought not to be overlooked—namely, that not only did their dividends depend upon the surplus revenue of India, but that the proprietors had a prior right to all payments not required for India. That was a matter which none could manage so well as a body of their own directors. If they once admitted the Secretary of State to administer the dividends the officials and clerks of his own department would, either directly or indirectly, obtain priority over the proprietors, and their claim would be violated. The resolution was then agreed to.

Mr. Crawshaw said he had had a communication with the Chairman previously to the meeting, and he understood that it was the wish of the directors that the proprietors should interest themselves in these matters. He might, by way of explanation, observe that the proposal to go to the Bank of England actually originated with the Company a year and a half ago. He therefore proposed the following resolution:—

"That it is desirable the Court of Directors should make such arrangements with the Bank of England as may be expedient."

The motion was seconded and agreed to, as were also the two following:—

"That it is desirable, in case any arrangement be made with the Bank of England, that duplicates of all transfers be kept with the secretary of the Company."

"That it is essential that the warrants for dividends be signed by the directors."

"That every exertion be made to continue the Company's offices at the India-house, and to provide further accommodation for the directors and proprietors."

"That the directors be requested to petition under the seal of the Company, against any Act of Parliament, or any clauses of any Act of Parlia-

ment, which will interfere in any degree with the rights of the corporation as by law established, and to oppose the same by every means in their power."

Mr. Dent (a director) said they were much indebted to Mr. Crawshaw for bringing these matters before them; and if it should be the means of preserving the existence of the Company as a body called together periodically to discuss matters connected with India, he conceived it would be a great national good. It was indeed a great and an agreeable surprise to find that Lord Ellenborough had had the courage in the House of Lords to come forward and defend that patriot Sir Charles Trevelyan in the measures he had taken, as Lord Ellenborough justly described it, to stay the pestilence of Mr. Wilson's proposed tax in India. Any person who had Indian experience must consider the proposal to establish an income-tax in that country as the most dangerous that could ever enter into the mind of man. He was glad to find that Sir Charles Trevelyan not only considered it dangerous, but that it was totally unnecessary. All honour to Lord Ellenborough, who got up and defended an individual to whom he was a stranger, a gentleman who had European experience not inferior to Mr. Wilson's, and who had Indian experience second to no man!

HONG KONG AFFAIRS.—It is the intention of the inhabitants of New-castle and other places to take steps for the introduction into Parliament of the revelations made in the Hong Kong Blue-book; and we believe also that Earl Grey will bring forward in the Lords the case of Tam Achoy and Capt. Baker.

THE LATE CAPTAIN BATE, R.N.—The fun for a testimonial to Captain Bate, R.N., who was killed at Canton, has reached £200, and has been paid over to the directors of the Royal Naval and Marine Orphan School at Portsmouth, on the condition of their establishing a nomination to the school, to be called the "Bate Scholar," to perpetuate the memory of that gallant and lamented officer. Vice-Admiral William Henry Bruce, the naval commander-in-chief at Portsmouth, has accepted for himself and successors the right of nomination of the "Bate scholar."

LONDON MISSIONARY SOCIETY.—The annual meeting of this society was held on the 22nd inst. at Exeter Hall, the Earl of Shaftesbury in the chair. The report stated that the receipts from ordinary sources had been £80,837. The donations, in answer to a special appeal for India, were £4,927, and for the extension of missions in China £8,141, making a total of £93,906, exceeding that of any previous year by £475. Ten missionaries had been sent out during the past year—one to Polynesia, one to British Guiana, six to China, and two to India. In addition to the 152 European agents the society employed 880 native agents, consisting of pastors, evangelists, catechists, and schoolmasters.

EXPLOSION ON BOARD THE P. AND O. STEAMER "ORISKA."—An explosion took place on the 24th about three o'clock on board the P. and O. Company's screw steamship *Oriska*, lying in the inner docks Southampton. It appears that she had been filled up with coals during the last few days, preparatory to her leaving for India, and one of the workmen on board had drilled a hole through the bunker for the purpose of ventilating the coals, when he applied a lighted candle to the hole to see that it was perfect. An explosion followed immediately, which blew up the deck overhead and tore to pieces much of the cabin fittings. Three or four men were scalded and otherwise injured, but not seriously, it is understood, and they were at once conveyed to the Royal South Ham's Infirmary. It is supposed that some of the coals were put on board wet, and the ignition of the gases thereby generated caused the explosion.

AN ESTIMATE OF RAJAH BROOKER.—We extract the following from *Once a Week*:—"As for his own place in his own country and its history, he is in himself a marking incident in his century. We have in him one more representative of an order of men who had seemed to have passed away, while yet there is no retrograde character about him and his work. We have in the American filibuster not only a retrograde but a corrupted specimen of the adventurer of the Middle Ages. Walker, in Nicaragua or in Mexico, is a base imitation of the old buccaner. Rajah Brooker bears no relation to such a specimen of depraved buccannery. He gave himself to Sarwak, instead of seizing Sarwak for himself. He did not grasp at the reins of Government, but put them in the hands of the natives, and showed them how to guide their course. He sacrificed his fortune for them, instead of extorting one from them. It has been the world's wonder what sort of Christians Corcoran and his comrades supposed themselves to be; and the world now sees what sort of a Christian a knight-adventurer may be. For the sake of this spectacle we may rejoice that that antique class has had one more Representative Man."

EAST INDIAN EMIGRATION.—Some papers lately laid before Parliament give an account of the emigration of labourers from India into the West Indies and British Guiana. During the fifteen years commencing with 1845, 14,185 men, women, and children, have embarked at Calcutta for Trinidad (two-thirds of them men), and the mortality during the three months' passage was no more than 4.6 per cent. during the first twelve years; but after that period the death-rate at sea increased beyond all previous experience, and amounted on 5,379 since embarked to 13.4 per cent., the proportion being larger among the women, and still heavier among the children. This is attributed to depressing circumstances. The most alarming reports were circulated respecting the destination of these coolies, calculated to impress them with the most melancholy forebodings. It was said that the English Government, to avenge the slaughter of Europeans in India, had selected the emigrant ships as the most convenient and least suspicious mode of carrying off the natives to sea, and there destroying them by hundreds, without the possibility of a single soul returning to tell the tale. A similar mortality took place among the Calcutta emigrants to British Guiana. Among the emigrants from Madras the mortality has been very much smaller. The difference, however, between various Calcutta ships in regard to the mortality on board has been very great indeed, almost startling, and sometimes the death have been most numerous where the passage has been the shortest. It may be supposed a fearful mortality on the voyage removes all the weak, and the annual death-rate among Indian immigrant labourers landing in Trinidad has been during the last three years only 1.6 per cent. per annum—a rate which should be very glad to see in England. Supposing this to continue during the remainder of the five years of industrial residence, these immigrants will have lost 21.3 per cent. of their number in a three

months' passage and five years' residence, and the average annual rate of mortality among a similar class in Calcutta is described as 4.4 per cent., which would indicate a loss of 23.1 per cent. in the same period, if they had stayed at home. The loss on the passage during the great Irish exodus to the States is stated to have been 17.5 per cent.

THE FRENCH IN THE RED SEA.—The Paris correspondent of the *Globe* writes:—"All you appear to know in England about the now accomplished settlement of the French in the Red Sea was compressed into a brief paragraph of the *Times*. Some details as to the nature of his colonial and military action may be useful. There came an embassy last year to Paris from some local potentate of Abyssinia, (there are five,) who was anxious to get formal recognition of his crown and guarantee for its perpetuity on the part of France. The former request was granted; as to the latter I am not able to say. In return he ceded on the coast of France the spacious bay of Adoulis, on a Greek colony, and its name indicates, meaning that slavery was ignored there as at African Liberia. Lord Val is named this part of the shore 'Anale's Bay,' probably ignorant of its Greek original. The harbour comprises two islands, Issa and Ooda, capable of being fortified. Water is plentiful, and pasture ground, with good anchorage on the roadstead. Plenty of horned cattle, sheep, and goats are in the vicinity, and the spot is within a few hours' sail of the island of Massouah, part of the Turkish territory, where there is already a French consulate. All the supplies for organising the settlement have come from L'Isle de Reunon and Mauritius."

THE SUZ CANAL.—A letter from Alexandria states that the result of the meeting of subscribers to the isthmus of Suez Canal Company, about to be held at Paris, is looked for with some feelings of curiosity. A show of carrying on works in the Suez Desert is still kept up; but every one is agreed that it is nothing more than a mere pretence, and that not the slightest real progress is made. Even M. de Lesseps' friends show great reserve when questioned on the subject. The information we derive from them amounts to little more than that some sort of temporary jetty and lighthouse have been built at the Pelusian end of the canal, and that large numbers of huts have been erected for labourers. On the other hand, we hear that obstacles arise and interfere with even the merest initiatory operations of the labourers to an extent far more serious than even the most dejected opponents of the scheme had ventured to predict. Unfortunately, the Egyptian Government has not kept itself so completely aloof as to enable it temporarily to disclaim all responsibility, and to maintain its innocence of having lent its countenance and having encouraged the waste of money that has been accomplished. The *Times* of the 24th inst., contains an able leader once again showing the futility of the scheme.

COMMERCIAL POSTSCRIPT.

MONDAY AFTERNOON.

The accounts from the silk manufacturers report inactivity, and the mills only work four days in the week. This is attributed to the French treaty. The holders of the raw material do not give way. The Tea Market is also firmer this morning, and next week will no doubt experience a further rise.

ARRIVALS (not included in Table), May 21.—At Bremen from Patavir, Oldenburg. 25th.—At London from Foo-Chow-Foo, Spi it of the North. 24th.—At Deal from Singapore. Laughing Water. 26th.—At Plymouth from Maulmain, Cing Ma's. May 3, at Havana, from Maca, Ville d Lima; 8, at Boston, from Batavia, Fortuna; 12, at St. Lawrence, from China, Augusta Mary; 11, off Boston, from Manila, Winged Arrow.

DEPARTURES—From Cardiff, May 22, for Shanghai, Gharra. From Sunderland, May 22, for Singapore, Humboldt. From London, 25th, for Batavia, Richard Thornton. 28th.—From Cardiff for Singapore, Amalia Augusta; May 28, from Deal, for Batavia, Goed Vertrouwen; 24, from Liverpool, for Batavia, Bether.

At St. Helena, April 12, from Penang, Helen Baird, Oattes, and sailed for London. Off St. Helena, April 15, Spartan, from Foo-chow-Foo.

CASUALTIES—The Remegius Adolhus, Browning, from Cardiff to Hong Kong, with coals, which put back May 16, leaky, has been hauled into dock to discharge and repair.

LAYD ON—At Liverpool for Manila, Sales; for Batavia and Sourabaya, Joachim Christian.—At London for Hong Kong and Whampoa, Scarfell; at London for Singapore and Shanghai, Sea Park.

Monetary and Commercial.

THE NEW TELEGRAPH TO AMERICA.

A deputation waited on Lord Palmerston in reference to the new electric line for connecting America, with a view of obtaining the assistance of Government in carrying out a perfect survey of the whole route which is intended to be laid down via Faroe Isles (Danish), Iceland and Greenland, as already noticed in previous numbers of this journal. Colonel Shaffner, Sir Edward Belcher, and Captain Young, who have explored the Arctic regions, attended. His lordship requested that a detailed statement should be drawn up as to the precise assistance required of Government. The following is a description of the route:—

It is at present intended that the European terminus shall be in the north of Scotland, whence the cable will be laid to the Faroe Island, a distance of 230 miles, and thence to Iceland, a short length of 280 miles more. A land line then proceeds across part of Iceland to join the submarine cable on the western coast of that island, near or at the town of Reikiavik, whence the cable is intended to proceed direct to the southern end of Greenland—a distance of between 700 and 800 miles; then, crossing by land lines from the eastern shore of Greenland to Julianhaab, a submerged line leads from that town to Hamilton's Inlet, on the coast of Labrador, a distance of about 600 miles more. Short land lines then continue the whole to the shores of the St. Lawrence, and are there placed in junction with those that traverse the United States.

A meeting of the Chartered Mercantile Bank of India, London, and China, also took place, Mr. W. Howard presiding. The annexed report was carried unanimously:—

The Directors have the pleasure of presenting their second annual report, and of submitting a statement of accounts for the half year ending the 31st of December last, and profit and loss account for the entire year, showing a net profit (after providing for all bad and doubtful debts, and payment of income-tax) of £74,560, which has been appropriated as follows:—£25,000 in payment of a dividend at the rate of 10 per cent. per annum for the half-year ending the 30th of June; £25,000 for a like dividend for the half-year ending the 31st of December; £20,000 carried to a reserve fund, and £4,670 carried forward to next account. The premises recently occupied by the bank in Old Broad-street having been found too small for the increasing business of the Company, the Directors were glad to avail themselves of an opportunity to secure an assignment of the lease of the present banking-house on favourable terms. Since the last meeting the court have opened a branch

in the Mauritius. In their last annual report the Court mentioned their expectation of receiving from the Directors of the late Mercantile Bank of India, London, and China, its reserve fund intact; in this they have been disappointed—the losses of the late bank have proved much larger than the amount at which they were estimated, and considerably in excess of the profits carried forward to meet them. The Directors of the late bank in Bombay, who have had the sole control of the winding-up of the institution, have apprised the Court that a considerable reduction will have to be made from the reserve fund of the late bank, before it is handed over to the Chartered Bank. In the mean time the Court have set apart the sum of £20,000 from the profits of the past year, as a commencement of the reserve fund of this bank.

GENERAL BALANCE FOR THE HALF-YEAR ENDING DEC. 31, 1859.

LIABILITIES.				
Proprietors' capital	..	..	..	£500,000 0 0
Current accounts, fixed deposits, draughts, notes in circulation, &c.	..	..	..	3,238,038 2 4
Profit and loss—balance from last half-year	..	..	..	£12,898 12 2

Leaving a balance to be carried forward to next half-year	..	..	..	4,670 4 0
				49,670 4 0

The Australian Mail service is once more about to be altered. The Peninsular and Oriental Steam Company find that they cannot make the service pay, at the present amount of the subsidy (£180,000 a year), and they have therefore intimated to Government their intention of throwing up the contract. The monthly communication with Australia, however, is not to be discontinued, for the Company have submitted a new plan to the Government, entailing a total subsidy of only £120,000 a year. Upon this plan it appears the Company intend to act, the colonial moiety of the subsidy having already been guaranteed by the colony of Victoria alone. The Company undertake to maintain a monthly service between Melbourne (only) and Point de Galle (Ceylon), in connection with one of the bi-monthly lines of postal steamers which now convey the India and China mails. At Point de Galle the Australian mails will be transferred to the Indian steamers. The only port between Melbourne and Point de Galle at which the Australian packets will touch will be King George's Sound, for coaling purposes. The conveyance of the Sydney, Adelaide, and other intercolonial mails to and from Melbourne must be performed by steamers chartered for the purpose by the several colonial governments, as the Peninsular and Oriental Company's packet, instead of making a tour of the colonies, will arrive at and sail from Melbourne alone. The principal remonstrance against the alteration will probably emanate from New South Wales and South Australia. It is intended that the new arrangement shall come into operation with the mail leaving Australia on the 22nd of July, and with the mail leaving England on the 20th-26th of June. Consequently, the June mail via Southampton will leave England on the 20th instead of the 12th, and the outward mail via Marseilles will go on the 26th instead of the 20th. Instruc-

tions to this effect have been sent out to the Company's agents in Australia by the mail of this day.

The meeting of the Provincial Bank of Ireland has taken place, when the dividend declared was at the rate of 20 per cent. per annum, or 8 per cent. ordinary dividend, and 12 per cent. bonus. The proceedings were altogether of a congratulatory nature, the course of operations and results being highly gratifying.

A prospectus has been issued of the Himalayan Tea Company, with a capital of £250,000 in £20 shares. The object is to cultivate tea in the hill districts of India, and to purchase the Government experimental plantations. The recent report of the Committee on Colonization and Settlement in India demonstrated that this branch of production may be attended with success; while, so far as local consumption is concerned, the growers will now have the additional advantage of a 10 per cent. bounty, tea being included among the articles on which Mr. Wilson has established protective duties.

There are English interests of some importance in Sicily, not merely in connection with the wine produce, but also in the preparation of silk at Messina and elsewhere; but our general trade with the entire Neapolitan dominions is comparatively small. Our exports to Naples and Sicily last year were under £1,200,000, and our imports thence only £1,632,000.

A curious instance of sharpness, distinguished by a Transatlantic element, has been furnished in the history of a recent railway company, called the Buenos Ayres and San Fernando—a London undertaking, in which some citizens of the United States have taken a very prominent part. It was introduced several weeks back, and, as it enjoys a guarantee from the Buenos Ayres Government for only twenty years, most persons would have expected that the attempt to float it would, so far as the general public were concerned, end in failure. Before the allotment, however, the shares, which are of £10 each, went to a small premium, and subsequently to 4 per cent. before the shares were allotted, and on application by the brokers they received but a small portion of the number applied for.

The committee of the Stock Exchange have terminated their inquiry on the Pullinger frauds. The resolution adopted is that the four members who acted for him as brokers—Messrs. Robert Johnston, Theodosius Uzielli, Sheldon, and Braddock—are to be suspended from admission to the House, the first three till the 25th of March next, when the annual election takes place, and they can be again admitted or rejected at the pleasure of the members, and the last for three months.

THE RED SEA CABLE.

The following from the *Times* relates to the question of telegraphic communication with India:—

"It may be assumed that the Government is at length convinced that the construction of the Euphrates line, either simultaneously with or in preference to that by the Red Sea, would have been a great advantage. Originally that line was specially encouraged. It was estimated to cost about one-half the sum required for the Red Sea, and to be capable of completion in far shorter time, while it would also have the quality of being secure against any break that could occasion delays of more than a few hours. The capital was subscribed, and the company were stimulated, under Government assurances, to expend a considerable amount. Suddenly all assistance was withdrawn from them; they were left to bear their loss, and it subsequently transpired that they had been deserted in deference to the Emperor of the French. The result was that, after a lapse of five years and the guarantee of a total of £800,000 to another company, we are still without any telegraphic communication with India and China that can be depended upon. There is no disposition to deny that it was desirable to have a route by the Red Sea; but the uncertainties of that course were always palpable, and the argument was that an alternative communication should be secured, and also that if one was to be commenced before the other, it should be that which would be the cheapest, the most speedy of construction, and the safest from the chances of accident."

Intelligence has been received since of the working of the cable from Suez to Kurrachee, and it is most probable, as intimated in our last, that the fault was in the instrument and not in the cable. The line from Kurrachee to Aden is at work for Government messages only for the present.

The Suez-Aden line having gone wrong north of Perin, is under repairs, the *Imperador* steamship being employed for the purpose, as noticed in our last. The last news received states that the line will probably be in working order by the end of this month.

The Singapore and Rangoon line is postponed, to be laid in February by Messrs. Glass, Elliot, and Co. Three iron steamers are building by Messrs. Palmer, of Newcastle, specially to take

out the cable. A great many tenders for laying the cable have been received by the Government, and Messrs. Glass's has been accepted. Nearly 1,200 knots of the wire of this cable are manufactured, and over 400 are covered with iron at Messrs. Glass's works, where the arrangements are very complete, and the work is progressing, we understand, to the satisfaction of the Government engineers, Messrs. Gisborne and Forde.

The Australian Government have granted a subsidy to prolong the Rangoon, Singapore, and Batavia cable to Sidney and Melbourne, but it is feared that the terms offered are insufficient to raise the capital in this country. Melbourne has, however, declared herself so strongly in favour of this line that better terms are sure to be granted when the necessity arises.

The shipment of specie by the steamer *Pera* on the 20th inst. is as follows:—Shanghai, £131,278; Foo-Chow, £2,205; Hong Kong, £44,310; Singapore, £23,200; Penang, £1,000; Calcutta, £26,620; Madras, £10,700 in silver, and £4,221 in gold. Total, £243,644.

ARTICLES OF IMPORT.

TEA.—Our market during the past fortnight has been very firm. Each successive telegram has brought news favourable for holder. Low and fair broken tea Congou have been sold freely, ex *Strawell*, from 1s. 1½d. to 1s. 3½d. per lb., whilst good common has gradually advanced from 1s. 4d. to 1s. 5d. per lb., at which it is now difficult to buy. Fair to good fine ory kinds have been sold at a rise of ½d. to 1d. per lb. Common to fair Ho-Hows and Ning Chows, as also second class Congou and Wopaks have been in request, and prices are now full 1d. per lb. dearer. Good and fine Kisows remain without alteration. There has been rather a better enquiry for fine Mouings and Wopaks at a shade higher prices. Tayshans are in request at full prices. Fair to good Oolongs are rather dearer. Sou-chongs and Flowery Pekoes show no material alteration. In Scented Teas business has been limited, and there is not much change to notice in prices. In Green Teas business has been moderate at about former prices, Young Hysons continuing scarce, and commanding full prices. Good and fine Moyune Gunpowders have been in air request at previous rates. Taipings remain much as before. To-day 12,280 packages were offered, of which 6,700 packages were sold—5,080 being without reserve,—and all prices were obtained, but no real change of rates was observable, excepting, perhaps, a rational advance in common Scented Capers and poor Taysham Congous. Several parties have within the last three or four days withdrawn their fine teas from the market, as the scarcity of these is becoming apparent.

SILK.—The market has continued without much variation—if anything our quotations have been strengthened.

SUGAR.—Sales of 4,000 bags of clayed Manila at 36s. to 37s. The market is still in the same inactive state.

COFFEE.—The recent arrivals of Plantation Ceylon have been brought forward rather extensively this week, the public sales amounting to 1,191 cases, 668 barrels and bags, and no holders showed a disposition to meet the market at a decline of 1s. to 1s. 6d. per cwt., a fair demand has been experienced, and the greater part has been cleared off as follows:—fine fine ordinary and low middling, 66s. 6d. to 71s.; middling and good middling, 72s. to 76s. The native description, though not to the same extent affected, has also suffered some depression, and 28 cases, 1,306 barrels and bags, were principally sold at and after the auctions, on lower terms; good and fine ordinary, 58s. 6d. to 60s.

RICE.—The market has been active at slightly advanced rates. Sales of Rangoon at 9s. 10½.

PEPPER.—Sales of 2,747 bags of Singapore black chiefly sold at 4d. to 4½d. per lb., and 1,854 bags of Penang partly sold at 3½d. to 3½d. White, sales of 566 bags of Singapore at 6d. to 6½d., and nine cases Tellicherry at 8½d. to 1s.

CINNAMON quiet at the currency of the late quarterly sales; 1st sort, 1s. 2d. to 2s. 2d. per lb.; 2nd, 10d. to 1s. 6d.; 3rd, 6d. to 1s. 2d.; 4th, 6d. to 10d.

NUTMEGS firm upon former terms; and 116 cases Penang and 19 cases Singapore at auction sold at 1s. 2d. to 1s. 6d. per lb. for ordinary small and part shelled to good bold.

MAON continues steady, and 20 cases Penang and 15 cases Singapore sold at auction at 11d. to 1s. 8d. per lb. for ordinary to fair palish, being fully previous value.

SAGO very flat—399 boxes at auction; a few sold at 17s. 6d. per cwt. for good mall. Sago flour market remains very firm; supply small, buyers 2s. 2d. per lb. on the spot, and 2s. 1d. near arrival; distant, 2s.

HEMP.—O 3,362 bales of Manila offered at auction, 2,327 bales were sold without reserve, and realised £22. 5s. to £26 per ton, for middling to good roving, prices being generally 10s. to 20s. lower, but competition good at the reduction.

CORRUM.—Sarat is quoted at 4d. to 5½d. Stocks are very moderate of the finer sorts.

JAPAN WAX.

TIN.—Banco is quoted at £136 to £137, Strait's £129 to £130, at which rates moderate business has been transacted.

TOBACCO.—The market and quotations are the same as noted in our last.

MISCELLANEOUS.—India Rubber: Only 93 chests brought to auction, and three-fourths sold, ordinary to very good round at 1s. 5d. to 2s. 6d. per lb.; ordinary flat, 1s. 6d.; being the previous value. Camphor China and Japan, 160s. to 170s., no transactions reported; sales at £11 to 11 17s. 6d. Ratan sales of Singapore and Batavia at 2s. 1d. to 6s. per 100. Sapanwood market dull; Siam quoted at £8 to £9 10s. A parcel of Manila offered at auction was withdrawn. Soy: quotation 4s. to 4s. 6d. Rhubarb: no transactions. Mother of Pearl Shell: Singapore quoted at 125s. to 140s. Manila, 105s. to 125s.; Cassia, 13s. to 13s. 6d., a few cases sold; Cassia Sgnea: sales at 88s. to 98s. Cassia Buds: sales retired at 20 s.; quotation 185s. to 190s. Cocoa-nut oil: Cry on, £39 to £43. Galangal root: sales at 26s. 6d. to 27s. 6d. Star Aniseed: sales at 90s. to 90s. 6d. Rum: East India, 1s. 6d. to 1s. 7d.

ARTICLES OF EXPORT.

IRON.—The official prices at Wolverhampton are as follows:—Best bars, £8 10s.; sheets, £9; doubles, £10 10s.; nail sheets, £8 10s.; lath, £12; boiler plates, £9; best and best best in proportion; common rods, £7 10s.; hoops, £8 10s.; gas strip, £8; Canada plates, £12, and all other sorts in proportion.

STEEL.—Swedish keg, £20; faggot £21 to £22.

TIN.—English black, 136s.; bar, 137s.; tin plates best charcoal I. C., 31s. to 32s. 6d.

LEAD, &c.—Pig, £22 5s. to £23; sheet, £22 15s. to £23 10s.; white, £30; solder, £21; zinc, £27; regulus of antimony, £52; copper sheet and sheathing, 12 pence; yellow metal, 10 pence.

MANUFACTURE MARKETS.—The yarn-market has been very flat, and India and China qualities are ½d. to ½d. lower, other kinds being more or less unfavourably affected. Messrs. John Slagg and Co. report:—"Since our last report the determination on the part of buyers to keep out of the market has become more marked. Later advices from India and China are considered very unfavourable, and there is, consequently, little or nothing doing in goods for those markets. We have made a slight reduction in our quotations, but they must be considered entirely nominal, as the few orders making are not sufficient to test them. There is still a moderate business doing for the home trade, and prices are comparatively steady." Messrs. G. Fraser, Son, and Co. say:—"The market has been very dull throughout, and prices are unsatisfactory for India goods and yarns of all kinds (excepting extra hard twist for the Levant), and also for 9-8ths printers and shirtings. Domestic remain without change, owing to the heavy orders beforehand in the hands of manufacturers."

LOUISE ADOLPHINE, Batavia to Antwerp, April 29, 30 N., long. 34.

CONFERENCE, Liverpool to Singapore, April 4, 6 S., 31 W.

CASUALTIES.

The Tung Yu, for China, put back to Liverpool 12th May with loss of bulwarks, &c., having been in contact during the previous night, off the Skerries, with the St. Patrick (s) from Drogheda, which lost bowsprit and figurehead.

The Tra'alcar (barque), from Manila to London, was abandoned 20th April, making thirty inches water per hour, and foundered the next morning in lat. 29 N. long. 42 W. The second mate and eight men were taken off by the Lidia, Bozano, arrived off Dover 13th May, and the master chief mate, and remainder of the crew by the Hugo Grotius, from Batavia to Rotterdam, which was in company at the time.

Cardiff, 15th May.—The St. Vincent (ship), of London, has been towed from Penarth Road into East Butte Dock, leaky. This vessel sailed from Cardiff for Singapore 10th May.

The Mount Stuart, Elphinstone, Fladserad, from Maulmain to Chatham, was stranded at Am'leteuse, near Boulogne, 15th May. She was towed away the next morning by steam tug, and arrived in the Downs the same day.

The Franziska, Moller, from Liverpool for Woosung, put back to Liverpool 16th May, having been ashore on Arklow Bank, and assisted off by a steamer.

The Remegus, Adolphus, from Cardiff to Hong Kong, arrived off Queens-town 17th May, leaky.

FREIGHTS AND CHARTERS.

Arrivals having been heavy during the week, owners have displayed more readiness to charter at the rates offered, and an active business has been done. Outward freights continue weak, the supply of tonnage being somewhat in excess of the demand. For Australia large vessels are almost neglected, £3 10s. to £3 12s. 6d. per ton N.N.M. being offered for the most aui able ships, while for vessels of 500 tons and under the rates current range from £3 15s. to £4.; the loading houses giving better terms for small vessels.

In the East India trade there is no new feature of importance. The rate for dead weight is well maintained, but light goods for Madras, Bombay, Calcutta, &c. are scarce, and taken at low rates. The current rates for the berth continue to rule at about 42s. 6d. dead weight for Bombay, Madras, or Singapore; 47s. 6d. Kurrachee, 35s. Calcutta, or 62s. 6d. (via Kurrachee). For teak from Moulmein 80s. to United Kingdom, 85s. Continent, and 90s. Mediterranean, is freely offered; or £6. 10s. on the round, taking coals out to Aden, Galle, Singapore, Madras, or Rangoon; or £6 going out direct to Rangoon. For rice 65s. is offered for arrival in January next, 62s. 6d. from Calcutta, 60s. from Java, 40s. Mauritius, 60s. Bombay to the Mediterranean, &c., &c. For China 105s. is offered for the round, taking coals to Hong Kong; or 55s. from Cardiff to Shanghai direct.

A BREEZE IN THE CHRONOMETER MARKET.—A correspondence on the production of these valuable and important instruments has appeared in the Nautical Magazine, in which it appears that a Mr. Pennington of Orchard-street, Portman-square, has undertaken to supply chronometers to the public at the manufacturing rates. The instruments of Mr. Pennington have been supplied to the navy for the past fifty years, and one of 1804 is now in use in one of the ships on the Australian station.

THE P. AND O. COMPANY.—The two vessels announced in a previous issue to proceed round the Cape for the purpose of affording better boats to the China line, left Southampton on the 10th inst., the Behr in command of Capt. Almond, and the China Capt. Henry. It is not certain until their arrival in Bombay if they will both be placed on the China line.

AUSTRALIA and NEW ZEALAND.—The most reliable intelligence from these colonies is given in the AUSTRALIAN and NEW ZEALAND GAZETTE, published every Saturday, price 6d. free by post.
London: Mr. F. ALGAR, 11, Clement's-lane, City.

LEA and PERRINS' CELEBRATED

WORCESTERSHIRE SAUCE.

PRONOUNCED BY CONNOISSEURS TO BE THE 'ONLY GOOD SAUCE,' AND APPLICABLE TO EVERY VARIETY OF DISH.

EXTRACT of a LETTER from a MEDICAL GENTLEMAN, at Madras, to his Brother, at WORCESTER, May, 1851.

"Tell LEA and PERRINS that their Sauce is highly esteemed in India, and is, in my opinion, the most palatable as well as the most wholesome Sauce that is made."

EXTENSIVE FRAUDS.—Lea and Perrins having discovered that several of the Foreign Markets have been supplied with spurious imitations of their "Worcestershire Sauce," the labels of which closely resemble those of the genuine Sauce, and in one or more instances with the name of L. and P. forged, they have deemed it their duty to caution the public, and request purchasers to see that the names of Lea and Perrins are upon the Wrapper, Label, Stopper, and Bottle.

L. and P. further give notice that they will proceed against any one who may infringe upon their right, either by manufacturing or vending such imitations, and have instructed their correspondents in the various parts of the world to advise them of such infringements.

Wholesale and for Exportation by the Proprietors, Lea and Perrins, Worcester; Grosse and Blackwell, and other Wholesalers and Merchants, London.

Now Ready, in One V.l. post 8vo., price 6s., RECOLLECTIONS OF BARON GROS'S EMBASSY TO CHINA AND JAPAN IN 1857-1858.

By the Marquis DE MOYES, Attaché.

IMPORTANT TO INDIAN RESIDENTS.

TESTIMONIAL RECEIVED BY

TUCKER AND SON,

MANUFACTURERS OF IMPROVED INDIAN LAMPS.

"Messrs. TUCKER & SON.

"Edinburgh, Sept. 11, 1856.

"Sirs,—I have much pleasure in bearing my testimony to the excellence of the Lamps supplied by you to me when in India last year. They give a brilliant light, are not affected by the punkah, and are in every way suited to the Indian climate. In short, they are the best lamps I have seen in the country.

(Signed)

"A. Ross, Bengal Civil Service."

MANUFACTORY, 190, STRAND, LONDON.

Established 40 Years. Designs and Price Lists sent free by post to India.

BOLTON AND BARNITT,

Manufacturing and Export Chemists,

146, HOLBORN BARS, LONDON

Formerly Button, Dymond, and Co.

AN AGENT WANTED IN CHINA.

JOHN GOSNELL AND CO.'S PERFUMERY, PATRONISED BY HER MAJESTY AND THE ROYAL FAMILY.

Among the celebrated articles for the Toilet prepared by J. G. and Co., the following are of the choicest kind, and universally admired:—

JOHN GOSNELL and Co.'s COURT PERFUMES.—Queen Victoria's Bouquet, The Bride's Bouquet, Jockey Club, Guard's Own, Eau Bouquet, Military, Royal Yacht Club, New Perfume—Extract of Flowers, Eugenie, Napoleon III., Frangipanni, Wood Viole, Opera Bouquet, &c.

JOHN GOSNELL and Co.'s FOUNTAIN PERFUMES for the BALL-ROOM.—A most elegant and useful invention, which cannot fail to be appreciated by the Ladies.

JOHN GOSNELL and Co.'s TREBLE DISTILLED LAVENDER WATER possesses in the highest degree the full fragrance of the flowers.

JOHN GOSNELL and Co.'s REAL OLD BROWN WINDSOR SOAP.—A Toilet Soap of the finest quality and very superior fragrance. It differs so widely in composition from the ordinary Alkaline Soaps, that its frequent use is highly beneficial in removing all harshness and redness of the skin.

JOHN GOSNELL and Co.'s MOELLINE, GOLDEN OIL, for the Hair.

80, Hatton Garden, London.

* Beware of SPURIOUS IMITATIONS

HOLLOWAY'S PILLS.—BILIOUS AFFECTIONS.—In the spring and fall of the year nothing is more common, and few ailments more distressing, than the class of diseases dependent on disordered liver. The sensation of nausea, headache, listlessness, and loss of appetite, will at once be recognised as the symptoms of liver affections, which can only be relieved by regulating the action of that organ. Holloway's Pills exercise a healthful influence over the biliary secretion, known and appreciated through Great Britain and her Colonies. These Pills cure after everything else fails. Sufferers for years from biliousness, sick headache, and liver complaints have been thoroughly restored by these Pills to sound health and a good digestion, who previously had no enjoyment in life.

KEATING'S PERSIAN INSECT DESTROYING POWDER.—This powder is quite harmless to Animal Life, but is unrivalled in destroying Fleas, Bugs, Emmets, Flies, Cockroaches, Beetles, Gnats, Mosquitoes, Moths in furs, and every other species of insect in all stages of metamorphosis. It is perfectly harmless in its nature, and may be applied without any apprehension, as it has no qualities deleterious to animal life. Sold in packets, 1s., 2s. 6d., and 4s. 6d. each; or post-free for 1d. or treble size for 3d. postage-stamps, by THOMAS KEATING, Chemist, 73, St. Paul's Church-yard, London, E.C.

Take notice each genuine packet bears the above name and address.—See "The Field," Oct. 2nd and 9th, pp. 263, 265, and 264.

TWINBERROW'S DANDELION, CAMOMILE, and RHUBARB PILLS, an effectual cure of indigestion, all stomach complaints and liver affections. In cases of constipation these pills never fail in producing a healthy and permanent action of the bowels, so that in a short time aperients will not be required, and, being quite as innocent as castor oil, they may be given to children.

From Dr. Dick, Lansdown-terrace, Kensington. "Sir,—Send me another bottle of your Dandelion, Camomile, and Rhubarb Pills for my own use. I lose no occasion of recommending these Pills, as I can conscientiously do so."

Prepared by TWINBERROW, Operating and Dispensing Chemist, 2, Edwards-street, Portman-square, London; and may be had of all Patent Medicine Vendors.

St. Paul's Export Scented Soap Works.

ROBSON and SOUL, EXPORT PERFUMERS and FANCY SOAP MAKERS Merchants can be supplied with sample cases from ten pounds and upwards on the shortest notice.

N.B.—Brushes, Combs, Sponges, and every article for the Toilet, 32, Lawrence-lane, Chancery-lane, E.C., Sole Proprietors of the "Rose of England."

By Appointment, and Royal Letters Patent.

JOHN BRACHER (late WILLIAM MARR & SON), Inventors, Patentees, and Manufacturers of the strong WROUGHT-IRON FIRE and THIEF-PROOF SAFES, CHESTS, STRONG-ROOMS, IRON DOORS and FRAMES, 9, Walbrook, and Vulcan Safe Works, Skin-yard, Bankside, Southwark. To the New Houses of Parliament, Her Majesty's Honourable Board of Ordnance, National Debt Office, Public Buildings, &c.

Full value given in exchange for old Safes. The attention of Corporations, Bankers, Architects, Solicitors, Commercial Houses, and all persons having the care of valuable property, is drawn to the superior quality of his Patent Fire-proof Safes and Chests.

PLUMBE'S GENUINE ARROW-ROOT

should be used in preference to any other. It is greatly preferred by the most eminent Physicians in London for infants, and as the best food for infants.

REPORT ON PLUMBE'S ARROW-ROOT, BY DR. HASSALL. "I have subjected Plumbe's Arrow-root to careful examination, microscopical and chemical. I find it to be perfectly genuine, and of superior quality; equal in all respects to the best Bermuda, for which a high price is usually charged. (Signed) ARTHUR HILL HASSALL, M.D." Directions and testimonials with each packet, which bears the signature of A. S. PLUMBE, 3, Abchurch-lane, London, E.

Retailed in London by Snow, Paternoster-row; Ford, Islington; Morgan, Skene-street; Williams and Lloyd, Moorgate-street; Medco, Camberwell.

AGENTS WANTED.

PUMPING MACHINERY.

GWYNNE and CO., ENGINEERS, LONDON, manufacture and supply the following machinery, of the most improved construction, and with all the latest improvements:—Portable and Fixed Steam Engines and Boilers of every description; Water-wheels, Windmills, Horse and Hand-power Machines; Pumping Machinery for the supply of towns, cities, and districts, and for the irrigation of coffee, cotton, indigo, sugar-cane, and rice estates, for pumping out coffer dams, canals, dry docks, reservoirs, &c. They also manufacture and supply the Pumping and other machinery for paper, pulp, and fulling mills, breweries, distilleries, tanneries, starch works, bleaching, dyeing, and calico-printing works, chemical works, silk, cotton, and flax mills, and manufacturing in general.

Price Lists and further particulars obtained on application to GWYNNE and CO., Hydraulic and Mechanical Engineers, Essex-street Wharves, Strand, London.

For Dock work, and large Pumping operations, Gwynne and Co.'s Machinery stands unequalled.

NELSON'S MEDICATED BELT.

(Ed. Nelson, Naval Surgeon from 1833 to 1857.)

Gentlemen who are subject to pains in the back or loins, Rheumatism, Lumbago, or who are given to corpulence, are advised to wear NELSON'S MEDICATED BELT, as it gives a great support to the entire frame, and a comfortable and genial warmth to the back and abdomen, promoting health and digestion. Gentlemen who ride for business or pleasure should wear this belt as a preventive of Rupture, &c.

NELSON'S MEDICATED MARINE BELT for the prevention of Sea Sickness and the support of the back and loins during a long voyage.

"All those whose duty or pleasure calls them to sea should possess this Belt, for, putting aside its use on board ship, it is invaluable as a riding belt, sitting easily, and supporting the back."

MARK PRECIVAL.

Lower Parade, Leamington, August 3, 1858.

These Belts are sold by Mr. WHITEBURN, Chemist, 174, Regent-street; price 21s. each, or direct from the Manufacturer, WM. ELSTON, 12, Avery-row, New Bond-street. Circulars free. Orders from the country must have the name of the agent and a post-office order for 21s., payable to WM. ELSTON, at Cavendish-street.

These Belts can be had of any tailor in the kingdom.

BLAIR'S GOUT and RHEUMATIC PILLS.

Price 1s. 1d. and 2s. 6d. per box.

This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century to demonstrate by unsolicited testimonials from persons speak of a cure for the Gout was considered a romance; but now the efficacy and safety of this medicine is so fully in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age.

These Pills require no restraint of diet or confinement during their use, and are certain to prevent the disease attacking any vital part.

Sold by all medicine vendors. Observe "Thomas Frost, 259, Strand, London," on the Government Stamp.

KAYE'S WORSWELL'S PILLS cannot be equalled as a Family Medicine.—Testimonials are constantly arriving from all parts of the world as to their astonishing efficacy in destroying the cause, and removing the effects of disease. They purify the blood and correct such derangements of the stomach, liver, and other organs as are the primary causes of disease, bring all the bodily functions into healthful exercise, and strengthen and invigorate the entire system.

Hundreds of cases of cure accompany each box. Sold by all Druggists and Medicine Vendors, in boxes at 1s. 1d., 2s. 6d., and 4s. 6d. Wholesale Depot, 23, Broad-street, London.

 and Perforated Zinc, Wholesale and for Exportation.
F. BRABY AND CO.,
 FITTERY WORKS—EUSTON ROAD, N.W., LONDON.

**NOTICE TO PASSENGERS BY THE OVER-
 LAND ROUTE via EGYPT.**

PHILIP ZECH, Proprietor of the two well-known Hotels in Alexandria, the Hotel d'Europe, and the Peninsular and Oriental Hotel, begs to inform his friends, and Travellers in Egypt in general, that he has purchased **SHEPHEARD'S HOTEL** in CAIRO, which will still continue to bear the same name; and in returning thanks for the extensive patronage enjoyed by his two houses in Alexandria, hopes that the preference may likewise be extended to his house in Cairo, which will be managed in first-rate style, and in a manner intended to give every satisfaction to its frequenters, both as far as table, wines, internal and external service are concerned. Many alterations and ameliorations are being carried out at the present moment.

Curtis on Manhood.—New Edition.—A Medical Essay on Nervous Diseases.

Just published, the 120th thousand, with numerous plates in a sealed envelope, price half-a-dollar.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE, with plain directions for perfect restoration to health and vigour. By J. L. CURTIS, 16, Albemarle-street, Piccadilly, London.

CONTENTS:
 INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.
 CHAPTER II. Causes of Spermatorrhoea and Impotence: early Vicious Indulgences; dangers of Neglect.
 CHAPTER III.—A Review of the various Disqualifications of Marriage—whether resulting from the Youthful Abuse, the Follies of Maturity, the Effects of Climate or Intemperance.

CHAPTER IV.—The Author's plan of Treatment, Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhoea and other Urethral discharges by microscopic examination.

CHAPTER V. and VI. on the modern Treatment of Gonorrhoea and Syphilis.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

"We feel no hesitation in saying, there is no member of society by whom the book will not be found useful—whether such person hold the relation of Parent, Preceptor, or Clergyman."—Sun.

Mr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by letter, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Mr. CURTIS having been demonstrated by the most complete success during a practice extending over a period of Twenty Years; nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINMAN, QUEEN'S ROAD, HONG KONG.

CRICKETING OUTFITTERS.

JOHN WISDEN AND CO.,

LATE F. LILLYWHITE AND WISDEN,

2, NEW COVENTRY STREET, LEICESTER SQUARE, LONDON, W.

EVERY article connected with Cricket may be had at this Establishment. Their large stock of **OLD AND WELL-SEASONED BATS** cannot be equalled, and they invite noblemen and gentlemen to inspect them. The wants of clubs, regiments, colleges, schools, &c., are particularly paid attention to, and their list of prices will convince officials that a great saving is effected by purchasing at their establishment, which contains articles, not only of their own manufacture, but of those who are acknowledged first-rate makers, and whose goods are selected by J. W. & Co. themselves, and therefore will be warranted. Models of L. & W.'s New Patent Catapults can be seen and worked at the above address. Illustrated list of Prices forwarded Post Free. Export Orders with immediate despatch.

CRICKETING OUTFITTER.

JOHN LILLYWHITE

(LATE LILLYWHITE AND SONS AND LILLYWHITE, BROTHERS),

5, SKYMOUR STREET, EUSTON SQUARE, LONDON, N.W.

THE largest wholesale Cricketing Outfitter in England. Every article connected with the game may be had. His celebrated Cane-handle Bat, manufactured expressly for foreign use; the handle warranted not to break. Batting and Wicket-keeping Gloves, Leg Guards (waisted), Boxing Gloves, Foot Balls, Quoits, Dumb Bells, and every article for British sports.

First-class goods only kept, and every article warranted. Export orders with immediate despatch.

Illustrated lists of prices post free. No connection with any other house.

SARSAPARILLA.

WILKINSON'S (LATE BRIDGE'S) ESSENCE OR FLUID EXTRACT OF RED JAMAICA SARSAPARILLA is appreciated for its purity and marked superiority, daily prescribed by the Faculty for Impurities of the Blood, AFFECTIONS OF THE LIVER, Constitutional Debility, attenuation of Body, as an Alternative Medicine at the changes of the seasons, and for freeing the system from the effects of mercury. In India and the Colonies it is extensively used to PREVENT taking complaints incident to tropical climates, and as a renovator of the system after sickness invulnerable. "A superior preparation that may always be relied on."—Sir Astley Cooper. "We are in every respect satisfied with it."—Lancet. "We recommend your Sarsaparilla as the best."—Medical Review. "Latterly, in consequence of much debility, &c., subsequent to cholera, I have freely used Bridge's Sarsaparilla myself, with complete benefit and success."—J. Coett, F.R.C.S. Sold in Pints, Half Pints, and Quarter Pints. One Pint is equal to Eight Pints of the ordinary preparations.

IMPORTANT CAUTION!—The public are cautioned against cheap preparations of Sarsaparilla, which, instead of being what they profess, are merely a decoction of common herbs, sweetened with molasses, and flavoured with American winter green. The genuine has "THOS. WILKINSON, LATE BRIDGE & Co., 270, Regent-street, London," engraved on each bottle.

AGREEABLE SEIDLITZ POWDER in one bottle, protected by a case, with measure and spoon included. This preparation is highly recommended, not only as a Mild Aperient, but to allay fever, thirst, &c.

AROMATIC TINCTURE OF QUINIDINE, for the prevention of Fever, Intermittent or Remittent Ague, and other effects of Malaria. No Person exposed to the influence or predisposing cause of Fever should be without it, for if taken in small doses daily, the system will become so thoroughly impregnated with its principles, as to be rendered proof against all attacks of Contagion or Malaria. Sold in Pints, Half Pints, and Quarter Pints.

Agents:—PYMBS, Point de Galle; and LITTLE, Singapore Dispensary.

The above Articles prepared only by THOS. WILKINSON (LATE WILKINSON, BRIDGE AND Co.), CHEMIST, &c., 270, REGENT STREET, LONDON, W.

**PHOTOGRAPHIC APPARATUS, LENSES,
 AND PURE CHEMICALS.**

BILLIARD TABLES.

THE ONLY BILLIARD TABLES appreciated in India, China, and the Colonies, are those made by THURSTON & Co., who have supplied Her Majesty's and Native Regiments for the last FORTY YEARS.

14, CATHERINE-STREET, STRAND, LONDON.

TO CAPTAINS, MERCHANTS, EMIGRANTS, AND OTHERS.

TOZER'S PATENT PORTABLE KITCHEN—It is a apted for Boiling, Stewing, Steaming, &c., in which a dinner can be cooked for three or four persons. To small families, pic nic parties, and to invalids in particular its varied application will be duly appreciated. Officers at home or on a foreign station will find it a most desirable article. A prospectus with drawings and prices will be forwarded on application to THOMAS TOZER, Ironmonger and Manufacturer, 55, Dean-street, Soho, London; or may be obtained of Mr. GEORGE HOLMES, Hong Kong.

MACHINE BELTING.

FIRE ENGINE HOSE and BUCKETS.

All descriptions of Leather for Exportation.

S. E. NORRIS & CO., SHADWELL, LONDON, MANUFACTURERS and PATENTEES.

GLENFIELD PATENT STARCH, USED IN THE ROYAL LAUNDRY, AND PRONOUNCED BY HER MAJESTY'S LAUNDRESS TO BE THE FINEST STARCH SHE EVER USED. Sold by all Chandlers, Grocers, &c., &c.

PREPARATORY EDUCATION, BRIGHTON.

A LADY residing in a healthy locality of Brighton, receives a limited number of BOYS for EDUCATION, and offers superior advantages on moderate terms. Parents who reside abroad would find this a desirable home for their children from 3 to 11 years of age. Satisfactory references given. Address to “Alpha,” at the office of this Paper, 337, Strand, London, W.C.

CAUTION!—The great superiority of ELLWOOD'S PATENT AIR CHAMBER HATS and HELMETS over all others, for Tropical Climates, has induced some persons to offer to the public useless imitations, bearing some outward resemblance to them, but totally devoid of their good qualities: the Public is, therefore, respectfully cautioned to observe that NONE ARE GENUINE UNLESS THEY BEAR THE NAME OF THE PATENTEES ON THE LINING.

The Patent Air-chamber Hats and Helmets to be had wholesale of J. ELLWOOD and SONS, 24, Great Charlotte-street (S.), London.

JOHN TANN'S PATENT RELIANCE LOCKS and FIREPROOF SAFES are the best and cheapest safeguard against Fire and Robbery.

WAREHOUSE, 30, WALBROOK CITY, LONDON.

RIMMEL'S TOILET VINEGAR super-sedes EAU DE COLOGNE, as a TONIC and BRACING LOTION, a reviving scent, and a powerful disinfectant. 1s., 2s. 6d., and 5s. Sold by all perfumers and chemists.

E. RIMMEL, Perfumer, 96, Strand, and 24, Cornhill London, and 17, Boulevard des Italiens, Paris.

ASTOR HOUSE.—This Private Hotel is admirably situated for Commercial purposes. It is between the English and French Legations, and commands an entire view of the river. It is especially recommended to gentlemen and families travelling, for the comfort of the table, elegance of furniture, and moderate charges. P. F. RICHARD, Proprietor.

CHRONOMETERS, WATCHES, and CLOCKS.

E. WHITE, for several years Principal Assistant at Messrs. Dent's, of Cockspur-street, London, having COMMENCED BUSINESS on his own account at the premises formerly occupied by Messrs. Green and Ward, begs to call the attention of the Public of India and China to his Stock of Chronometers, Watches, Clocks, &c., all of which have been recently manufactured in the most improved principle by workmen of the first talent.

Orders with remittance or reference to London Agent faithfully and expeditiously executed, or through Mr. GEO. HOLMES, Hong Kong.

20, Cockspur-street, Pall Mall, London, S.W.

THE LONDON AND CHINA TELEGRAPH.

THE FIRST VOLUME of this JOURNAL

was completed on the 11th Nov. 1859, and can be obtained bound, with an Index, price 23s.; subscriptions for Vol. II. commenced on the 25th Nov. 1859. Price 18s. per annum, or 5s. per quarter, not including postage. Terms for advertising, 2s. 6d. per five lines; and 6d. for each additional line.

Subscriptions and Advertisements received abroad by the following Agents:—

Paris	G. FOWLER, Palais Royal.
St. Petersburg, Amsterdam, and all Continental cities.	Post-office.
New York	WILMER and ROGERS.
Canada	THOMPSON and Co., Toronto.
Malta	G. MUIR.

List of Passengers.

PASSENGERS INWARD.

By this Mail.—From Hong Kong for Marseilles: Mr. Lehtz. For Southampton: Mrs. Gilmour and Mrs. Menzies, Messrs. J. S. Hamilton and Tate.

PASSENGERS OUTWARD.

Per P. and O. str. Ceylon, 4th June.—From Southampton to Hong Kong: Mr. Hamilton, Quartermaster Benston, Mrs. Anderson. To China: Captain Gannell. From Marseilles, 13th June, to Hong Kong: Mr. Elles. To Singapore: Mr. K. H. C. Bayer. To Penang: Mr. and Miss Matthieu.

Per P. and O. str., Ripon, 20th June.—From Southampton to Hong Kong: Mr. Frankiss, Messrs. Humphrey, W. P. Dalton, and H. Chevalier. To Shanghai: Mr. Dulcken.

Per P. and O. str., 4th July.—From Southampton to Hong Kong: Mr. Henderson. To Singapore: Mr. R. B. Blundell and Miss Blundell. From Marseilles, 12th July, to Penang: Mr. Mathieu, Miss Mathieu. To Singapore: Mr. J. Ten Brink. From Alexandria to Singapore: Mr. and Mrs. H. Strauss, two children, and European female servant; Mr. and Mrs. Hartzfeld and lady.

Per P. and O. str., 20th July, from Southampton to Singapore: Mr. W. Fraser. To Hong Kong: Mr. Wheeler.

Per P. and O. str., 4th August.—From Southampton to Singapore: Mr. and Mrs. Little. To Shanghai: Mr. E. Elias. From Marseilles to Singapore, 12th August: Mr. and Mrs. Paddy. To Penang: Mr. H. Y. Paddy.

Per P. and O. str., 20th August.—From Southampton to Singapore: Mr. and Mrs. Mohr and child. To Shanghai: Mr. Bryan. To Hong Kong: Mr. and Mrs. C. T. Steel. From Suez to Penang: Mr. E. J. Leveson and friend. From Alexandria to Hong Kong: Mr. F. Cholmley.

Per Solent.—From London to Shanghai, May 23: Mr. G. Mees, (from Amsterdam) Miss Burrows, and Master Levy.

PASSENGERS ARRIVED OUTWARD.

Per mail str. at Hong Kong.—Paymaster Hunt, Messrs. Piper and Purdie, Lieut Franklin. For Shanghai: Messrs. Dow and King.

Per Ziba.—From London: Mr. Braddon.

Per Vortigern.—From Calcutta: Capt. McGregor, 3 native officers, 140 men belonging to Fane's native Cavalry, and 75 horses.

Per Athlete.—From Bombay: Lieut. Col. Spence, Capt. Baldwin, Lieuts. Cassidy, Gould, McIntyre, Ensigns Fibbitts, Maynard, Lieut. and Adj. James, Quartermaster Kettles, Assistant-Surgeon Giroud, Capt. Bean and Swettenham, Ensigns Huxham, Butler, Gow, and Mr. Atkinson, Surgeon, and 540 rank and file of H.M.'s 31st regiment.

Per Carthage.—From Calcutta: Capts. Howers and Roberts, Lieut. Van Beverhood, and Dr. Armstrong and 165 men of the 87th Royal Irish Fusiliers.

Per Winetred.—From Singapore: Major Walsh, Capts. Muirhouse and Ruggles, Lieuts. Ripley and Kenner, and Assist. Surgeon Bambray, and 470 men (natives).

Per Matilda Atheling.—From Singapore: 120 men (natives).

Per Brandon.—From Singapore: Lieuts. D. Stewart and Pakenham, and 120 men 1st Lk Cavalry.

Per H.I.M.S. Vengeance.—From Singapore: 500 soldiers and 250 marines.

Per Michigan.—From Singapore: 10 officers, 250 men M.N.I., Capt. Hicks, commanding, and 40 horses.

Per Norden.—From Bankok: Messrs. J. Dogherty and C. Allen.

Per Indomitable.—From Calcutta: Col. Butler, Capts. Warren and Farquharson, Lieuts. Henderson and Cox, Ensigns Butler, Frust, Morris, Stewart, and Dr. Young, and 247 men belonging to the 60th Rifles.

Per Lightning.—From Calcutta: Lieuts. Har s and Sutherby, Capt. Briscoe, Mr. De Silva, and 179 Seikhs.

Per Sydney.—From Singapore: Ten officers and two companies of H.M.'s 87th Irish Fusiliers.

Per Lady Ann.—From Singapore: Capts. Dadswell and Drummond, J. Baker, V.S., and 113 native soldiers, and 50 horses.

Per Erance.—From Calcutta: Major St. John and Capt. Taylor, 113 native soldiers, and 51 horses.

Per York.—From Singapore: Capts. Rigg and Renton, Lieuts. Cooke and Clarke, Ensign Stotton, Assistant-Surgeon Fry, and 378 rank and file of the 21st M.N.I.

THE PRESENT MAILS.

The Mails delivered this morning may be considered as one week in advance of their due date; this is attributable to the quick passage of the P. and O. Co.'s steamer *Nubia*, which vessel arrived at Suez in time to transfer her mails with those from Bombay, which had been detained there for the Australian Mail then overdue. In consequence of this several headings of intelligence will not be found in the usual order.

Summary of News from the Far East.

THE THIRD CHINA WAR.

The reply to the *ultimatum* forwarded by our Ambassador to the Imperial Government at Peking will be found in another column. A second letter was forwarded by the British Minister on the 14th of April, acknowledging the receipt of the communication of the General Council at Peking, and stating that the conditions previously specified in the ultimatum are unalterable, as being the expressed will of the Queen of England; that if the Chinese Government yield immediate compliance therewith the demand for indemnity will not be pressed, but the treaty stipulations providing for the residence of the British Minister in the Chinese Capital, together with that which guarantees to respectable foreigners the right of free locomotion in the interior, cannot be revoked. On refusal by the Chinese Government to comply with these conditions the solutions of the difficulties will devolve upon the Commanders-in-Chief of her Majesty's Forces. No reply had been received to this at the time of departure of the mails, but there is no doubt that it will be of a similar nature to the previous one, and that the matter must be handed over to the naval and military commanders-in-chief. It is possible, however, that Mr. Bruce will prefer awaiting the arrival of his brother, Lord Elgin, who left by the mail of 26th April, and should arrive out about the 10th of June. The *North China Herald*, in noticing the appointment of Lord Elgin, observes:—"We hope the British Government have not committed so egregious an error as to supersede our present plenipotentiary at the moment when his policy is about to bear fruit. Such a measure would be fatal to a lasting peace. It would so inflate the pride of this haughty autocrat that the Treaty of Tientsin would never be carried out in all its integrity, and we should have to yield the points of real importance to our commerce for the sake of a temporary peace."

Some uncertainty exists as to what ports will be blockaded, but it is generally believed that the blockade will be confined to the ports in the Gulf of Pechellee.

With few exceptions, the whole of the British naval and military forces have arrived at Hong Kong. Those of the French were daily arriving, and no casualty had been reported. Two transports were on the way from Manila with horses and drivers for the expedition. No positive intelligence has been received of Chusan having been garrisoned, but we have reliable information that British and French officers proceeded to that place in H.M.S. *Cruizer*, with the intention of negotiating with the Taoutai for accommodation for the troops, in the same way as the Kowloong shore, opposite Hong Kong, has been rented.

A correspondent of the *China Mail* offers the following suggestions on the present state of our relations with China:—

"The practical differences between the civilisations of the West and the East are presented in strong contrast by their different views in regard to international treaties. It is a maxim in the West that treaties once made must be executed in whole and in all their parts; and no greater disgrace falls on a government than the deliberate non-fulfilment of treaty provisions. But this is not the maxim of the East; treaties are not thus understood nor executed. The rules with the Chinese, exemplified by the history of their treaties, is, that those provisions which are beneficial to commerce, to the industry, and to the great interests of the country, which have received their free assent are binding; and those other provisions which have not received their free assent are not binding. They oppose uniformly, as well after as before signing, provisions which are odious to them. The treaty of Nankin opened to foreigners the gates of Canton, but they were kept out for years by the sturdy resistance of the Chinese, not by force, but by arguments against the expediency or the justice of enforcing the agreement. It is not of moment to consider, in this connection, whether or not the Chinese view of treaty obligations is, in the abstract, right; but it is worth while to appreciate the fact that such are their views and their practice, as it is these with which we have to deal. I would, however, suggest that in the courts of justice amongst the civilised nations of the West the fundamental fact, required in contracts is, that their provisions shall have received the voluntary assent of the mind of both parties, and if the evidence of that assent is wanting, the contract is null and void. This is the vital principle of the contract in all its forms; it regulates the dealings of individuals, of associations, and societies, among the most civilised peoples, and it is the same principle which the Chinese apply to the treaty-contract. The rule which requires the voluntary assent of the mind is obviously a rule of justice, while that which requires fulfilment without such assent is the rule of injustice. Whether or not the Chinese, who in their simplicity or their wisdom have applied the great rule of justice to the treaty-contract, have thereby placed their civilization on higher ground or on lower ground than we, who apply to treaties the rules of force, is a question which may be left to philosophy. But that they will thus act in regard to the treaty of Tien-tsin, may be safely predicted, and it will not be uninteresting to see how it will affect them. There are three provisions in those treaties which in the opinion of the Chinese will bear hard on them.

1.—The forced residence of a minister at Peking. This they allege will impair the influence and authority of the government, and is offensive to the dignity of the Emperor, because it is forced; their opposition to it, after signing, was so feeling and earnest that Lord Elgin recommended a relaxation of it, but it has been since suggested that this relaxation will be withdrawn.

2nd.—The provision for the interior transit of Chinese produce, free from the usual taxes. This measure will invade the local and Imperial treasuries, and disturb the fixed arrangements of every province. The government is weak in its administrative department, and is not able to enforce methods of revenue which are not consecrated by usage, and for which the organization sanctioned by time does not exist. It is moreover a measure in violation of the great principle of non-interference in internal affairs so recently made prominent by England in application to Italy, assented to by France and applauded by the world.

3rd.—The free navigation of [the Yang-tze kiang—a provision which invades the national sovereignty, carries foreign consular jurisdiction to the interior, and threatens to destroy the property and the industry of a great population engaged in carrying. The forced concession of such a river would be justly resisted by any Government on earth, and how the demand can be justified is difficult to conceive. These are the provisions of the treaties of Tientsin which are repugnant to the Chinese; they did not voluntarily assent to them, and do not feel bound by them. It is therefore vain to rely on the existence of the treaties, for their fulfilment; nothing but the pressure of force—sufficient force, can secure the execution of provisions obtained by force, and which derive no support from the sense of right inherent in the minds of men. Are these concessions worth what they will surely cost? They will compel the French Government equally to make permanent establishments of force sufficient to insure their observance, for the Emperor's Government cannot afford to retire and have its treaty hung on its heels. The recent experience of his Majesty who invaded Cochin China, for a real or fancied cause, is instructive. Unable to reach the Government, unable to obtain a treaty, and unable to retire with honour without one, his forces were compelled to concentrate at Saigon, where they await the smiles of fortune, or the king to relieve them. The best security for the fulfilment of the treaties would be, to make them satisfactory to both sides, when it will be the interest of both to preserve them. The benefit to England from the provisions so obnoxious to the Chinese will be small, in comparison with the cost and with the inconvenience of compelling her ally to remain in the field to watch the fulfilment—a neighbour and rival to share her influence and clog her policy.

The Hong Kong *Daily Press* has the following remarks, headed "Practical Utilitarianism of the Chinese":—"There are many things which we think our naval and military men might learn from the Chinese, but which they affect to despise. We think that if our sappers and miners were taught to construct this bamboo scaffolding work, they might effect good

service occasionally. For instance, had commissariat sheds been erected at Balacava after the Chinese model, constructed out of the studding sail booms and other small spars of the transports, and covered with awnings, sails, &c., what an enormous amount of money and misery would have been saved! Then again for making a bridge across a gully, or a jetty for vessels to come alongside, the Chinese plan is most expeditious, economical, and portable. We should also imagine that for a temporary elevation on a battle field, for the purposes of observation, Chinese scaffolding would be admirably adapted. It is perfectly astonishing how strong this scaffolding can be made. We remember seeing the American flag staff at Canton, an immense spar, slung and put into its place by the kind of scaffolding we refer to.

Then, again, the Chinese mode of slinging heavy weights is very effective, where there are no roads. No matter what the weight is, if it can only be slung, the Chinaman will carry it. If any heavy artillery should have to be landed about the Peiho, the bamboo rifles will astonish our artillerymen, if they are only allowed to have their own way and are provided with means to sling the guns. In this respect the Chinamen are the most practical people in the world. In England, where all means and appliances for the carrying out of scientific plans are available, the case is different, but here we know of several cases where sunken vessels, after being given up as "bad jobs" by Europeans, were recovered by Chinamen. Why even the immense anchors belonging to the navy yard, when that establishment was moved from West Point to its present site, were carried by coolies on their shoulders. Again, a large number of flat-bottomed boats have been built to land troops and horses at the North. These of course are simply wanted for the occasion, and, being built upon the European model, naturally cost a large sum of money. Why a junk's long boat would answer every purpose, would not cost one fourth the money, would we think be lighter, and would stand far more wear and tear. We should hope that materials are being sent up to construct jetties which will run into at least ten feet of water, so that the men may be landed dry shod. We cannot comprehend the use of all the large men-of-war. Surely if the crews were formed into a naval brigade, and the ships converted into transports, not only a great addition to the force would be the result, but there would be a great saving in money in the transport service.

In reference to the receipt of a sum said to be equal to two millions of dollars by the French from the Canton authorities, the utmost secrecy prevails. On one hand it is stoutly denied, and on the other as stoutly maintained. Two things tend to corroborate the veracity of the report. One, the fact of the French having expended large sums of money in the purchase of steamers and in other warlike operations; and the other, the fact of their not having either received remittances from France or entered the exchange market.

JAPAN.

KANAGAWA.

From a notification published here on the 29th of February, it will be seen that the recent murders are ascribed by the British Consul at Kanagawa to foreign sailors and servants going about intoxicated and offering unprovoked violence to Japanese. Such provocations were not wanting on the day when the two Dutch captains were murdered, and were probably connected with that deplorable event, though the captains had done nothing to offend. Foreigners have been warned not to venture out at night without lanterns and attendants. A Russian officer has shot a Japanese official at this place with a revolver for insulting him.

The intelligence from Japan continues alarming and most unsatisfactory. There appears to be a party in the state antagonistic to the existing government, and further, that the cause of such antagonism arises entirely from the liberality of the administration towards foreigners. The retainers of one of the princes, who is known to be most inimical to foreigners, made an attempt to assassinate the regent. They succeeded in wounding him, but it is not known whether he is dead or not. A panic is the result—the persons of the foreign ministers are not deemed safe, and every precaution is being adopted to prevent the foreign residents at Yokuama from being either assassinated or openly attacked. There can be no doubt that commerce conducted on legitimate laws of trade, is entirely opposed to the despotic institutions of the Japan government, and if allowed to proceed without check must ultimately subvert it.

The tyranny and despotism practised in Japan are hardly credible, and it is impossible that a people so intelligent and ingenious can tamely submit to it, if made aware of their degradation by being placed in contact with foreigners.

SHIPPING IN KANAGAWA.—Judge Shaw, What Cheer, Page (sch.), Troas, Medina, Witch of the Seas, Zoe; Celestial sailed for Shanghai on 5th. In NAGASAKI: Kate Hooper, Acastus, Veloz, Maryland; and nine whalers; H.N.M.'s frigate Groningen, bound for Kanagawa, had put back with loss of rudder; Yangsze (str.) had arrived, and sailed for Kanagawa.

CHINA.

PEKIN.

Hochiun, Commander-in-Chief of the whole military forces north and south of the Great River, has published a long proclamation, giving an account of his operations against the rebels. He affirms that the Nankin rebels are besieged on all sides, that their last moment of existence has almost arrived, and that their confederates have found themselves too weak to assist them in their last extremity; but the rebels lately defeated in the province of Ngan Hwui are, according to the General-in-Chief, the most depraved of all others. Defeated with great slaughter, they fled along the Hu-Chau line of road into the province of Cheh Kiang, capturing on their way the district cities of Ngah-Kih, Siau-Fung, and Chang-ping, which successes Genl. Ho accounts for by the fact, that the official and other inhabitants of those cities were ignorant of the peculiar circumstances of the rebel army; did not know that it was a defeated army; so prudently allowed it to have everywhere its own way. The General Commanding-in-Chief had despatched Lieutenant-Generals Pa Lihwan and Chang Chin, each with an army of 10,000 men, to relieve the above-mentioned localities from rebel pressure, but the banditti informed of the quick approach of the Imperial troops struck their tents, and in the most audacious manner advanced direct on Hang-Chau. Well aware the city itself was impregnable, the Commander-in-Chief was at ease with regard to it, but he knew that these pestiferous banditti might carry fire and sword through the numerous unprotected villages adjacent, and therefore issued prompt orders to Lieutenant-General Chang to fall upon them with an army of 30,000 men and to exterminate them at all risks. Militia, he adds, must be levied for the protection of the villages, every one must put his shoulder to the wheel, and whoever performs a meritorious service in effecting the destruction of a rebel shall be rewarded. Let the people only put confidence in the measure adopted by the Commander-in-Chief for their protection, and the native bandit and political rebel shall soon share one and the same miserable fate.

SHANGHAI.

The London Mail of the 27th February arrived on the 17th April, 50 days, *en route*. Mr. Bruce, the British Ambassador, had not, according to all accounts, enlightened the community as to the reply received to his *ultimatum* from the Pekin Government. General Grant, and Admiral Jones (second in command) are still at this port. Admiral Hope, the Commander-in-Chief of the naval forces, remains at Hong Kong to despatch the forces to the north, which are ordered to rendezvous at Kin-tang, and H.M.S. *Imperieuse* has been sent to join them. There are several gunboats engaged in carrying despatches, besides which there are in harbour H.M.S.'s *Assistance*, *Furious*, *Nimrod*, *Roebuck*, and chartered steamer *Granada*—H.I.M.S. *Du Chayla*, and chartered steamer *Shanghai*. Referring to the forces already despatched from Hong Kong to the north, the Overland Trade Report says:—"Nothing has been heard of the transports which left this port some weeks ago for that destination, but it is clear they have escaped the heavy weather that prevailed upon the coast, or some of them would have returned ere this. As the weather for the next two months will be most favourable for the operations of the allies, and as all that energy and skill can devise is being done to push matters forward, the allied force will doubtless be sufficiently concentrated and organised to commence operations within one month from this date. No known casualty has yet occurred, and everything requisite appears to have been admirably arranged."

On the present mail service the *North China Herald* has the following remarks:—"Although the dates of arrival of the homeward, and departure of the outward mails in London approximate more nearly than before, increased speed on the voyage or less delay at the ports is still wanting to 'save the post,' leaving London on the 26th of the month, as it will be seen that the inward mail is timed to arrive on the 26th or

27th in several months—experience has shown that it is generally a little later. The steaming distance from Marseilles is rather under 8,000 miles, therefore an increased speed of half a knot per hour would save about three days, and generally brings answers by return of post, thereby gaining a fortnight. For the receipt of our inward mails in time to answer them by the outgoing packet, we may thank the owners of private steamers, congratulate ourselves on our good fortune, and growl at the contract mail service.

Several rebels have been detected in disguise, and the native bankers and merchants are still in a great state of alarm at their late successes at Hangchow.

An action was brought by the owners of the steamer *Meteor* against the owners of the *Ta-Yung*, for 800 taels, for damages caused by that vessel fouling her, together with 2,448 taels as compensation for time lost while undergoing repairs. The verdict of the Court was, that both vessels were in fault, and that each pay one-half of the whole damages, inclusive of the loss of tug-hire on the part of the *Meteor* during the time she is under repair, the amount of such damage and tug-hire to be assessed by an accountant selected by the consul, and also sanctioned by the consul when the repairs shall have been finished; further, that each party pay one-half of the costs of the suit.

NINGPO.

We gave some particulars in our last of the rebel attack on the city of Hangchow, and we now add some further details:—One thousand long-haired rebels arrived in the neighbourhood of the provincial city of Hangchow, and as their leader offered ready money and higher pay than the Imperial troops were getting, a number of the latter deserted, and joined the rebel leader, so, what with these, and the rabble who are always ready for plunder, the rebel leader determined to attack the city, which he did, and got possession of the Chinese quarter very easily. It is, however, suspected that the Tartar had some understanding with the rebels, or they would not have got possession so easily as they did. This Tartar has since been headed by the Tsiang-Kiung or Tartar General-in-Chief, who is one of the Emperor's men. The face of Hangchow created quite a panic, both here and at Shanghai; in three days Ningpo was nearly emptied, the people leaving by thousands, carrying their goods, &c., into the country. The foreign Consuls were applied to to know if they could get troops to take care of the city for the Chinese, they, the Chinese, offering to pay all expenses. This panic lasted for about four days, when we received news that the rebels, after plundering all they could lay hands on, had vacated the city, and gone to a place called Foo-yang, *en route* for Kwei-chow. This news stopped the panic, and people are regaining confidence. The Imperialists are now, of course, very brave.

The authorities at this place have petitioned the Imperial Government not to sanction foreign inspectors for the Custom-house.

FOO-CHOW-FOO.

The Government appear to be in a state of great alarm at the anticipated approach of the rebels, and are collecting (*squeezing*) funds from the native merchants and others who are capable of undergoing that process.

SWATOW.

The claim brought by the owners of the *Chin Chin* against the Inspector-General of Customs will, it is reported, be paid without litigation.

In consequence of the disturbances noticed in our last, a quiet, unoffending missionary on going ashore drew around him a threatening mob, who asked him whether he was an Englishman or an American. He said an Englishman, upon which they told him had he been an American they would have stoned him to death. Pleasant news for our cousins!

HONG KONG.

The London Mails of the 10th March arrived on the 22nd April, being 43 days *en route*.

Business, although not quite suspended, is very little talked about—the war being the lion of the day, and the uniforms of the various officers are the principle attraction in the streets of Victoria. On the Kowloon side, the numerous tents form at once a grotesque and unique display, in which are located detachments of the 31st and 40th Regiments, and a few companies of Artillery with their Armstrong guns. The English and French forces are arriving daily, and in the course of another week it is expected the whole will be complete. The departures for the North are under the superintendence of Admi-

ral Hope who is here, there, and everywhere. The Chinese Coolies' Corp numbers over 2,000, and is found to be most useful.

The *China Chronicle* says:—"Six of the Armstrong guns are now mounted on their carriages. The occupation of Kowloon Point is not without precedent. There are gentlemen now in Hong Kong who have been at cricket matches when a part of the 18th Royal Irish and the Bengal Volunteers were quartered there in 1841."

The *Chery Chase* is reported as having made the passage up to Shanghai, against the monsoon, in three days.

The pension of Mr. Hulme, the late Chief Justice, has been the subject of comment by the Press, according to their respective opinions of that gentleman, for and against. As ours has been already recorded, we have only to hope that the Hong Kong community may never have a worse.

The *China Mail* says:—"The appointment of Mr. Adams to the vacant bench will not be unacceptable. He has, no doubt, defects, not the least of which is a tendency to lecture Hong Kong juries as if they were Boston lights, but considering the difficulty of getting good men out here, Hong Kong may be very well satisfied with him; and if Mr. Adams is appointed, we earnestly trust that a new Attorney-general will be sent out from home, for nothing is more wanted here than lawyers of high professional character, above local interests, and concerned with law alone." And the *Overland Trade Report*:—"We have heard nothing about the nominations to the vacancies occasioned by Mr. Hulme's retirement. Doubtless Mr. Adams will be appointed to the bench, which is really a great boon to the colony. For sound law, good intentions, and public spirit, it would be very hard indeed to find his equal. The Attorney-generalship will, we imagine, remain open until Mr. Green's health takes a decided turn one way or the other."

Mr. Tarrant is, we regret, still confined in the debtor's jail, under the Sheriff's writ, for the amount of the costs in the suit brought against him in the Criminal Court by Colonel Caine, which amounts to the enormous sum of £600 sterling. The extreme anomaly of this case has been brought to the notice of the Duke of Newcastle, the Secretary of State for the Colonies; and it is to be hoped that the Government will at once release him from this impost. We believe it to be against all constitutional law that any one should suffer for the same offence both a criminal and civil punishment, the two are totally incompatible. Mr. Tarrant's health, in consequence of the long confinement, has been seriously injured, and the last mail brought rather alarming accounts for his life, which was to be attributed mainly to the vindictive influences of the authorities around him, who it appears will not release him from jail on his furnishing security for the amount of the costs, payable after an appeal has been made to the Home Government. The *Daily Press* has the following remarks on the subject:—

"Victoria, &c., to the Sheriff, &c. We command &c. goods and chattels of William Tarrant, cause to be made 2,263 dolls., which William Hastings Alexander Esquire, the master of the Crown office in and for the said colony who prosecuted for ourself in this behalf lately &c. together with 12 per cent from 22th September 1859 and have &c. to be rendered to William Hastings Alexander the master of the Crown Office, and that &c."

"Witness W. H. Adams, the 15th February in the 23rd year, &c."

"(Signed) N. R. Masson, Deputy-Registrar."

"This writ was issued by W. T. Bridges. Levy 2,263 dolls. &c., besides 3 dolls. for the costs."

One lunar month and two whole days has Mr. Tarrant now been in prison under this attachment by the master of the Crown office. During all that time he has been in correspondence with lawyers and Government arranging the preliminaries of an appeal to the privy council. Our contemporary is satisfied that if he once gets this appeal in, instead of 2,263 dolls. he will not have to pay 763 dolls. (the amount which Government once paid him on being defeated.) The saving of 1,500 dolls. is worth trying for certainly. The appeal can be settled in about four months we take it; and so the case stands. Far wiser would it have been to let Mr. Tarrant have every chance. If he thinks himself entitled to an appeal, give it to him by all means; and as already notified by Mr. Tarrant of his intention to appeal, it would only be proper discretion in Mr. Alexander, Registrar of the Supreme Court, to give our contemporary his liberty on the usual security terms. Such, indeed, he should do without an instant's delay, for as all know who have seen him, Mr. Tarrant, with such continued close confinement and a flow of blood to the brain, is an altered man since he changed his diet from felon's fire, and it is doubtful whether, with the increasing heat, he will be able to stand it much longer. We can but say, however, that we admire his pluck; he is ready to die rather than be victimized by hungry lawyers.

CANTON.

The scarcity of Rice noticed in our last has continued, but owing to the arbitrary interference of the Government prices have considerably fallen, but it is expected to rule at famine rates for some time, and the Government interference will be found to have defeated its own object.

As for the movements of the insurgents in the vicinity of Canton, the provincial authorities appear utterly impotent to cope with them, and yet they have evinced no disposition to advance. Refugees continue to flock from the country in large numbers, the beneficence of the Cantonese being taxed to provide shelter and maintenance. The occupancy of the place by the foreign garrison doubtless checks the progress of these marauders, whose object being solely plunder, and who having latterly shown much inactivity, have, in all probability, been bought off by the mandarins. The greatest distress prevails in the adjacent districts, food being at famine rates, many of the fields remaining untilled, and thousands dying of starvation. The lateness of the season doubtless makes the crops precarious, but the anarchy which follows in the wake of these marauders, and the want of confidence which arises from their supremacy, certainly aggravate the effect, and tend to make farming hazardous.

The coolie trade continues to be carried on in spite of the adverse monsoon in the China Seas. The emigration to the West Indies is suspended until the return of the fair monsoon.

COCHIN-CHINA.

A conflict has taken place between the British forces and the Annamese. It appears several of our transports put into a bay for water, &c., and that two officers of the 31st Regt., and a captain of one of the transports on landing were taken prisoners and conveyed some distance inland, but on investigation they were reconducted to their ships. One of the forts, however, fired on a boat, and it is reported that H.M.S. *Magicienne*, which was at anchor there with the *Centaur*, demolished the fort which had committed this act.

According to the latest advices it appears that the vessels chartered at Hong Kong to load at Saigon with sugar, rice, &c., had not been able to procure cargoes. The natural resources of the place are considerable, but at present these are rendered entirely nugatory by the resistance of the Annamese to the occupancy of the French. The latter are closely invested, and, as a matter of course, supplies from the interior are all but cut off. Only the vessels which arrived first were able to procure cargoes, which were supplied out of the stock in store in the town. In sixteen days 3,000 piculs were obtained, the bribes and transit expenses on which amounted to nearly as much as the cost of the rice. The river is described as being unexcelled for commercial purposes. There are neither bars, shoals, nor hidden dangers. The bottom is soft mud, and the banks are deep close to. It is, however, very narrow, serpentine, and tortuous in its course, and has this great disadvantage, the ebb tide only runs at about one knot per hour, and a light breeze nearly always blows up the river; so that it is a most difficult task to undertake to drop a vessel down without the aid of steam. From the mouth to Saigon the distance is about eighty miles, and we understand the ships are sometimes twelve days in accomplishing it.

MALACCA STRAITS.

SINGAPORE.

SINGAPORE AND BATAVIA CABLE.

Intelligence has been received that the telegraphic cable between this and Mintoh is injured in several places, but that the communication between that port and Batavia is complete.

From the report on the Government telegraphs for 1859, we learn that the line to Surabaya has been broken upwards of twenty-four times by trees falling upon it, and many times the communication has been interrupted by the wire falling to the ground or into the water from the posts being knocked down or injured by lightning, inundations, landslips, &c. Out of 36,500 insulators, 954 were broken, 136 of which were ascertained to have been struck by lightning. Of 20,000 kapok trees used as posts for the telegraph 3,634 were destroyed, at least a fourth part from the effects of lightning. The receipts, including 31,232 francs for Government messages, &c., amounted to 140,916, and the expenditure to 705,552 francs.

The *Straits Times* publishes an extract from the circular of Messrs. Jardine, Matheson & Co. (of China), and considering that that house is very chary of any of their information being made public, we cannot understand the reason of this exception, but it may probably be connected with the telegraphic information which was circulated by their correspondents in this city before the arrival of the last mails.

The following extract from a Penang paper will, we ima-

gine, be pleasing intelligence for shipowners:—"We are at last enabled to congratulate our shippers on the prospect of having a fine first-class ship of eight hundred tons laid on the berth for London. Captain Montgomerie, of the *Goleonda*, came up from Singapore to see how freights were going, and he has left again to bring up his vessel."

EXPORTS FROM MANILA.

Per *Britannia* to London: Sugar, 4,178 piculs; hemp, 1,510; sapan wood, 360; tortoise shell, 270 cattie; indigo, 69 quinquals.

Per *Oshawa* to Liverpool: Sugar, 9,741 piculs; hemp, 5,658; sapan wood, 450.

EXPORTS FROM SINGAPORE.

Per *Resolute*, to New York: 3,314 bales gambier, 5,833 piculs; 3,560 bags black pepper, 160 ditto in bulk, 2,692 piculs; 2,661 pieces sapan wood, 834 piculs; 400 bundles rattans, 129 piculs; 10 bundles Malacca canes (500); 200 cases gum dammar, 199 piculs; 36 cases nutmegs, 18 piculs; 14 cases mace, 7 piculs.

Per *C. C. Dow*, to New York: 426 bales gambier, 1,002 piculs; 631 albs tin, 457 piculs; 4,152 bags sugar, 4,079 piculs; 1,372 bags black pepper, 999 piculs; 133 buffalo hides, 581 cow hides, 144 piculs; 750 bags sago flour, 758 piculs; 369 boxes cassia lignea, 183 piculs; 11,380 bundles rattans, 447 piculs; 144 baskets India rubber, 156 piculs; 33 boxes mace, 17 piculs; 1,803 boxes tea.

The picul is 133½ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents. and is divided into decimal parts of ten.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From London: April 15, *Maida*, Lucknow. From Liverpool: 10, *Templeman*, Fanny McHenry, Invincible. From Dover: 10, *Ukko*. From Yarmouth: *Augusta* and *Meline*. From New York: *Union*.

At HONG KONG, MACAO, and CANTON. From London, April 22, *Zila*; 23, *Patrician*. From Sunderland: 16, *Negotiator*. From Newcastle: 15, *Mercedes*; 17, *Gazehound*. From Cardiff: 24, *Johanne Laue*. From Portsmouth: 24, H.M.'s ship *Ringdove*.

At SINGAPORE.—From London: April 24, *St. Powerful*. From Liverpool: 22, *Hidalgo*. From the Continent, 24, H.M.'s ship *Grasshopper*; 25, H.M.'s ship *Urgent*, gunboat *Bouncer*; 27, H.M.'s ship *Havoc*; 29, G. B. *Weazel*; May 1, G. H. *Hardy*.

SAILED.

From SHANGHAI.—For London: April 13, *Constantia*, Sir G. Pollock; 14, *Benvoirlich*. For New York: 9, *Eureka*.

From HONG KONG, MACAO, and CANTON.—For London: 19, *Carioca*. For Europe: 15, *Malacca*. For Aberdeen: 19, *Indomitable*.

From MANILA.—For London: April 7, *Britannia*. For Liverpool: 9, *Elias*; 19, *Oshawa*.

From SINGAPORE.—For London: April 23, *Kiawasha*. For New York: 30, C. C. *Dow*; May 1, *Resolute*.

LOADING.

At SHANGHAI.—For London: *Berwick Walls*, Invincible. For New York: *Union*, *Urania*.

At AMOY.—For Havana: *Neptune*.

At HONG KONG, MACAO, and CANTON.—For London: *Carnatic*. For Havana: J. Wakefield, *Live Yankee*, *Santa Liocia*, Governor *Morton*. For Sydney: *Fides*, *Petronella*. For San Francisco: *Lizzie Spalding*, *Leonides*, *St Helena*.

At MANILA.—For Sydney: *Billiton*. For Cork: *Omega*.

At SINGAPORE.—For London: *Hidalgo*, *Zambier*. For Liverpool: *Sébastien*, *Cabot*, *Versailles*. For Boston: *Rocket*.

PASSED THE STRAITS OF SUNDRA.

From England and Continent to China: April 9, H.M. str. *Vulcan*; 10, *Falcon*; 18, *Hollovoetalius*; 19, *Esmeralda*, *Brederode*, *Electric*; 20, *Willy*. From Boston: 18, *Magenta*. From China to England and Continent: 11, *Antagonist*, Sir W. P. Williams; 13, *Felix*; 15, *Corea*; 19, *Anna*. To New York: 20, *Red Gauntlet*. To Havana: 22, *Brave Zourine*. From England and Continent to Singapore: 18, *Sardinian*; 19, *W. Stewart*; 21, T. A. Ross, *Joshua Waddington*, *Albatross*. From Sydney: 14, *St. Louis*. From Australia: 21, *Nabob*. To Manila: 18, *Prince de Santander*; 19, *Cliton*, *Julian deu Unzueta*. From Manila to England and Continent: 10, *City of Boston*; 11, *Spitfire*. To New York: 14, *Nestorian*; 19, *Ringleader*.

FREIGHTS AND CHARTERS.

At SHANGHAI.—The rates to London are £2 for tea and £4 for silk. To New York: 12 dols. for tea and 15 to 20 dols. for silk. The *Invincible* is the only vessel on for London which is fully engaged at the above figures, and the *Urani* and the *Union* for New York. Vessels for the coasting trade are much required.

At HONG KONG, MACAO, and CANTON.—To London the rates are as last quoted. For New York there are no vessels on the berth. The requirements of Government have been supplied by the *Maria Frederika*, *Jacoba Cornelia*, and *Queen of the East*, at 22s. per register ton per month. There is very little cargo offering, and no settlements are reported since our last.

At MANILA.—To England, £2 17s. 6d. Tonnage is in demand both for England and the United States, and a few seeking vessels would find employment readily.

At SINGAPORE.—To England: £2 11s. to £2 12s. 6d. for Tin *Gambia* sugar and sago flour; £3 for pearl sago, pepper, gutta percha, &c. A good demand existed for tonnage to China, but the unfavourable advices received from Hong Kong checked the shipments, and there is now less inquiry for vessels.

CASUALTIES.

HONG KONG.—The *Intrepid* (American ship) from China to New York, with silk and cassia, was wrecked at the entrance of Gasper Straits, 1st March. Crew saved and landed at Auger, on the 7th April.

The British ship *Negotiator*, from Sunderland, when in lat. 40.9 S., long 21.42 W., on the 27th December, experienced some very severe weather, knocking away the starboard bulwarks fore and aft, and carrying away the mainyard. She arrived at Hong Kong on the 16th April, having been 200 days at sea.

On the French frigate *La Vengeance* entering into harbour on the 24th April, she accidentally ran foul of the barque *Chicora*, and snapped off the flying jibboom.

The iron ship *Europe*, of 400 tons, from Saigon to Manila, with troops was wrecked on Triton Island, Paracels. One of the boats went back to Saigon, and two steamers immediately proceeded to the wreck, saved all hands, and then abandoned her.

The *Star Light*, from Bangkok, was a month overdue and is supposed to have been lost.

On the *Fernandes* proceeding to the wreck of the steamer *Shamrock*, she was found to have broken off by the boiler, that the Chinese had brought battering rams to bear upon her, and were hauling her to pieces with lines. She was completely broken up.

SINGAPORE.—The *Oriental* (British transport) when off the great Coco Islands, picked up 12 Burmese, one being the commander and the rest the crew of an Akyab vessel which was wrecked off the coast. The men stating that they were starving were taken on board and landed at Penang.

The *Teaser*, from Bombay to Mauritius, with coolies, was totally dismasted near the Rodrigues, most of the coolies being drowned. She was towed into Mauritius by a steamer (name unknown).

RUSSIA.

ST. PETERSBURG, May 28.

Count Murawieff-Amoorsky, the Governor-General of Siberia, who arrived from his seat of government in this city on leave of absence a couple of months ago and proceeded to Paris to visit his family—the countess is a French lady of high nobility—has just returned to this capital via Berlin, and landed from the steamer *Prussian Eagle* in which he embarked at Stettin. Although he personally much wished to be relieved, particularly as the Siberian climate does not agree with his health, the difficulty was to find a sufficiently able and energetic successor, and it is now generally understood that he has acceded to the Emperor's personal request and agreed to return to the banks of the Amoor after a further short sojourn here, it being expected that great complications are about to take place in that part of the world, which will require the presence of such a zealous and experienced statesman to carry Russia with success through the troubled waters that appear to be looming in the distance.

The Amoor is now navigated in its whole extent by river steamers. The arrival of a German colony is announced to take place in the course of this summer. It consists of about forty families, who will arrive from California and locate themselves at the confluence of the Bureja with the Amoor. The head of this spirited enterprise is Capt. von Bries, the owner of the steamer *Admiral Kosakewitsch*, that was the first to navigate the great Siberian river last year from one end to the other. Another colony of a hundred Mennonite families is about to proceed this summer from the Government of Tauris, and will locate themselves in the Amoor territory on the banks of the Seja, one of its principal tributaries. But as this latter body of colonists travel overland with their own waggons and cattle, they can proceed but slowly, and their actual arrival cannot possibly take place before next summer.

The latest accounts received here from the newly-founded capital of Blogowesseutsk, on the lower Amoor, describe the progress they are making there as highly satisfactory, and state that their traffic with the Chinese town of Aigoon, on the right bank of the river, is daily becoming more important and lively. Major-General Busse has been installed at Blogowesseutsk ever since May last year as Governor. The town is rising rapidly, many of the churches and other public buildings are completed, and the principal street extends along the banks of the river for more than a werst in length.

A useless controversy has been going on for some time in the press of this city as to the undoubted importance of Russia's latest acquisition in the East of Asia. Whilst the *Rusky Wiestnik* and the *Rusky Slovo* defend the policy of the Government, and demonstrate the prospective advantages to be gained from the colonisation of the Amoor, the *Morsky Bornik* and the *Industrial Messenger* doubt the wisdom of the enterprise, and make very light of the development of that country's natural resources. As I said above it is a useless squabble, for neither the pessimist fears of M. Sawalischin, nor the optimist views of M. Romanoff are likely to have any serious influence on the Government which continues steadily to execute the plan adopted according to time and circumstances.

An official communication from the head of the staff in Eastern Siberia has been received here, announcing that the ship *Golden Eagle*, freighted at Cronstadt by the naval department to carry a cargo of stores to the Amoor, had suffered so much from bad weather that she was unable to proceed, and had transferred her cargo to the *Gottorp*, chartered at Copenhagen to carry out naval stores for the use of the Russian squadron in the Pacific.

The *Prussian Gazette*, a semi-official Berlin journal, contains the following intelligence from St. Petersburg, which is important, if authentic. "Our friendship and alliance with China have come to an untimely end. Continual acts of hostility practised by the natives of Maudschuria, against the Amoor trading company, rendered it imperative on the part of the Russian Vice-Governor to interfere with military proceedings. The newly appointed Chinese Viceroy of Maudschuria is doing all he can to harass the Russians, and interrupt their traffic in the Amoor country. The latest accounts from thence contains particulars of many illegal acts and hostilities perpetrated by the Chinese; Russian forts blown up, whole villages of peaceful colonists destroyed and plundered, the inhabitants brutally ill-treated, and even, in some instances, killed when venturing to offer opposition in self-defence. The Russian troops stationed on the Amoor are so few in number in comparison with the

large bodies of hostile Maudschurians, that they are unable to cope with them in the field, and are cooped up in their fortified military stations. Since the resignation of Count Murawieff,* Russia appears to despair of realising the brilliant dreams she once-entertained of successfully colonising the Amoor territory, and refuses to grant further subsidies to obtain that object, whilst private individuals naturally become faint-hearted and cautious, which of course checks all spirit of enterprise, so that it will not astonish the world to learn in a short time that the whole country has been abandoned by the Russians, and again reverted to the Chinese rule."

It appears that the Chinese have taken the offensive in Manchouria. Some of the Russian forts have been burnt, and the pickets stationed in them cut down without mercy. It does not seem to be the intention of the Government to resent the affront just now; for, if so, it might reasonably be expected that the St. Petersburg papers would not be permitted to condemn the new English expedition against China. In an article upon the forthcoming hostilities, published in the *Vedomostee*, occurs the following noteworthy passage:—

"The dangers of a Chinese campaign are greater for England than France. The mutiny in India, scarcely crushed, begins to revive; the peasants occupied in the indigo and opium culture resist the claims of the Government, and rise against them. It is true that there are no telegraphs at the disposal of the Chinese that might be used in transmitting a word of command through Thibet and the Himalayas to the frontiers of the Indian possessions of Great Britain; but, notwithstanding this deficiency of mechanical means, the inventors of the compass are perfectly up to the task of sending emissaries to Bengal; nor does their diplomacy, which is of 4,000 years' standing, lack the instruction of Europeans in the art of revolutionising a country, and making a people rise against its rulers."

The following private letter from Charabofka, on the Amoor, lately received by a lady in this city from her brother, contains much that is new from that interesting quarter, and I make no apology for translating copiously, it having been placed at my disposal for that purpose. It is dated January 12:—

"Charabofka is situated at the confluence of the Amoor with the Ussuri, and stands on a picturesque eminence in a romantic part of the country. It was only founded in the summer of 1858, and forms the headquarters of the 5th battalion of the line. It contains a church, from the tower of which the sound of the bells penetrates on Sundays and festivals far and wide into the solitudes inhabited for centuries exclusively by heathens. The Ussuri is one of the principal tributaries of the Amoor, and the length of its course is 706 wersts (471 miles).

"Very little was hitherto known of the surrounding country. About a hundred years ago some French scientific travellers ventured to make an exploring expedition, but it cost them their lives. There are but few parts of the world that can compete with the Ussuri. Although the whole country is covered with aboriginal forests, the climate affords a happy medium between the heat of the torrid zone and the mildness of the temperate one. The dull monotony of the fir and pine tree is nowhere met with, but quantities of graceful cedars and other noble trees unknown in Europe abound. Large tracts of country are covered by vines which grow wild and bear excellent fruit. With a very little training and attention they might be used for making wine, which would become a profitable undertaking, as water-carriage is cheap and conveniently near, and wine would command a good market in all the surrounding countries. It is stated that the crab-apple was the only tree indigenous to Great Britain, and now no country in the world produces a greater variety of the finest descriptions of that useful fruit. On the banks of the Ussuri grow immense numbers of wild apple trees, which by a judicious application of grafting and other horticultural manipulations, might in the course of a few years be turned into extensive and valuable orchards. Amongst the native fruits indigenous to the soil may be mentioned the grape-cherry, of which the bears are so fond. These animals are great gourmands, invariably selecting a tree most loaded with fruit for their desert, and proceeding with the greatest gravity and becoming decorum to enjoy it to the utmost. Having climbed up the tree to a convenient height, so as to have the larger part of the fruit within easy reach, they break off some boughs and deliberately set to work to make a rude species of seat on one of the principal forks, and thus comfortably seated break off one branch after another, and strip them of their fruit. All these forests are densely populated by wild beasts and game, valuable to man either for their skins or their eating. Amongst the most frequent denizens of these forests are the bear, panther, wild boar, stag, elk, badger, marder, and fox. At certain times of the year mosquitoes and other insects swarm on the banks of the river, and hover over the bosom of its waters, affording abundant food for the trout and other fish, but they are certainly a great plague to the human species.

"At present the only natives that inhabit the valley of the Ussuri are some wandering tribes of Gholds and a few Chinese, the latter exiled from their native country. I know not for what crime or misdemeanour they are banished, but a part of their sentence is to be deprived of female society, and separated from their wives and families. They appear, however, to put up with the punishment in a most philosophical manner, and devote themselves with incredible zeal and activity to agricultural pursuits, so that their farms are in a most creditable state of cultivation, yielding in this favoured climate a rich harvest without any chance of a failure of the crops. The Chinese may well be proud of their love of agriculture; it is at once the source of their easy circumstances and an occupation both invigorating and conducive to health and longevity. They are very temperate in their habits, live chiefly upon bread, vegetables, and fish, seldom eating meat, which irritates their nervous system and heats their blood."

Parliamentary Intelligence.

HOUSE OF LORDS.

SELLING AND HAWKING ON SUNDAY BILL.—(June 5.) Lord CHELMSFORD moved the third reading of this Bill, which was opposed by Lord St. Germans, Lord Teynham, Lord Granville, and the Bishop of Lichfield. After some discussion the Bill was read a third time and passed.

REFRESHMENT HOUSES AND WINE LICENSES BILL.—After a brief discussion this Bill was read a second time.

HOUSE OF COMMONS.

CHINA.—(May 31.) Lord J. RUSSELL laid on the table papers in reference to China, being a continuance of the correspondence between Mr. Bruce and the Foreign-office.

TRIAL OF CAPTAIN SAUNDERS.—Mr. WYLD asked the Secretary of State for Foreign Affairs whether the Government had been informed by the Governor of Hong Kong of the trial at the Supreme Court of Captain Saunders, of the British barque *Chin-Chin*, for the murder of one of the crew of the Custom-house boats in the port of Swatow, and if there were any objection to lay the despatch on the table.—Lord JOHN RUSSELL stated in reply, that he was informed that no despatch has been received at the Colonial Office with respect to the trial of Captain Saunders for murder.

CHINA.—CUSTOM'S ARRANGEMENTS.—Mr. BUCHANAN thought it of great importance that arrangements should be made for the conduct of British trade in China in a manner satisfactory to those engaged in it; for, although we were about to go to war with that country, he hoped it would not be long before peace was proclaimed. It was a most anomalous state of things that foreign merchants should collect the revenues of another Power and should hand over to its Treasury the funds that might be employed in carrying on hostilities against their own country. Hong Kong was at this moment a free port; but the system of establishing British Custom-houses along the whole coast of China must seriously interfere with the success of that settlement. Other Governments, and especially that of America, were not likely to co-operate very cordially in these new Customs' arrangements, the working of which must encourage smuggling at certain points on the coast to the detriment of legitimate trade. It was therefore to be hoped that our Government would not commit itself to the adoption of a scheme against which so many good arguments could be brought.—Lord JOHN RUSSELL said it certainly was a very anomalous system that foreigners should be put in the collection of the revenue of China; but Lord ELGIN and others had said that there was a great deal of bribery and favouritism in the Chinese custom-houses, and that the appointment of a few foreign inspectors would tend to put an end to many abuses and give greater confidence to merchants. He had not given to the new system that decided and unqualified approbation which the hon. member for Glasgow supposes, but he thought it was one which ought to be tried.

CHINA WAR.—Sir H. WILLOUGHBY asked the Secretary for War whether he had any objection to produce an estimate of the expenses to be incurred in the China war. It was now quite clear that this country was in for a war involving very considerable outlay, and it would be desirable for the House that it should at least have an outline of the expenses, so far as they could be ascertained. There would, he thought, be no difficulty in framing an estimate, giving the probable expenditure on account of the naval and military forces engaged, of transports, stores, the native forces which would be despatched from India, and the increased pay and allowances to which soldiers and sailors were entitled when serving in that part of the world. There could be nothing more affronting to the House than to ask it to vote vast sums of money without its knowing the manner in which it was to be expended. He wished to know if the right hon. gentleman had any objection to lay on the table an estimate of the probable expense of the expedition to China.—Mr. S. HERBERT had to state, in answer to the hon. baronet (Sir H. Willoughby), that not only had he no objection to lay an estimate of the expenses of the war with China on the table, but it would be his duty to do so. It would be necessary to bring forward such an estimate, as it would be obviously impossible to meet the expenses of the war in which we were unfortunately involved with China without a Parliamentary vote.—Sir F. SMITH was glad to find that the right hon. gentleman proposed to give an estimate of the China war. He confessed, however, he did not know on what elements the right hon. gentleman could frame that estimate. He might give an estimate for the armaments, the cost of transports, and the ammunition; but he hoped he would give a large lump sum and a wide margin.—(4.) Sir J. ELPHINSTONE asked the Chancellor of the Exchequer what provision had been made for the cost of the war in China.—The CHANCELLOR of the EXCHEQUER said that, as he had only received the notice of the hon. member that day, he had not had time to communicate with the Secretary for War, to whom, rather than himself, it pertained to answer the question. He believed, however, that the House was already aware of the provision which had been made for the cost of the Chinese war. It amounted to the sum of £850,000, which was taken as a vote of credit for the financial year 1859–60, but only a portion of which was paid during the financial year, the remainder continuing to be available for the present year. The provision for the war also included a sum in the estimates of £1,100,000 or £1,200,000 for the present year; and, further, a vote of credit proposed to be taken during the present year to the amount of £500,000. That was the provision for the cost of the war as announced to the House four months ago; but, as they were aware, circumstances had changed somewhat since then, and the Secretary for War had intimated that it would be his duty, on an early day, to call attention to the subject in the course of the discussion on the estimates. No accounts had yet been received, but there were materials for estimating the probable charge beyond what were previously possessed, and full information would be given to the House on the earliest opportunity.—Sir J. PAKINGTON said he understood from the Secretary of State for War that the Government would lay upon the table an estimate of the probable cost of the Chinese war, and he wished to know when it was likely that estimate would be laid on the table?—The CHANCELLOR of the EXCHEQUER said that was a question which the Secretary of State must answer rather than himself; but he supposed, from the materials which were in the possession of the Government, it would be on very early day.

SUPPLY.—FORCE AT LABUAN.—(June 1.) On the vote to complete the sum required to defray the miscellaneous charges, Mr. W. WILLIAMS moved the reduction of the vote by the sum of £5,321 charged as "repayment to the Indian Government for the force maintained at Labuan."—Mr. S. HERBERT said that this money was required for the payment of expenses already incurred. The sum asked for this year was £429 less than that voted last session. The amendment was negatived without a division and the vote was agreed to.

H. RUSTOMJEE.—A petition was presented from this gentleman a Parsee and British subject, a native of Bombay, trading as a merchant in China, stating that 6,000,000 dollars were given by the Chinese Government under the treaty of Nankin, signed in August, 1842, to liquidate claims of British subjects against the Chinese merchants associated as hong; that the petitioner is a creditor, and that he cannot obtain his rights, although 456,774 dollars still remain in the hands of the British Government, and praying for redress.

Spirit of the Press.

THE CHINA WAR.

China has refused the British ultimatum with a directness and with an insolence such as a great preparation and a consequent sense of security alone could have prompted. The terms of the ultimatum are confined to a confirmation of the treaty of 1858, an apology for the outrage at the mouth of the Peiho, compensation for losses, restoration of ships and material, a revival of the clause in the last Treaty on the visits of the British Minister to Peking, and an indemnity for the expenses of the present expedition, according to the obstinacy of the Chinese resistance. It is evident from the reply that the Chinese are infatuated with success, and, painful as it is to see them running headlong to their doom, we cannot help feeling that this is the long expected justification of ourselves and others who on several occasions have maintained against attacks, the cause of Her Majesty's servants in those regions. The Chinese have recourse to every trick of policy, every evasion of argument, and every folly of invective which the traditions of our very nurseries have ascribed to their race. In the first place, and what alone would justify the present expedition, they refuse to admit that our remonstrances, or ultimatum, have been conveyed to the Emperor or to give any answer, except as from the Provincial Government, in accordance with commands from the Great Council. This is equivalent to a refusal to negotiate in the only sense of negotiation among civilized countries—that between one sovereign and another. It is evident that there never was an intention of confirming the treaty, and that it has not yet been recognized by the Emperor. The Chinese maintain that the British and French Ministers were duly warned, even at Shanghai, not to proceed to Taku, which had been fortified, as they pretend they had informed us, but to Peh-tang, or the false mouth of the Peiho, which turns out to be, indeed, no mouth at all. They still refuse to admit our ships of war up the Peiho, on the ground that an ambassador can require no armament, and that any foe might assume our flag. Against our expenses they plead their own greater expenses. The ships and guns cannot be restored, because they are at the bottom of the sea, and we had better let them remain there. They propose to treat our Minister as they treated the American; and they criticise the tone of our ultimatum and correspondence as insubordinate, extravagant, and indecorous. The Emperor's advisers, or they who assume the name, could never have any other purpose than to persist in the policy of isolation, and leave foreigners no resource against any amount of wrong. All the treaties hitherto must have been mere hypocrisies, and nothing short of a visit to the Court of Peking is likely to obtain for us the simple rights of trading and sojourning, conceded by all civilised states to one another. The real question at issue appears to be whether we shall continue our intercourse with China on our terms or on hers. Our terms are those on which we communicate with all the nations of the world—simplicity, frankness, hospitality, high principle, and equality, as between gentlemen. The Chinese, on the contrary, insist on keeping up the illusion of an unapproachable Sovereign, an irresponsible Central Government, and the not less startling illusion of an infinitely superior morality and sense of decorum. So long as we permit this illusion, and endure its natural consequences, we must be liable to continual insult and degradation, to frequent interruption of intercourse, to the cost and trouble of reinstating ourselves, and the odium of waging war with a people who know the proprieties neither of peace nor of war, and over whom victory itself is a scandal. This is best understood by the analogies of private life. It may be necessary to have intercourse with inferior people, but it is for us to choose whether we will associate with them on their terms or our own. We may, if we please, condescend to their insulated ideas, listen to their petty quarrels, their invidious estimate of all classes above them, their perpetual tone of depreciation, their immensely exaggerated opinion of themselves, and the substitution of one or two distorted ideas and inflated sentiments for the recognized maxims, and common sense of well-bred and well-educated people. If we do this we inevitably sink to their level, and wallow with them in the same Stygian pool of malignity and folly. The only escape is to dictate our own terms; to maintain truth, kindness, and mutual respect; and to consider ourselves, not as conspiring against society for some paltry gain of our own, but co-operating with it for our common good. Some such account may be given of the terms on which we may demand, and do demand, to communicate with China. The time has gone by when she could impose her conditions; they are condemned by the result; we have tried them and failed; we must now impose our conditions with such gentle force as may be found necessary. All policies are judged by the result, not our private advantage, but the final development. The result of our former weak and temporizing policy in China is that we are outcasts, and at war, at the very time that our trade is greater than ever, and some hundred thousand Chinese are settled in the British dominions. The result on China herself is that she is torn to pieces, and her population decimated by a wide-spread rebellion, and she is driven to immense cost in the idle defence of her barbarous system. As it is only eight weeks since the receipt of the answer to the British ultimatum it must be some time before the arrival of any important intelligence.—Times.

LONDON, WEDNESDAY, JUNE 6, 1860.

EUROPEAN COLONISATION OF THE INDIAN ARCHIPELAGO.

The question of the colonisation of the Indian Archipelago by Europeans has often been discussed by the Dutch States General, though Holland is not much disposed to favour colonists of any other country, and the liberal expressions about permitting private persons to buy land, made use of in the Chambers, are only a cloak to mask the real intentions of the speakers or their constituents, and further their interests, by enabling them to renew their contracts under still more favourable conditions. A system of colonisation in which the newly-arrived immigrant plays the part of lord of the soil, and the native that of his cringing slave, is neither in accordance with the laws of nature, nor adapted to the enlightened spirit of the age we live in. The difficulties in the way of European colonisation in the East are well known to consist in the narrow-minded system of monopoly and prohibition hitherto in operation. So long as the possession of a colony is only considered worth having in proportion to its power of bearing squeezing and as a source of revenue, European colonization can never succeed; but with the termination of this abuse, and the abolition of all prohibitions and restrictions, the countries of the Indian Archipelago would open up a rich field for steady labourers and enterprising colonists, who would keep up their relations with the mother country, and increase the trade with Europe to a most enormous extent.

In the face of the present threatening aspect of political affairs, it is manifestly the interest of Holland to look steadily at the dangers of the future, for in the event of being entangled in a war she could never expect to retain her colonies without some powerful protector and naval ally, for she cannot rely upon the fidelity of the natives. Dutchmen would not be induced to go out in sufficient numbers without exorbitant pay and advantages, and it must always be a dangerous experiment to enlist Germans or Belgians, or Swiss. It was only by a late Overland Mail that intelligence was received of the arrival at Batavia of the *Abel Tasman*, with a detachment of "supplementary troops" from Holland, who had formed a serious conspiracy, with the intention of murdering the officers and taking possession of the ship, which was most providentially frustrated in time, and five-and-twenty of the men landed in irons, and sent to the depot at Weltevreden to take their trial by court martial. And this is not a solitary instance, for the letters of our correspondent at Amsterdam mention several similar irregularities of greater or less aggravation that have occurred since he has undertaken to communicate to us what is going on in Holland and her colonies, among which we may mention a late attempt to tamper with the crew of the frigate acting as guardship in the roads of Batavia, which was also happily discovered in time.

In looking around for a powerful ally, in the event of a continental war breaking out, nothing seems more natural than that Holland should select her nearest neighbour and seek an offensive and defensive alliance with Germany, to whom she is already bound by the natural ties of relationship, by blood, affinity of language, and one and the same religion. Such an alliance can but prove advantageous to both parties. There is not a single German who is not possessed of a *presentiment* that the war which is looming in the distance will become the happy means of establishing that unity the want of which is so much deplored by the natives of the thirty-four different States that compose collectively their fatherland,—a country with forty millions of inhabitants, with immense material resources, and which, whenever brought under one sceptre, would necessarily be one of the most formidable powers of Europe,

and quite able to maintain her own independence, and prove a match for any of her neighbours. An alliance between Germany and Holland would, moreover, be a practical way of opening the door for that great desideratum and object of the German's dreams, the establishment and rapid development of the German navy, commenced in 1848 under the influence of revolution, but speedily wiped out on the reaccession to power of the legitimate potentates, and when the reactionary movement was again triumphant. Prussia is the only State of Germany—for Austria is such a conglomeration of different nationalities that, though a member of the Germanic confederation by virtue of the possession of the Archduchy of Austria, Bohemia, and the Tyrol, it certainly cannot claim to be called German—that has kept alive this feeling and responded to the wishes of the people by forming the nucleus of a navy, composed, it is true, of the most heterogeneous parts, but containing the elements of future development; for, of the ships, the *Thetis* frigate was obtained from England in exchange for a couple of swift steamers of a peculiar class, the *Recruit* and *Weiser* (both of which, by-the-bye, were built in private yards in England); the *Gefion* was taken by a lucky chance from the Danes, who let her drift on a lee shore, and under the guns of a land battery, during the short war of 1849; the *Mercury* was formerly a merchant brig, as was also the corvette *Amazone*; the *Barbarossa*, now doing duty as guardship at Dantzic, was formerly the *Britannia*, belonging to the Cunard line of packets, and running many years between this country and America, when she was bought by the German Parliament, until the national navy was sold by auction at Bremerhaven (where the ships were lying), and the *Barbarossa* purchased by the Prussian Government; whilst it was only in one of our last numbers that our correspondent at Hamburg recorded the purchase in that city of Prussia's latest naval acquisition, the barque *Columbia*, of Apenrade, in Denmark, which, on hoisting the pennant, assumed the name of the *Elbe*, and which lately sailed to take part in the expedition to Japan. The only vessel they have built themselves is the steam corvette *Arcona*, also forming part of the expedition to Japan, but she is so slightly constructed, and laboured so much on her passage from the Baltic, that it was seriously intended to send her back as unseaworthy; and it was only after very extensive repairs and alterations at Southampton, attended with great delay and a fearful outlay of money, that she was enabled to go to sea again. The composition of the officers of the Prussian navy is equally heterogeneous; the Vice-admiral Schröder is a Dutchman, Captain Sundewall is a Swede, Captain Donner is a Dane, Captain Howard an American, and Captain Strutt (the latter is no longer in the service) an Englishman, whilst all the coast countries of the Baltic, including even the Russian provinces of Courland, Esthland, and Liefland, furnish severally their contingents for the subaltern and petty officers.

Experience teaches us that the physical constitution of Europeans is not adapted for successful colonisation in those parts of tropical countries which are but slightly elevated above the level of the sea, as many abortive attempts prove. No European female can live above a few months on the coast of Guinea; by far the greater part of all the children of European parents, born in Bengal, die at an early age, chiefly of encephalites; the female system is less able to withstand the effects of a hot climate than that of the other sex, which is the reason why female beauty so rapidly declines when exposed to it, causing the premature loss of the hair and teeth, whilst the skin, deprived of its colouring matter, dries up and shrivels to little better than living parchment. If, then, the low countries of tropical climates exert such a baneful influence on the life and constitution of Europeans, they will naturally seek more elevated regions where these disadvantages are not in existence. It is a well-known fact that the islands of the Indian Archipelago at a certain distance from the sea suffer neither so intensely nor for so long a period from extreme heat as the continents of Asia and Africa under the same parallel of latitude, the air being tempered by the cooling sea breezes. Even on the coast the thermometer seldom rises above 90 deg. Fahrenheit in the shade, whilst at an elevation of a couple of thousand feet the temperature is about the same as in the southern parts of Europe, and the inhabitants enjoy the pleasant prospect of eternal verdure and a perpetual spring.

The first attempts to colonise a new country are always attended with great expense and serious difficulties, and should therefore never be commenced except on a limited scale, and in the light of a trial. Although the interior parts of all the

larger islands of the Indian Archipelago contain high table lands admirably suited for European colonisation, yet there are elevated parts of the island of Java which offer peculiar chances of success, such as the three districts of Djeng, Tenger, and Ihdjeng, which produce abundantly potatoes, corn, and all European vegetables and fruits, and might be increased to an unlimited extent. The climate is also highly favourable for the breeding of useful cattle, as is seen by the fact that the meat of those districts is by far the best of any in the island, whilst the inhabitants enjoy a never-failing supply of fresh milk. Even the ill-looking native dogs of the Indian jackal race assume quite a healthful appearance, and their usually long rugged hair becomes glossy and soft as silk. For this reason the climate would be found admirably adapted for the introduction and propagation of new species of useful animals from other parts of the world, and none would succeed better than the Yack or Thibet ox, the Angora goat, the Lama, the Vicuna, and the Alpaca.

But in addition to the above there are many other parts of Java which contain all the elements required for a successful colonisation, such as the table lands of the Preanger Regencies, Karang Kobar, and the district of Yang, at the eastern extremity of the island. However, all these are but of trifling extent in comparison with the high level lands of Sumatra, Borneo, New Guinea, Celebes, and Ceram, where millions of industrious colonists might lead a happy life in health, peace, and growing prosperity. But unfortunately for the Dutch they do not know how to make the most of the natural advantages they possess as lords of these valuable colonies; they have certainly not made themselves popular with the natives of the soil, and it is quite clear that should they ever again fall into the power of England by the fortune of war, that minister must be a bold man who—warned by the experience of the past—would propose to abandon them as worthless, and again restore them without any equivalent to their present owners.

MR. BRUCE'S CORRESPONDENCE AND ULTIMATUM.

FROM MR. BRUCE TO LORD JOHN RUSSELL.

Shanghai, February 8, 1860.

I feel myself in a position of much difficulty with reference to the ultimatum I am directed to present. The French ultimatum demands an indemnity for the expenses of the expedition rendered necessary by the conduct of the Chinese Government. In my instructions that demand is made contingent on the ultimatum of her Majesty's Government being rejected; an act of grace founded, I apprehend, on the impression conveyed by my first despatches, that the Chinese Government would be glad of a reasonable and fair accommodation.

I do not think that impression was a correct one; on the contrary, I am now more convinced than ever that from the period of our departure from Tien-tsin, in 1858, the war party assumed the ascendant, and deliberately determined to set aside the engagements entered into by the Emperor. For though the main objection stated is to the residence of a minister, I cannot doubt that if an arrangement be made which leaves the credit and power of the war party intact, they will strain every nerve to render nugatory the stipulations destined to facilitate intercourse with this country. We know by the example of Foo-chow, which remained hermetically sealed to trade for ten years after the treaty of Nankin, that a port may be nominally open, and may be practically shut; and violent counsellors will, without difficulty, throw such obstacles in the way of granting passports, and of the operation of the clauses respecting transit duties, as will either reduce these privileges to nothing, or will lead to fresh differences in a short time. I feel bound to record my conviction that nothing short of the complete defeat of this hostile party, and a lesson which will teach the Chinese that perfidy and bad faith lead necessarily to signal punishment, will enable us to place our relations for the future on a secure basis. I do not think that this lesson will be given if the Chinese are allowed to plan an ambushade and slaughter our men, and then to escape from the consequences of their acts by consenting to receive us in a proper manner, when they see a force collected which they are afraid to resist. This result will encourage the advocates of that system of dogged obstruction which has characterised all their intercourse with us, which has rendered all amicable efforts to adjust difficulties unavailing, and has led, even in cases of private wrong, either to an acquiescence in injustice, or to its redress by local acts of violence.

The spirit of your lordship's despatch of the 10th of November leads me to hope that this view will not be contrary to the policy of her Majesty's Government.

If the Emperor had disavowed the act committed by his subordinates at once, and had made such advances towards an accommodation as would have justified me in assuming that he would consent to reasonable terms, and in forwarding the ultimatum on its arrival, I should have done so with pleasure. But, as a display, if not an actual exercise, of force will certainly be required to make the Chinese give way, and I cannot proceed as I should do, did a disposition to effect an amicable settlement exist, as I must be prepared to meet retaliatory measures, and to follow the demands up with an early blow, I hope your lordship will think me borne out in making my ultimatum agree with that of the French, and that the advantages of an identity of proceeding on the part of the allies will excuse the step.

I need not dwell on the grave inconveniences to which an opposite course may lead. If there is one art of diplomacy understood by the Chinese, it is that of separating interests which ought to be identical, and from it we are suffering at present. Two years ago, the representatives of England

and France avoided it by indorsing each other's demands; but, on a question of pecuniary indemnity asked by a foreign power, I could not adopt such a measure. I must, therefore, either make a similar demand, justified fully, I submit, by the moral features of the case, or desert our allies in a legitimate demand, and expose China, and the interests connected with it, to the risk of a contest with France single-handed.

I am quite aware of the responsibility I incur, and trust that my reasons will prove satisfactory to your lordship.

"MR. BRUCE TO THE SENIOR SECRETARY OF STATE, PANG-WAN-CHANG.

"Shanghai, March 8.

"The undersigned, &c., has the honour to address a communication to his Excellency Pang-Wan-Chang, a Senior Secretary of State, and their Excellencies the Members of the Great Council of His Majesty the Emperor of China.

"The undersigned has the honour to state that, as in duty bound, he has laid before Her Britannic Majesty's Government a full narrative of all the circumstances attending his journey to the mouth of the Tien-tsin river last summer for the purpose of exchanging the ratifications of the Treaty of Tien-tsin, as required by the provisions of that Treaty, on or before the 26th of June, 1859. Besides the whole of his correspondence with the Imperial Commissioners and other officers of the Imperial Government, the undersigned has transmitted to the Government of Her Britannic Majesty a copy of the Imperial Decree, dated the 9th of August, and handed, by the Emperor's desire, to the United States' Minister, Mr. Ward, on the eve of his departure from Peking.

"The decree begins as follows:—

"Last year the ships of the English sailed into the port of Tien-tsin and opened a fire on our troops. We accordingly instructed Sang-kolin-sin, Prince of the Khorchin tribe, to adopt the most stringent measures for the defence of Taku, and (the Envoys of) the different nations coming up to exchange treaties on this occasion were told by Kweiliang and Hwasbana at Shanghai that Taku was thus strictly guarded, and that they must go round by the port of Peh-tang. The Englishman Bruce, notwithstanding, when he came to Tien-tsin, in the fifth moon, did not abide by his original understanding with Kweiliang and his colleague, but actually forced his way into the port of Taku, destroying our defensive apparatus."

"The undersigned did not fail at once to apprise the Government of Her Britannic Majesty that the Emperor had been singularly misled. Had it, indeed, been signified to him by the Commissioners at Shanghai that His Majesty had decided on closing to foreign envoys the natural and most convenient highway to his capital, such evidence of an unfriendly disposition on the part of the Imperial Government would certainly have been regarded by the undersigned as fit matter of remonstrance and negotiation.

"No intimation of the kind, however, was conveyed to the undersigned in the letters of the Imperial Commissioners. The port of Peh-tang was never named by them, nor did the undersigned enter into any engagement with them other than that contained in his letter of the 16th of May, in which he acquainted his Excellency Kweiliang of the nature and object of his mission, and of his intention to proceed by ship to Tien-tsin, from which city he requested his Excellency to give the necessary orders for his conveyance to Peking.

"He begs to enclose copy of this letter, as also of that received from the Imperial Commissioner of the 12th of June. These will prove that the undersigned was allowed to quit Shanghai in total ignorance of the Emperor's objection to his employment of the usual river route.

"A like silence on the subject of the Imperial prohibition was observed towards Admiral Hope, Commander-in-Chief of her Majesty's naval forces in these seas, when, in furtherance of the objects made known to his Excellency Kweiliang in the letter above cited, he appeared on the 17th of June at the mouth of the river to announce the approach of the undersigned and his colleague the Minister of France. The admiral was assured that the passage had been closed by the so-called militia, whom he found in charge of the booms obstructing it, without the orders of their Government, none of whose officers, the militia repeatedly affirmed, were near the spot; also that it was closed, not against foreigners, but against a native enemy. These false representations were supported by false appearances; the batteries of the forts were masked, no banners were displayed, no soldier discovered himself. Still further to prevent verification of the statements of the militia, no communication was allowed with the shore. After promising to remove the obstacles at the river mouth, the militia repudiated the promise. They conducted themselves with rudeness and violence to the officers who were sent to speak with them, in one instance proceeding so far as to threaten the life of a gentleman despatched with a message from the admiral.

"Such was the state of things when the undersigned arrived outside the bar on the 20th of June. Finding that the officials persisted in keeping aloof, while the militia continued to assert that the obstruction of the river way was their own unauthorised act, he called on the Admiral to take such steps as would enable him to reach the capital by the time appointed. This, after due notice given to the Militia, and after receiving from them an assurance on the previous evening that they should certainly have nothing further to communicate, the Admiral was proceeding to effect, on the 25th of June, the eighth day from his arrival, when the forts, which had been for these eight days to all appearances deserted, suddenly opened fire upon his squadron. Apparently to cover this treacherous conduct, the officers in charge of the forts have imposed another fiction on his Imperial Majesty, who has been led to believe that the British squadron assumed the offensive by bombarding the forts. This is utterly without foundation; no shot was fired until the batteries had opened; the ships having no other object in advancing but to remove the obstacles placed across the river without authority.

"The facts of the case are simply those stated by the undersigned; and her Britannic Majesty's Government, after mature deliberation, have decided that whether the Emperor of China was cognizant of this act of hostility, or whether it was directed by his officers, it is an outrage for which the Chinese Government must be held responsible. Her Britannic Majesty's Government require, therefore, an immediate and unconditional acceptance of the following terms:—

"1. That an ample and satisfactory apology be made for the act of the troops who fired on the ships of Her Britannic Majesty from the forts of Taku in June last, and that all guns and material, as well as the ships abandoned on that occasion, be restored.

"2. That the ratifications of the Treaty of Tien-tsin be exchanged without delay at Peking; that when the Minister of Her Britannic Majesty proceeds to Peking for that purpose, he be permitted to proceed up the river by Taku to the city Tien-tsin in a British vessel; and that provision be made by the Chinese authorities for the conveyance of himself and of his suite with due honour from that city to Peking.

"3. That full effect be given to the provisions of the said treaties, including a satisfactory arrangement to be made for prompt payment of the indemnity of 4,000,000 taels, as stipulated in the treaty, for losses and military expenses entailed on the British Government by the misconduct of the Canton authorities."

"The undersigned is further directed to state that, in consequence of the attempt made to obstruct the passage of the undersigned to Peking, the understanding entered into between the Earl of Elgin and the Imperial Commissioners in October, 1858, with respect to the residence of the British Minister in China, is at an end, and that it rests henceforward exclusively with Her Britannic Majesty, in accordance with the terms of Article II. of the Treaty of Tien-tsin, to decide whether or not she shall instruct Her Minister to take up his abode permanently at Peking.

"The undersigned has further to observe that the outrage at the Peiho has compelled Her Majesty's Government to increase her forces in China at a considerable cost, and the contribution that may be required from the Chinese Government towards defraying this expense will be greater or less, according to the promptitude with which the demands above made are satisfied in full by the Imperial Government.

"The undersigned has only to add, that unless he receives within a period of thirty days from the date of this communication a reply conveying the unqualified assent of His Majesty the Emperor of China to these demands, the British naval and military authorities will proceed to adopt such measures as they may deem advisable, for the purpose of compelling the Emperor of China to observe the engagements contracted for him by his plenipotentiaries at Tien-tsin, and approved by his Imperial edict of July, 1858.

"The undersigned, &c.

THE REPLY AND DECREE OF THE PEKIN GOVERNMENT.

"The Great Council writes a reply (to the Commissioner Ho, which he is) to transmit.

"The Council received yesterday (or, a short time since) a despatch from the Commissioner, and with it a communication he had forwarded from the British Minister Bruce, the contents of which have occasioned the Council the greatest astonishment.

"He states (1), for instance, that Peh-tang was never alluded to by the Imperial Commissioners Kweiliang and his colleagues. It appears that last year the Imperial Commissioners, Kweiliang and his colleagues, waited for the British Minister at Shanghai for the express purpose of considering with him in person all the conditions proper to an exchange of treaties. On ascertaining that the Minister Bruce had arrived at Wussung, they wrote to him several times to engage him to meet them; their object being, in fact, to acquaint him that Taku was fortified (or that arrangements had been made for keeping people out of Taku), and that he must go by way of Peh-tang. He, however, repelled them, refusing them an interview. The Imperial Commissioners, Kweiliang and his colleagues, moreover, informed him that vessels of war must on no account (2) cross the bar; but the British Minister Bruce paid no attention to these words; and when, on arriving off the Tien-tsin coast (or, the port or ports of Tien-tsin), Hang, Governor-General of Chih-li despatched an officer with a communication to the effect that he was to proceed by way of Peh-tang, and sent him a present of provisions, he would receive nothing, but suddenly brought his vessels into Taku, and (commenced) destroying the defensive apparatus there placed. How can he allege that he never received the slightest intimation that he was to go by Peh-tang? And, as he was coming to exchange treaties, why did he bring with him ships of war? It was plainly his intent to pick a quarrel. How, then, can he (when the blame is all his own) charge China with shortcomings towards him.

"The defences prepared at Taku are not either (as he implies) prepared to keep out the British (3). Suppose that some other nation's ships of war were to go to the length of presenting themselves under British colours, could it be left to them to commit any breach of propriety they pleased? Well, then, the defences of Taku cannot possibly be removed, even when the treaty shall have been exchanged.

"(Then the demand for) indemnity under different heads, and for the restitution of guns, arms, and vessels, is yet more against decorum (4). The war expenses of China have been enormous. The cost of defending the coast from Kwang-tung and Fuh-kien up to Tien-tsin, from first to last, has not been short of several millions of money. Were she to demand repayment of England, England would find that her expenses do not amount to the half of those of China.

"As to restoring ships and guns, the year before last England destroyed the forts at Taku, and obtained possession of a number of guns belonging to China; ought she not, then, on her part to be considering how to make these good? But, besides this, half the British ships and guns (demanded) were sunk in the sea; they are not in the possession of China at all. The question may be dropped, therefore, by both parties alike.

"Then there is (the announcement that) the compromise by which, the treaties once exchanged (the Minister), was to have resided somewhere else, is at an end. The compromise by which once the treaties were exchanged (the Minister) was either to select some other place of residence, or to a visit (the capital) whenever there might be business of importance to transact, was definitely settled by the British Minister Elgin in negotiation with the Imperial Commissioner Kweiliang and his colleagues. The revocation of this compromise now (announced) is even more unreasonable than all the other propositions.

"Last year when, after the Americans had exchanged their treaty, there was an alteration in the rate of tonnage dues, and the ports of Tai-wan and Cheng-chow (Swatow) were opened to trade, the British Minister earnestly prayed for a like arrangement (in his favour). The English had not exchanged their treaty, but His Majesty the Emperor, liberal to foreign nations, and full of tender considerations for the interests of commerce, graciously sanctioned an extension of the boon to the English, for which they should be

grateful (5). But, if the compromise duly negotiated is to be annulled, there will be no impropriety on the part of China if she cancel the arrangement by which she has conceded to the English (the same advantage of) the improvements in tonnage dues and trade that accrues to the Americans under their treaty.

"To come to the (British Minister's) request to be treated with courtesy when he comes north to exchange treaties. If he be sincere in his desire for peace, let the Commissioner, when he shall have thought over all the details of the treaty, those which it will be proper to give effect to, and those respecting which compromise (or arrangement) is to be made, negotiate (with the British Minister), and when both parties shall be perfectly agreed, if he will come north without vessels of war, and with a moderate retinue, and will wait at Peh-tang to exchange the treaties, China will not take him to task for what is gone by. He must be directed to acquaint himself with the rules (observed or laid down) at the exchange of the American treaties, and the course to be pursued will be further discussed with him (by the Commissioner). But if he be resolved to bring up a number of vessels of war, and if he persist in proceeding by way of Taku, this will show that his true purpose is not the exchange of treaties, and it must be left to the high officer in charge of the coast (or port) defences to take such steps as shall be thereby rendered necessary (*lit.*, as shall accord with reason).

"The despatch written on this occasion (by the British Minister) is, in much of its language, too insubordinate and extravagant (for the Council) to discuss its propositions more than superficially (*lit.*, to go deep into argument). For the future he must not be so wanting in decorum.

"The above remarks will have to be communicated by the Commissioner to the British Minister, whom it will behove not to adhere obstinately to his own opinion, as, so doing, he will give cause to much trouble hereafter.

"A necessary communication."

REINFORCEMENTS FOR CHINA.—Government have engaged the clipper *White Star*, Captain Kerr, of 2,340 tons, belonging to Messrs. Wilson and Co., of Liverpool, to convey to China a portion of the following troops ordered to proceed forthwith:—21 officers and 949 non-commissioned officers and men of the 2nd battalion of 1st Royals, 1st battalion of the 8th Buffs, 31st, 44th, 67th, and 99th regiments. Four officers and 192 men of the 2nd battalion 60th Rifles. Of the above draughts 11 officers and 548 men of 1st Royals, 31st, and 44th regiments will embark at Gravesend, and 10 officers and 401 men of the 3rd Buffs, 67th, and 99th regiments at Cork.

THE WILL OF MR. ALBERT SMITH.—Mr. Albert Smith, by his will dated the 3rd March last, leaves his house and premises, North End Lodge, Fulham, with all the furniture, books, plate, and other effects, to his widow. He then gives several pecuniary legacies to relations and friends; and, after making provision for his widow, mother, and sisters, he leaves the residue to his brother Arthur, whom, together with his friend, Mr. Arthur Pratt-Barlow, he appoints executor and trustee. His effects will probably be sworn under £25,000.

THE BANKRUPT, BLAIKIE.—In the case of Mr. John Blaikie, the Aberdeen lawyer who absconded last month, leaving deficiencies to the amount of £200,000, it has transpired that he was an active speculator, not only in shares, but in consignments of cotton and other goods to China and elsewhere.

THE FRENCH STEAM COMPANY TO THE FAR EAST.—It appears that for some time past a council has been sitting in Paris on the subject of steam postal subsidies with America, India, China, and other places, and, as in the case of the Brazil and Mediterranean contracts, the parties before this council and the interests represented were purely French. The merchants and manufacturers of Lyons and other manufacturing towns in France have applied for a direct French communication from the country of production to one of the largest in consumption of silk, indigo, and other valuable commodities as one of the necessary elements to their being able to compete with English manufacturers in the liberal commercial system which they anticipated would shortly commence. An Englishman conversant in these matters applied for an audience of the emperor, "in order to hear from his Majesty in person the confirmation of the fact, and, if possible, to make the movement not only beneficial to France, but to England, and all interests connected with the India and China trade." He found that the company was to be exclusively French, and the speed, carrying power, and size of the vessels such as, he alleges, would not much promote the interests of commerce. The Emperor granted the audience, received him in a cordial manner, and displayed an amount of information on the subject for which he was not prepared. His Majesty gave him the report of the council, and met his suggestion that the services should be performed by a French and English company, particularly as the greater part of the goods and passengers would be supplied by England or by its possessions, if his modification of the route and size of vessels were adopted, and readily assented to the ships being regarded as neutral if England agreed. The report of Lord Jocelyn's Committee to the House of Commons in 1851 was submitted to the Emperor, who manifested his willingness to adopt a report which he appeared to consider as promoting the interests of free trade and commerce.

COMMERCIAL.

TEA SALES.—At the public tea sales on the 30th ult., 15,674 packages passed. Of this quantity 4,225 packages were sold, of which 828 were offered "without reserve," and 2,139 boxes. The sales have gone steadily to-day, and fully previous rates have been obtained for the small quantity of congou passed. Some large parcels of common to fair scented caper were chiefly withdrawn, the biddings for these kinds being low. About 100 packages of Japan tea (green) were realised at full prices. 4,800 packages remain to be brought forward to-morrow, nearly the entire quantity being printed "without reserve."

BULLION.—The shipment of specie by the steamer *Ceylon*, on the 4th inst., is as follows: Shanghai, £136,050; Hong Kong, £49,276; Singapore, £38,750, in silver; Madras, £2,248; Ceylon, £1,700, in gold. Total, £228,024.

UNITED STATES.

The following is a correct report of the Japanese Embassy presentation:—

The Japanese Embassy had audience of President Buchanan on the 17th ult. A little before noon they left the hotel in open carriages, policemen in front and rear, marines and ordnance-men on each side. In point of size and extravagance of embroidery the dresses of the Ambassadors were worthy the occasion. The naval officers and the officers of the army formed in line in the East-room, which was destined to be the scene of the grand presentation, and at noon the folding doors were opened, and the President, accompanied by the Cabinet officers, entered. Secretary Cass then retired to the ante-room, and returned with the Japanese Commissioners and their attendants, who made their appearance, bowing profoundly. Then the principal Ambassador addressed the President in appropriate terms, omitting, however, a portion of the speech which was not designed for the public ear. After delivering their message they retired, but soon returned, bowing as before, when the President responded through the interpreter to the address they had delivered, concluding by handing them a copy of his speech. After the President had shaken hands with them the Cabinet officers were successively introduced, and then General Scott and Speaker Pennington. At the conclusion of the ceremonies the Ambassadors returned to their hotel in the order of their coming. The demeanour of the Japanese throughout was exceedingly solemn. The Japanese Ministers had determined to call only on such of the diplomatic corps as represent Powers having diplomatic relations with Japan. These include England, France, Russia, and the Netherlands. On the 18th they made official calls on Baron Van Limberg, Minister from the Netherlands, and Baron Stoeckol, of Russia.

The steam ship *Niagara*, which assisted in laying the Atlantic cable, has been put in commission, for the purpose of conveying them back to their homes; she will probably return by the way of the Cape of Good Hope, thus enabling them to circumnavigate the globe.

The following is a description of the attendance of the ambassadors at a ball given by the Secretary of State at Washington:—

"The Japanese ambassadors appeared unofficially, for the first time, in public. The interest felt on this occasion was so great that of the numerous guests invited, hardly a single one failed to be present. The saloons of General Cass were fully crowded at quite an early hour, 500 or 600 persons assembling before 9 o'clock. The ambassadors did not leave Willard's Hotel until 10. On reaching General Cass's residence they were conducted by Captain Dupont and other gentlemen, who accompanied them through the various rooms of reception, and finally seated at a point most convenient for approach by those who were to be presented to them. Their neighbourhood was at once invaded by numberless candidates for introduction, mostly ladies, all of whom were received with the grace and elegance of manner inseparable from the Japanese. The party visiting the Secretary of State was composed of three princes, and the five officers next in rank, and the two interpreters. For nearly an hour these ten gentlemen sustained unflinchingly the unaverted gaze of as many scores of people as could draw near to them. Their self-possession then, as it always is, was marvellous. The haughtiest stare, with intensest eyeglass concentration, could neither move them to embarrassment nor rouse them to the least defiant glance in return. Directly personal remarks, not always uttered, I am afraid, in the best taste, and sometimes unworthy the fair lips whence they proceeded, were listened to by those who perfectly understood them with no sign of discomposure, except perhaps a slight compression of the mouth, showing that insensibility was no cause of their immovable calmness. Towards 11 o'clock the ambassadors rose, and were again led through the apartments, pausing before a refectory table, the details of which no interpreter was needed to explain to them.

COMMERCIAL.

There are no great changes to notice in commercial or financial matters since our last. Money continues easy at 5 and 6 per cent. on call, and for sixty day loans. The weekly bank statement published yesterday exhibited an increase of \$54,806 dols. in specie, with a decrease in loans of 1,246,148 dols. The increase in undrawn deposits amounted to 653,606 lbs.; Sterling Exchange on London, 109½ to 109¾ for bankers' sixty day bills. On Paris rates varied from 5 dols. 14½ cents. to 5 dols. 13½ cents. at short.

There continues a good demand for American cotton piece goods to China, and the shipments last week embraced 2,212 bales, of the value of 114,615 dols. The bill largely increasing American custom duties has passed the House of Representatives as previously stated, and is before the Senate. Its friends hope for its final passage, with some modifications, which is doubtful.

FIRE CRACKERS are selling more freely, but in prices there is no improvement. The sales embrace 6,000 to 7,000 boxes Canton No. 1, on private terms.

GUNNY BAGS remain firm; sales, 300 bales, 425 boxes, at 10½ cents, less 3 per cent. cash, and 200 ditto for future delivery.

GUNNY CLOTH continues active, with prices in favour of sellers. The transactions are 150 bales here, at 14½ cents, less 3½ per cent.; 100 ditto to arrive here in about two months, at 16, less 4 per cent.

HEMP.—The market generally continues dull, but in prices there is no change. The recent sales of Manila to arrive were made at 6 cents, 8 mos., at which some further parcels to arrive have been disposed of.

INDIGO is quiet, but firm. We have only to notice the sales of a few cerroons Caracus at 1 dol. 2½ c. to 1 dol. 5 c., 6 mos.

TEA.—There is a good demand from the trade, and the market is firm, but business is much restricted by the extreme pretensions of holders, who either refuse to sell, or offer their stocks sparingly. The only sale of note at present is that of 2,500 half-chests Oolong and Aukoi, per Maury, on private terms. The auction sales of Green were spirited, and the whole offering was quickly disposed of at very full prices for all kinds, and at some improvement on low grades. A catalogue of about 3,000 packages of Green Teas are to be sold at auction to-day, and it is expected that previous prices will be sustained.

TIN.—There is more movement in Straits, and sales have been made of 800 slabs here, and 800 ditto in Boston, to come here, at 31 cents, 6 mos., at which figures there are still sellers. Banca gold to the extent of 200 pigs at 31½ to 31¾ cents, cash.

INDIA RUBBER.—There is no East India offering.

The following vessels have arrived at New York:—From Manila, May 12, Aurora. At Boston from Singapore, May 7, Philomela. From Manila, 12, Winged Arrow. Sailed: From New York for Shanghai, May 9, Horatio, for Hong Kong; 11, Surprise.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

EVANS—At Malta, on the 18th of May, the wife of U. W. Evans, Esq., M.D., 2nd battalion 15th regt., of a son.

ZECHARIAH—At Singapore, on the 1st of May, Mrs. G. I. Zechariah, of a son.

MARRIAGES.

MORGAN—GRAY—At the British Consulate, Batavia, on the 11th April, by the Rev. Scott Moncrieff, William M. Morgan, Esq., merchant there, to Jane Alison, youngest daughter of the late J. B. Gray, Esq., of Batavia.

STRACHAN—BRAIDE—At the London Mission House, by special license, on the 18th April, by the Rev. J. Leggo, D.D., Robert Strachan, Esq., to Isabel Braide.

DEATHS.

GRAY—At Manila, on the 13th April, Mr. M. M. Land Gray, formerly of Batavia.

HASKELL—At Singapore, on the 1st of May, of erysipelas, George Lewis Haskell, Esq., of Boston, Mass., U.S.A., aged 37.

RIACH—On the 25th March, on board the *Isambolt*, at sea, James Pringle Riach, jun., Esq., of Bombay, son of the late Major W. A. Riach, 79th regt.

MCDERMOTT—On 5th June, Captain B. McDermott, late of the P. & O. Comp's. ship *Fort William*, Hong Kong, aged 42 years.

INLAND INDIAN STEAMER.—Another vessel, called the *Jumna*, for this navigation, has been launched by Reid and Co., Port Glasgow. The length of the *Jumna* is 220 feet, the breadth 30 feet, and the depth about 7½ feet. She is built with two rows of longitudinal truss work to impart longitudinal strength, and has also an iron deck beneath the wooden one, so that the vessel virtually constitutes a great iron tube, which is divided at intervals by watertight compartments. The *Jumna* will be propelled by engines on the double cylinder principle. There are two high-pressure cylinders of 26 inches diameter, and 6 feet stroke, and two low pressure cylinders of 48 inches diameter and 6 feet stroke. The steam is generated by four locomotive boilers. The pressure of the steam is 120 lbs. on the square inch, which is the pressure now used in locomotives of the most approved construction. The steam, after having generated power in the high-pressure cylinders, passes into the low-pressure cylinders, when it again generates power, and finally passes to the condenser. The condensation of the steam is effected by extreme cold, so that only pure water is supplied to the boilers, an object of much importance in muddy rivers like the Ganges. The engines of the *Jumna* are expected to work up to 1,200 or 1,300-horsepower. The vessel will tow four barges, each 130 feet long, 30 feet broad and 7 feet deep, and one barge 160 feet long 30 feet broad, and 7 feet deep. The total capacity of these five barges is about 120,000 cubic feet, or reckoning 40 feet to the ton, 3,000 tons, but on the average, the train of barges is not expected to carry more than 2,000 tons of cargo.

TOULMIN AND GALE

MAKERS OF

PATENT INDIAN DESPATCH BOXES, WRITING DESKS,
DRESSING CASES, TRAVELLING AND TOILETTE BAGS,
7, NEW BOND STREET,

(OPPOSITE THE CLARENDON.)

AN AGENT WANTED IN CHINA.

JOHN GOSNELL AND CO.'S PERFUMERY, PATRONISED BY HER MAJESTY and the ROYAL FAMILY.

Among the celebrated articles for the Toilet prepared by J. G. and Co., the following are of the choicest kind, and universally admired:—

JOHN GOSNELL and Co.'s COURT PERFUMES—Queen Victoria's Bouquet, The Bride's Bouquet, Jockey Club, Guard's Own, Ess Bouquet, Military, Royal Yacht Club, New Perfume—Extract of Flowers, Eugenie, Napoleon III., Frangipanni, Wood Violet, Opera Bouquet, &c.

JOHN GOSNELL and Co.'s FOUNTAIN PERFUMES for the BALL-ROOM.—A most elegant and useful invention, which cannot fail to be appreciated by the Ladies.

JOHN GOSNELL and Co.'s TREBLE DISTILLED LAVENDER WATER possesses in the highest degree the full fragrance of the flowers.

JOHN GOSNELL and Co.'s REAL OLD BROWN WINDSOR SOAP—A Toilet Soap of the finest quality and very superior fragrance. It differs so widely in composition from the ordinary Alkaline Soaps, that its frequent use is highly beneficial in removing all harshness and redness of the skin.

JOHN GOSNELL and Co.'s MOELLINE, GOLDEN OIL, for the Hair.

JOHN GOSNELL and Co.'s INSTANTANEOUS HAIR DYE—The only Hair Dye which produces a good natural colour with perfect certainty, and with the least possible trouble.

JOHN GOSNELL and Co.'s PATENT TRICHOSARON—The obvious utility and improved construction of the Trichosaron Hair Brush adapt it for general use, and render it the most suitable Hair Brush for the Toilet. Sold by all Perfumers, Chemists, &c.

JOHN GOSNELL and Co.'s STEREOSEMIC TOOTHBRUSHES, highly recommended by the most eminent Dentists.

JOHN GOSNELL and Co.'s ESSENCE OF GINGER. Merchants and Shippers supplied on liberal terms. 12, THREE KINGS COURT, LOMBARD-STREET LONDON.

KAYE'S WORSDELL'S PILLS cannot be equalled as a Family Medicine.—Testimonials are constantly arriving from all parts of the world as to their astonishing efficacy in destroying the cause, and removing the effects of disease. They purify the blood and correct such derangements of the stomach, liver, and other organs as are the primary causes of disease, bring all the bodily functions into healthful exercise, and strengthen and invigorate the entire system.

Hundreds of cases of cure accompany each box. Sold by all Druggists and Medicine Vendors, in boxes at 1s. 1½d., 2s. 9d., and 4s. 6d. Wholesale Depot, 22, Broad-street, London.

THE BITTER CUP, filled with water for a minute, produces a powerful and lasting tonic, beneficial for dyspepsia, loss of appetite, regular and atonic gout, nervous irritability, and hysterics.—See Dr. Graham's "Domestic Medicine." Excellent for Sherry and Bitters. Introduced by, and sold wholesale and for exportation at the Tropical Depot, 53, Cornhill, London, E.C. Caution—See the label on Cup.
Agent for Hong Kong, Mr. GEORGE HOLMES.

"I have subjected Plumbe's Arrow-root to careful examination, microscopical and chemical. I find it to be perfectly genuine, and of superior quality; equal in all respects to the best Bermuda, for which so high a price is usually charged. (Signed) **ARTHUR HILL HASSALL, M.D.**"

Directions and testimonials with each packet, which bears the signature of **A. S. PLUMBE, 3, Allie-place, Allie-street, London, E.**

Retailed in London by Snow, Paternoster-row; Ford, Islington; Morgan, Sloane-street; Williams and Lloyd, Moorgate-street; Medes, Cumberwell.

AGENTS WANTED.

PUMPING MACHINERY.

GWYNNE AND CO., ENGINEERS,

LONDON, manufacture and supply the following machinery, of the most improved construction, and with all the latest improvements:—Portable and Fixed Steam Engines and Boilers of every description; Water-wheels, Windmills, Horse and Hand-power Machines; Pumping Machinery for the supply of towns, cities, and districts, and for the irrigation of coffee, cotton, indigo, sugar-cane, and rice estates, for pumping out coffer dams, canals, dry docks, reservoirs, &c. They also manufacture and supply the Pumping and other machinery for paper, pulp, and fulling mills, breweries, distilleries, tanneries, starch works, bleaching, dyeing, and calico-printing works, chemical works, silk, cotton, and flax mills, and manufactories in general.

Price Lists and further particulars obtained on application to **GWYNNE and CO.**, Hydraulic and Mechanical Engineers, Essex-street Wharves, Strand, London.

For Dock work, and large Pumping operations, Gwynne and Co.'s Machinery stands unequalled.

NELSON'S MEDICATED BELT.

(Ed. Nelson, Naval Surgeon from 1832 to 1857.)

Gentlemen who are subject to pains in the back or loins, Rheumatism, Lumbago, or who are given to corpulency, are advised to wear **NELSON'S MEDICATED BELT**, as it gives a great support to the entire frame, and a comfortable and genial warmth to the back and abdomen, promoting health and digestion. Gentlemen who ride for business or pleasure should wear this belt as a preventive of Rupture, &c.

NELSON'S MEDICATED MARINE BELT for the prevention of Sea Sickness and the support of the back and loins during a long voyage.

"All those whose duty or pleasure calls them to sea should possess this Belt, for, putting aside its use on board ship, it is invaluable as a riding belt, fitting easily, and supporting the back."
"MARK FRANKLIN."

"Lower Parade, Leamington, August 3, 1858."

These Belts are sold by Mr. **WHITBURN**, Chemist, 174, Regent-street, price 21s. each, or direct from the Maker, **WM. ELSTOB**, 12, Avery-row, New Bond-street. Circulars free. Orders from the country must have the size of waist and hips, and a post-office order for 21s., payable to **WM. ELSTOB**, at Cavendish-street.

These belts can be had of any tailor in the kingdom.

BLAIR'S GOUT and RHEUMATIC PILLS.

Price 1s. 1½d. and 2s. 9d. per box.

This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century to demonstrated by unsolicited testimonials from persons speak of a cure for the Gout was considered a romance; but now the efficacy and safety of this medicine is so fully in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age. These Pills require no restraint of diet or confinement during their use, and are certain to prevent the disease attacking any vital part.

Sold by all medicine vendors. Observe "Thomas Prout, 229, Strand, London," on the Government Stamp.

TWINBERROW'S DANDELION, CAMO-

MILE, and RHUBARB PILLS, an effectual cure of indigestion, all stomach complaints and liver affections. In cases of constipation these pills never fail in producing a healthy and permanent action of the bowels, so that in a short time aperients will not be required, and, being quite as innocent as castor oil, they may be given to children.

From Dr. Dick, Lansdown-terrace, Kensington.

"Sir,—Send me another bottle of your Dandelion, Camomile, and Rhubarb Pills for my own use. I lose no occasion of recommending these Pills, as I can conscientiously do so."

Prepared by **TWINBERROW**, Operating and Dispensing Chemist, 3, Edwards-street, Portman-square, London; and may be had of all Patent Medicine Vendors.

**NOTICE TO PASSENGERS BY THE OVER-
 LAND ROUTE, via EGYPT.**

PHILIP ZECH, Proprietor of the two well-known Hotels in Alexandria, the Hotel d'Europe, and the Peninsular and Oriental Hotel, begs to inform his friends, and Travellers in Egypt in general, that he has purchased **SHEPHEARD'S HOTEL** in CAIRO, which will still continue to bear the same name; and in returning thanks for the extensive patronage enjoyed by his two houses in Alexandria, hopes that the preference may likewise be extended to his house in Cairo, which will be managed in first-rate style, and in a manner intended to give every satisfaction to its frequenters, both as far as table, wines, internal and external service are concerned. Many alterations and ameliorations are being carried out at the present moment.

Curtis on Manhood.—New Edition.—A Medical Essay on Nervous Diseases.

Just published, the 120th thousand, with numerous plates in a sealed envelope, price half-a-dollar.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE, with plain directions for perfect restoration to health and vigour. By J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

CONTENTS:

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhoea and Impotence; Early Vicious Indulgences; Dangers of Neglect.

CHAPTER III.—A Review of the various Disqualifications of Marriage—whether resulting from the Youthful Abuse, the Folies of Maturity, the Effects of Climate or Infection.

CHAPTER IV.—The Author's plan of Treatment, Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhoea and other Urinary discharges by microscopic examination.

CHAPTER V. and VI. on the modern Treatment of Gonorrhoea and Syphilis.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

"We feel no hesitation in saying, there is no member of society by whom the book will not be found useful—whether such person hold the relation of Parent, Precceptor, or Clergyman."—Sun.

Mr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by letter, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Mr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty Years; nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINNAM, QUEEN'S ROAD, HONG KONG.

CRICKETING OUTFITTERS.

JOHN WISDEN AND CO.,

LATE F. LILLYWHITE AND WISDEN,

2, NEW COVENTRY STREET, LEICESTER SQUARE, LONDON, W.

EVERY article connected with Cricket may be had at this Establishment. Their large stock of **OLD AND WELL-SEASONED BATS** cannot be equalled, and they invite noblemen and gentlemen to inspect them. The wants of clubs, regiments, colleges, schools, &c., are particularly paid attention to, and their list of prices will convince officials that a great saving is effected by purchasing at their establishment, which contains articles, not only of their own manufacture, but of those who are acknowledged first-rate makers, and whose goods are selected by J. W. & Co. themselves, and therefore will be warranted. Models of L. & W.'s New Patent Catapults can be seen and worked at the above address.

Illustrated list of Prices forwarded Post Free. Export Orders with immediate despatch.

CRICKETING OUTFITTER.

JOHN LILLYWHITE

(LATE LILLYWHITE AND SONS AND LILLYWHITE, BROTHERS),

5, SEYMOUR STREET, EUSTON SQUARE, LONDON, N.W.

THE largest wholesale Cricketing Outfitter in England. Every article connected with the game may be had. His celebrated Case-handle Bat, manufactured expressly for foreign use; the handle warranted not to break. Batting and Wicket-keeping Gloves, Leg Guards (warranted), Boxing Gloves, Foot Balls, Quoits, Dumb Bells, and every article for British sports.

First-class goods only kept, and every article warranted. Export orders with immediate despatch.

Illustrated lists of prices post free. No connection with any other house.

SARSAPARILLA.

WILKINSON'S (LATE BRIDGE'S) ESSENCE OR FLUID EXTRACT OF RED

JAMAICA SARSAPARILLA is appreciated for its PURITY and marked superiority, daily prescribed by the Faculty for Impurities of the Blood, AFFECTIONS OF THE LIVER, Constitutional Debility, Attenuation of Body, as an Alternative Medicine at the changes of the seasons, and for freeing the system from the effects of mercury. In India and the Colonies it is extensively used to PREVENT taking complaints incidental to tropical climates, and as a renovator of the system after sickness invaluable. "A superior preparation that may always be relied on."—Sir Astley Cooper. "We are in every respect satisfied with it."—Lancet. "We recommend your Sarsaparilla as the best."—Medical Review. "Latterly, in consequence of much debility, &c., subsequent to cholera, I have freely used Bridge's Sarsaparilla myself, with complete benefit and success."—J. Poett, F.R.C.S.; Sold in Pints, Half Pints, and Quarter Pints. One Pint is equal to Eight Pints of the ordinary preparations.

IMPORTANT CAUTION!—The public are cautioned against cheap preparations of Sarsaparilla, which, instead of being what they profess, are merely a decoction of common herbs, sweetened with molasses, and flavoured with American winter green. The genuine has "THOS. WILKINSON, LATE BRIDGE & Co., 270, Regent-street, London," engraved on each bottle.

AGREEABLE SEIDLITZ POWDER in one bottle, protected by a case, with measure and spoon included. This preparation is highly recommended, not only as a Mild Aperient, but to allay fever, thirst, &c.

AROMATIC TINCTURE OF QUINIDINE, for the prevention of Fever, Intermittent or Remittent Ague, and other effects of Malaria. No Person exposed to the influence or predisposing cause of Fevers should be without it, for if taken in small doses daily, the system will become so thoroughly impregnated with its principles, as to be rendered proof against all attacks of Contagion or Malaria. Sold in Pints, Half Pints, and Quarter Pints.

Agents:—PITKES, Point de Galle; and LITTLE, Singapore Dispensary.

The above Articles prepared only by THOS. WILKINSON (LATE WILKINSON, BRIDGE AND Co.), CHEMIST, &c., 270, REGENT STREET, LONDON, W.

**PHOTOGRAPHIC APPARATUS, LENSES,
 AND PURE CHEMICALS.**

mands an entire view of the river. It is especially re-
commended to gentlemen and families travelling for the
comfort of the table, elegance of furniture, and moderate
charges. P. F. RICHARDS, Proprietor.

CAUTION!—The great superiority of
J. ELLWOOD'S PATENT AIR CHAMBER HATS
and HELMETS over all others, for Tropical Climates,
has induced some persons to offer to the public useless
imitations, bearing some outward resemblance to them,
but totally devoid of their good qualities; the Public is,
therefore, respectfully cautioned to observe that NONE
ARE GENUINE UNLESS THEY BEAR THE NAME
OF THE PATENTEES ON THE LINING.
The Patent Air-chamber Hats and Helmets to be had
wholesale of J. ELLWOOD and SONS, 24, Great Char-
lotte-street (S.), London.

CHRONOMETERS, WATCHES, and
CLOCKS.
E. WHITE, for several years Principal Assistant at
Messrs. Dent's, of Cockspur-street, London, having COM-
MENCED BUSINESS on his own account at the pre-
mises formerly occupied by Messrs. Green and Ward, begs
to call the attention of the Public of India and China to
his Stock of Chronometers, Watches, Clocks, &c., all of
which have been recently manufactured on the most im-
proved principles by workmen of the first talent.
Orders with remittance or reference to London Agent
faithfully and expeditiously executed, or through Mr. GEO.
HOLMES, Hong Kong.
20, Cockspur-street, Pall Mall, London, S.W.

PREPARATORY EDUCATION, BRIGHTON.
A LADY residing in a healthy locality of
BRIGHTON, receives a limited number of BOYS for
EDUCATION, and offers superior advantages on moderate
terms. Parents who reside abroad would find this a de-
sirable home for their children from 3 to 11 years of age.
Satisfactory references given. Address to "Alpha," at the
office of this Paper, 337, Strand, London, W.C.

HOLLOWAY'S PILLS and OINTMENT
are indispensable for the security of life and health.
Fever, Influenza, Brouchitis, Sore Throat, Diphtheria, and
Bilious complaints are ever present plagues to mankind,
but these can certainly and permanently be put to flight
by the use of these unrivalled aperient, detergent, and re-
storative remedies. There are multitudes of mallow and
feeble invalids now languishing in all parts of the world,
under these diseases, who would soon find their healthy
appearance, strength and cheerfulness return if they judi-
ciously used Holloway's preparations, from which no harm
can possibly result. The Ointment should be well rubbed
night and morning over the affected parts, while the Pills
are taken with discretion. A great and happy change for
the better will speedily appear.

The outward mails for the above places, which should have closed yesterday, will close to-day at 6 p.m.

The intelligence in our United States' column as to the Chinese having agreed to our claims was headed by the *Times* and other papers in large type, "Peace with China." The assassination of the Emperor of Japan was also announced, and is very likely to turn out equally incorrect. The author of this *canard* which has been imposed on the San Francisco, American, and English press, is the captain of the American schooner *Page*, which left Yedo on the 23rd April for San Francisco.

The Publication of THE LONDON AND CHINA TELEGRAPH commenced at 3 P.M.

List of Passengers.

PASSENGERS OUTWARD.

Per P. and O. str., Ripon, 20th June.—From Southampton to Hong Kong: Mr. Frankiss, Messrs. Humphrey, W. P. Dalton, Mr. H. Reinhart, 2nd Class Military Store Clerk, F. A. White, and H. Chevalier. To Shanghai: Mr. Dulcken. From Marseilles, 28th June, to Shanghai: Mr. H. M. Twombly.

Rennie and Rutherford (Staff-Surgeons), Low, Watson, McCarthy, White, Mustaigne, Bowell, Kercious, Bailey, Robinson, and Cook.

Summary of News from the Far East.

WRECK OF THE P. AND O. COMPANY'S STEAMER MALABAR—CAPT. GRAINGER.

The *Malabar* had completed her lading of treasure, mails, cargo, and passengers for Singapore and Hong Kong, which left this on the 26th April, when she parted her cables and went on shore in Galle harbour. The passengers are saved; the mails in part only, and the treasure, amounting to £282,307, it is expected will be recovered by divers. About 700 chests of opium were on board. Of this sum about £100,000 was on Government account for Hong Kong, and £14,000 for the French Government. The *Malabar* was a screw steamer of 1,080 tons and 200 horse-power, and her value is estimated at about £80,000, which will fall on the P. and O. Company if she proves a total loss. The passengers were as follows:—

To Hong Kong: Earl of Elgin, Lieut.-col. H. H. Crealock, Military Secretary; Mr. H. B. Loch, Private Secretary; the Hon. J. F. Stuart Wortley, First Attaché; the Hon. T. J. Howell Thurlow, Second Attaché, Baron Gros, Count de Pastard, Mr. Veitch, Mr. L. Leembruggen. To Shanghai: Mr. D. D. Lewin. From Southampton to Shanghai: Mr. R. Harrison, Mr. W. Strachan. To Hong Kong: Messrs. E. H. Lavers, Necham, G. Hickman, R.N.; G. F. Lay, N. McThail, Baxter, Mr. and Mrs. Gifford, Mr. and Mrs. Lane, Paymaster Forster. To Singapore: Mr. R. S. Scott, Mr. W. Meldrum. From Marseilles, 28th April, to Singapore: Mr. W. Rodderman, Mr. Kramer, Mr. and Mrs. Rowson, Mr. H. Haakman.

THE THIRD CHINA WAR.

No communication of a pacific nature has been received from the Chinese Government. Preparations continue for defending the Peiho, and the Mandarins are pressing the male population into the army.

The leading incident connected with the expedition reported by the present mail, is the occupation of Chusan by the allied troops, which was effected without any resistance, on the 21st April. Sir Hope Grant was present, and proceeded afterwards to Hong Kong, where General Mitchell was awaiting him. General Napier has charge of the troops on the Kow-loong side. It was not announced when the forces would move forward to the Peiho; it appears the Allied Commanders were waiting for the Earl of Elgin and Baron Gros, and would be very much inconvenienced by their detention caused by the wreck of the *Malabar*.

The troops quartered at Chusan were the 67th and 99th Regiments, and about 400 marines, artillery, &c., besides the following men of war, &c., *Imperieuse*, *Pearl*, *Scout*, *Roebuck*, *Opossum*, *Stanley*, *Kestrel*, *Woodcock*, *Granada*, *Adventure*, H.M. *Du Chayla*, *Alarme*, *Mitraille*, *Dragonne*, *Saigon*. [Troop and store-ships *Tasmania*, *Cressy*, *Octavia*, *Mars*, *Walmer Castle*, and *Gamecock*.

The steamer *Mauritius* had arrived from London with stores and ammunition after a passage of nearly four months, and the remaining portion of the B.N.I. from India. The following interpreters have been attached to the expedition, in addition to Messrs. Wacle and Lay, Mr. M. C. Morrison, Acting Consul at

Amoy; Mr. Morgan, Assistant Chinese Secretary; Mr. Swinhoe, Interpreter at Amoy; Mr. Hughes, at Ningpo, and Messrs. Gibson and Davenport, students.

The *China Mail* has the following comments on the coming war:—"It will be very extraordinary if hostilities do commence, when all the parties concerned are averse to them, when the people of England, the Government of England, the people of China, and the Government of China, are all alike anxious for peace; and should war ensue, the plenipotentiaries and commanders concerned will find, as Mr. Bruce has already done, that the responsibility of it will fall on their shoulders, whatever the letter of their instructions may be. The sight now presented on the coast of China is one which cannot fail to arrest the attention of the most careless observer. Here are thirty thousand troops, fully equipped with all the most destructive weapons of modern warfare, from two of the most powerful nations of Europe, about to make war upon the oldest Empire in the world. It is most proper to inquire what is the cause of this expensive expedition. Passing by matters of less importance, two are prominent. In 1858, under the pressure of military force, some provisions were inserted in the treaties with China that are very objectionable to the Government and people, and of these a modification was subsequently promised by Lord Elgin. In 1859, in the attempt to exchange the ratified treaties, a most unfortunate collision occurred, in which the British forces were defeated with great loss. By some it is regarded as essential, in order that negotiations may be resumed, that the untoward events of 1859 should be adjusted. Military pride burns to revenge this repulse of British arms and to restore British prestige; diplomacy is attempting to adjust the difficulty without a recourse to arms. It may be worthy of consideration whether diplomacy may not go behind that point, and endeavour to remove the cause of the difficulty.

As the accounts from various correspondents differ somewhat owing to the excitement current, we append another connected account just received, which is from a reliable correspondent, and gives the best resume. It is dated Hong Kong, or the latest date, 7th May:—

"The whole of the vessels from England have, arrived here now, except the gunboats *Havoc*, *Hardy*, *Grasshopper*, and *Flamer*. The troops also have all arrived, with the exception of the head quarters of the 87th Royal Irish, who have been expected here some days, as they have passed Singapore; and the four troops of Dragoon Guards who have not yet been heard of. Two companies of the 44th and the 19th Punjaub Regiment left yesterday in the *Sir R. Napier*, to take possession of Kintang, an island at the back of Chusan. The 87th relieve the 3rd Buffs at Canton, to remain there; the whole of the other troops have to go North, with the exception of a detachment from each regiment, who remain here to garrison Hong Kong. Most of the troops are encamped on the Kow-loong shore, in tents, with the exception of the 60th Rifles, who are in barracks over at Stanley, and the 1st Royals. There was a review at Kow-loong on the 30th, and another for cavalry only on the 5th May; the troops looked all well, and in good spirits. We are all ready to start, and I believe only waiting the arrival of Lord Elgin, when we shall move onwards. All the arrangements seem admirable, with regard to the transport, embarking troops, &c. The Admiral works night and day, doing everything himself. The *Encounter* left to-day for Shanghai, to hire fifty junks to take up to Peiho, for some purpose not known. The report is here that more troops have been sent for from India.

No one knows anything for certain, as all is kept so close. A naval brigade is to be formed, and Capt. McCleverty is to command it, but no one knows anything more about it as yet, except that we have all drawn tents for our men by orders.

We observe the *Imperatrice* from Suez, with the Armstrong guns, &c., arrived at Singapore on the 7th May, en route for Hong Kong, and sailed on the 9th with the gunboat *Hardy* in tow. The *Encounter*, *Weasel*, *Bouncer*, and *Grasshopper* were at Batavia on 20th April, bound for Hong Kong.

JAPAN.

There is no confirmation of the report announced in the daily papers of the assassination of the Emperor, alluded to elsewhere; but the latest dates by this opportunity are up to 10th April, while those reported through San Francisco are to 23rd April.

CHINA.

SHANGHAI.

The mail of 10th March had not arrived when the present

mail left on 28th April. Everything is at a stand, politically and commercially. Nothing has emanated from Mr. Bruce, who no doubt holds back for Lord Elgin; but in doing so, or rather the Allied Commanders, the proper moment for operations on the Peiho will be lost.

NINGPO.

The notorious Lorch commanders of this place have had a deadly feud, and one of their number, an Englishman, named Daniel Fergusson, has been murdered by three Frenchmen. There is nothing new reported in connection with the rebels noticed in our last. Hang-chow seems to have recovered from the late investment of these banditti.

FOO-CHOW-FOO.

A considerable number of troops are in and about the city. The authorities having received information that the rebels had been put down in the Chih-Kiang province, many of the troops that had arrived here for despatch to Hangchow, or for distribution in the upper parts, have been detained, while some have been sent back to their previous destinations.

The *Richard Busteed* (American) left here on the 20th of April, for Shanghai, with timber and army contractors on board, to build barracks at Chusan.

SWATOW.

The coolie business for the present has been put a stop to, so that there are no horrors to advise under that head. Clan fights continue to prevail to a sad extent, further illustrating the utter disorganization of the Government. Two villages Ho-Po and Sua-Po are at war with each other, killing and imprisoning one another whenever an opportunity occurs. There is a small village near the Cape of Good Hope called To-Po, the people of which have the same family name as those at Sua-Po. About 12th inst. four armed boats from Ho Po landed some sixty men near To-Po, and seized fourteen of the villagers of the latter, killing one on the spot and holding the remainder to ransom. Houses were plundered, pigs, poultry, furniture, and cash were misappropriated. The following day the wives of those who had been captured, implored the mandarin to interfere, but as there was no money forthcoming, he declined the required redress. Under such a state of affairs, it can hardly be wondered at that thieves abound to an alarming extent. Two doors have been carried away bodily from the houses of foreign missionaries, and pawned for one hundred and eighty cash each.

Rice is very high, and the poor are suffering great privations. The wheat and sugar crops have been gathered in and give a good yield, but rain is much wanted for the paddy fields.

Regarding Custom-house matters, a duty of thirty taels has been imposed on opium, which the dealers resist the payment of. The receiving ships, to evade this levy, threaten to remove outside, probably to Gua-Sua Creek.

HONG KONG.

The London Mails of the 26th March have not yet arrived, but are hourly expected, being out 42 days. The Earl of Elgin is expected by it.

Notwithstanding the movement of the forces to the North it is still thought that our demonstrations will end on reaching the Peiho, there certainly seems some hesitation to "move on," as the *Times* stated of the expedition under Admiral Seymour. Of Admiral Hope there is every good opinion, and his second it is considered only necessary to put him at the work to ensure success.

The Hong Kong Club feud has not settled down, and it is perhaps correct to say that the managing committee have lost sight of the objects for which it was founded, and so has laid itself open to animadversions which, however they might be entertained, would probably not be publicly expressed if it partook only of the character of a private institution.

The *China Mail* on the camp at Kow-loong has the following:—"The camp on the Kow-loong peninsula, where there are now some thousands of troops, is an object of general attraction, though the Chinese profess not to think much of it, and openly state their opinion that it will never return from the North. Judging by a camp of Chinese troops, and ignorant of the power which our superior arms and organisation afford, it is no wonder that the display of force on the Kow-loong shore appears very small to their eyes. The troops were reviewed the other evening, or rather they passed before the General, and afterwards the Sikh horse went through some of its exercises, Major Probyn especially distinguishing himself by his skill in the use of the spear. These splendid irregulars of India are among the finest troops in the world; and their officers command them so easily

only because they are chieftains rather than mechanical officers, and lead even more than order. It is not improbable that every one of these Sikhs who goes back to the Punjab will become there a centre of democratic and rebellious ideas. There was some practice with the Armstrong guns yesterday afternoon at a cask and flag about three miles off, and not far from Stone-cutter's Island. The balls all fell short, and the results were not so surprising as the accounts in the home papers would lead one to expect. Should the artillerymen happen to hit any of the Chinese boats sailing about, they need be under no apprehension. All they have got to do is to say that the boats were pirate boats, and to get the Hong Kong Government to indorse the statement in the *Gazette*."

A petition from the citizens of San Francisco (which has not appeared in the New York papers) has been presented to the Assembly of California. It represents that the system of coolieism in existence in that State works not only injuriously to the interests of the white labourer, but it is actually an infraction of that portion of the constitution of California which declares it a Free State. It states further that the greater portion of the Chinese population there are held by a superior rank of their own people in a state of servitude, and that in consequence thereof the masters are enabled to bring their slaves into competition with their own working classes. We learn from this petition that coolies can be hired in that city at from 76 cents. to 1 dollar per day without board. The Chinese emigrants to California are much superior to Chinese coolies; most of them are very respectable men, shopkeepers, artificers, and farmers, who pay their own passage, and are perhaps, on the whole, not inferior to the run of emigrants from England and Ireland to the United States and Australia.

We have received a pamphlet published by Mr. Caldwell, which enters into the question between him and Mr. Anstey, and in which Mr. Tarrant—who is still in the debtors' jail—is included. He has published a reply, and we must reserve a further notice until our next.

Mr. Locke, connected with the P. and O. Company, has arrived, on a tour of inspection.

The trial of Caldwell v. Murrow was to come off on the 22nd May.

Subscriptions were being collected for the Chinese Foundling Hospital, for the purpose of erecting a new building by the principal, Mr. J. L. Dadendorff.

CANTON.

The rebellion is reported to be at an end by the interposition of an old chief, who was bought over by the Imperialist Governor. It is announced, in confirmation, that large numbers of men have been seeking employ, and been engaged on the site at Shameen now clearing for the new foreign factories.

The terms said to have been offered to these gentry are a blue button and rank of Too-sze or Major to Chin-King-Kang; crystal buttons and the rank of Show-pei, or Captain, to each of the other four; and a sum of thirty thousand taels is to be distributed amongst the entire band. The main body is to receive a grant of unoccupied land; and the immediate followers of each chief, some eight or ten hundred men in all, are to be considered and paid as Imperial soldiers. One strange and somewhat inexplicable part of the offer is, to provide a place of residence for the women on Honan.

Traders anticipate a good year's business, and if these rebels do really come to terms, there is no reason, save one, why the anticipation should not prove correct. That one reason is, that Laou might be tempted to create a diversion in this quarter, in the event of an expedition to the North; for with the country rid of these rebels, he will have a very large force at hand available for any use that may suggest itself, and to that force the rebels themselves would be a very formidable addition. However, the city and suburbs of Canton remain quiet, all the shops are open, the streets are crowded, and confidence seems on all hands to prevail.

Rice has become more abundant, and the price fallen almost to ordinary rates.

The two millions of dollars said to be received by the French Government from the Chinese turns out to be a hoax.

With regard to the coolie trade to the Havana, it is not yet known if the pressure which the dealers have brought to bear upon the Canton commissioners, with the view of extending the emigration during the summer months, has been successful or not. The trade still flourishes under the auspices of How-e-tow-bay. One of the P. and O. steamers, on her passage down a few days

since, actually witnessed an attack, within sight of the Spanish receiving ship, of pirates on some trading vessel, the object clearly being to kidnap the crew.

PHILIPPINES.

MANILA.

The French ship *L'Europe*, on her passage from Cochin China to this place with nearly 300 troops on board, was wrecked on the Triton Reef. After remaining fourteen days on the reef, a young lieutenant of marines, Senor Arquistoin, volunteered to put off in a boat to Saigon, a distance of 160 leagues. He succeeded in reaching there, and, through his gallant conduct, the whole of the passengers were rescued. A splendid ball has been given at the Casino by the garrison to the heroic officer and the corps. It is intended to present him with a testimonial; and a subscription is on foot with that object. The French captain had previously made a desperate but ineffectual attempt to rescue them.

H.M.S.S. *Snake*, towing the tender *Touze*, has arrived from Sarawak. She will sail in a day or two for Hong Kong.

The surgeon of a regiment and an officer have fought a duel with revolvers. The provocation was on the part of the officer, who has died from a shot in the abdomen.

COCHIN CHINA.

We have received the following additional particulars on the attack on British vessels alluded to in our last:—

It seems that the transports *Winifred*, *Forerunner*, *Elizabeth*, and *Zuleika*, left Singapore in tow of her Majesty's steamers *Centaur* and *Magicienne*. The steamers took the transports into Quinhone Bay (which is in Cochin China about half way between Saigon and Turon), for the purpose of filling up coals out of them. The narrative we have been favoured with is rather indistinct, but as the *Centaur* took no part in the brush, and as only two transports are mentioned as having been present, we presume the *Magicienne*, *Zuleika*, and *Elizabeth* were the only ships in the bay at the time of the occurrence. The commanders of these two transports last named, with some artillery officers, took a sail, for pleasure we presume, each commander in his own cutter. They were suddenly fired upon from a battery which appeared to mount sixteen guns. The first shot passed over the boats, on which they put about and returned the way they came, *only a little faster*. The battery fired five shots subsequently notwithstanding. The practice would seem to have been by no means contemptible; for the *Zuleika's* boat, which had more Europeans in than the *Elizabeth's*, was evidently singled out as a mark, and such was the precision of the aim that some of the shots fell within a few feet from her. The day following, the *Magicienne* steamed abreast of the fort with a flag of truce flying, and sent a boat on shore, also under a flag of truce, to open a parley. The officer in charge of the boat landed and approached to within one hundred yards from the fort, when, being fired at with gingalls, he retreated. The *Magicienne* then opened fire at 1,000 yards distance with shot and shell, which was feebly replied to at first by four or five harmless shots, and which was continued for about one hour, thereby inflicting material injury on the structure generally. Some of the shells burst inside the fort, and must have done considerable damage.

SIAM.

BANKOK.

A correspondent from this place gives the following narrative, which we gladly reprint from our Singapore contemporary, the *Standard*, as intelligence of the manners and customs at that place is difficult to obtain:—

"The bath and the breeze are blessings of Bankok, and it is astonishing to think what lively people a few days fine blowy weather has made us. The Siamese seem only to appreciate the windy weather for the amusement of kite-flying. Kites of all shapes and sizes are darting and dancing above the city; at times they are fastened to boats, and may be seen whipping them along the river at railway speed; the greatest excitement prevails among the Siamese when kites entangle and combat in the air, and betting on this sport is said to run high. The ruinous condition of public works in Siam show great apathy in its Government; the roads are a reproach, the bridges are jeopardies, and it may be said there is no drainage at all. The kings are wise and skilful enough to calculate eclipses, but notwithstanding they suffer their subjects to continue in sloth and ignorance and gaming, that curse of all countries is a licensed toleration in Siam. The scenes of squalor in Bankok outside St.

Giles' or Spitalfields, but owing to the simplicity of the native *regimen*, and the constant warmth of the weather, it may be truly said that real poverty does not exist among the Siamese. The Siamese matrimonial engagements are very simple, and the white population seem to like their convenience. The Siamese army—male and female, is the most innocent and ludicrous turnout that can be imagined; the soldier-wenchies are uniformed in red flannel sacks open at both ends for ventilation, and girt at the middle to keep their powder-pouches dry. To see them scampering along or squatting together nursing old rusty match-locks instead of babies, begets spontaneous burst of derisive laughter. Our city watchmen keep up an incessant shouting throughout the night; it is very stupid to allow this, for it is not only a breach of the peace, but gives thieves a timely notice of their approach; but many are of opinion here that these nocturnal guardians and night robbers are identical. A melancholy occurrence happened here. Mr. Wigley, the engineer and master of the Royal Mint, lately arrived at Bankok from England, had gone to the door of his floating-house to order a boat away, when he unfortunately overstepped a narrow platform and fell into the dark rolling waters of the Chow Phya and was drowned; his body was recovered and interred two days after this sad event occurred.

"There is quite a dearth of engineering talent here at present; the Government engineers lately threw up their agreements and left the country. It would seem that the Siamese are not so faithful to their engagements as *Falstaff* was to *Ford's* wife, neither can so much be said for Siamese morality as can be read in praise of the exemplary ethics of the 'Merry Wives of Windsor.' The Protestant missions at Bankok are not attended with success: whether this be owing to any want of energy in their undertakings it is difficult to say. A great many converts, however, are being made to the Roman Catholic faith; there are five churches of this kind in Bankok, and others in various parts of the country, but not one public place for Protestant worship can be found within the kingdom. These facts tell more than a multitude of words could do about the energy and apathy of the two churches. The Siamese are not quite so merciful to the canine species as the Japanese, but still they have sympathy enough to keep them from killing the worst and ugliest of the breed; when this nuisance swarms to intoleration, some neighbouring noblemen pay for the capture and banishment of the 'barkers' to the opposite side of the river.

"The new year holidays of the Siamese have just passed over very quietly indeed, and with less *ecclat* than was shown on the same occasion by the Chinese. Nine-tenths of the trade of the country is carried on by Chinese, who number one with the natives; they are not so particularly slothful in business as the Siamese. This is the time when the annual revenue is farmed out; 6,000 catties of silver has been paid by the opium farmer, and 930 catties by the three per cent. import farmer; a European inspector has been appointed to watch the interests of the three per cent. farmer in all vessels arriving with European commanders. Prince Kromolong, who is far in advance of most of his countrymen, both in political and intellectual knowledge, is making needful improvements in Siamese shipping laws, his charges are in exact conformity with the laws relating to British merchantmen. I have been very impartial in my 'bon mots' on the Siamese, for I always speak of the 'Fords as I find them,' and regard flattery as masked insult. I am convinced that all intelligent and discerning Siamese will appreciate my out-spoken candour."

JAVA.

The following was omitted in our last:—Unusually heavy rains had fallen in Java during the month of April, and inundations had occurred in different parts of the island, of a more serious nature than any before witnessed. They had been most heavy and destructive in the two great deltas of Samarang (Damak and Grobogan) and of Surabaya, on the western borders of Pasuruan, and in the residency of Bazukie.

In Banjermassing numerous expeditions have been directed against the rebels in various directions, always defeating them where they made a stand. The Pangeran Hidayat Ullah has at length openly placed himself at the head of the revolt, and will no longer be a source of embarrassment to the Netherlands Government in dealing with the future management of the country.

LEGALISING TRADE WITH CHINA.

A decree has been published in the *Gazette*, of which the following is an extract:—"And it is further ordered that, not-

withstanding the existence of hostilities between her Majesty and her august ally on the one hand, and the Emperor of China on the other hand, and during the continuance thereof, all and every the subjects of her Majesty and of her august ally the Emperor of the French, shall and may, during such hostilities, freely trade at and with all ports and places where-soever situate in the dominions of China, and also with all persons whomsoever, as well subjects of the Emperor of China as others residing or trading within any part of the dominions of the said Emperor, and this benefit is extended to all neutral powers."

COMMERCIAL REPORT.

The mails delivered this morning give a better account of the import market at all ports, but at Shanghai the least is doing. The following changes in firms are announced: Mr. Julius Kahn is admitted a partner in the firm of Reiss and Co.; Mr. R. H. Chambers and Mr. W. Balfour sign the firm of Smith, Kennedy, and Co., by procuration; and Mr. E. H. How that of Adamson and Co., who have opened a house at Foo Chow.

EXPORTS.

TEA.—The present season may be considered closed at all the ports. Nothing is positively known of the new season's supply, but there are no appearances of a stoppage at any of the ports. At Shanghai, the settlements, since the departure of last mail, have been quite insignificant, say 2 chops Shanghai packed Congou at 17 to 19 taels; one chop Shanghai packed Ningchow, at 26 taels; one chop country packed ditto, at 30 taels; and 230 packages Flowery Pekoe, rate not given. The remaining stock is estimated at 2,500 packages Shanghai packed Congou. Green: The settlements of the fortnight have been trifling, being reported at 2,500 half chests, and 500 boxes of which are for London and half for New York. Previous rates are fully maintained. The stock is reduced to 4,000 or 5,000 packages, besides 10,000 packages inferior Japan skin, unfit for export. As no more supplies of the present season's yield are expected, the business may be said to be all but closed until the new teas shall arrive. No settlements whatever are reported at Canton. Spurious teas unfit for shipment to Europe or the United States are being shipped from Macao to Bombay.

RAW SILK.—At Shanghai the disposition on the part of dealers to realise, as mentioned in last report, continued for a few days after the departure of mail, and prices fell 5 taels further. Foreigners, however, entering the market, the fall was more than recovered. The settlements of the fortnight are reported at 3,000 bales, making a total for the season of 62,500, or 15,000 less than at corresponding period of last season. The supplies from the country have been trifling, and the unsold stock in the market reduced to less than 2,000 bales, which principally consist of inferior description. It is unlikely that any additional supplies of this season's crop will be brought forward. The coming yield will be rather late, and is generally rumoured to be short in quantity. The quotations are:—Tsatlee, No. 1, taels, 430 to 440 per picul; 2, 410 to 420; 3, 380 to 395; 4, 360 to 370; 5, 340 to 350. Taysaam, No. 1, 350 to 355; 2, 330 to 340; 3, 315 to 325; 4, 285 to 308; 5, 270 to 280. At Canton a small settlement of re-reeled Kumchook is reported at \$440. Ordinary can be had at \$400. The new crop is expected before the end of this month, but accounts regarding it are very conflicting.

DRUGS.—No settlements are reported at Canton during the fortnight. The following are the quotations. Cassia lignea: \$18. 50c. to \$18. 75c.; stock, 500 piculs. Cassia buds: \$36; stock, 25 piculs. Cassia oil: \$325. Star anniseed: \$18, scarce. Anniseed oil: \$190. Rhubarb: Stock, 100 piculs. At Shanghai rhubarb of the best quality can be had at 40 taels, and wool at 3 taels 5 m., no settlements being reported.

IMPORTS.

At SHANGHAI grey shirtings weighing 6½ catty, and 5½ catty T-Cloths, have been asked for, and a few sales are reported as quoted below, but all other descriptions are neglected. Coloured fancy and white shirtings remain without inquiry, but forced sales in barter have been made at low rates. No sales of woollens or long ells are reported, but a few camlets have been taken for shipment to Japan. The clearances of the fortnight are reported as under. Grey shirting, 30,000 pieces. White shirting, 2,000 pieces. T-Cloths, 10,000 pieces. American goods, 5,000 pieces damaged. Camlets, 90 pieces. The stock

uncleared of American goods is 135,000 pieces drills; 15,000 pieces sheetings, and 2,500 pieces jeans.

At CANTON sales are reported at 524 bales yarn, 32,000 pieces grey shirtings, 4,200 pieces white ditto, 13,500 pieces American drills, 2,500 pieces T-cloth, 200 pieces long ells, 240 pieces camlets, 1,500 piculs betel nut, 350 piculs rattans, 300 piculs sapan wood, 700 piculs lead, 100 flasks quicksilver, 420 piculs nail rod iron, 600 piculs small round rod ditto, and 60 piculs iron wire.

At AMOY.—The sales of the month are reported—550 bales yarn, 450 pieces white shirtings, and 750 pieces T-cloths.

At Foo-Chow-Foo.—The sales of the fortnight are reported at 600 piculs. American drills, at \$3. 70c.; 6,000 pieces T-Cloths, $4\frac{1}{2}$ to $5\frac{1}{2}$ cattie, at \$1. 65c. to \$2. 5c.; 700 pieces white shirtings, 36 yards, at \$2. 80c.; 1,300 pieces chintz, at \$1. 40c. to \$1. 65c.; and 200 boxes tin plates, at \$8. 20c. to \$8. 40 c.

HONG KONG.—Sales of the fortnight: 200 bales yarn, 3,000 pieces grey shirtings, 1,000 pieces white ditto, 27,000 pieces T-Cloths, 120 pieces lastings, and 200 piculs black pepper.

MANILA.—There had been no further arrivals of manufactured goods, and most of those per *Casas* having been sold to arrive, the market generally is in a healthy position. The export market is without much animation, the want of tonnage assisting to check operations, and any little alteration in quotations is in favour of shippers.

SINGAPORE.—There has been rather more activity in our market for Manchester goods. There is a good demand for grey shirtings and light grey T-cloths, and better prices have been obtained both on the spot and for arrival. Some kinds of dye goods are also in better request. There is more inquiry for the low numbers of grey twist. Woollens are in moderate demand. Metals are for the most part very dull of sale. Coals continue extremely scarce. Tin Exports: Our market for produce has during the past fortnight been steady, but without animation. Supplies of the staple articles of export have not been so plentiful as before, and this, with the easier state of exchange and increased supply of tonnage, has had the effect of giving greater firmness to prices.

EXPORTS FROM MANILA.

Per *Omega* for Cork: sugar, 11,050 piculs; sapanwood, 2,232; hemp, 1,260.

The picul is 133½ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents. and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

SHIPPING INTELLIGENCE.

ARRIVED.

At HONG KONG, MACAO, and CANTON.—From London: April 26, *Albueria*; May 4, *Falcon*. From England: April 24, H.M.S. *Odin*; 28, H.M.S. *Snake*; May 1, H.M.G.B. *Snap*; 2, H.M. troop ship *Urgent*; 3, *Volcano*; 4, *Maurius*; 5, H.M.S. *Vulcan*. From Cardiff: April 30, *Ydale*; May 2, *Geradaus Jacobus*. From Hamburg: April 24, *Canton*; May 1, *Philip* 1.

At MANILA.—From Liverpool: April 19, *Casas*.

At SINGAPORE.—From London: May 6, *St. Adelaide*. From Liverpool: 2, *Tigris*; 5, *Joshua Waddington*, *Sheridan*. From Hamburg: 5, *Heros*; 7, *Melbourne*. From Shields: 4, *Asia*, *Rose*. From Glasgow: *William Steward*. From Cardiff: 5, *E. P. Rosendal*. From Newcastle: 5, *Jane Grey*.

At BATAVIA.—From London: April 23, *Prince Alfred*. From Liverpool: 9, *Juliane*; 27, *Lizzy*. From Glasgow: May 5, *Commodore*. From Hamburg: April 19, *Voorwaarts*. From Swansea: May 1, *Hollands Trouw*.

SAILED.

From SHANGHAI.—For New York: April 21, *Urania*.

From HONG KONG, MACAO, and CANTON.—For Havana: May 5, *Governor Morton*.

From MANILA.—For Cork: April 30, *Oniega*.

From BATAVIA.—For Boston: May 3, *Telliss Amazone*. For Hamburg: April 24, *Princess Royal*.

LOADING.

At SHANGHAI.—For London: *Beverley*, *Berwick Walls*, *Invincible*. For New York: *Union*.

At Foo-Chow-Foo.—For London: *Star of the North*, *Claro*.

At HONG KONG, MACAO, and CANTON.—For London: *Carutic*, *Southern Cross*, *Merceda*. For Havana: *J. Wakefield*, *Live Yankee*. For Sydney: *Fides*. For Melbourne: *Norma*. For San Francisco: *Iconium*, *Moonlight*, *St. Helena*, *Santa Lucia*.

At MANILA.—For Cork: *Casas*. For Boston: *Nautilus*.

At SINGAPORE.—For London: *Zambia*, *Hidalgo*, *W. Stewart*, *Jane Gray*. For Liverpool: *Tigris*, *Joshua Waddington*. For New York: *St. Louis*.

At BATAVIA.—For England: *Juliane*. For Boston: *Manila*. For Sydney: *D. J. Visser*.

PASSED THE STRAITS OF SUNDA.

From England and Continent to China: April 21, *J. C. Ross*; 22, *Hoang Ho*; 24, *Challenger*, *Bertha*; 26, *Robin Hood*, *Chrysolite*; 27, *Bacchante*, *Christopher Hall*; 28, *Bo-etta*, *Lancaster*, *Beatrice*, *Salacia*; 29, *Hollands*, *Trouw*; May 1, *Glen Clune*, *Flying Scud*; 3, *Polmaise Carein*, *Crest of the Wave*; 4, *King Fisher*, *Clarence*; 5, *Juno*, *Sunbeam*; 6, *Electric Salim*. From New York, April 25: *Mandarin*; 28, *Winged Racer*; May 1, *Lucy E. Ashby*. From China to England and Continent: April 22, *Sir Ralph Abercromby*; May 3, *Countess of Seafield*. To Havana: April 21, *Brave Lournal*, *Joshua Waddington*, *Albatross*; May 3, *Maria Elizabeth*, *Quadalupa*. From England and Continent to Singapore, April 27, *Baron P. Rosendael*; May 3, *Melbourne*; 4, *Florence Nightingale*; 6, *Keystone*. From Sydney, April 22, *Jane Grey*. From Boston, 2, *Hollander*. From England and Continent to Manila, April 22, *Eliza*, 30, *Amoor*. To Batavia, April 29, *Asia*; 30, *Commodore*; May 3, *Noach*; 4, *Gazelle*; 6, *Henriette*, *Kroning en Vadderland*, *Mergitte Melchior Hafis*. From Singapore to Liverpool, May 3, *Glengariff*. From Manila to London, 4, *Britannica*.

CASUALTIES.

HONG KONG.—The *Dulcinee* was boarded on the 22nd April by the *New York* in lat. 20.52 N., and, upon sounding the pumps, found six feet of water in the hold, fore and mainmasts gone, covering board broken on the starboard side. No fresh water left on board, and no boats but the long

Giles' or Spitalfields, but owing to the simplicity of the native *regimen*, and the constant warmth of the weather, it may be truly said that real poverty does not exist among the Siamese. The Siamese matrimonial engagements are very simple, and the white population seem to like their convenience. The Siamese army—male and female, is the most innocent and ludicrous turnout that can be imagined; the soldier-wenchies are uniformed in red flannel sacks open at both ends for ventilation, and girt at the middle to keep their powder-pouches dry. To see them scampering along or squatting together nursing old rusty match-locks instead of babies, begets spontaneous burst of derisive laughter. Our city watchmen keep up an incessant shouting throughout the night; it is very stupid to allow this, for it is not only a breach of the peace, but gives thieves a timely notice of their approach; but many are of opinion here that these nocturnal guardians and night robbers are identical. A melancholy occurrence happened here. Mr. Wigley, the engineer and master of the Royal Mint, lately arrived at Bangkok from England, had gone to the door of his floating-house to order a boat away, when he unfortunately overstepped a narrow platform and fell into the dark rolling waters of the Chow Phya and was drowned; his body was recovered and interred two days after this sad event occurred.

"There is quite a dearth of engineering talent here at present; the Government engineers lately threw up their agreements and left the country. It would seem that the Siamese are not so faithful to their engagements as *Falstaff* was to *Ford's* wife, neither can so much be said for Siamese morality as can be read in praise of the exemplary ethics of the 'Merry Wives of Windsor.' The Protestant missions at Bangkok are not attended with success: whether this be owing to any want of energy in their undertakings it is difficult to say. A great many converts, however, are being made to the Roman Catholic faith; there are five churches of this kind in Bangkok, and others in various parts of the country, but not one public place for Protestant worship can be found within the kingdom. These facts tell more than a multitude of words could do about the energy and apathy of the two churches. The Siamese are not quite so merciful to the canine species as the Japanese, but still they have sympathy enough to keep them from killing the worst and ugliest of the breed; when this nuisance swarms to intoleration, some neighbouring noblemen pay for the capture and banishment of the 'barkers' to the opposite side of the river.

"The new year holidays of the Siamese have just passed over very quietly indeed, and with less *eclat* than was shown on the same occasion by the Chinese. Nine-tenths of the trade of the country is carried on by Chinese, who number one with the natives; they are not so particularly slothful in business as the Siamese. This is the time when the annual revenue is farmed out; 6,000 catties of silver has been paid by the opium farmer, and 930 catties by the three per cent. import farmer; a European inspector has been appointed to watch the interests of the three per cent. farmer in all vessels arriving with European commanders. Prince Kromolong, who is far in advance of most of his countrymen, both in political and intellectual knowledge, is making needful improvements in Siamese shipping laws, his charges are in exact conformity with the laws relating to British merchantmen. I have been very impartial in my 'bon mots' on the Siamese, for I always speak of the 'Fords as I find them,' and regard flattery as masked insult. I am convinced that all intelligent and discerning Siamese will appreciate my out-spoken candour."

JAVA.

The following was omitted in our last:—Unusually heavy rains had fallen in Java during the month of April, and inundations had occurred in different parts of the island, of a more serious nature than any before witnessed. They had been most heavy and destructive in the two great deltas of Samarang (Damak and Grobogan) and of Surabaya, on the western borders of Pasuruan, and in the residency of Bazukie.

In Banjermassing numerous expeditions have been directed against the rebels in various directions, always defeating them where they made a stand. The Pangeran Hidayat Ullah has at length openly placed himself at the head of the revolt, and will no longer be a source of embarrassment to the Netherlands Government in dealing with the future management of the country.

LEGALISING TRADE WITH CHINA.

A decree has been published in the *Gazette*, of which the following is an extract:—"And it is further ordered that, not-

withstanding the existence of hostilities between her Majesty and her august ally on the one hand, and the Emperor of China on the other hand, and during the continuance thereof, all and every the subjects of her Majesty and of her august ally the Emperor of the French, shall and may, during such hostilities, freely trade at and with all ports and places where-soever situate in the dominions of China, and also with all persons whomsoever, as well subjects of the Emperor of China as others residing or trading within any part of the dominions of the said Emperor, and this benefit is extended to all neutral powers."

COMMERCIAL REPORT.

The mails delivered this morning give a better account of the import market at all ports, but at Shanghai the least is doing. The following changes in firms are announced: Mr. Julius Kahn is admitted a partner in the firm of Reiss and Co.; Mr. R. H. Chambers and Mr. W. Balfour sign the firm of Smith, Kennedy, and Co., by procuration; and Mr. E. H. How that of Adamson and Co., who have opened a house at Foo Chow.

EXPORTS.

TEA.—The present season may be considered closed at all the ports. Nothing is positively known of the new season's supply, but there are no appearances of a stoppage at any of the ports. At Shanghai, the settlements, since the departure of last mail, have been quite insignificant, say 2 chops Shanghai packed Congou at 17 to 19 taels; one chop Shanghai packed Ningchow, at 26 taels; one chop country packed ditto, at 30 taels; and 230 packages Flowery Pekoe, rate not given. The remaining stock is estimated at 2,500 packages Shanghai packed Congou. Green: The settlements of the fortnight have been trifling, being reported at 2,500 half chests, and 500 boxes of which are for London and half for New York. Previous rates are fully maintained. The stock is reduced to 4,000 or 5,000 packages, besides 10,000 packages inferior Japan skin, unfit for export. As no more supplies of the present season's yield are expected, the business may be said to be all but closed until the new teas shall arrive. No settlements whatever are reported at Canton. Spurious teas unfit for shipment to Europe or the United States are being shipped from Macao to Bombay.

RAW SILK.—At Shanghai the disposition on the part of dealers to realise, as mentioned in last report, continued for a few days after the departure of mail, and prices fell 5 taels further. Foreigners, however, entering the market, the fall was more than recovered. The settlements of the fortnight are reported at 3,000 bales, making a total for the season of 62,500, or 15,000 less than at corresponding period of last season. The supplies from the country have been trifling, and the unsold stock in the market reduced to less than 2,000 bales, which principally consist of inferior description. It is unlikely that any additional supplies of this season's crop will be brought forward. The coming yield will be rather late, and is generally rumoured to be short in quantity. The quotations are:—Tsatlee, No. 1, taels, 430 to 440 per picul; 2, 410 to 420; 3, 380 to 395; 4, 360 to 370; 5, 340 to 350. Taysaam, No. 1, 350 to 355; 2, 330 to 340; 3, 315 to 325; 4, 285 to 308; 5, 270 to 280. At Canton a small settlement of re-reel Kunchhook is reported at \$440. Ordinary can be had at \$400. The new crop is expected before the end of this month, but accounts regarding it are very conflicting.

DRUGS.—No settlements are reported at Canton during the fortnight. The following are the quotations. Cassia lignea: \$18. 50c. to \$18. 75c.; stock, 500 piculs. Cassia buds: \$36; stock, 25 piculs. Cassia oil: \$325. Star anniseed: \$18, scarce. Anniseed oil: \$190. Rhubarb: Stock, 100 piculs. At Shanghai rhubarb of the best quality can be had at 40 taels, and wool at 3 taels 5 m., no settlements being reported.

IMPORTS.

At SHANGHAI grey shirtings weighing 6½ catty, and 5½ catty T-Cloths, have been asked for, and a few sales are reported as quoted below, but all other descriptions are neglected. Coloured fancy and white shirtings remain without inquiry, but forced sales in barter have been made at low rates. No sales of woollens or long ells are reported, but a few camlets have been taken for shipment to Japan. The clearances of the fortnight are reported as under. Grey shirting, 30,000 pieces. White shirting, 2,000 pieces. T-Cloths, 10,000 pieces. American goods, 5,000 pieces damaged. Camlets, 90 pieces. The stock

uncleared of American goods is 135,000 pieces drills; 15,000 pieces sheetings, and 2,500 pieces jeans.

At CANTON sales are reported at 524 bales yarn, 32,000 pieces grey shirtings, 4,200 pieces white ditto, 13,500 pieces American drills, 2,500 pieces T-cloth, 200 pieces long ells, 240 pieces camlets, 1,500 piculs betel nut, 350 piculs rattans, 300 piculs sapan wood, 700 piculs lead, 100 flasks quicksilver, 420 piculs nail rod iron, 600 piculs small round rod ditto, and 60 piculs iron wire.

At AMOY.—The sales of the month are reported—550 bales yarn, 450 pieces white shirtings, and 750 pieces T-cloths.

At Foo-Chow-Foo.—The sales of the fortnight are reported at 600 piculs. American drills, at \$3. 70c.; 6,000 pieces T-Cloths, 4½ to 5½ cattie, at \$1. 65c. to \$2. 5c.; 700 pieces white shirtings, 36 yards, at \$2. 80c.; 1,300 pieces chintz, at \$1. 40c. to \$1. 65c.; and 200 boxes tin plates, at \$8. 20c. to \$8. 40 c.

HONG KONG.—Sales of the fortnight: 200 bales yarn, 3,000 pieces grey shirtings, 1,000 pieces white ditto, 27,000 pieces T-Cloths, 120 pieces lastings, and 200 piculs black pepper.

MANILA.—There had been no further arrivals of manufactured goods, and most of those per *Casas* having been sold to arrive, the market generally is in a healthy position. The export market is without much animation, the want of tonnage assisting to check operations, and any little alteration in quotations is in favour of shippers.

SINGAPORE.—There has been rather more activity in our market for Manchester goods. There is a good demand for grey shirtings and light grey T-cloths, and better prices have been obtained both on the spot and for arrival. Some kinds of dye goods are also in better request. There is more inquiry for the low numbers of grey twist. Woollens are in moderate demand. Metals are for the most part very dull of sale. Coals continue extremely scarce. Tin Exports: Our market for produce has during the past fortnight been steady, but without animation. Supplies of the staple articles of export have not been so plentiful as before, and this, with the easier state of exchange and increased supply of tonnage, has had the effect of giving greater firmness to prices.

EXPORTS FROM MANILA.

Per *Omega* for Cork: sugar, 11,050 piculs; sapanwood, 2,232; hemp, 1,260.

The picul is 133½ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents. and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

	Bank.	Private.
At Shanghai 6 months sight.	6s. 7½d.	6s. 8d. to 6s. 8½d.

SHIPPING INTELLIGENCE.

ARRIVED.

At HONG KONG, MACAO, and CANTON.—From London: April 26, *Albuera*; May 4, *Falcon*. From England: April 24, H.M.S. *Odin*; 28, H.M.S. *Snake*; May 1, H.M.G.B. *Snap*; 2, H.M. troop ship *Urgent*; 3, *Volcano*; 4, *Mauritius*; 5, H.M.S. *Vulcan*. From Cardiff: April 30, *Ydale*; May 2, *Geradaus Jacobus*. From Hamburg: April 24, *Canton*; May 1, *Philip*.

At MANILA.—From Liverpool: April 19, *Casas*.

At SINGAPORE.—From London: May 6, *St. Adelaide*. From Liverpool: 2, *Tigris*; 5, *Joshua Waddington*, *Sheridan*. From Hamburg: 5, *Heros*; 7, *Melbourne*. From Shields: 4, *Asia*, *Rose*. From Glasgow: *William Steward*. From Cardiff: 5, *E. P. Rosendal*. From Newcastle: 5, *Jane Grey*.

At BATAVIA.—From London: April 28, *Prince Alfred*. From Liverpool: 9, *Juliane*; 27, *Lizzy*. From Glasgow: May 5, *Commodore*. From Hamburg: April 19, *Voorwaarts*. From Swansea: May 1, *Hollands Trouw*.

SAILED.

From SHANGHAI.—For New York: April 21, *Urania*.

From HONG KONG, MACAO, and CANTON.—For Havana: May 5, *Governor Morton*.

From MANILA.—For Cork: April 30, *Oniega*.

From BATAVIA.—For Boston: May 3, *Telliss Amazone*. For Hamburg: April 24, *Princess Royal*.

LOADING.

At SHANGHAI.—For London: *Beverley*, *Berwick Walls*, *Invincible*. For New York: *Union*.

At Foo-Chow-Foo.—For London: *Star of the North*, *Claro*.

At HONG KONG, MACAO, and CANTON.—For London: *Carutic*, *Southern Cross*, *Mercedes*. For Havana: *J. Wakefield*, *Live Yankee*. For Sydney: *Fides*. For Melbourne: *Norma*. For San Francisco: *Iconium*, *Moonlight*, *St. Helena*, *Santa Lucia*.

At MANILA.—For Cork: *Casas*. For Boston: *Nautilus*.

At SINGAPORE.—For London: *Zambia*, *Hidalgo*, *W. Stewart*, *Jane Gray*. For Liverpool: *Tigris*, *Joshua Waddington*. For New York: *St. Louis*.

At BATAVIA.—For England: *Juliane*. For Boston: *Manila*. For Sydney: *D. J. Visser*.

PASSED THE STRAITS OF SUNDA.

From England and Continent to China: April 21, *J. C. Ross*; 22, *Hoang Ho*; 24, *Challenger*, *Bertha*; 26, *Robin Hood*, *Chrysolite*; 27, *Bacchante*, *Christopher Hall*; 28, *Boetta*, *Lancaster*, *Beatrice*, *Salacia*; 29, *Hollands*, *Trouw*; May 1, *Glen Clune*, *Flying Scud*; 3, *Polmaise Carein*, *Crest of the Wave*; 4, *King Fisher*, *Clarence*; 5, *June*, *Sunbeam*; 6, *Electric Salim*. From New York, April 25: *Mandarin*; 28, *Winged Racer*; May 1, *Lucy E. Ashby*. From Boston: May 2, *Fearless*. From China to England and Continent: April 22, *Sir Ralph Abercromby*; May 3, *Countess of Seafeld*. To Havana: April 21, *Brave Lournal*, *Joshua Waddington*, *Albatross*; May 3, *Maria Elizabeth*, *Quadalupa*. From England and Continent to Singapore, April 27, *Baron P. Rosendael*; May 3, *Melbourne*; 4, *Florence Nightingale*; 6, *Keystone*. From Sydney, April 22, *Jane Grey*. From Boston, 2, *Hollander*. From England and Continent to Manila, April 22, *Eliza*, 30, *Amoor*. To Batavia, April 29, *Azia*; 30, *Commodore*; May 3, *Noach*; 4, *Gazelle*; 6, *Henriette*, *Kroning en Vafferland*, *Mergitte Melchior Hafis*. From Singapore to Liverpool, May 3, *Glengariff*. From Manila to London, 4, *Britannica*.

CASUALTIES.

HONG KONG.—The *Dulcinee* was boarded on the 22nd April by the New York in lat. 20.52 N., and, upon sounding the pumps, found six feet of water in the hold, fore and mainmasts gone, covering board broken on the starboard side. No fresh water left on board, and no boats but the long

boat, which was lying smashed on the lee side of the deck. The captain and crew arrived at Hon. Kong on the 24th in the Canton. Nothing has since been heard of the ship.

FREIGHTS AND CHARTERS.

At SHANGHAI.—For London: £2 for tea, £4 for silk. For New York: \$12 for tea, \$20 for silk. There is less tonnage in port than there has been for some months, and freights are a trifle higher. Her Majesty's Government have advertised for vessels to transport horses from Japan to the Gulf of Pechelie.

At HONG KONG, MACAO, and CANTON.—For London: £3 to £3. 10s. For New York: \$10. For San Francisco: passenger rate \$28 gross. The value of tonnage has depreciated greatly, owing to the large arrivals, the conclusion of the season for Chinese emigration, and a sudden fall of grain having put a check on the rice trade. Government wants have been supplied by the *Dayspring* (small craft) at 22s. per ton per month, and the *Mary Shepherd* and *Lincelles* at 17s. 6d. The *Southern Cross* and *Mercedes* have been laid on for London; the former at £3, and the latter at £3. 10s. The hull of the clipper *Challenge* has been sold by auction for \$9,200.

At FOO-CHOW-FOO.—For London: £3. 5s.

At MANILA.—For Liverpool: £3. 12s. 6d. and £4. 10s. to the Continent. The *Cavas* is the only vessel laid on for Europe, and tonnage is much required, both for Europe and the United States.

At SINGAPORE.—For London: £2. 10s. to £2. 12s. 6d. for tin, gambier, sago flour, and sugar; £3 for pearl sago, pepper, gutta percha. Freights for homeward voyages are steady, there being an increase of seeking ships, and very little coasting employment offered.

SINGAPORE AND BATAVIA CABLE.—The Submarine cable has not yet been repaired, and as some of the breaks, of which there are believed to be several, have taken place in the deepest part of the Straits, it will probably be a matter of great difficulty to recover the ends.

MR. TARRANT IN THE DEBTORS' GAOL AT HONG KONG.

We have been favoured with the perusal of a letter received from Mr. Tarrant by last mail, which, as it contains many explanatory points in his case which we have hitherto been unable to lay before our readers, we gladly avail ourselves of the permission to publish the same.

It appears that, notwithstanding the applications made by Mr. Tarrant to the Governor of Hong Kong on the subject of his confinement in the Debtors' Gaol for the costs in the suit of Colonel Cine, the Duke of Newcastle, her Majesty's Secretary of State for the Colonies, has not been officially informed of the same by the Hong Kong Government. In a despatch on the case, signed by Mr. Fortescue on behalf of the Duke, dated June 21st, he says: "His Grace has not yet received any despatch from the Governor of Hong Kong respecting the complaint forwarded to this office by Mr. Tarrant. His Grace has no reason to doubt that the Governor would exercise a proper discretion on the subject of Mr. Tarrant's complaints, but will be prepared to address a despatch to the Governor, recalling his attention to the case." It does most certainly appear to us that the Hong Kong Government were bound to make a report of the same to the Home Government, and their omission to do so looks, at least, unjust and spiteful. The following is the letter:—

"I have been a good deal put out by the petty conduct of the court, or, properly speaking, I should say of Acting Judge Adams. Kingsmill, the Acting Attorney-General, to whom I paid £50 for opinions on the point, believed that as the court had refused my appeal, the Governor of the colony, representing the Queen, could do the needful, and, receiving my petition to the Queen in Privy Council, admit me to bail. But at an Executive Council (of which the judge is a member) it was, I believe, determined that the Governor could do nought in the matter; and upon that Kingsmill advised me to apply to the registrar to forward on the necessary documents. This application I made, but was told they could not be forwarded till I had the consent of the Queen to appeal. That, as the taxed costs were under £500, it was doubtful whether the appeal would be allowed, &c. I then wrote and asked for attested copies of the necessary papers; but I am again put off in a most contemptible note received last night from the judge's clerk. However, I am determined to have them, and to day, if I keep well, shall write again. As regards the quibble of amount, that can easily enough be got over, even if it would be started by the registrar at Whitehall. The bill originally, at the Government exchange of 4s. 2d. per dollar, was £657 12s. At the Bank rate of 4s. 6d. it would be £710 4s.; reduced on taxation to £2,331 at 4s. 2d., it is £485 12s. 6d.; at 4s. 6d. it is £523 18s. Again reduced on review to £2,263 at 4s. 2d., it is £471 9s.; at 4s. 6d. it is £509 3s. The day before yesterday I wrote to Sir Hercules Robinson direct, pointing out the contrast between this bill of costs and that rendered by my brother, when the Government action against me in 1858—the Hong Kong Government Corruption action—was upset. That bill was only \$844½, and they taxed off \$98, so allowing \$750½. In that bill, again, Chisholm Anstey's fees—the action, with four sittings of court, extending over eighty-four days—were charged at \$595. They struck off \$95 and only allowed him \$500. In this action, on the contrary, the fees allowed to counsel—the action from date of libellous article to trial extending over twenty-five days only—amount to \$1,896.

"Can you conceive such monstrosity? It is quite impossible to find out on what principle the registrar reviews bills of costs. For the first day of trial alone the registrar allowed Bridges and Pollard, as counsel, \$598 34—more than in the previous year's trial they allowed Chisholm Anstey altogether.

"In 1858 trial, too, we did not send in our bill till January, 1859. But in this Bridges and the Master of the Crown-office, betwixt 'em, got bill

taxed and judgment entered up within eight days of my imprisonment, and Moy, the sheriff, was told he would have a *fi-fa* to attach my goods and chattels at once.

"The fact of the matter is, that the power of the court here to grant writs of *ca-re* and *ca-sa* and *fi-fa* for costs requires restriction. It is a most formidable weapon in the hands of an unscrupulous lawyer in his ability to obtain arrest.

"I see Mr. Fortescue, replying to Mr. James, identifies me with the *generality* of libellers here. With as much justice might we condemn the press in toto as for the fault of one bad writer. But on this point I will send you next mail an extract from a letter I wrote to Sir Hercules, when in the criminal gaol, as regards the corruption admitted by Sir John Bowring to exist. All I say is, let Government appoint me a working member of a committee to rectify Rotten-row, *alias* Downing-street, and I'd precious soon stop extortion in Hong Kong, or any other British colony."

THE KEY TO THE ELGIN-SEYMOUR CONTROVERSY.

(To the Editor of the London and China Telegraph.)

SIR,—The battle royal between Elgin and Seymour was an extraordinary item in Parliamentary proceedings. I agree with you that Lord Elgin was decidedly wrong; and yet I have not a particle of doubt but he acted most conscientiously, and as he believed. My opinion of the matter is this. In his Lordship's suite were several Foreign-office "young men," and if you could get an insight to the archives of Downing-street, you would find piles of complaints by plenipotentiaries of the difficulty they have had to induce admirals and generals to do just as they, the said Plenipos, wished. You would find Sir Henry Pottinger complaining of Parker and Gough, Sir John Bowring of Admiral Sterling, and now we have Elgin on Seymour. But whether, after this affair, it would be prudent to give greater power to plenipotentiaries in their relations with admirals and generals, is, I think, very doubtful. In some cases the Plenipos are right—in others the Executive officers; but taken all in all, I do believe it is best to let matters stand as they are. We have but one common end, namely, naval and military renown; and no concession should be made to diplomacy which would jeopardise that end for an instant. But I will give you a few instances of these disagreements, which have come under my personal observation. First, there was the Chinhae affair in 1841. Chinhae, as you know, commands the entrance of Ningpo river, and it was taken only after the most obstinate defence in China warfare. But after it was in our possession, our troops and boats remained three days before they started for Ningpo. Just fancy such a thing as even one day's delay, and wild enough, I can assure you, was the passionate Ambassador, Sir Henry Pottinger. Malcolm, Woosnam, Elmalie, and others, who were there with Sir Henry, could tell a curious story were they "Olyphant-ish." In that Chinhae affair the diplomatist was right.

Then we had the notorious fracas between Sir John Bowring and Admiral Sterling in 1854, in respect to the rebel blockade of Canton and the Admiral's visit to Japan. There, the diplomatist was wrong. Dear me, what a heap of misery should we have avoided had the rebels got possession of Canton that time, and it must come to that soon; indeed, the very moment we evacuate, for the rebels are in huge force all round.

Even Sir Michael Seymour's compliance with Sir John Bowring's Canton attack, *in re* the *Arrow*, was altogether wrong. Had Sir Michael been allowed to use his own excellent judgment, I am sure he would have thought a good many times more than he did before he fired a shot at the Viceroy's Yamun. Sir Michael really knew no more why he had "raised all that dust" than I can institute a comparison. In a word, he was the instrument of Bowring in his vain wrongheadedness, and no more. Sir Michael soon learned his position, and we had no more diplomatic coercion after that. And, perhaps, to this very circumstance we may attribute any asperity which may have been exhibited towards Sir John's successor in the diplomacy.

In this matter of Elgin's requisition for gun-boats at such an early period of the year the Earl was wrong. Even admitting his conclusions, that an earlier display of force would have effected certain things—most assuredly, after what we had done with Canton, it would never have effected what the capture of the forts effected. The only thing to be regretted is that Sir Michael did not at once say to Lord Elgin, "My lord, in asking me to send a fleet to that point at this period of the year, you ask me to perform a most difficult service. Between the ending of February and ending of May the waters in the northern parts of the China sea are in such a disturbed, whirlpool state, that the very oldest navigators are often put to fault. Added to this is the continuance of fogs so thick that for days and even weeks it is impossible for vessels to make progress, except at imminent risk." But Sir Michael did not say this, and did his best; and then came the mischief-makers—the Foreign Office "young men," with their traditions and underhand primings to stop "that sort of thing" if possible. And thereupon Lord Elgin was induced to write as he did; and, however right he may have been at the time, he was decidedly wrong in allowing "My dear Olyphant" to refer to the heart burnings and bickerings in his book. Your remarks and those of the *Times* on the matter are, I think, very just. On this third Chinese war I perceive you and the *Times* are at issue. *Aprpos*—Did you ever hear a story current at Singapore when Bruce and Hope came out last year? Bruce hoisted a plenipotentiary's flag; Hope ordered him to haul it down, and told him that it would be quite time enough to hoist that when he got off the *Peiho*! After that, was it likely that Bruce would do more than leave the naval man to do as he pleased, to run his head, like a huge obstinate blunderer, as I believe him—brave as a lion withal though he be—as hard against a post as he saw fit? Poor Mr. Bruce, you are all wrong at home in condemning him—he could not have acted differently. By next mail look sharp for reports of disasters in the China seas. I feel sure that Lord Elgin will arrive in China to receive the most practical of rebukes for having determined on supporting "the Olyphant." I fear most for the French, who have such a knack of finding stones in their path. The appointment of Elgin and Gros to wind up this affair is, I think, highly commendatory; but it is a long business—the Russians are at the bottom of it.

Yours truly,

Canton, April 22, 1860

ENATOR.

Continental Intelligence.

HOLLAND.

AMSTERDAM, June 21.

The Netherlands' Trading Company has chartered the following twenty-six vessels to sail from different ports as subjoined:—

From AMSTERDAM: *Jacob and Anna*, *Louise Reoloffine*, *Cornelia and Henrietta*, *Baltimore*, *Henricus Gerhardus*, *Anna and Elisa*, *Zeemeuw*, *Jacqueline and Elisa*, *Antoinette Seraphine*, *Margaretha Simonetha*, *Broedertrouw*, *Anna and Helena*, *Nieuweland*, *Besokie*, *Canton*.

From ROTTERDAM: *Krimpen aan de Lek*, *Elisabeth*, *Erasmus*, *America*, *Ouderkerk*, *Prins van Oranje*.

From DORDRECHT: *Egidia and Pauline*.

From MIDDLEBURG: *Stad Middleburg*, *Walcheren*.

From SCHIEDAM: *Constancia*, *Susanna*.

The King having granted a concession for working the tin mines in the Island of Billiton to a capitalist of this city, that gentleman is forming a company with a large capital to work the mines on an extensive scale. The quality of the ore is said to be equal to that of Banca, and recent surveys prove the existence of an inexhaustible supply.

The Hague journal *Nieuwsbode* states that the Minister for the Colonies has given notice that in future the uninsured part of cargoes of Government produce from the East India possessions is to be increased to the sum of 10,000 florins by each vessel.

In my last letter I mentioned that the Government were in treaty with Mr. H. T. Stieltjes, the eminent engineer, to proceed to Java. This gentleman, who was formerly a distinguished artillery officer, and, on his retirement from the service, accepted the lucrative appointment of consulting engineer of the Overijssel Canal Company, has accepted the Government proposals, and been officially appointed "Consulting Engineer for the Technical Department of the Ministry for the Colonies," and entrusted with a special mission to Java, to examine and study the topography of that island, with a view to draw up a general and comprehensive plan for a system of railroads and other local means of personal communication and goods traffic. Mr. John Dixon, who is appointed chief engineer of railroads in Netherlands India, accompanies him to the East.

The King has granted permission to his Excellency, Mr. C. F. Pahud, Governor-general of Netherlands India, to accept and wear the insignia of Grand Cross of the Royal Order of Frederick, conferred on him by his Majesty the King of Wurtemberg.

Mr. Wilhelm Friederick Mathieu, hitherto Hamburg Vice-Consul at Sourabaya, has been promoted to the rank of Consul for that Republic, and has received his *exequatur* from the King of the Netherlands to act in that capacity.

PRUSSIA.

The Prussian Government has received official despatches from Commodore Sundewall, announcing the arrival of the squadron under his command, destined for China and Japan, on the 15th April, at Madeira, and in the Bay of Santa Cruz (Teneriffe) on the 20th of the same month. The *Deutsche Reichs Zeitung* states that, after all, the expedition is given up, and the ships have received orders to return home. It must, however, be observed that the above journal is not an official organ. One thing, however, is certain, and that is, that Count Eulenburg, the diplomatic representative of Prussia and head of the expedition, who was to go out by the overland mail and join the squadron at Singapore, has not yet taken his departure, but is still in Berlin.

UNITED STATES.

NEW YORK, June 14.

The Japanese Commissioners took leave of the President for New York on the 5th, and expressed themselves highly gratified with the treatment they had experienced. What they have done in the way of settling the currency and other disputes does not fully appear, but the following has been published:—

"The *North Star* brought advices from Japan via California to the 23rd of April, and from China to the 10th of April. The Chinese had consented to pay the English and French Governments their expenses, and to accede to their demands. The Chinese ports and rivers were to be free. The Chinese authorities had issued a proclamation against the Coolie trade. The Emperor of Japan was assassinated on the 15th of March. While on his way to the palace he was attacked by fourteen Japanese dressed as travellers. Six of the Emperor's guards were killed and several wounded. Thirty suspected persons had been beheaded, and two princes of high rank were permitted to disembowel themselves. An insurrection was threatened.

"The regulation of the Japanese currency, which has formed the subject of much anxious discussion between the Naval Committee and the in-

terfer, has finally been settled most satisfactorily on the Japanese. The committee has made an arrangement with the Secretary of the Treasury, by which the Mint at Philadelphia will receive all the old gold and silver coin of Japan to recoin, the standard to be fixed in their presence when they go to Philadelphia. The Government is going to give them one piece of each denomination of our gold and silver coin made from their old coin."

The U.S. steamer *Niagara* on a late trip returned to New York very leaky, and it is doubtful if she will convey the Japanese Ambassadors, as announced in my last.

A fearful and destructive tornado swept over Iowa and Illinois on Sunday, the 3rd instant. Three towns were demolished, and many of the inhabitants buried in the ruins.

A new Arctic expedition sailed from New London, Connecticut, on the 29th ult., on board the bark *George Henry*. The expedition consists only of Mr. B. F. Hall, of Cincinnati, and his Esquimaux guide, Cud-la-ja-ah. Mr. Hall designs to make explorations in the region lying between Cape Willoughby and the entrance to Fury and Hecla Strait.

It is announced that fifty miles of the Atlantic Cable have been recovered, and further success is certain.

Some fishing boats have been detected in bringing over two or three slaves from Cuba, and selling them on the coast.

Another disgraceful scene was enacted in the House of Representatives at Washington on the 1st inst., which is thus described:—

"Mr. Train said he would consider it discourteous and ungentlemanly to insist upon speaking after being called to order. Mr. Houston inquired of the gentleman from Massachusetts if he meant to apply that language to him personally. Mr. Train rejoined that he said what he meant, and should stand to it. Mr. Houston then said, if the gentleman intended to apply that language to him, he (Mr. Train) was a disgraceful liar and a scoundrel. After hours were consumed in nonsensical debate, and it was apparent that the Republicans would not yield their ground until a vote was had, declaring that they would remain until morning to obtain it, Mr. Houston arose and apologised to the House and acknowledged that he was out of order."

From the *New York Herald* of the 12th instant we take the following:

"Since the arrival of the Japanese in Washington two important points have been gained, which will enable this country to avail itself of the advantages of that treaty to an extent beyond our most sanguine expectations. One of these is an arrangement preliminary to the establishment of the currency of the two countries on a satisfactory basis. This has been one of the greatest sources of difficulty between England and Japan. A second point gained since the arrival of the Ambassadors is in reference to Russia, which has been threatening Japan with hostilities. But Mr. Cass has made such representations to the Ambassadors about the friendship of our Government, and its moral influence with Russia and the nations of Europe, that their apprehensions are quieted, and our ascendancy in the "hermetic empire" is proportionately increased.

COMMERCIAL.

Since our last the Money Market has undergone very decided ease. The rates on call loans with Government stocks as collateral are at 4 to 4½ per cent., and at 4 to 6 months 5 to 6 per cent. A large amount of capital lies idle seeking investment.

The *Persia*, to-morrow, it is said, will take out from \$800,000 to \$1,000,000 in specie. The two steamers which sailed last Saturday carried out about \$1,200,000.

The balance in the sub-treasury amounts to about six millions of dollars sterling. Exchange on London closed dull to-day for the *Persia* at 109½ to 109¾ for bankers' bills, 60 days. Good commercial bills are scarce. Bills on Paris range from \$5 13¼c. to \$5 12¼c.

There is no chance for the Tariff Bill to pass the Senate of the U.S. Congress this session. The Republicans, its authors, have signified their intention of abandoning it.

TEA.—At the public sale on Wednesday a fair spirit was exhibited, and the catalogue, chiefly greens, was disposed of at somewhat improved prices for the low and medium grades, Young Hyson, &c., but a shade lower on the better grades. At the auction on Friday the offering was moderate, and chiefly green; the catalogue was disposed of at prices fully sustaining the previous currency. At private terms nothing of moment is passing; 1,000 chests Oolong, per *Flying Childers*, sold at private terms.

FIRE CRACKERS.—Since our last, sales have been made of 1,800 boxes Canton, and No. 1, 40 packages, ranging from \$1 45 c. to \$1 47½ c. par, at 6 mos., or discount for cash, also a small lot No. 2, at Boston, to come at \$1 35 c., 4 mos.

INDIA RUBBER.—Since the large sales in our last the market has been light; holders remain firm on account of the late encouraging advices from Para.

INDIGO.—The market continues firm, with sales of 26 chests of Bengal here, and 38 more to arrive, also 9 chests of Kurpah at private terms.

TRIN.—The market is quiet in consequence of prices demanded by sellers; sales of some 2,000 to 3,000 slabs. Straits at 32 to 32½ c., 6 mos.; and 150 do. banca, at 33 c. cash. The Dutch sale takes place on the 28th inst., and will consist 141,953 slabs, and 20,000 afloat, it arriving in time.

HEMP.—Sales are small, consisting of 256 bales, chiefly Sial, at 5½, 6 mos. At Boston 200 bales Jute sold at \$97 50 c., 6 mos. The stock for Manila hemp in the market for June 1st is 33,336 bales, the largest amount of stock ever reached.

FIRE CRACKERS.—Sales have been made since our last of 1,700 boxes 40 packages at \$1 45c. to \$1 47½c par at 6 months or cash.

CASSIA since our last has been quite active at improved prices. The sales last week embraced 40,000 to 50,000 mats, all to be had under 20 cents. Since then small sales have been made at 20c. The market continues firm.

LINEERS.—Sales of 2 or 3 cargoes of Calcutta have been made in Boston at \$1 75c., and in N.-w York at 177c.

GUNNY CLOTH.—Sales of 200 bales were made in Boston at 15½c, less 3 per cent. off for cash. 100 do. sold in New York to-day at 15½c, and 200 do. arrive some time since at 15½c.

Pepper and Nutmegs, with Pimento, have undergone no change since our last.

ARRIVALS.—Ship Flying Childers, Horton, at New York, May 25, from Foo Chow. Ship R. B. Forbes, Dollard, at Boston, May 26, from Singapore. Ship Cyclone, Millett, at Boston, May 27, from Singapore. Ship Southern Cross, Howes, at Boston, May 29, from Manila. Ship Shirley, Allen, at Boston, May 29, from Calcutta. June 6, at New York from Shanghai. Canvas Back.

SAILED.—Ship Tropic, Smith, from New York, May 23, for Sydney, N.S.W. Barque J. Howe, Kelton, from New York, May 23, for Sydney, N.S.W. Ship Sancho Panza, Hall, from Boston, May 24, for Hong Kong and Shanghai. Ship Dirigo, Emery, from Boston, May 25, for Sydney, N.S.W. Ship Nabob, Baxter, from New York, June 2, for Shanghai. Barque Maury, Paul, from New York, June 4, for Singapore.

LOADING.—The following vessels are up at New York for Mauritius and Calcutta, Barque Patmos. Hong Kong, ships Samuel Russell and Onward, Melbourne, ships Kate Sweetland, Joshua Bates, and Southern Eagle. Shanghai, ships Western Continent and Onward. Sydney, N.S.W., barque Homer. The following are up at Boston for Calcutta, ship Uriel. Melbourne, ships Clarissa, Currier and Guiding Star. Shanghai, barque Inman.

We notice the engagement in Boston recently of five or six ships to be in Calcutta from September to January, to load at that port for Boston at \$10 50 c. to \$11.

Parliamentary Intelligence.

HOUSE OF COMMONS.

CHINA WAR.—Sir G. B. PEACHELL asked the Secretary to the Admiralty whether it was intended to give to the navy serving in China the same extra pay and allowances enjoyed by the army in India, and which are said to be now granted to the military forces to be employed with the navy in the same quarter.—Mr. SOMES asked the Secretary of State for India whether an American ship had been taken up by Government for the conveyance of stores from Calcutta to China; whether eligible British ships were tendered for the same service; and, if so, whether he would state the reasons which induced the Government to make such selection? The hon. member said, he had called attention to this matter because, in case of war breaking out between this country and other nations, we should be placed in a difficult position. He did not wish to preclude absolutely the Government from taking up foreign ships in cases of emergency; but when British ships were offered to the Government they ought to be engaged. There could not be any excuse on the ground of economy, because the money so spent would go into the pockets of foreigners and not into the pockets of persons residing in this country. The hon. gentleman concluded by asking the question mentioned above.—Sir CHARLES WOOD, in reply to Mr. SOMES, said he was not aware that any American ship had been employed by the Government, and could not give any reasons for what he was not aware had been done.—Lord C. PAGET, in reply to Sir G. PEACHELL, said he should be afraid of saying anything that would raise hopes on the part of the fleet in China that might be disappointed. He could, however, assure the hon. and gallant admiral that the Admiralty would act strictly according to precedent. There was the precedent of our late wars in China, and the Admiralty would do all the just ce they could to the naval forces now engaged in that part of the world. He could not, however, distinctly answer the question as to what allowances they were to have.

COLONIAL MILITARY EXPENDITURE.—(11.) Mr. CHILDERS asked the Secretary of State for War whether Government would propose to refer to a select committee the subject of colonial military expenditure.—Mr. S. HERBERT said that, as the Departmental Committee to which the subject had already been referred had not been unanimous, but had sent in two reports, embracing both sides of the question, the Government could deal with it without referring it to a select committee of that House.

THE ARMY OF INDIA.—(11.) Sir C. WOOD moved for leave to bring in a Bill to repeal so much of the Act 22nd and 23rd of Victoria, cap. 27, as enabled the Secretary of State for India to raise in this country men for her Majesty's local European forces in India, observing that he had adopted this as the simplest mode of testing the opinion of the House on the principle, without entering into minute details. He explained the nature of the force in question, and urged that both for Indian and imperial reasons it was essential that our military power, upon which our chief reliance must be placed, should be maintained in a state of discipline and efficiency, and that object could be best attained by one uniform force.—Lord STANLEY admitted that the Bill of the Government placed the question of the fusion of the Indian with the Imperial army in the simplest form, but complained that they had to discuss the subject before they were in possession of the details of the plan. In the course of a long speech he pointed out the impossibility that soldiers of the line should devote themselves to Indian service, the element of uncertainty which would be introduced, and the consequent danger that India would be deprived of those defenders best capable of serving her. He could not believe that officers new to the country could avoid giving offence to the natives and involving themselves in difficulties. So far from the existence of an Indian army being a cause of discontent, they would be a source of trust and confidence to both countries. Should any dissatisfaction shew itself it was far less likely to extend over two distinct forces than over a single force. He dwelt on the military knowledge and experience acquired in a long Indian service, which moreover, if kept separate, would attract to itself the men best fitted for it.—General PEARCE said that the evidence both for and against the Bill of the Government was so evenly balanced that they could not refuse it due consideration. There was no subject on which those entitled to judge differed so greatly in opinion. Lord Derby's Government had decided in favour of a local force, but he admitted for himself that since that time his opinions had changed, from the force of late occurrences. He should not only vote for the introduction of this Bill, but give it his cordial

support.—Colonel SYKES defended the Indian army, especially in reference to their conduct on the late transfer of India from the Company to the Crown, and denied that there was any jealousy between the two services.—Mr. PEACOCKE, Sir DE LAOY EVANS and Capt. JERVIS, supported the Bill, which was then read a first time.

SUBMARINE TELEGRAPHIC CABLE TO GIBRALTAR.—(15.) Colonel HERBERT asked the Chancellor of the Exchequer whether he would have any objection to lay before the House the report of the commissioners appointed to inquire into the merits of various schemes for the submarine telegraphic cable to Gibraltar?—Mr. M. GIBSON said that no commission had been appointed. Some gentlemen had been asked by the Board of Trade to make an examination into the composition of the submarine telegraphic cables, which it had been proposed to lay down to Gibraltar. Those gentlemen had been authorised to make experiments, and their investigation was drawing to a close. Their report would, when completed, be laid on the table of the House.

ALLOWANCE TO SAILORS IN CHINA.—(18.) Mr. COCHRANE asked the Secretary of State for Foreign Affairs whether he would lay on the table a despatch from Admiral Sir Michael Seymour, dated the 14th of December, 1858, in which the admiral urged the propriety of giving additional pay and allowances to the naval forces employed in the Chinese war, in conformity with the precedents of the war in 1842, and of the Burmese war? Lord C. PAGET said there was no objection to the production of the despatch.

THE NAVY IN CHINA.—(21.) Mr. B. COCHRANE gave notice that on the 10th July he would move a humble address to her Majesty, praying that her Majesty will be graciously pleased to place the officers, marines, and seamen of the fleet serving in China on the same footing as her Majesty's troops with respect to extra pay and allowances, and that this House will make good the same.

Spirit of the Press.

TRADE WITH WESTERN CHINA VIA PEGUE.

The *Leeds Mercury* concludes an able article on the scheme of Captain Sprye, with the following comments:—

"There are three things to be done. First, it is necessary to make Esmok an open trading town, like the trading towns which have been established on the Russian frontier, through which the Russian produce enters into the Celestial Empire. This the Government should be urged to attempt in the negotiations with China, which Lord Elgin has gone out to open. The next thing to be done is to send an Ambassador, who shall make arrangements with the King of Burmah. The King of Burmah is said to be an enlightened man, fully aware of the value of friendly intercourse with Europeans, and anxious to promote the welfare of his own dominions by peaceful means. But the King of Burmah has a high notion of his own dignity, and he steadily refuses to treat with the envoys that have been more than once sent by the Governor-general of India. As an independent Sovereign he refuses to treat with any but an independent Sovereign. He points to Siam, to which kingdom we have sent ambassadors direct, and he claims at least equal dignity with a Sovereign whose territories his ancestors have frequently overrun. The claim is in itself by no means unreasonable, and so far from being disadvantageous to us, might possibly prove of extreme value. At all events, for the object of establishing direct communication between Rangoon and Western China, in other words, for the object of opening up a trade with about two hundred millions of people to the British nation, this is an essential and not very difficult preliminary step. The third step is to establish a trading emporium on the north-eastern frontier of our province of Pegu. The distance between such a town and Esmok, through Burmese territory is, as we have said, only 250 miles, and with a free trading town at Esmok, and permission from the King of Burmah to carry on our intercourse through his dominions, the wealth of some of the finest provinces in the world might be opened to the commerce of the West. None of these steps involves any great difficulties. It is not likely that an enlightened sovereign would object to open a road through his territories for the passing of foreign caravans, if a certain transit duty were paid on all the merchandise to swell his own regal revenue. In every way his own kingdom would derive the benefit. Villages and towns would spring up on the road, and a large commercial intercourse would be established between his own subjects and both the nations trading through his dominions. Perhaps the least hopeful part of the matter is the prospect of maintaining peace with China even after we had established free intercourse with her in the west. But on this matter we see no reason to despair. We should ourselves, perhaps, seldom approach Chinese territory. The transit across Burmah would be more in the hands of the Chinese, who are accustomed to these overland journeys, than of British merchants. They would come to our emporium more than we should go to theirs. Besides, when we did go to their emporium, we should be much less likely to make a dust than at Hong Kong. We should have no frigates, and no troops at Esmok. Even Captain Osborne's powers of seamanship, which effected such miracles in the Zangtze Keang, could hardly navigate a frigate five hundred miles over the land. Now it is just possible that these frigates have something to do with our always getting into quarrels. It is just possible that we should trade with the Chinese as peaceably as their other neighbours—as peaceably as the Siamese and Burmese are doing now—if we had not continually the power of knocking them on the head with our artillery. It may be that such a thing as peaceful intercourse is not altogether out of the question, and that even in the East, by fair dealings, reasonable concessions to the prejudices and ignorance of the people with whom we have to deal, allowances for those little infirmities of character which make them unwilling to part with their gold for about half its value in silver, or to conduct the trade for our advantage without any consideration of their own, trade may yet be made profitable without resort to war, and good feeling be established without the intervention of the cannon. Let the Chambers of Commerce do their best by memorials to the Government to establish the intercourse, and let us trust to the good sense of our consuls and merchants to do the rest."

THE ARMY IN CHINA.

An army so heterogeneous in its composition as that now assembled in and about Hong Kong, consisting of English, French, Bengalees, Sikhs, Madrassese, Lascars, and Chinese coolies, with "followers" (dire Indian word) of every caste, tribe, and hue, from Cape Comorin to the Himmaleh, and from the Red Sea to the Pacific, affords as pretty a variety of subjects of consideration as ever fell to the lot of the practiced army administrator, and which, no doubt, have been fully and fairly weighed in all their probable bearings and contingencies. Leaving on one side the troops and mere military material, we will resume the subject of stores—low in comparison, but not altogether unimportant. We will first consider what will most obviously be required for the various and rather incongruous nationalities we have collected under our standard, and we will then consider what prospect there may be of getting what is wanted where it is wanted. There will be the scrupulous Brahmin, the salt of the earth, holding the rest of the world to be unclean; cooking chupatties within his tabooed circle, under extreme difficulties, requiring not merely flour, that most easily damaged of comestibles, but flour of a particular kind—crushed wheat. There will be the rice and curry consuming Madrassese, requiring some twenty or more articles of daily consumption, including tamarinds, cummin, and coriander seed, garlic, chillies, betel-nut, ghee, and numerous other infinitesimal modicums of everything which grows under an Indian sun, but which will be rich and rare exotics in the north of China. There must be beef and pork, porter and rum, bread and biscuit, for the Britishers; pork and salted cabbage for the Chinese; flour or wheat, ghee and he-goats, for Bengalees; curry and salt-fish for the Madrassese; mutton and she-goats for the Sikhs. Hindoo and Sikh will regard with amazement and disgust the beef-devouring Briton; the Mussulman will regard with abhorrence both Britons and Chinese for their pork-eating propensity, and, with pharisaical longing, their forbidden but seductive dram of liquid gehennum, tempting and wrong. The English will not be behindhand in turning up the nose of scorn at their neighbours' gastronomic peculiarities; and not without reason, when their olfactories are assailed with the flavour of that "stinking ghee," which makes the very atmosphere greasy, as, closely allied with garlic, it tenaciously clings to garments and to everything within reach of its noxious influence. The party only requires to complete its incompatibility, that our allies should add to the olla podrida their ancient diet of frogs and snails. Now, in the North of China, a filibustering raid might have been highly successful against a *faineant* enemy who has never failed to run when time and opportunity favoured the manoeuvre; and, if successful, war would not only have been brought rapidly to a conclusion, but it would also have saved an enormous expenditure in equipping the force at such a vast distance from the scene of operation, with everything which the British imagination, made morbid by Crimean experiences, fancied might by remote possibilities be wanted under every possible or impossible contingency. For such a raid the general should have been provided only with Europeans, Ghoorkas, and Chinese, who would have fed alike and fed on everything, who would not stand on ceremonious trifles, and who would under difficulties, defer washing and praying for a week or two. Brahmins, who make long prayers, who must wash themselves and their clothes daily, and who must cook in private, or starve, are not exactly adapted for a buccaneering exploit. Mu-sulmans are a little more pliable, with a prospect of loot and licence, and, with the help of sand, get over a good many ceremonial difficulties, though at best they would, except in the looting line, hardly be the men for Walker. We therefore assume that, in spite of its tempting facilities, a raid will not be attempted; that the war will be conducted in the old-fashioned, regular way, without any indecent haste or confusion, — the quartermaster's-general department in front, the cavalry on the flanks, the main body in open order, for coolness and air — the climate being warm and the country dusty — and the field-hospitals and commissariat in the rear, with well-loaded transport and ample depots; every man with a full stomach and three days' rations in his haversack (the French in Algeria carry fifteen days' rations.) But — (those horrid buts) — we must here remind an impatient British public — who will barely allow Garibaldi a week to beat 30,000 Neapolitans, take a province, and form a provisional government without any commissariat, with very few men or arms, and no artillery — we repeat, we must remind an impatient British public, that Hong Kong, where our forces are a-sembling, is 1,200 miles from the Peiho; that Canton, when it is taken, is 500 miles from the Peiho; that when the Gulf of Petcheli is reached, the squadron, owing to the shallowness of the gulf — nearly filled by the deposits of the Yellow River — must lie some six to nine miles from the shore, and that the shore, when arrived at, is a very muddy one. We must remind our readers that the plains of Tartary are hot as Bengal in summer, and cold as Kamtschatka in winter; that after the middle of September, when the north-east monsoon has set strongly in, the Gulf of Petcheli is inaccessible from the south, and nearly all the water is blown out of it, and that a little later it is locked up in ice, and the expedition is cut off till the following spring from all communication with its depots. — *Army and Navy Gazette.*

THE INDIAN ARMY.

The whole question of our military establishment in India is now fairly before Parliament and the country. Sir Charles Wood expounded it in a very elaborate, and, we must in fairness add, a very lucid statement. The point which is now submitted for decision is, whether it will be more conducive to military efficiency and political safety to provide protection for India by enlarging our ordinary military system so as to embrace that peninsula, or whether it will be better to establish in that land a separate European army, destined solely to its service. It is not a question of money. It will not make so much as one per cent. difference in the Indian Military Estimates, whichever course we adopt. In the first place, it seems to us that the onus lies upon those who require a particular European service for the peninsula of India to tell us why this extraordinary thing should be. We have colonies and possessions in all climates, and never elsewhere is such an exceptional requirement made. We have no special service for Canada or for Malia, or even for Ceylon or Hong Kong. What Queen's troops there are in those possessions are there in their ordinary turn of duty. So at the Cape of Good Hope and at our other possessions. There are bad climates in other places besides India. The West Indies have no good reputation, and Hong Kong is in bad odour, although drink and debauchery are answerable for more than the climate. Yet our Queen's troops go out to

all these places without even extra pay. Why, then, should it be indispensable, or even advantageous, that India should have a service entirely to herself? It is for the advocates of a local army to make out their case, and, as it is an abnormal system they recommend, it ought to be very powerful in order to prevail. They say that we have to deal with a sensitive people, whose habits, religions, and course of thought are entirely different from ours; that to know them is the study of a life, and not to know them is to lose their confidence and excite their hostility; that for this purpose officers and men ought to live among them; that the system of a Local European Army, feeding and sustaining an immense civil establishment, has been; and therefore, as they have no confidence in any other system, ought not to be disturbed. These, we believe, are the points of the local army advocates. *Prima facie*, it is a very strong case. Four years ago it would have been an irresistible case. When the Duke of Wellington, who had marched his Sepoys over such wondrous battle-fields, was asked whether he thought the system under which he conquered was a good system, it required all his directness of vision to see a flaw in it. We, less absolute men, should have been content to let a system work which had worked so well. But now, in this year 1860, the face of the controversy is entirely changed. Nothing is left of all that used to be alleged in favour of a local army except that it once was, and that there are remaining some who have vested interests in the old institution. It is now proved that men do not grow better soldiers by remaining in India, nor better officers by passing their time in lucrative semi-civil offices. It is before the Houses of Parliament that "length of residence in India, so far "from leading to immunity from illness, leads to physical degradation." Such is the high controversy which is about to occupy the attention of Parliament, and which we rather hope than expect may attract some attention from the public at large. The question is, — shall we erect again the structure which has so signally broken down under our feet? Shall we make once more an army officered by clerks absent upon their official duties, and manned by rank and file mutinous, ill-disciplined, and knit together in secret combination? If we should come to the conclusion that it is desirable to re-create such an army, now that it has so happily dissolved itself, is it worth while to do so at the expense of occupying India with our regular troops while we are recruiting in our own country this precious military body, and drilling them to the system of which they are to form part? We confess we cannot see how among English statesmen there can be two sides to this question, but it seems it is so. Let it be decided, then, once for all — Shall there be one British Army for the British Empire; or shall we maintain two British Armies to keep each other to their allegiance? — *Times.*

THE MALABAR.

The *Malabar*, with the two Ambassadors of France and England, Baron Gros and Lord Elgin, on board, has gone down in the harbour of Galle. Nobody who knows the harbour of Galle will be surprised at such an occurrence. Except on the land side, it is open to every wind that blows, inasmuch as on two other sides — the fourth being to seaward — the land is so low as not to afford protection against any wind. Nearly every gale that sweeps over the Indian Ocean, then, can drive with full force against any craft which may be lying in this deceitful harbour. It is, no doubt, vast enough in apparent extent, but the very appearance of extent is treacherous. The water is so shallow round the harbour that only a boat of the very lightest draught can even approach the shore, except towards the town. The strength of the wind in these seas is at times tremendous, and nothing, save the interposition of a cape, or hill, or other natural defence of the like kind, would enable a vessel to ride out a gale in security. Even with our experience of last autumn as to what the power of the elements may be when fairly roused to fury, we have but a scant notion of an Indian typhoon. But at certain seasons of the year these typhoons constantly occur, and one would suppose that even selfish considerations would impel Government departments and steamship companies to select proper spots for their coaling harbours. At one time you are sending out troops, and upon their punctual arrival may depend the fortune of a campaign; at another you are bringing these troops home again, sick and disabled, and every motive of policy as well as humanity would suggest the propriety of taking every precaution for their safety; again, a third time you may be sending out Ambassadors charged with the conduct of important negotiations, sometimes treasure, and always the mails. It needs, however, no great argument to show that the communications between England and India must be even more carefully guarded than between any two other points of the empire. Now, Ceylon must remain a half-way house or a place of call mainly for coaling purposes, and if there were no option but to send the steamers into the harbour of Galle there would be no blame to be attached to anybody. It does so happen, however, that at Trincomalee, on the other side of the island, there is a most excellent harbour, which possesses nearly all the advantages in which Galle is deficient. It is very true that some time back the *Ava*, with the wounded of Lucknow on board her, was thrown away near Trincomalee, but you would not say that Holyhead, whatever may be its defects, is an unsafe harbour because the captain of a steamer had run his ship ashore on the Isle of Man. There may be reasons of which we are not aware why Trincomalee should not be chosen as the harbour of Ceylon. — *Times.*

CHANGES AND PROMOTIONS IN HER MAJESTY'S ARMY AND NAVY.

WAR OFFICE, PALL-MALL.

6th Regiment of Dragoon Guards—Lieut. William Gair, to be adjutant, vice Lieut. Weatherley, who resigns the adjutancy only.

VETERINARY MEDICAL DEPARTMENT.—To be Acting Veterinary-Surgeons—George Albert Oliphant, gent.; Frederick Fitzhugh Marshall, gent.

BREVE.—Captain Edward Lawes Pym, Royal Marines, to be major in the army.

NAVY.

PROMOTIONS.

LIEUTENANTS.—D'Arcy S. Preston, late flag lieutenant to Sir B. Reynolds, to the rank of Commander.

ASSISTANT ENGINEERS.—First Class: G. Wynnall, to the Bustard; J. Langrish, to the Cornwallis, for service in the Ruby; T. Witt, to the Fisgard, for service in the Bann; J. Lowrie, to the Nile; and T. Huard, to the Wasp. Second Class: W. Sides, to the Ardent; J. Annable, to the Majestic; J. King (a), to the Fisgard, as additional, for service in gunboats; R. E. Denison, to the Royal Albert, for service in the Porpoise; J. Hall, to the Termagant; J. Boxell, to the Assurance.

ACTING ASSISTANT ENGINEER.—Second Class: W. H. Tweedy, to the Asia, for service in the Gunter.

APPOINTMENTS.

COMMANDERS.—G. M. Jack-on, to Geyser; F. H. Smith, to Torch.

LIEUTENANTS.—F. H. Blair, to the Cenurion; G. Worsfold and G. Stratton, to the Blenheim; A. Bagley, to the Edinburgh; H. Rogers, to the Ajax; S. Long, to the Bloodhound; C. J. McGrigor, J. B. Grove, and F. H. Blair, to the Colossus; E. H. L. Ray, C. R. F. Boxer, W. H. Gould, T. M. Magnay, C. G. Fane, and A. H. Alston, to the St. George; F. H. S. Webber, and A. G. Wootton, to the Donegal; G. B. Gooden, to the Mars; G. A. Brine, to the Monarch; W. J. Walker, to the Barracouta; Sir F. Blackwood, to the Aboukir; E. C. Betty, to the Blenheim, for service in the Violet; G. G. F. Knowie, to the Terrible; W. Wright, to the Royal Adelaide; J. E. M. Wilson and M. G. Silverlock, to the Grion; C. S. Tritton, to the Edgar; A. G. Gellert, to the Marlborough; H. Smith, to the Formidable.

MASTER.—W. H. Crane, to the Colossus, W. G. Aldrich, to the St. George; G. H. Allen, to the steam guardship Asia, for service in the Hornet; A. J. Burniston, to the Cumberland, for service in the Foxhound.

SURGEONS.—J. Stirling, M.D., to the St. George; Clark A. Duckett, to the Geyser; P. Cooke, to the Rhadamanthus; J. A. Nuller, to the Colossus.

CHAPLAIN.—R. J. Jenkins, to the Colossus.

PAYMASTERS.—J. Mallard, B. Scott, J. Kay, and J. Pooley, to the Colossus; G. Ramaden, to the St. George; J. E. Terry, to the Geyser; and F. F. Eversfield (additional), to the Majestic; J. G. Simmonds, to the Imaum.

SECOND MASTER.—W. M. Lowick, to the Bloodhound.

ASSISTANT SURGEONS.—C. J. Fennell, E. P. Forrest, to the Colossus; W. Lockart, confirmed in the Imaum; A. Minnoch, confirmed in the Exmouth; J. N. J. O'Malley, from the Victory, to the St. George; B. Crabb, to the Hawke; A. S. Pratt, to the Rolla; T. Fulton, M.D., confirmed in the London.

LONDON, WEDNESDAY, JUNE 27, 1860.

MARINE SURVEYS—THE ISLAND OF FORMOSA.

It is a wonderful fact that in spite of the vast improvements and inventions of the age in all that appertains to navigation, which render locomotion by sea much more safe and rapid than formerly, the geographical discoveries made by naval expeditions are not to be compared in extent or importance with those made by land. During the last five-and-twenty years, with the exception of the solution of the North-West Passage, scarcely any discovery of note has been achieved by water, or anything of importance added to our general stock of knowledge concerning the surface of our planet, whilst during the same period continents have been ransacked and travelled over in all directions, the longitude and latitude of places previously unknown satisfactorily defined, and a general knowledge obtained not only of the configuration of countries, but their geological construction, together with their natural productions. Africa, for so many years a *terra incognita* with the great bugbear of the "impenetrable Desert of Sahara," and the "Mountains of the Moon," has been pierced from every point of the coast, and crossed and recrossed in every possible direction by enterprising land travellers. The interior of both North and South America is now as well known as Europe, and the only great geographical problem left to be solved—the interior of the Australian continent—is on the point of being satisfactorily cleared up by the colonial Governments having offered large premiums to the party that shall first succeed in making its way from the inhabited districts of the south to the hitherto unknown regions on the northern coast. This offer has excited competition, and the last accounts received from Australia state that two or three different parties were then being organised for exploring expeditions, in the hope of claiming the promised reward, so that in a few months we may expect to hear that some of them have succeeded in traversing that great continent. On the other hand, it is a remarkable fact that the discoveries by maritime expeditions by no means come up to the energy and enterprise of explorers by land. It is true that we, and other maritime nations, have a number of surveying ships constantly engaged in hydrographical surveys in different parts of the world, but it must be confessed that though they are conducted by men of science and skill, their labours are principally confined to details of sounding and accurately defining the configuration of certain given lines of coast, which, however important in themselves, and useful for the safety of vessels employed in the local navigation of those waters, cannot possibly interest the public generally. This is the more to be wondered at as such surveying expeditions are fitted out with great care and completeness, carrying with them the means of prosecuting the exploration by land, and from the very nature of their existence able to reach, with safety and despatch, the coast of any given continent or island from whence they could the more easily make exploring excursions into the interior.

Amongst those parts of the globe so easily accessible by water, and of which our knowledge is so imperfect and limited, is the island of Formosa, or "the Beautiful Island," called so originally by the Portuguese, by whom it was first discovered, but denominated by the natives 'Tai-wan, signifying "the high

peaks." It lies off the east coast of China, to which country it now belongs by right of conquest, and is in the direct track of vessels proceeding from Hong Kong to Shanghai. We have before us the reports of the United States' naval officers, Capt. Joel Abbot, Lieut. A. W. Habersham, and the chaplain, Rev. G. Jones, as well as Commander Brooker, R.N., Mr. Groom, and Mr. Fortune. Capt. Abbot was the commander of the United States' steamer *Macedonian* (of which frigate the Rev. G. Jones was chaplain), and was detached from the American squadron under Commodore Perry, in 1854, to the coast of Formosa, for the purpose of trying to discover any traces of Americans supposed to have been wrecked on that coast and held in captivity, whilst Mr. Jones was specially directed to examine and report on the coalfields said to exist near Keelung, on the northern part of the coast. Lieut. Habersham was in command of the *John Hancock*, commonly known in the American navy by the familiar cognomen of "Old John," which formed part of the surveying expedition under Captain Ringold, in the year 1855, and in which he paid a flying visit to Formosa. Commander Brooker, R.N., was ordered to proceed to that island in the summer of 1858, in H.M.S. *Inflexible*, to look for some shipwrecked sailors, and returned to Hong Kong in the beginning of July without having succeeded in the object of his mission. And, finally, Mr. Groom paid an involuntary visit to Formosa, having been shipwrecked off the coast in the *Alert*, in which vessel he left Hong Kong as a passenger on the 26th September, 1858, and was wrecked on the 11th October of that year. Lieut. Habersham, Mr. Groom, and Robert Fortune landed on the west coast of the island, whilst Commander Brooker examined the eastern part of Formosa, and anchored at Keelung. Capt. Abbot and Mr. Jones confined their observations to the northern coast. Mr. Swinhoe, of Amoy, also visited Formosa, and we must consider his account to be one of the best published.

"Old John," the crazy old craft "that people looked at with astonishment, wondering that she was not gone to the bottom long ago," was sent to endeavour to find the missing crew of the *Porpoise*, belonging to Commodore Perry's squadron, which had disappeared, and was supposed to have been lost between Formosa and the continent of China. Stress of weather obliged Lieut. Habersham to run into a little bay near the South Cape for shelter under the lee of the coast, where they remained till the storm subsided. "On our arrival about dusk (says that officer), we saw nothing but an extensive tract of white sand-hills, bounded on the land side by green hills, but thought we saw a village in the distance on the slopes of the mountains. Our conjecture proved to be right, for as soon as it was dark we perceived the lights in the houses. The next morning we enjoyed an extensive view, verdant slopes and waving rice fields, here and there broken by high table land, studded with cattle. Such a scene is always pleasurable to the beholder." Whilst Mr. Groom, the involuntary visitor to Formosa, was stripped and plundered of all his clothes and other property by the natives, who then marched him and his companions to a village in the interior, Lieut. Habersham and his party experienced a more friendly reception, possibly owing to their being armed, which inspired the natives with due respect for them. "We landed fearlessly (says that officer), in the face of the great crowd which had congregated on the shore to see us, and though they were all armed either with matchlocks or bows and arrows, we recognised them as Chinese, and consequently knew that we had not much to fear from them." According to Mr. Groom, who was wrecked considerably further northward, it would appear that he fell into the hands of the Aborigines, who have been for a long time subjugated by the Chinese. On arriving at the village he experienced a kinder treatment, and the people furnished him with food and raiment.

In another part of his narrative Mr. Groom says:—"In the second week of November the rice harvest commenced, and during the excursion that I made into the country I almost forgot I was a captive in Formosa, so much did the busy occupation of the people put me in mind of a harvest home in Old England; and I could not help asking myself with astonishment and wonder, how it happens that in the middle of the nineteenth century such a beautiful and fruitful country should be so comparatively unknown in Europe? The climate is decidedly better than at Hong Kong, the weather less changeable, and the inhabitants more healthy. During my stay in Formosa I heard and saw nothing of those diseases so common at Hong Kong; and which are enough to deprive mankind of all desire to live in even the most beautiful country in the world."

THE JAPANESE IN AMERICA.

A MORSEL of live royalty is a rare treat for a Republican. So well assured are we of this, that we have read without much astonishment the graphic accounts which have reached us from week to week of the sayings and doings of the Japanese and their entertainers in America. It is true that out of the seventy Japanese there are only three princes, and those three "not hereditary but titular;" still, with their \$80,000 and their eighty tons of luggage, they have driven the Americans frantic with delight. We pass over the civic glories at San Francisco. When the embassy reached Washington, so enthusiastic was the welcome that it was, we are told, "a wonder how the poor Japanese escaped with their lives." The correspondent *naïvely* adds, "The whole scene must have given them a vivid impression of the remarkable freedom of Republican institutions." We doubt it not, but we cannot refrain from expressing our hope that, as there is some probability of a real "hereditary" Prince paying our American friends a visit, they have not used up all their fine phrases. We should be sorry indeed were they to be in the predicament in which Oliver Goldsmith once found himself. The simple poet waited by appointment on a duke. He put on his finest clothes and prepared, as many another genius has done, one of the finest of speeches. After waiting some time in the ante-chamber, a gentleman enters dressed still finer than himself. Oliver immediately delivers himself of his speech, and too late he learns that he has wasted his eloquence on the Duke's gentleman. Of course our readers know the conclusion. When ushered into his Grace's presence, poor Goldsmith couldn't utter a word. Let us hope, however, that the "titular" princes of Japan have left a little honey in the comb for the hereditary Prince of Wales.

The Japanese have spent more than a month in America—they have dined with the President and had mysterious financial controversies with the Secretary of State. The currency question must have been rather an intricate one, as the Ambassadors addressed their Court Interpreter in Japanese, their Court Interpreter turned the Japanese into Dutch for the information of the U.S. interpreter, and the United States Interpreter converted the Dutch into English for the benefit of the United States Minister. What a dollar was like, after going through this remarkable process, we are unable even to conjecture. But this is not the Ambassadors' only title to fame. They endured with "more than courtesy" what is described as "a constant hand-shaking for two consecutive hours;" indeed, the "holy palmer's kiss" with the Washington ladies does not appear by any means to have dismayed them. The English copy of the Treaty in substitution for that which was accidentally burnt in Japan has been signed by the President, and the ratifications have been formally exchanged. We have just learnt, too, that a Bill has been passed in the American Senate carrying into effect the Asiatic treaties. But after all this digging about and dunging, will the tree bring forth fruit? In truth, these commercial treaties have a very fair outside, but, alas! as an Italian proverb teaches—"Out of a white egg often comes a black chick." The Chinese egg was just as white—so was the French egg. We know the colour of the Chinese chick, and we await with considerable anxiety the hatching of the French one. If the Japanese be, as an eminent authority assures us they are, the greatest liars in all the East (and we know what the superlative degree must in this case mean), we are not bound to believe that they will be more faithful in the observance of treaties than more civilised nations. The President of the American republic seems to have had some unpleasant misgivings on this point, for he thought it as well to hint to his guests "among other things," that he had selected for their escort several of the most gallant officers in the American navy, who in peace were most kind, but upon whom nevertheless in war they depended for their defence. *He trusted, however, they would never be required to operate against Japan.* We are told that "the distinguished visitors through their interpreter expressed their high appreciation of the President's address." Of course they did, just as the petty German Princes the other day, worshipped the rod which is not unlikely to emulate that of Aaron of old, and swallow up their puny sceptres.

The Americans are rampant because of our supposed jealousy at the first visit of the Japanese being paid to the United States. One of our New York contemporaries indeed attempted to get up a "sensation" on a statement that an English ship had omitted to salute the vessel containing the august visitors. But the Americans are mistaken, we have no feelings of jealousy.

We are quite ready to admit that they are entitled to the honour and happiness of receiving the first embassy from Japan. We do not forget that the expedition to Japan under Commodore Perry, and the treaty concluded by Mr. Harris, were of prior date to the visit of the Earl of Elgin. We must also allow that the Americans have been more fortunate in their relations with the Japanese than the English have, and although the American ambassador, Mr. Harris, does not probably rest upon a bed of roses, still more "uneasy lies the head" of the British plenipotentiary, Mr. Alcock. We may here correct an erroneous impression which, we believe, our "leading journal" has been the means of disseminating. It was never intended that the ambassadors now in America should visit Europe before their return to Japan: but it is probable that ere long the English will have an opportunity of extending their hospitality to an embassy from that country. But be this as it may, we are neither angry nor sad because the princes and their attendants, and their dollars, and their tons of luggage, have been received at Washington. We hope that they have not only derived some pleasure from their visit, but that they will take back with them to their own country the desire for freer and more extended intercourse with the civilized world—the assurance that their own interests will best be served by faithfully fulfilling the engagements they have undertaken, and the conviction that those who are mightiest to avenge perfidy and wrong are the most anxious to welcome them among the brotherhood of nations. Ere this they have, in all probability, left America. May we hope to date from their arrival in Japan a change in the policy of the Japanese Empire? may we hope that confidence and integrity will succeed to distrust and scheming, and that deliberate political assassination may henceforth be unknown? more than this—may we hope that the seeds of a purer and holier religion have been sown among them—that reasonable belief may be entertained that the day is not far distant when the veil of superstition and idolatry shall be rent in twain—when the ægis of Christianity shall overshadow them, and when they shall receive, with the fulness of knowledge which the light of civilization will shed, that enduring peace which passeth understanding?

THE POST-OFFICE AND THE EARL OF ELGIN.

A correspondent of the *Times* calls attention to the inconvenience to the public service caused by the non-appointment of a successor to the Earl of Elgin as Postmaster-General. The present *locum tenens*, the Duke of Argyll, only nominally discharging the duties, and Sir Rowland Hill, the secretary, being absent on sick leave, it is likely that the present "difficulties" with the letter-carriers will extend to other branches of the service to the detriment of the public. We may here mention that the appointment of the Earl of Elgin to China has not been gazetted, nor that of the members of his suite.

DEFENCES OF GREAT BRITAIN.

CHIEF among the subjects which engage the attention of the public is that of the military defences of this country. The report of the Commissioners appointed for the examination of this vital question has just been published. The works therein recommended are estimated to require an expenditure of nearly twelve millions sterling. We concur in the expressions of regret, which are almost universal, that the instructions given to the Commissioners should have been such as to circumscribe, as it seems to us, unnecessarily the area of their inquiry. We think it impossible to overrate the importance attached to one aspect of the subject, and we regret—sincerely regret—that not merely do the Government not appear disposed to extend their vision beyond the limited field surveyed in the report, but that it is not their intention not to carry out in their integrity the recommendations contained therein. We refer to the proposed works at Woolwich, not simply as the great depot of our military resources, but also as bearing more immediately on the question of the fortification of the Metropolis. Why is this recommendation of the Commissioners to be ignored? It affects but in a very small degree the financial part of the question; but were it otherwise, pecuniary considerations are not in this case of the first importance. We learn from the *Times* that it is the intention of Government to proceed promptly and vigorously on a great portion of the Commissioners' report, but to abandon the attempt to defend Woolwich. It is proposed to expend in all only about eight and a half

millions, instead of the eleven and three quarter millions of the report. This includes £1,885,000 for the purchase of land, which it is proposed to acquire at once under the Defences Act. As only a small portion of the land will be wanted for the works, and the remainder will merely be kept clear from buildings, the latter will be let out, and need not be an unprofitable investment. Government will propose to commence the works immediately, and the Commissioners have pointed out how they may be available for defence in three or four months, even while far short of completion. It is intended to raise the money by terminable annuities, so that the whole sum may be absorbed in twenty-five years. We shall probably advert on a future occasion at greater length to this subject, as the fortification of London is, in the opinion of all, a question of the highest importance.

THE MILITARY DEFENCE OF OUR COLONIES.

We had occasion to notice this subject in our issue of the August 26. The late disturbance in New Zealand, and the gallant manner in which the European volunteers operated against the natives, has opened the question in Parliament of how far it is expedient to maintain a military force despatched from this country in our colonial possessions. The Australian colonies may perhaps form an exception to a certain extent, but we see no other. It appears there is a force of 1,500 men now stationed in various parts of New Zealand, and yet when a *fracas* occurs with the natives a force of only 100 can be brought against the disturbers of the peace. According to this it would appear that a larger force was necessary, and we certainly can see no other way of protecting these colonies from outward and internal aggression, than by detachments from our regular army recruited by any colonists who may be disposed to enter it. The *Times* on the subject says—"A cargo of Enfield rifles, a battery of Armstrong guns, a few light ships of war off the coast, and some hearty words of encouragement and sympathy from home would, we think, put the colonists in a position to dispense in a great measure with the aid of regular troops." The local volunteer forces are most excellent institutions, but it is not to be expected that they can do more than be ready for any extraordinary emergency until regular troops can be brought to the spot; if their services were further taxed we should soon find the volunteer force dwindle into atoms. The troops for Australia and New Zealand should, however, be supplied not direct from England but from India. After a service there of a few years, and when requiring a change of climate, we think that of Australia would be found more beneficial than even England.

RELIGION OF THE JAPANESE.—In the *New York Herald* appears a leading article on this interesting and important subject. Our American contemporary is very anxious lest any of the Japanese now in Washington should be converted to Christianity. The reason it advances against missionary efforts in that direction is a singular one. The higher classes of the Japanese "have no religion whatever," *exclaimed*, leave them alone. But this is not all: we are told that the governing classes in Europe "stand in exactly the same position that is occupied by the Japanese." We should be sorry to think it; we do not believe it. We admit that the embassy from Japan is a purely commercial one. We admit that no converts will be made by persuasion; but even if it were true that irreligion is the order of the day, both in Europe and America, so far as the governing classes are concerned, that surely would be no valid reason for stigmatising the attempt to enlighten the Japanese with the rays of Divine truth as *extremely imprudent*. We shall probably recur to this subject, for we hold that even Buddhism is more than one step removed from "no religion at all."

RAILWAYS IN INDIA.—A report, intended to be annual, on the subject of railways in India, has been presented to the Secretary of State for India by Mr. Danvers, the secretary to the Railway Department of the India-office. It describes the eight railway companies and the Steam Flotilla Company for the Indus. The railways are to make 4,917 miles of communication, and the Flotilla Company to navigate 570 miles of the Indus. By the end of last year the three great companies (the East Indian, the Great Indian Peninsula, and the Madras) had 636 miles open. The estimated cost of the whole of these undertakings is £52,430,000, but at present the Indian Government has only authorised £34,133,300 to be raised, and the amount actually raised at the end of 1859 was £27,079,712. It is remarkable that of this sum only 625,971 has been subscribed in India, or £1 in every £44.

TRANSFER OF THE GOVERNMENT OF SINGAPORE, &c.—A deputation, consisting of the Messrs. Guthrie, Mr. Crawford, Mr. Buchanan, M.P., and Mr. Gregson, M.P., had an interview with the Duke of Newcastle on the 11th inst., at the Colonial-office. Nothing was said as to the precise time when the Straits settlements would come under the Colonial-office. Some financial matters and statements are still to be discussed, so that beyond the mere fact that the transfer had been arranged, nothing definite transpired at the interview. Probably some months at least, if not a longer period, will elapse before the arrangement is carried out.

APPOINTMENTS AND PROMOTIONS.—Mr. T. F. Callaghan, barrister, has been appointed chief magistrate at Hong Kong, vice H. T. Davies resigned and joined the Chinese Customs.

GENERAL VAN STRAUBENZEE.—A contemporary has the following remarks on this gentleman's return from China by a late mail:—"The gallant general comes to England at his own request, after long and arduous services in the East. The dispassionate political action and military skill which he so judiciously exercised in all his operations with and against the Chinese at Canton, up to the moment of his departure, was the fulcrum which removed commercial difficulties there, and established peace and protection to life and property among the industrial citizens. The equitable line of policy which he so long and honourably maintained through conflicting difficulties cannot fail to be justly appreciated and rewarded by the home Government. Sir Charles is accompanied by his amiable wife, the ministering angel of so much good to many of the general's suffering soldiers at Canton."

LECTURE ON SIAM.—At a meeting of the Geographical Society on the 11th inst. two short papers on Siam, communicated by Sir R. Schomburgk, our Consul at Bangkok, gave rise to an interesting discussion, in which Mr. Crawford, Captain Sherard Osborn, Captain Oliphant, and Colonel Sykes took part. Mr. Crawford, who was formerly ambassador from this country to the court of Siam, described the country with some minuteness. He considered the inhabitants to be less civilised and less intelligent than the Hindoos or the Chinese. Captain Osborn said that the rivers of Siam which fall into the Bay of Bengal, and take their rise from the mountains on the south-east of China, offer the means of gaining access to that part of the Chinese empire, which is more fertile than any other portion, though but little known to Europeans. He stated that he obtained tea in that district which was much finer in quality than any that is to be obtained at Shanghai. Colonel Sykes thought Mr. Crawford's account of the inferior state of the civilisation of the Siamese was not correct at the present time. He mentioned some additional particulars respecting the elder of the Siamese kings, indicating the advances he had made in education, and in the adoption of the manners of European civilisation, among which was the use of visiting cards; two of those cards, Colonel Sykes said, he had in his possession, which are quite equal in appearance to the bridal cards of English ladies.

SIR JOHN BOWRING ON RELIGION.—In a country newspaper, the *Bridport News*, we find the report of a long speech delivered by Sir John Bowring at the annual meeting of the Unitarian Christian Union. It has not found its way into any of our metropolitan prints, and we may imagine the extraordinary opinions announced will astonish the public not a little. Our space will not permit a reprint of the whole. After stating that the Unitarians were among the most advanced religionists of the day, and that the great error of Christians was in supposing that they had a monopoly of the truth, Sir John says: "Wherever there was religion, whether it was that of the Parsee, whom he had often seen rising from his bed to pay devotion to the rising sun, unobserved, seeking no human applause, could he fail to say that in that there was something of true religion. When in the interior of China he had seen a spot where there was a water-fall; some poor individuals had scooped out an altar, and there they had placed a god, and to that god libations were offered, and prayers were addressed, while the idolator, as he was called, was expressing a hope that by the influence of that idol more mischief might be averted from his family. Was there no religion in that? He thought there was a great deal!—(hear, hear)—and that that divine and benignant Being who looks down from Heaven's heights did not regard those distinctions which we were accustomed to make, but might see religion where we would only find something which he would not honour with a name. Why, he had heard a Chinese father reason with a Christian missionary, and the latter would say, 'you know that child of yours is born in sin, and condemned to eternal perdition, unless you listen to me.' Did they think that religion that came in that shape could triumph? No; it was repulsive in the highest degree."

ROYAL ASIATIC SOCIETY.—The last meeting of the season was held on the evening of the 16th inst., when Col. Sykes, M.P., the president, delivered an able and interesting lecture. The subject selected was one which we suspect will be regarded as a novelty by the majority both of our European and our Asiatic readers. "The buried Cities of India,"—who has heard of them? yet how pregnant with interest is the subject! Two cities, the Pompeii and Herculaneum of India, have been, so to speak, disinterred. Though we know not with certainty their names, there are evidences that they were large and populous—that they flourished about the eighth century—and that it was by some sudden and wondrous physical convulsion they were engulfed. The excavations have not hitherto been to any great extent, but the numerous interesting relics exhibited to the meeting afforded abundant evidence that several of the arts and various branches of industry were cultivated among the inhabitants. Mr. Thomas (who made a few observations at a subsequent period of the evening) stated, that as the latest date discoverable on any one of the coins found was A.D. 913, it was clear that at that period these cities were extant. Col. Sykes referred to the number, variety, and particularly the infinitesimal size of the copper coins discovered, and argued thence that labour was probably cheap and the fruits of the earth abundant, which does not, however, appear to have been the case in other parts of India at that time. It is difficult to guess what a copper coin, scarcely larger than a pin's head, could have purchased. The members of the society present (among whom we noticed the lecturer at the previous meeting, Dr. Macgowan,) appeared highly gratified with the exposition of their respected president.

EAST INDIA COMPANY.—The quarterly court of the proprietors of East India stock was held at the India House, Colonel Sykes, M.P., in the chair. The chairman announced that the dividend warrants would be payable on and after the 6th proximo, and stated that he understood from the Secretary of State for India that the projected Bill, by which the Government proposed to interfere with the reserved rights of the Company, was not as yet ready. He could not conceive what right Government could have to justify them in taking that course with the Company, more than with any of the railway companies having a guarantee from the State. Mr. Crawshaw then moved that the directors be respectfully requested not wait longer for information as to the proposed Bill in relation to the affairs of the Company, before entering into communication with the Bank of England, and taking

such other measures as might be in their power, in accordance with the resolution with the last general court. Mr. Jones seconded the resolution. After some discussion the resolution was put and carried. Mr. Crawshaw then moved that the thanks of the Company be given to those members of the House of Commons who had exerted themselves to get the despatches connected with the Afghan war printed in their entirety. Dr. Beattie seconded the motion. The resolution was then agreed to. Mr. Jones then moved a resolution to the effect that the financial scheme of Mr. Wilson was false in commercial policy, discreditable in operation, and dangerous to the dignity of the Crown. The honourable proprietor was proceeding to prove these propositions, when, as the court became thin, the debate was adjourned to the next court. The proceedings then terminated.

IMPORTS OF BULLION.—The total value of the gold bullion and specie imported into the United Kingdom last year was £22,297,698, against £22,793,126 in 1858. The value of the silver bullion imported in 1859 was £14,772,458, against £6,709,064 in 1858. The total receipts of bullion and specie were consequently £37,070,156 last year, against £29,493,190 in 1858, showing an increase of rather more than 25 per cent. Australia sent us gold to the amount of £3,624,566 last year, as compared with £9,064,763 in 1858. The next best source of supply was the United States, which sent £7,909,842 last year, and £4,502,464 in 1858. From the northern ports of Russia gold also came to the extent of £2,070,066 last year, and £1,446,813 in 1858; while Mexico, South America, and the West Indies contributed £1,738,700 and £3,848,419, respectively. France last year sent us silver to the extent of £6,365,852; Belgium, £1,521,176; Holland, £1,035,149; the United States, £1,763,639; and Mexico, South America, and the West Indies, £3,385,252. With the exception of the last, these totals are very largely in excess of similar receipts from the same quarters in the previous year.

THE JAPANESE EMBASSY AND THE FAIR SEX.—"The Japanese," says the *New York Herald*, "finding it to be the custom of the country, are very fond of shaking hands with the ladies. We have even heard it alleged that, notwithstanding the solemn oath, involving for its violation the penalty of death, which they took, every man of this embassy, before leaving Japan, to keep themselves perfectly exempt from any contact with the crino line of the outside barbarians during their absence, there is danger, if these celestials do not look sharp, of some executions among them on their return. Let them be careful, therefore, in their reconnaissances round this city, and every other American city in which they may sojourn a few weeks or days, or they may be called to a fearful account when the chief censor renders in his report of the embassy at Jeddo." The Japanese have been overwhelmed in a sea of crinoline. They have been encompassed by hoops of steel. They have been stared out of countenance by the bright eyes of Columbia's maids and matrons in Congress assembled. Wherever they have been, there has been the same impenetrable wall of American female chattering, flirting, staring, giggling, wondering, guessing, reckoning, or calculating, according to the line of country from whence she hails. The feminine rush after the Japanese has been something tremendous; and as the atmosphere of Washington is not favourable to the growth of modesty, the Ambassadors have been terribly shocked. In their country, when strangers arrive in a city or village, the women all run away and hide themselves. Here, when a distinguished foreigner turns up, the women all run after him, as if they desired to eat him up, and were afraid there would not be a piece left if they did not make haste.

BRITISH COLUMBIA.—From the mines the news was never better. New diggings are constantly being discovered, and large earnings being made all over the mining region. The Chinese immigration, which was expected, is beginning to set in. About 800 Chinamen have arrived within the last fortnight, some of them in two vessels from China direct, others from San Francisco. They have nearly all gone up to the mines. Accounts from China say that a large immigration may be expected if the Chinese are well treated. There are no distinctions made against them in these colonies. They have the same protection as all other persons, and in the mines they are allowed the same rights, liberties, and privileges as all other miners, and the great bulk of the population is very glad to see them coming into the country. Fears for the result are the phantoms of a few nervous and ill-informed persons.

THE FIRST RUSSIAN CONSUL IN CHINA.—*The Shipping and Mercantile Gazette* has the following notice of Mr. Burrows: "Some years since, a Russian corvette, on a voyage from the United States to St. Peterburg, having on board as passengers a Russian Ambassador and several officers of the Russian navy, was dismasted in a hurricane, and all on board placed in imminent danger of their lives. In this wrecked condition she was fallen in with by a ship from New York for the Pacific Ocean, owned by Silas E. Burrows, a merchant, of the United States. The Russian minister agreed to give the captain of this ship, for his owner, \$10,000 if he would take them from the wreck and return to New York, which was done; but on arriving at New York Mr. Burrows refused to receive any compensation for rendering this great service to the shipwrecked sufferers, and for which decision he received the official thanks of the President of the United States, General Jackson. His Majesty the Emperor of Russia has been pleased, as a remembrance, to appoint Mr. Burrows as his Consul at Hong Kong. We are pleased to have to record such liberality, where aid is extended to those who meet with disasters on the waters."

SHOOTING AT JUDGES ON THE BENCH.—At Toulouse a most extraordinary affair occurred. As the judges composing the Second Chamber of the Imperial Court were, in a suspension of the audience, descending from the bench, headed by M. Solminiac, who had presided, a man who was standing near the seats of the advocates fired a pistol at that learned judge; the ball with which it was charged passed close to him, and lodged in the wood-work behind the bench. The man who fired the pistol did not attempt to escape, and was at once secured. He stated his name to be Guilhem, and his residence to be Graulhet, in the Tarn. He had, he said, lost, before the tribunal of Labour, and afterwards, on appeal before the Second Chamber of the Court of Toulouse, a lawsuit, by which he was compelled to make restitution of certain sums he had inherited. As this restitution would entirely ruin him, he had petitioned the Emperor to set aside the judgments, or to give him the means of carrying the matter before the Court of Cassation;

but he had not received a favourable reply, and, in consequence, he had resolved to take vengeance upon the judges who had last pronounced against him. "I wrote to the Emperor," he continued, "to say that if justice were not done me in a month, I would murder all the judges of the Second Chamber. I regret," he added, "that I missed my man, but when I am at liberty I will take a better aim!"

The finance and revenue accounts of India give the following estimate of the revenue for the year ending April 30, 1860:—Land revenue, including tributes from native States, £20,947,283; customs, £3,691,603; salt, 2,846,549; opium, 6,071,022; Post-office, stamps, and all other sources, £4,240,175; total, £37,796,632. From this must be deducted the charges of collection, cost of salt and opium, allowances payable in accordance with treaties, and allowances amounting in all to £6,938,607, leaving as net revenue £30,858,025. But the expenditure is stated at £39,952,232, making a deficit of £9,094,207.

A deputation waited on Lord Palmerston to illustrate the impolicy of Mr. Wilson's tariff in India. It was shown in one example, by patterns and calculations, that a piece of gray mull, when bleached at an additional cost of 4d., had added to the price for the purpose of charging the duty not less than 2s. 9d., 10 per cent. *ad valorem* duty being afterwards charged on that amount.

The privileges of the book post have been extended to the colony of Labuan.

The Bishop of Labuan had an interview with the Duke of Newcastle at the Colonial Office. He is shortly to return. His lordship has been preaching in aid of the missions to Borneo, but we believe without much success.

The whole of the collection connected with the Egyptian Hall, the property of the late Mr. Albert Smith, will be sold to-morrow by auction.

PENINSULAR AND ORIENTAL STEAM NAVIGATION.

The half-yearly meeting of this company was held on the 5th inst., at the offices, Leadenhall-street; Mr. Willcox, M.P., in the chair.

Mr. C. W. Howell, the secretary, read the report, which stated that the *Massilia* had been completed and brought into active service on the Southampton and Alexandria line, where she had fully realized the expectations held out in former reports. The *Nepaul* was despatched via the Cape of Good Hope, on the 10th of February last, to take up her station on the Mauritius line, and arrived out after a remarkably short passage, delivering the first mail at Suez seventy-three days only after leaving Southampton. The *China* and *Belar* left Southampton on the 11th of May, to reinforce the fleet at Bombay for the service of the company between that port and China, and would shortly be followed by the *Orissa* and *Ellora*. The report also stated that "The combined operations of the French and English Governments in the expedition to China have again led to the extensive employment of the company's steamers in the transport of troops, the *Oriental*, *Hindustan*, and *Pottinger* being under charter to the Madras Government for this purpose, while the *Granada*, *Araf*, and *Chusan* have been engaged at Hong Kong,—the *Granada* being for the use, it is understood, of the British Commander-in-Chief and his Staff, in moving from place to place. The *Shanghai* has also been chartered by the authorities of the French naval division. On the requisition of the Government at Calcutta, the *Dentuck* was offered either for charter or sale; the purchase was decided upon, and that vessel, therefore, no longer appears on the list. The directors are happy to add that during the six months embraced in this report the very extensive operations now carried on by the company have not been attended with any casualty of importance. The directors announced in their last report that, in consequence of their experience of the unsatisfactory working of the Australian line via Mauritius, they had proposed to the Government a trial of the route via Galle, with an addition of £25,000 per annum to the subsidy. The change of route was agreed to, but as the colonies contributed one-half to the subsidy, that part of the question could not be dealt with without a reference to Australia. The local government of Melbourne transmitted to the Government of this country a proposal that a monthly line should be established between that port and Galle, in connection with one of the company's fortnightly lines between Calcutta and Suez, offering, at the same time, to take upon themselves the full half of the necessary subsidy, which was estimated at £120,000 per annum. By the time this proposal reached England, further experience had made it fully manifest that the loss already incurred in working the Australian contract would be permanent; and the directors, acting on the principle that the company cannot be expected to carry out a public service at a sacrifice, and that the shareholders have, on the other hand, a right to a fair profit on these operations, entered into communication with the Government, with the determination either to obtain an increase to the subsidy, or to abandon the contract. The Lords of the Treasury requested to be informed whether the directors had any alternative plan to propose, or whether they intended to discontinue the service altogether. Upon this invitation the directors submitted a proposal, upon the plan and terms suggested by the local Government of Melbourne—namely, a monthly line between that port, calling at King George's Sound only, and Galle, for a subsidy of £120,000 per annum. The official sanction of this alteration of the service was received in time to admit of the transmission, by the last mail, of instructions to the company's agent to discontinue the costly line to Suez forthwith. The new plan will consequently come into operation next month, and the directors consider that there is a fair prospect of its proving remunerative. Concurrently with the change of route, the scale of passage money to and from Australia will be assimilated to the rate per mile on which the charges on the East India and China lines are calculated." In reference to the increased cost of coals, the directors state that the increase in expenditure extends not only to the fuel now being consumed in the navigation of the company's ships, but to the large stocks it is necessary to provide beforehand at all the large coaling stations. Owing to the extended operations, the company's steamers now burn not less than 300,000 tons of coal annually, against 200,000 tons two years ago, and the average cost at all the stations is 51s. 7d. in 1859-60, against 40s. in 1858-9. The expenditure on coals alone is therefore augmented by 11s. 7d. on 200,000 tons, and by 51s. 7d. on 100,000 tons (the increased amount of the consumption), making in all £373,750 per annum. A general rise has also taken place in the price of provisions, and almost every article consumed in the outfit, repair, and navigation of the steamers. These circumstances com-

bined have led the directors to consider whether it will not be necessary to revert to the rates of passage money and freight which existed before the last reduction in 1857; and also whether they can continue to carry on the present amount of postal service on the India and China lines for the subsidy now received. The mileage performed annually by the steam-vessels of the company in the conveyance of Her Majesty's mails was on nine lines £1,165,024 miles, the subsidy being at the rate of 4s. 6d. per mile; but on the Suez and Sydney line via Galle, the returns from freight and passage money are so small as to throw the maintenance of the service almost entirely on the subsidy, which consequently shows a much higher rate per mile than the average of the others, the mileage on this route being for twelve voyages 208,848 miles, and the average rate of subsidy 17s. 2d. per mile, making the total mileage performed by the company's steamers 1,373,872 miles. The disbursements of the company now amount to upwards of £2,000,000 annually; and taking the sum shown at the last annual meeting—namely, £2,006,363, the cost of navigating the company's ships and of carrying on the business is 29s. per mile; the difference between this sum and the amount of subsidy per mile (4s. 6d.) is very striking; and when it is borne in mind that a receipt at the rate of not less than 26s. 6d. per mile has to be made up out of earnings in freight and passage money to enable the company to pay a dividend of 7 per cent. only, it will be readily understood that the extra expenses, the strain upon the vessels, and other disadvantages which attend the constant and punctual performance of the obligations of the mail service, may not be adequately compensated at so trifling a rate of subsidy. A call of £5 per share was made payable on the 1st of April last, and was responded to by the proprietors with their usual punctuality. Another instalment of £5 has also been called for the 1st of July, which will leave £25 payable on each of the new shares, or £500,000 in all. The proceeds of these two calls will go in great measure to meet the purchase money and outfit of the vessels bought on entering upon the Australian service, and other expenses connected therewith. The operations of the half-year, so far as the gross receipts are concerned, are satisfactory; but the disbursements have been unavoidably increased in a more than corresponding ratio. The directors are, however, enabled to recommend that the usual dividend of 3½ per cent. be declared for the half-year ending the 31st of March last, and that payment of the same be made, clear of income-tax, on and after the 25th inst.

The Chairman, in moving the adoption of the report, said he would only make one or two observations. During the past half-year the company had rendered very valuable assistance to the Government, and had chartered no less than seven of their vessels for the expedition to China. Of course, that would be done for a consideration, but the directors had given considerable assistance to the authorities without seeking any return. He then read part of a letter from Admiral Hope, stationed at Hong Kong, in which the gallant admiral acknowledged the valuable assistance the company had given him there, stating that the company's officers had also done everything they could to help. They had also forwarded from Suez a portion of a brigade 212 strong, with an Armstrong battery. The Government vessels not having arrived as expected, they were forwarded by the *Precursor*, and victualled for twenty-five days. They also supplied the Government vessels with coals when they arrived, and a vast number of stores, which had contributed to the comfort of the men. Their agent at Singapore had informed them that Admiral Hope had stated to the commander on that station "that it was not too much to say, that without the able assistance of the Peninsular and Oriental Company it would have been impossible for part of the expedition to China to reach its destination at the time fixed." He (the chairman) believed that the assistance they had rendered was well appreciated by the Government authorities. He then called attention to the increased cost of coal, and stated that freights had risen considerably. The adoption of the superheating system was a perfect success. It would be a work of time to apply it to all their vessels. They could not spare their effective ships to lay up for a month for the purpose of having the superheating apparatus fitted to their machinery, or else it would have been more extensively employed in their fleet. They had, however, sent out five sets of that apparatus to India to fit to any of their vessels that might be undergoing repairs, so as to carry the superheating system out as far as possible. He might mention that the *Ceylon*, running from Southampton to Alexandria, consumed, with the superheating apparatus, 500 tons of coals less than she did before it was applied.

Mr. Bransell seconded the motion for the adoption of the report, and in so doing alluded to the vast services rendered by the company to the Government, India, Australia, and other colonies.

The report was then unanimously adopted.

Mr. Jack believed they had always done everything they could for the Government, but he thought the Government did nothing for them. When any new route was proposed the directors were asked to give all the information they could to the Government, and when that was obtained the latter endeavoured to get some one else to do the work. It appeared to him that the conduct of the directors must be gratifying to the country at large. (Hear.) He concluded by moving that a dividend of 3½ per cent. for the six months ending the 31st of March last, clear of income-tax, be declared. He thought that satisfactory reasons had been given that the dividend should not be larger.

The resolution was seconded and carried unanimously.

On the motion of Mr. Penny, seconded by Mr. Dakin, a vote of thanks was passed to the chairman and directors for their devotion to the interests of the company, and the meeting separated.

PETITION TO THE LORDS AND COMMONS, ON HONG KONG ADOPTED BY THE NEWCASTLE FOREIGN AFFAIRS ASSOCIATION, MAY 31, 1860.

That your petitioners are informed that Tam Achoy (a Chinaman, a noted resident at Hong Kong), Captain Baker (an English subject), and a number of American and European sailors, recently made a piratical attack on the Chinese village of Sun-ning, near Macao, in which three Europeans and a number of others were killed.

That a steamer flying the British flag was chartered by Tam Achoy for this expedition. That on Tuesday, Feb. 21, of the present year, Tam Achoy, Captain Baker, and others, who were engaged in fighting, were

brought to trial before the Supreme Court at Hong Kong, charged with misdemeanour. That the accused pleaded guilty, but made affidavits, in which they put forward the fact, in mitigation of punishment, that before starting on their expedition they consulted the Government of the colony concerning it, through Mr. Caldwell, the Registrar-General and Protector of Chinese, and received no warning from the said Government to prevent their proposed expedition. That to the truth of this statement the Registrar-General of Hong Kong himself bore witness, in an affidavit, which he also made. That in consequence no sentence was passed on Tam Achoy, Captain Baker, and the others. That the Acting Chief Justice, Mr. Adams, did withhold the above-mentioned affidavits, which had been read in open court, when application was made to him for them for the purpose of publication. That a newspaper at Hong Kong, the *China Mail*, in reference to these circumstances, made, on Feb. 2, the following statement:—

"That the expedition against Sunning was only the natural development of the system of attacking alleged pirate fleets and villages with English gun-boats on very insufficient information as to the real facts of the case, and of interfering with Chinese quarrels, which can be far better settled by the natives themselves. Mr. Caldwell was the official here best fitted to discriminate between pirates and others; yet even he had the almost incredible stupidity to direct Captain Bythesa against Namtow because of acts committed by a junk in the legitimate action of the Chinese customs. The Namtow people came to Hong Kong, and engaged a lawyer to prosecute in this matter; but they must have been bought off, for when everything was clear before them, and legal opinion in their favour, they suddenly left the place, and gave up the prosecution.

"That in February, last year, a petition, signed by the mayor on behalf of a public meeting of the inhabitants of this town, was laid before your Right Honourable House, praying for justice in respect to conduct similar to that above recited on the part of the Registrar-General and other officials at Hong Kong. That in June of last year a petition to the same effect, signed by the Mayor on behalf of another meeting of the inhabitants of this town, was presented to her Majesty, to which her Majesty was graciously pleased to reply that she had 'commanded the said petition to be referred for the consideration of the Secretary of State for the Colonies.' That in March of the present year, in return to an address of the Honourable House of Commons, a volume of official papers relating to Hong Kong was laid before your Right Honourable House, which papers confirm to the fullest extent the statements contained in the above-mentioned petitions. That, nevertheless, no steps have been taken by your Right Honourable House to redress the grievances complained of; the consequence being the continuance of the customary state of things at Hong Kong, as evinced by the circumstances of the above-mentioned trial for piracy of Tam Achoy and Captain Baker.

"That your petitioners attribute this state of things to the conduct of the late and present Secretaries of State for the Colonies in neglecting her Majesty's commands to give consideration to the complaints of her Majesty's subjects; and further, in upholding guilty officials, and punishing only their accusers. Your petitioners, therefore, humbly pray your Right Honourable House to inquire into the aforesaid conduct of the Colonial Office, and to take such steps as to your Right Honourable House may appear necessary to vindicate the honour of the Crown, and do justice.

"And your petitioners will ever pray."

Naval and Military.

THE CHINA EXPEDITION.

The *White Star* troop-ship, announced in our last as engaged for the conveyance of reinforcements to China, will sail in a few days with the following details:—

1 captain, 1 subaltern, and 162 non-commissioned officers and men of the 1st battalion 2nd Queen's Royals, from Walmer; 2 subalterns and 1 man of the 1st battalion 3rd Buffs, from Limerick; 1 captain, 2 subalterns, and 103 non-commissioned officers and men of the 31st regiment, from Chatham; 1 captain, 1 subaltern, and 91 men of the 44th Regiment, from Colchester; 3 captains, 1 subaltern, and 192 men of all ranks of the 2nd battalion 60th Rifles, from Winchester; 1 subaltern, and 102 men of the 67th Regiment from Athlone; 2 captains, 2 subalterns, and 54 non-commissioned officers and men of the 87th Royal Irish Fusiliers, from Youghal; 2 captains, 2 subalterns, and 244 non-commissioned officers and men of the 99th Regiment, from Cork, giving a total of 22 officers and 949 non-commissioned officers and men. The 2nd Royals, 31st, 44th, and 60th Rifles are to embark at Deptford; and the 3rd Buffs, 67th, 87th Royal Irish Fusiliers, and 99th at Cork. The medical officers selected to proceed in charge of the above reinforcements are Surg.-Major W. Howe, M.D., and Assist.-Staff-Surgeon F. T. McCarthy, who will embark at Cork; and Staff-Assistent-Surgeon G. F. Spry, who embarks at Deptford. An armourer-sergeant will also proceed with the troops.

The *Torch*, 4, screw, is reported to proceed to the China station, but requires some confirmation. No further reinforcements have been announced, or vessels chartered, with the exception of engagements for the conveyance of stores and ammunition, which are being despatched almost weekly by sailing vessels.

Her Majesty has been pleased to order that, in consequence of distinguished services performed by Captain Jermyn Charles Symonds, of the Royal Marine forces, while serving with the Royal Marine brigade in China, that officer shall be restored to his original rank in the corps. Captain Symonds's name has, consequently, been placed between those of Brevet-Major C. B. Rodney and Lieut.-Col. J. M. Wemyss. Captain Symonds was, we understand, unfortunately tried by a naval court-martial on some trifling charges some years back, while serving on board her Majesty's ship *Trim-comalee*, in the West Indies, and hence his suspension of rank, to which he has now been restored.

Acting Sergeant-Major Woon, belonging to the 1st battalion Royal Marine Infantry, was yesterday presented by Col. Stransham, commanding the division at Woolwich, with a gold watch and Albert chain, value 30 guineas,

subscribed by Col. Holloway, C.B., aid-de-camp to the Queen, Col. Walsh, C.B., and the officers of the battalion late serving in China, in testimony of their appreciation of his undaunted courage and bravery under the many circumstances to which he was exposed from the Chinese guns during the attack on the forts in the Peiho river. Sergeant-Major Woon, on his arrival in England, was presented with an annuity medal for good services by order of the Lords of the Admiralty.

Lord Clyde will succeed the late Lord Strafford in the command of the Coldstream Guards. The two other vacant colonelcies will be filled by the appointment of Major Generals Maunsell and Monina, both officers of Peninsular service.

The 200th anniversary of the formation of the First or Grenadier Regiment of Foot Guards was celebrated on Saturday evening by a sumptuous festival, held in the Banquet-hall of St. James's Palace.

The annual inspection of the Royal Marine Artillery at their headquarters, Fort Cumberland, near Portsmouth, was concluded by a display of practice from mortars, guns, and rockets, such as is seldom witnessed in a single day.

The Channel Fleet have been anchored in the Frith of Forth for two weeks, and the officers have exchanged civilities with the residents and authorities.

We believe it is probable that Sir Alfred Horsford, on assuming the duties of Deputy-Adjutant-General, will be succeeded as head of the Recruiting Department at the Horse Guards, by Colonel Hope Graham, of the 59th regiment, lately in China.

The Staff of Sir George Clark, the new Governor of Bombay, consists of Major Coley, 10th Bombay Native Infantry, Military Secretary; Major Clark, Rifle Brigade; and Captain Ellis, 83rd regiment, Aides-de-Camp.

Surgeon-Major W. Howe, M.D., Assistant-Staff-Surgeon F. T. McCarthy and Staff-Assistant-Surgeon G. F. Spry, are ordered to China with detachments.

Colonel Warre, of the 57th regiment, is, we understand, to be attached to the personal Staff of Sir Hugh Rose, the new Commander-in-Chief in India.

It has been moved in the House to give the officers of the navy extra pay and allowances.

The following plan of defence for Great Britain has been proposed by a correspondent of the *Army and Navy Gazette* :—

"In developing the military maritime power of a nation, the grand objects to be held steadily in view are the formation of two nuclei; the one, which shall be the basis of an unlimited extension of its active power; the other, of its reserve, as the exigencies of the period may demand.

"The bases on which these results can alone be attained in this country are :—

"1st. The formation of a standing navy, never to be reduced beneath a fixed standard—whatever may be the temporary aspect of the political horizon—to which irregulars, or men enlisted for brief terms of service, can be attached, their numbers fluctuating with the exigencies of time and circumstances.

"2nd. The formation of a coast-guard or standing reserve under similar conditions, which should become the nucleus of whatever additional irregular reserves may be deemed requisite."

The minimum to which the permanent and available personnel of our navy can prudently be reduced, to enable the country to pursue a path of integrity and dignity, instead of periodic panic and expediency, whether we consider the vast navies arising around us, or the magnitude of the interests at stake, on which depends our very being as a nation, to say nothing of our extended colonies and commerce—is 100,000 men, exclusive of whatever number of boys may be required to feed the standing navy.

This permanent force should be organised in the following manner :—Four divisions of standing navy, 40,000 men; (boys, as required to meet demand, unlimited); irregulars attached to standing navy, say 20,000 men; one division of coast guard or standing reserve, 10,000 men; irregulars attached to standing navy, say 20,000; Royal Marines (the back-bone of the service), 20,000 men.—Total available force to meet aggression or emergency, 110,000 men.

The *Army and Navy Gazette* has the following comments on the commissariat officers now in China :—

"The English commissaries are armed with imperial authority; the Indian commissaries are nominated by the Indian Viceroy; the former are in possession, but the latter have the ear of the general. The former bear the Crimean brand on their downcast brows; the latter are radiant with Delhi and Lucknow successes. The former are civilians, with their noses on the war-office grindstone; the latter have the prestige of military rank, and have a resource besides the commissariat, they can speak out without being utterly ruined by their rashness. The former have a deputy commissary-general at their head, and claim the command; the latter, though under an assistant commissary-general, conceive it derogatory to serve; and they, moreover, expect from India a commissary-general, who will unquestionably be the senior; they may, nevertheless, be out-manœuvred, as the British commissary holds the keys of the military chest from the treasury, and his appointment from the Minister for War.

"In such jeopardy stand the prospects for the subsistence of the army. The Transport, as means by which the subsistence shall reach the army, is not without its little difficulties also. It appears that the Commissariat is to undertake its old duty of providing the entire transport—a duty temporarily usurped by the Land Transport corps in the Crimea. This corps is represented in China by the Military Train, a cavalry corps, which fights after the ancient British fashion, from their chariots; by the Chinese Coolie corps, some 3,000 or 4,000 strong, biped beasts of burden of incomparable value; and some 3,000 or 4,000 pack ponies, rough and ragged, collected on the coast of China, Japan, and the Straits, for Commissariat stores and baggage. These splendid troopers, with their dragoon officers; these funny, nondescript, but efficient coolies, under officers of the Madras army; and this tag-rag and bob-tail of pack-ponies, are all to be indiscriminately dammed up in a heap, and to be put somehow under the Commissariat. Such are the primary discordant elements with which the military machine in China is to be kept going, and discordant as they are, we nevertheless fondly hope they may answer somehow.

The following appointments were made yesterday at the Admiralty :—Thomas F. Simmons, first-class assistant engineer, to the Asia, for service in the Grindler; Francis Thornton, promoted to the rank of second-class assistant-engineer in the Bloodhound; F. G. Pearce, paymaster (additional), to the Blenheim; B. W. Fielding, B. H. Dunn, A. O. Tottenham, P. A. Black, A. Ross, L. C. Reece, J. A. Clifton, J. W. Wilkins, H. E. Walters, G. S. La Costa, G. G. Boys, F. A. Gataber, G. Osborne, R. W. J. Herman, and the Hon. E. W. D. Browne, naval cadets to the Marlborough, for disposal; C. T. F. Hodgkinson, naval cadet to the Hannibal; T. H. Houghton, E. S. Dugdale, and C. W. Cole, naval cadets to the Nile for disposal.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

- BOWIE—At Singapore, on the 11th of May, Mrs. W. Bowie, of a son.
GIBBS—On the 13th instant, at Springfield Lodge, Upper Clapton, Mrs. D. A. Gibbs, of a daughter.
KYNNAIRD—On the 3rd May, at Rome, the Viscountess Kynnaired (Marchioness Bandini Giustiniani), of a son and heir.
LAZAROO—At Singapore, on the 13th of May, Mrs. P. Lazaroo, of a daughter.
PRESTON—At Canton, on the 2nd May, the wife of the Rev. C. F. Preston, of a son.
VAN SOEST—At Singapore, on the 2nd of May, Mrs. L. Van Soest, of a daughter.
VYSE—On the 13th instant, at Stoke-place, Mrs. Richard Howard Vyse, of a son.
ZECHARIAH—At Singapore, on the 1st of May, Mrs. G. I. Zechariah of a son.

MARRIAGES.

- GORTON—ROSE—On the 14th inst., at the parish church, Woodchurch, by the Rev. P. Robin, John, eldest son of James Gorton, Esq., of Seedy, Manchester, to Emma, eldest daughter of W. Rose, Esq., of Liverpool, late of Manchester.
SEWELL—BURN—On the 7th May, at Singapore, by the Rev. T. C. Smyth, A.M., Henry Fane Haylett Sewell, Esq., Lieutenant and Adjutant her Majesty's 40th Regiment M.N.I., son of Lieutenant-General Sewell, C.B., Royal Army, to Violette Ann, only daughter of Brigadier Burn, commanding troops in the Straits.
VOLHARDT—SILVEIRA—At Hong Kong, on the 28th April, at the Roman Catholic Church, by the Rev. Fr. Angelo Vandagna, G. Vollhardt, to Guilhermina A. da Silveira.
WILSON—ROBERTSON—At St. Andrew's Church, Singapore, by the Rev. T. C. Smyth, M.A., on the 15th May, Mr. Charles Wilson, to Miss Christina Robertson.

DEATHS.

- FOGG—On the 1st instant, Hiram Fogg, late of the firm of Messrs. H. Fogg and Co., Shanghai.
GRAY—At Manila, on the 13th April, Melland Gray, lately of Batavia.
HASKELL—On the 1st May, of erysipelas, George Lewis Haskell, Esq., at Boston, Mass., U.S.A., aged 37.
MARGESSON—On the 14th instant, at 4, Green's-row, Chelsea, Philip Davies Margesson, Captain Royal Artillery, F.R.G.S., fourth son of the Rev. W. Margesson, aged 33.

COMMERCIAL POSTSCRIPT.

WEDNESDAY AFTERNOON.

There is no change in the produce markets; the prospects for tea and silk are good.

The sales of tea are in progress while we go to press, and it is expected the rates will be fully maintained, owing to the advances received this morning.

ARRIVALS NOT INCLUDED IN TABLE.—June 23, at Bremen from Akyab, Flying Eagle; 26, at Falmouth from Akyab, Wm. Kidston; 22, at Texel from Batavia, Piter; From Banjoewangie, Nederland en Oranje; 22, at Brouwershaven from Banjoewangie, Lod-wyk; 26, at Queenstown from Maulmain, Jane; in the Downs, from China, Vanguard.

DEPARTURES.—June 23, from Southampton for Hong Kong, Neckar; 24, from Liverpool for Hong Kong, Catharine, from Clyde for Singapore, Elizabeth; 26, from London (in ballast), for Cardiff and Manila, Elveria. For Hong Kong, Lyee Mo-r; 22, from off St. Catherine's Point, for Batavia, Maria; 20, from off Dungeness, for Padang, Anna Maria Wilhelmina; 23, from Sunderland, for Singapore, Jan Van Schaeffer.

At St. HELENA, May 10.—From Batavia, Nieuw, Holland. 11th, Twee, Anthonya. 12th, from Shanghai, Vanguard.

SPOKEN.—Queen Mab, Liverpool to Singapore, 10th May, 3 N. 21. W

Monetary and Commercial.

COMMERCIAL.—The mail of 27th inst. takes out in specie, for Shanghai, £182,026; Hong Kong, £189,503; Singapore, £875.

THE LABUAN COAL COMPANY.—The prospectus has been issued of the Labuan Coal Company, with limited liability. With a capital of £100,000 in £10 shares it is proposed to work the coal mines which have long been known to exist in that possession. The company obtain the concession, with all its rights, from the Eastern Archipelago Company, which amount to an exclusive grant to work the entire coal on the island, and the existing plant and machinery for 2,500 paid-up shares; and the directors are not to receive any remuneration until the share-

holders are paid 10 per cent. per annum from *bona fide* profits, and then it is to be 10 per cent. on the net profits. The directors of the company are Sir James Elphinstone, W. P. James, T. Mackenzie, W. Miller, M.P., the Hon. W. Napier, W. W. Cargill, and E. Price. Agents in Singapore, Messrs. Middleton, Harrison and Co. Mr. Smith estimates the cost of raising the coal, and placing it on board ship at Labuan at 5s. per ton. Mr. Robert Coulson, a practical English coal miner, who has resided on the island, has offered to work the mines by contract, and to put the coal on board ship at 6s. 9d. per ton, all charges included, on condition that the company find plant and machinery. Taking the latter price (6s. 9d. per ton) and adding 3s. 3d. for agency, management, &c., the cost of the coal on board ship at Labuan would stand the company 10s. per ton. Assuming even 14s. per ton for freight to Singapore—a distance of only 700 miles—the cost of the Labuan coal, when delivered at that port, would be 24s. per ton against 60s., the present price there of English coal equal in quality; and it is estimated that, when the company is fairly at work, it could easily raise and dispose of 100,000 tons of coal annually, which rates, after making ample allowances for all contingencies, leave a large margin for profit. The directors have secured the services of Mr. John McLaren, a practical engineer, whose experience of machinery, and in the management of great works in the East, eminently qualify him for the important charge committed to his trust, and who proceeds forthwith to Labuan.

The half-yearly meeting of the P. and O. Company was held on the 5th inst. and a dividend of 3½ per cent. declared. A full report will be found in another column.

A meeting of the East India Coal Company was held 5th inst., Mr. H. Haymen in the chair. The report stated that on the collieries at present at work 1,019 tons of coal were raised in the fortnight ending the 31st of March, exclusive of rubble coal.

A company is said to be in course of formation, to be called the London and Oriental Steam Company, for a line to India via the Cape by vessels to perform the service with regularity in forty-five days. The contemplated steamers are of 6,000 tons register and 1,200-horse power, and among the points urged for the necessity of the route are the increased accommodation that will be required for the army passenger traffic under the new regulations respecting the number and description of troops to be henceforth employed in India, and the importance of having an efficient alternative means of communication for mails, merchandise, stores, and passengers, military or civil, in case of any contingency that might interfere with the Egyptian transit.

A scheme is reported to be on foot to raise £2,500,000 under a French guarantee of 5 per cent. for the construction in this country of ten vessels, each of about 6,000 registered or 10,000 builders' tonnage, to be ultimately employed as a steam line from France to the East. Nothing is said about the intended stations of the proposed route, but it may be assumed it would extend to Cochin China, and also include the new territory just ceded to the Emperor by the King of Abyssinia.

RED SEA CABLE.

No communications have been received through this line since our last, and the advocates of the Euphrates valley route are now rising up in judgment against the Red Sea line, and considering that we are now launched on a China war, it is particularly unfortunate that we have no telegraphic communication in readiness, at least half way. The laying of the Rangoon and Singapore cable, as announced in our last, is postponed until February. The vessels for conveying the same are to be ready in October.

The exports to China from 1st Jan. to 30th April are as follows:—Cottons, £1,190,624; cotton yarn, £188,931; lead, £21,994; woollens, £189,664; worsted stuffs, £177,735.—Total, £1,768,798; for 1858 the amount was £741,288; for 1859, £1,031,655.

The *Times* of the 6th inst., in its Hong Kong correspondent's letter, has the following:—

"The rebels in the neighbourhood of Canton still prove their presence by causing great injury to trade. The difficulties thrown in the way of all transit by them is stated to be a principal cause of the extreme dearth of tea in the province. To prevent any further advance in prices of that necessary of life, the Governor-General lately took the high-handed course of putting all the principal dealers in prison. For a few days rates in consequence declined; but they are again advancing."

Our readers may detect that the article described as "that necessary of life" should be *rice*, not *tea*. The word *rice* has been, probably by a printer's error, omitted.

ARTICLES OF IMPORT.

TEA.—The public sales concluded heavily, and, until to-day, there being no fresh news from China, the course of the market has been without interest. The heaviness has been increased by the declaration of large public sales for the 27th inst., comprising 41,393 packages, of which nearly 10,000 are for absolute sale. The demand for good common for export has been moderate, but the scarcity enables prices to be maintained. For all other descriptions of Congou prices must be quoted ¼d. per lb. lower. In fancy teas business has been limited at about former rates. For fair to good scented Orange Pekoes there has been a slight demand at former rates. Capers remain as before. In Green Teas there has been a fair inquiry for all descriptions under 2s. per lb., but above that figure the demand is languid, at about former prices.

SILK.—At the public sales on the 20th the quantity offered was about 2,000 bales Bengal and 7,000 bales China. As usual the whole was passed rapidly without biddings. This, however, is not matter of surprise, seeing the large business that had been doing for the last six weeks, and the high prices at which importers bought in their silk. Fair business is doing by private contract, home consumers being still very barely supplied. The deliveries of this month have been unusually large, telling heavily upon the stock, which hitherto has received but small reinforcements since the 1st instant.

SUGAR.—The market has improved. Sales of 10,000 bags Clayed Ma-

nila at 36s. to 37s.; 4,120 bags of Penang at 33s. 6d. to 36s. for middling to fine brown, and 36s. 6d. to 39s. for low and middling yellow; 40s. to 42s. 6d. good to fine; low white Siam, 42s. to 42s. 6d.

COFFEE.—Sales of Ceylon have been 466 casks; 165 barrels and bags Plantation went off readily, and in some cases at an advance of 6d. per cwt.; fine ordinary to low middling, 68s. to 73s. 6d.; middling, 75s. to 76s. Native has been more inquired for, but owing to the very light quantity offering, only retail parcels have been sold privately; 132 casks, 184 bags, at auction, were held with firmness, and only a small part was realised, good and fine ordinary, 60s. 6d. to 62s. 6d.

RICE.—Large sales have been made in the expectation of a bad crop. Necranzie at 11s. 8d.; Bassein at 10s. 9d.

PEPPER.—Market active. Sales of 8,265 bags Singapore, grey to fair black, 4d. to 4½d., and 2,562 bags Penang, common to fair dusty, 3½d. to 3½d. White has been of more easy sale; 118 bags Penang, and 55 bags Singapore, of middling quality, having been taken at 6d. to 6½d.

SAGO in very limited request: 2,000 boxes at auction met only languid biddings, excepting for a part superior small pearl, for which 22s. was obtained; the remainder was withdrawn, but about 1,000 boxes have, however, since been sold—middling small, 16s. 9d.; good large, 17s. 6d.; ordinary large and medium, 15s. 9d. to 16s.

SPICES.—Cinnamon, demand small for Ceylon sorts, quotations nominal at the last rates. Cloves: sales 22 cases; Penang, at 10d. to 1s. 4d. Mace: sales of 17 cases Penang, and 10 Singapore, at 10d. to 1s. 4d. Nutmegs: sales of 137 cases Penang, at 1s. 3d. to 8s. 11d. Cassia Lignea: sales of a part of 500 cases at auction, at 8s. per cwt. for second quality.

HEMP.—Demand has slackened. Small sales, at £21 10s. to £22 for Manila, current quality.

COTTON.—There is no change to observe in this market, and in the business done irregular prices have again been current, viz., 700 bales Surat, very ordinary to fully fair 2½d. to 4½d., and 700 bales Madras, fair to good fair Tinnivelli 4½d. to 5½d.

JAPAN WAX.—Sales in part of 450 cases at 60s. for block, and 63s. to 63s. 6d. for saucers.

TIN.—Market more active. Sales of Banca at £137 to £138, and Straits at £130 to £131. Regulus of Antimony, £52.

TOBACCO.—Sales of 24 bales of Manila, partly damaged, sold at 1s. 8d. to 1s. 10d. For No. 5 Cayaya Capos, 7½d. to 9d. A few bales, re-packed, 13d. to 15d. Arracan, 1½d. to 1½d.

MISCELLANEOUS.—Rum nominal at the last quotations. India Rubber—prices firm at 2s. 2d. to 2s. 3d. for pure, but demand limited. Camphor, small sales at 150s. to 160s.; market dull. Battans, sales of 9,228 bundles of Batavia and Penang at 2s. 6d. to 6s. 1d. per 100. Sapanwood: no demand, and nominal at last quotations. Soy: sales at 3s. 6d. to 4s. Rhubarb: sales are announced. Mother-o'-Pearl Shells sales of Singapore at 125s. to 140s., and Manila 105s. to 125s. Tortoise Shell auctions have included 20 cases Singapore, only three sold at 16s. 6d. per lb. for very fair sorts; 15 cases Sydney, 5 sold, at 14s. 6d. to 20s. for middling to very good; 2 cases Penang not placed. Cocoa Nut Oil: this market has been especially animated, and large operations have been made, for arrival and on the spot, for both descriptions. Rates have advanced £1 to £2 per ton. Auctions have combined 242 casks Cochin, and 223 casks Ceylon. the demand continues. Star Anniseed: a few sales at 87s. 6d. to 95s.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6 7s. 6d. to £6 15s.; nail rods, £6 17s. 6d. to £8; hoops, £9 to £9 10s.; sheets, £9 10s. to £10; Staffordshire bars £8 to £8 10s.; rails, £5 5s. to £7.

STEEL.—Swedish keel, £19 to £20; fagot £20 to £21.

TIN.—Best charcoal I.C., 31s. to 32s. 6d. per box; second quality, 30s. to 31s. 6d.

LEAD.—Pig, £22 to £23 5s.; spelter, £20 5s. to £20 10s., zinc, £27 copper, sheet, and sheathing, 11½d

MANCHESTER MARKET.—The improvement in demand, at the commencement of the week, for India shirtings and other cloths, slight as it was, appears to have been lost, through the impression left on the minds of exporters by the advices to hand from India. Printing cloths are scarcely so firm as last week, though still relatively better supported than other fabrics. In T-cloths the trade continues much as last week, with scarcely so much doing, and prices still inclining downwards. India shirtings, 36-inch shirtings, and jaconets, rather weaker in value, the demand being very limited. For domestics rather lower offers were made, but sellers are difficult to move, the demand keeping pace nearly with the production. A slightly better feeling is reported in the yarn market, but it is chiefly confined to water-twist, suitable to China and the Continent. India mule is scarcely o

firm. At Leeds the demand in woollens for China had quite fallen off, and business was very slack.

VICTOR EMMANUEL, Bordeaux to Hong Kong, Feb. 7, 1 S., 21 W.

FREIGHTS AND CHARTERS.

Owing to the demand for Government purposes, there has been a fair activity in shipping. Several vessels have been fixed for India at £10 to £12 per head for troops. Coal charters from the North to India may be quoted at 30s. to 35s., to Hong Kong 50s., and Shanghai 60s. To Australia the business has been slack, and a few vessels fixed for emigrants to Adelaide and Sydney at £15 7s. 6d. In the Pacific trade there has been some activity. The rate for United Kingdom or Continent is still £3, and for French ships to French ports 90 francs direct, 95 francs calling for orders. For coals out 35s. is current for ports between Valparaiso and Callao, 40s. Payta, &c.

Rates of freight current for vessels on berth to Shanghai 60s. per ton dead weight; 45s. per ton of 40-foot measurement. To Hong Kong, 50s. weight, 45s. measurement. To Singapore, 35s. to 40s. weight or measurement. To Manila, 35s. and 40s. To Japan, £5 weight, 90s. measurement. To Batavia, 50s. weight, 40s. measurement. At the United States:—To Shanghai, coal and measurement goods, \$9 to \$10.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Jeddo, 70s. to 80s.

At Hamburg, for Batavia and Singapore, 35s. to 40s. China and Manila, 50s.

CASUALTIES.

The Chaa Sze, from Sunderland for Hong Kong, came in contact with the dock entrance and damaged her outwater.

The Constance, Kimmereen, from Rotterdam to Batavia, put into Brouwershaven, June 9, with her rudder damaged.

The Primera de Espana, Siches, from Liverpool to Manila, put back to Bristol to dock there on June 18; the report from thence states that when she put back to Penarth Roads on the 14th; she was leaky.

The Young Mechanic, Amesbury, which arrived at Falmouth June 17 from Akyab, had been compelled to throw part of her cargo overboard.

The Sarah March, Stowers, bound to Shanghai, put back to Gravesend June 20, with some damage. Particulars not given.

The Connecticut, Spedden, from Liverpool for Woosung, put into Plymouth June 22; leaky.

CARDIFF, June 22.—The Chevreuil, Ollivier, bound to Havana, which sailed yesterday, drove foul of the Maria Catherina (Dutch barque), bound to Singapore, last night, doing considerable damage. Both vessels have returned to dock for repairs.

At St. HELENA, May 2.—Jan Dewitt, Guyl, from Batavia, and sailed 3rd for Dordt; 4, Augusta, Batol, from Java, and sailed for Falmouth; 5, Messenger, Manton, from Macao, and sailed for Havana; 7, Solide, Fourneau, from Macao; Dictator, Zerega, from Batavia; Edwin Forrest, Croker, from Shanghai, and sailed for New York.

THE "LY-EE-MOON."—This vessel is now at Greenhithe and will proceed to-morrow to Southampton, and to China on the 1st. She is to call proximo at St. Vincent, Cape of Good Hope, and Singapore.

PASSENGERS OUTWARDS.—Per Zeenymph, Captain Van Roggen, from Amsterdam to Batavia: Messrs. J. Zomermeijer, J. A. Manuel, and C. H. Swalne. Per Bellatrix, Captain Sandberg, from Amsterdam to Batavia: Mr. and Mrs. P. H. Verburne. Mr. and Mrs. P. H. Ankenent and Son, Mr. H. A. Thyssen, Mrs. Adrian, Mrs. Hogel, and Miss Galup. Per Argo, Captain Teutem, from Rotterdam to Batavia: Mr. and Mrs. Brakel Rieder and three children, Mr. and Mrs. F. J. Knoops and four children, Mrs. A. Oostwegen, Messrs. Vermont, Van Ommeren, Tadema, and A. Hoogfeld, one Dutch and two Javanese servants. Per Joan Melchior Kemper, Captain Salm, from Amsterdam to Sourabaya: Mr. F. L. Mahlerwen, Miss G. Goldberg, Miss Emily Meyer, and a Javanese lady.

PASSENGERS INWARDS.—Per Goudet, Captain Kamings, at Amsterdam from Batavia: Messrs. H. B. Dal, C. Bon, P. G. Teunisse, L. Henkes, A. Polet, J. Kramer, W. Palmer, B. Tenthom, J. C. Koning, D. Kok, J. Grevers, and A. Van der Linden. Per Staatsraad Houven, Captain Heime-rika, at Amsterdam from Batavia: Captain Van Zee and family, Mr. Berliner, Surgeon East Indian Army, and family; Mr. Joritsma, Mr. and Mrs. Stevens and family, Mr. Safflon, Mrs. Schuim and family, Mr. Strating. Per Batavier, Captain Van der Straaten, at Amsterdam from Batavia: Captain and Mrs. Poll and family, Mrs. Brand. Per Postillion, Captain Poll, at Nieuwe Deep from Batavia: Mr. H. C. Wichers. Per Beurs van Rotterdam, Captain de Vos, at Brouwershaven, from Batavia: Mr. and Mrs. Staus and child.

**NOTICE TO PASSENGERS BY THE OVER-
 LAND ROUTE, via EGYPT.**

PHILIP ZECH, Proprietor of the two well-known Hotels in Alexandria, the Hotel d'Europe, and the Peninsular and Oriental Hotel, begs to inform his friends, and Travellers in Egypt in general, that he has purchased **SHEPHEARD'S HOTEL** in CAIRO, which will still continue to bear the same name; and in returning thanks for the extensive patronage enjoyed by his two houses in Alexandria, hopes that the preference may likewise be extended to his house in Cairo, which will be managed in first-rate style, and in a manner intended to give every satisfaction to its frequenters, both as far as table, wines, internal and external service are concerned. Many alterations and ameliorations are being carried out at the present moment.

Curtis on Manhood.—New Edition.—A Medical Essay on Nervous Diseases.

Just published, the 120th thousand, with numerous plates in a sealed envelope, price half-a-dollar.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE, with plain directions for perfect restoration to health and vigour. By J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhoea and Impotence; Early Vicious Indulgences; Vangers of Neglect.

CHAPTER III.—A Review of the various Disqualifications of Marriage—whether resulting from the Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection.

CHAPTER IV.—The Author's plan of Treatment, Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhoea and other Urinary discharges by microscopic examination.

CHAPTER V and VI. on the modern Treatment of Gonorrhoea and Syphilis.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

"We feel no hesitation in saying, there is no member of society by whom the book will not be found useful—whether such person hold the relation of Parent, Preceptor, or Clergyman."—Sun.

Mr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by letter, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Mr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty Years; nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINMAN, QUEEN'S ROAD, HONG KONG.

FACILITIES in BOOK-KEEPING

OFFICE, 337, STRAND, LONDON, W.C.

By Appointment, and Royal Letters Patent.

JOHN BRACHER (late **WILLIAM MARR & SON**), Inventors, Patentees, and Manufacturers of the strong WROUGHT-IRON FIRE and THIEF-PROOF SAFES, CHESTS, STRONG-ROOMS, IRON DOORS and FRAMES, 9, Walbrook, and Vulcan Safe Works, Skin-yard, Bankside, Southwark. To the New Houses of Parliament, Her Majesty's Honourable Board of Ordnance, National Debt Office, Public Buildings, &c.

Full value given in exchange for old Safes. The attention of Corporations, Bankers, Architects, Solicitors, Commercial Houses, and all persons having the care of valuable property, is drawn to the superior quality of his Patent Fire-proof Safes and Chests.

BORWICK'S BAKING POWDER

will secure the following important results:—

BREAD will be made cheaper, more digestive, and in one-fourth the time; Puddings and Pastry will be made light, wholesome, and delicious, with half the usual quantity of Eggs and Butter; and Flour will be converted into Tea Cakes, Buns, Sally-Lunns, Norfolk Dumplings, &c., in a few minutes, and at a trifling cost. The article is recommended by the Queen's Private Baker, the Analytical Chemist to the late Director General of the Navy, and numerous eminent medical men, and is extensively used both by the Army, Navy, and Merchant service.

To be had at all stores, in 1d., 2d., 4d., and 6d. packets, and 1s. boxes. Stores not supplied may obtain it at the Manufactory, 23, 24, and 25, London Wall, and of all wholesale London houses.

TWINBERROW'S DANDELION, CAMOMILE, and RHUBARB PILLS, an effectual cure of indigestion, all stomach complaints and liver affections. In cases of constipation these pills never fail in producing a healthy and permanent action of the bowels, so that in short time aperients will not be required, and, being quite as innocent as castor oil, they may be given to children.

From Dr. Dick, Lansdown-terrace, Kensington.
 "Sir,—Send me another bottle of your Dandelion, Camomile, and Rhubarb Pills for my own use. I lose no occasion of recommending these Pills, as I can conscientiously do so."

Prepared by **TWINBERROW**, Operating and Dispensing Chemist, 2, Edwards-street, Portman-square, London; and may be had of all Patent Medicine Vendors.

CHEMICALS and APPARATUS.

AN AGENT WANTED IN CHINA.

NELSON'S MEDICATED BELT.

(Ed. Nelson, Naval Surgeon from 1832 to 1857.)

Gentlemen who are subject to pains in the back or loins, Rheumatism, Lumbago, or who are given to corpulence, are advised to wear **NELSON'S MEDICATED BELT**, as it gives a great support to the entire frame, and a comfortable and genial warmth to the back and abdomen, promoting health and digestion. Gentlemen who ride for business or pleasure should wear this belt as a preventive of Rupture, &c.

NELSON'S MEDICATED MARINE BELT for the prevention of Sea Sickness and the support of the back and loins during a long voyage.

"All those whose duty or pleasure calls them to sea should possess this Belt, for, putting aside its use on board ship, it is invaluable as a riding belt, fitting easily, and supporting the back."

MARK PERCIVAL.

Lower Parade, Leamington, August 3, 1858.
 These Belts are sold by Mr. WHITBURN, Chemist, 174, Regent-street; price 21s. each, or direct from the Maker, Wm. ELSTOB, 12, Avery-row, New Bond-street. Circulars free. Orders from the country must have the size of waist and hips, and a post-office order for 21s., payable to Wm. Elstob, at Cavendish-street.

These belts can be had of any tailor in the kingdom.

AUSTRALIA and NEW ZEALAND.

F. F. GIBBS, LONDON AGENT, 147, LEADENHALL-STREET.

HOLLOWAY'S OINTMENT AND

PILLS.—PIMPLES, BILES, CARBUNCLES,

ABSCESSES.—These maladies arise from some obstruction to the free circulation of blood through the blood vessels or capillaries; and the only rational mode of cure consists in removing the local impediment at the same time that any impurity engendered by the stoppage should be filtered from the blood. Holloway's remedies applied to the part effects the first, his Pills accomplish the latter object. The inflamed skin derives softness, coolness, and ease from the application of this unguent, which gradually penetrates to the affected tissues, and soon restores the circulation and its channels to a healthy condition, and saves the sufferer from most serious diseases which too frequently follow from carelessness or injudicious medical treatment.

KEATING'S

PALE NEWFOUNDLAND COD LIVER

OIL, perfectly pure, nearly tasteless, having been analysed, reported on, and recommended by Professors Gaylor and Thomson, of Guy's and St. Thomas's Hospitals, who, in the words of the late Dr. Pereira, say that "The finest oil is that most devoid of colour, odour, and flavour." Half-pints, 1s. 6d.; Pints, 2s. 6d.; Quarts, 4s. 6d.; and Five-pint Bottles, 10s. 6d., Imperial measure.—79, St. Paul's Churchyard, London.

BLAIR'S GOUT and RHEUMATIC

PILLS.

Price 1s. 1jd. and 2s. 9d. per box.

This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century to demonstrate by unsolicited testimonials from persons speak of a cure for the Gout was considered a romance; but now the efficacy and safety of this medicine is so fully in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age.

These Pills require no restraint of diet or confinement during their use, and are certain to prevent the disease attacking any vital part.

Sold by all medicine vendors. Observe "Thomas Prout, 229, Strand, London," on the Government Stamp.

 tin's-lane, London, W.C.

THE PEN SUPERSEDED.—Mark your
 Linen. The best and only method of Marking Linen,
 Silk, Stockings, Course Towels, or Books, so as to prevent
 the Ink washing out, is with CULLETON'S PATENT
 ELECTRO-SILVER PLATES. By means of this novel
 invention a thousand pieces of linen can be marked in a
 few hours. Initials, 1s. each; Name, 2s. 6d. Set of
 Movable Numbers, 2s. 6d.; Crest Plate, 6s., with the ne-
 cessary directions for use. Post free. Certificate from
 the eminent Dr. Sheridan Muspratt, F.R.S., Professor of
 Chemistry, &c.

"Several trials with Mr. Culleton's Patent Electro-
 Silver Plates, for marking linen, induce me to pronounce
 them excellent; the letters are beautifully marked in a
 deep black colour, without blotting, and after a long boil-
 ing, with either potash or soda, they remain unaltered.
 Other plates which I tried decomposed the ink, and in
 many cases burned holes in the linen. I can testify Mr.
 Culleton's Plates are incorrodible, and will not hurt the
 finest fabric.—(Signed) "SHERIDAN MUSPRATT."
 "College of Chemistry, Liverpool."

"May 15, 1864."
 All orders to be sent to the Patentee and Sole Maker.
 T. CULLETON, 25, Cranbourn-street, corner of St. Mar-
 tin's-lane, London, W.C.
 All Orders executed by Return of Post.

LATE F. LILLYWHITE AND WISDEN,

2, NEW COVENTRY STREET, LEICESTER SQUARE, LONDON, W.

EVERY article connected with Cricket may be had at this Establishment. Their large
 stock of **OLD AND WELL-SEASONED RATS**
 cannot be equalled, and they invite noblemen and gentlemen to inspect them. The wants of clubs, regiments, colleges,
 schools, &c., are particularly paid attention to, and their list of prices will convince officials that a great saving is effected
 by purchasing at their establishment, which contains articles, not only of their own manufacture, but of those who are
 acknowledged first-rate makers, and whose goods are selected by J. W. & Co., themselves, and therefore will be warranted.
 Models of L. & W.'s New Patent Catapults can be seen and worked at the above address.
 Illustrated list of Prices forwarded Post Free. Export Orders with immediate despatch.

CRICKETING OUTFITTER.

JOHN LILLYWHITE.

(LATE LILLYWHITE AND SONS, AND LILLYWHITE, BROTHERS),

5, SEYMOUR STREET, RUSTON SQUARE, LONDON, N.W.

THE largest wholesale Cricketing Outfitter in England. Every article connected with the
 game may be had. His celebrated Cane-handle Bat, manufactured expressly for foreign use; the handle
 warranted not to break. Batting and Wicket-keeping Gloves, Leg Guards (warranted), Boxing Gloves, Foot Balls,
 Quoits, Dumb Bells, and every article for British sports.

First-class goods only kept, and every article warranted. Export orders with immediate despatch.

Illustrated lists of prices post free. No connection with any other house.

BY SPECIAL APPOINTMENT TO H.R.H. PRINCE ALBERT.

ROBERT DARK, Sole Inventor and Original Manufacturer of the
TUBULAR INDIA-RUBBER GLOVES, Improved **LEG GUARDS**, and **WICKET-
 KEEPING GAUNTLETS**, (vide "Bell's Life" and "Denison's Cricket Companion" 1844)
 which are warranted to be made of the best materials and workmanship; as are also his cele-
 brated **CRICKET BALLS**. The above may be had of the Proprietors of Cricket Grounds; of
 the respectable Shopkeepers and Fancy Warehouses that sell Cricketing articles in all towns
 in the United Kingdom; and of the Foreign Agents at Calcutta, Madras, Bombay, Quebec, New York, Adelaide,
 Sydney, Melbourne, &c., and may be ordered through Mr. George Holmes, Hong Kong.—N.B. The M. C. C. "Laws of
 Cricket."

DARK'S CRICKET BALLS.—The Prize Medal and honourable mention Class XXIX., No. 198, of the late Great
 Exhibition, has been awarded to ROBERT DARK for his Cricket Balls, Tubular India-Rubber Gloves, Leg-Guards,
 Gauntlets, &c. The lovers of this truly national game are respectfully informed that R. D. has manufactured several
 hundred dozens of Cricket Balls, from carefully selected materials, and of the best workmanship. He, therefore, feels
 confident that they will give perfect satisfaction in the cricket field, as they are the only balls used by the Marylebone
 Club for many years in all their Grand Matches at Lords, and now in play at Oxford, Cambridge, Eton, Harrow, and
 Winchester Colleges. A list of Prices forwarded.

CARSON'S
ORIGINAL ANTI-CORROSION PAINT,**PATRONIZED BY**

The British Government,
The French Government,
The Russian Government,

H. R. H. The Prince Consort.
Hon. East India Company,
Most of the Nobility and Gentry,

Railway and Canal Companies,
The Principal Collieries,
Mill Owners, Iron Masters, &c., &c.

The Anti-Corrosion Paint is now used extensively

FOR ALL KINDS OF OUT-DOOR WORK,

Such as WOOD, STONE, BRICK, COMPO, CEMENT, &c. Also IRON STEAM VESSELS, BRIDGES, PIERS, or any description of Iron, and from its being expressly manufactured for exterior purposes, is peculiarly adapted for tropical Climates, resisting the rays of the sun more effectually than any other Paint. It can be easily applied by any Labourer, being sent in various Colours, requiring simply to be mixed (no grinding is needed).

Merchants and Shippers' attention is particularly drawn to it as a most serviceable article for exportation. A List of Colours, Prices, &c., also Copy of Testimonials, will be sent.

WALTER CARSON AND SONS,

(Successors to the Inventors), 9, GREAT WINCHESTER-STREET, LONDON, E.C.

HUBBUCK'S PATENT WHITE ZINC PAINT.

BY their process, which is patented, Pure Zinc Paint is cheaper than White Lead. It does not change colour with the London atmosphere.

Adulterations.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes from 10 to 80 per cent. No workman can produce good work with such material. Those who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

Cheapness.—Not only is it cheaper per hundred weight, but two hundred weight of this Paint with six gallons of Oil, covers as much surface as three hundred weight of White Lead and twelve gallons of Oil. Each cask is stamped "HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, and PAINT WORKS,
24, LIME-STREET, LONDON.

14, CATHERINE-STREET, STRAND, LONDON.

LEA AND PERRINS' CELEBRATED**WORCESTERSHIRE SAUCE.**

PRONOUNCED BY CONNOISSEURS TO BE THE ONLY GOOD SAUCE, AND APPLICABLE TO EVERY VARIETY OF DISH.

EXTRACT of a LETTER from a MEDICAL GENTLEMAN, at Madras, to his Brother, at WORCESTER, May, 1851:—"Tell LEA and PERRINS that their Sauce is highly esteemed in India, and is, in my opinion, the most palatable as well as the most wholesome Sauce that is made."

EXTENSIVE FRAUDS.—Lea and Perrins having discovered that several of the Foreign Markets have been supplied with spurious imitations of their "Worcestershire Sauce," the labels of which closely resemble those of the genuine Sauce, and in one or more instances with the name of L. and P. forged, they have deemed it their duty to caution the public, and request purchasers to see that the names of Lea and Perrins are upon the Wrapper, Label, Stopper, and Bottle.

L. and P. further give notice that they will proceed against any one who may infringe upon their right, either by manufacturing or vending such imitations, and have instructed their correspondents in the various parts of the world to advise them of such infringements.

Wholesale and for Exportation by the Proprietors, Lea and Perrins, Worcester; Cross and Blackwell, and other Oilmen and Merchants, London.

CAUTION!—The great superiority of ELLWOOD'S PATENT AIR CHAMBER HATS and HELMETS over all others, for Tropical Climates, has induced some persons to offer to the public useless imitations, bearing some outward resemblance to them, but totally devoid of their good qualities; the Public is, therefore, respectfully cautioned to observe that NONE ARE GENUINE UNLESS THEY BEAR THE NAME OF THE PATENTEES ON THE LINING.

The Patent Air-chamber Hats and Helmets to be had wholesale of J. ELLWOOD and SONS, 24, Great Charter-lot-street (S.), London.

OVERLAND ROUTE.

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., via EGYPT.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY book Passengers and receive Cargo and Parcels for Gibraltar, Malta, Corfu, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers, leaving Southampton on the 4th and 20th of every month. Per Scowfell, for Hong Kong: Mr. W. Bourne.

THE THIRD CHINA WAR.

The island of Chusan has been placed in charge of an Allied Commission, composed of Mr. Hughes, of H.M.'s Consular Service; M. de Méritens, Attaché to the French Legation; and Capt. Gritton, R.M. They have published proclamations, intimating their authority, and forbidding anyone to establish himself at Ting-Hai without their permission. Sir Hope Grant was to proceed on the 30th May to the North, Gen. Napier had gone. A fleet of transports, with the following troops, was on the point of starting North:—Beddingfield's Battery, Pennycuik's Battery, the 2nd Battalion of the 60th Rifles, the 3rd Buffs, the 2nd Battalion of the 1st Royals, the 1st Battalion of the 31st Regt., the 44th Regt., with the 8th and 19th Punjab Infantry.

In order to assimilate the pay of the European Regiments with that which they receive in India, the pay of every European non-commissioned officer and soldier has been raised 2d. per diem.

The artist of the *Illustrated London News* and others are accompanying the expedition.

Mr. Thomas Dick, who has resigned his interpretership in the Supreme Court of Hong Kong, has been appointed an interpreter to the Force, at a salary of £500 per annum, and is attached to the Commissariat Department.

The *Forest Eagle*, and the steamer *Azof*, both chartered by H.M. Government, left Shanghai on the 3rd May for Japan. The former took a large portion of the military train who will be employed in the transport of horses to the rendezvous; the latter will keep up communication between the ports of Japan. The *Sin Tuck-kee* go down is being prepared for the reception of 200 of the Royal Marines now on board H.M.S. *Assistance*, the remainder will be transferred to the troop-ship *Octavia*, hourly expected from Chusan. The *Assistance* will then proceed to Hong Kong for more troops.

(FROM ANOTHER CORRESPONDENT.)

Up to the present time nothing whatever has transpired in respect to the specific operations which it may be the intention to undertake in the neighbourhood of the Peiho, nor does it seem probable that anything definite will be determined on until the arrival of Lord Elgin, as the main body of the English portion of the expedition force is still encamped on the Cowloon shore of Hong Kong harbour, the movement to the north having, in reality, only commenced during the past week (with the exception of the arrival of the 67th and 99th regiments at Chusan last month.) The following troops have embarked and sailed for Chusan since the 14th inst.:—1st and 2nd Foot; left wing, 31st Foot; seven companies 44th Foot, 2nd battalion 60th Rifles, and two regiments of Seik Infantry. The whole of these regiments are in sailing transports, and will not be towed. It is not expected in the present stage of the South-West monsoon that they will reach their destination much

under one month from the date of their sailing from here. The 67th, 99th, and 400 marines are now in peaceful occupation at Chusan, where there is no doubt they will be a great acquisition to the revenue of the place.

Lieutenant-Colonel Barry's Armstrong battery is still at Cowloon, and Major Millwards' which left England at the same time in the *Himalaya*, in^d January last, arrived here two days ago in the *Imperatrice*, twenty-four hours after the English mail came in, which the *Imperatrice* had preceded from Suez fourteen days. Probyn's Horse (Sikh Cavalry), 600 strong, embark with their horses to-morrow for Chusan, in eight transports. The other Sikh Cavalry corps (Fane's Horse) 400 strong, with seventy troopers of the King's Dragoon Guards, will remain in the meantime at Cowloon. Major Hacket, Ensign Rennie, Paymaster Hart, Assistant-Surgeon McDowel, and 120 men of the 44th regiment, embarked the day before yesterday in the *Forerunner* transport as a guard over Chinamen enlisted for service in the military train. This is a precaution found indispensable, owing to the large number of them that desert as soon as they receive the advance of two months for which they stipulate prior to embarking for service in the north. Upwards of 5,000 of these enterprising celestials have already been enlisted, and the corps now constitutes a supplementary battalion to the Military Train, and from its equipment consisting solely of long bamboo poles for carrying weights, it has been facetiously styled the "Bamboo Rifle Brigade," which *sobriquet* the corps is now generally known by. The men composing it are all Celestials. They are provided by the Government with food and clothing, and receive as pay nine dollars per month (equal at present to about £2 3s. 4d.), which is the lowest sum that John Chinaman has felt inclined to take for the peculiar and not over patriotic service in which he is about to embark. Enlistment goes on briskly, but the great difficulty is the retention of them afterwards, as they avail themselves of every opportunity to slip off with their two months' advance of pay, and then re-enlist, their identification (short of branding their skins) being a physical impossibility, from the close resemblance that they bear to one another.

The following, it is believed, will be the brigades, with their respective commanding officers, though it is not improbable that some alteration will be made in the brigadiers, nothing yet being definitely settled with the exception of the divisional commands:—

1ST DIVISION.

Major General Sir John Michel, K.C.B.

1ST BRIGADE.—Col. Stavelly, 44th Foot. 1st and 31st Regts., with 1 Sikh Regt.

2ND BRIGADE.—Col. Sutton, 31st Foot. 2nd Foot, 60th Rifles, 5th Punjab.

One Armstrong Battery to the division.

2ND DIVISION.

Major General Sir Robert Napier, K.C.B.

1ST BRIGADE.—Col. Jephson, 2nd Foot. 3rd Buffs, 44th Foot, and 8th Punjab Infantry.

2ND BRIGADE.—Col. Reeves, 99th Foot. 67th 99th Regts., 1 Sikh Infantry.

One Armstrong Battery to the division.

Hong Kong is garrisoned by the Provisional Battalions, consisting of the depots of the regiments proceeding to the North, and the 21st Madras Native Infantry. The 87th Fusiliers have proceeded to Canton, where they are to be stationed. The following detachments arrived by the English steamer on the 20th inst. :—60th Rifles, Lieut. Morah, and one sergeant; 31st Foot, Ensign Mansfield and 6 men; Army Hospital Corps, Staff Surgeon Rennie, M. D., three sergeants and fifty men. The Army Hospital Corps have arrived most opportunely, a large detachment of this corps being in the Melbourne steam-transport, which is not likely to be here for some time, owing to the accident to her machinery; and we believe that the want of the men was beginning to be felt by the medical authorities. Sir Hope Grant and Admiral Hope are here at present; Generals Michel and Napier have gone North. The greater portion of the French force has left this. One of their largest transports, the *Isere*, has been lost on the coast since leaving here for the North; all hands have been saved, but she went down with 400 tons of gunpowder, and all the harness for their field artillery. The *Adelaide* steam storeship has arrived at Singapore, where she remains until the arrival there of the remainder of the King's Dragoon Guards; she will then proceed on to this place with the vessel in tow.

JAPAN.]

It is announced by the present mail that the Prince Regent has been assassinated, and the reports lately received, *via* America, as to the attempt on the Emperor, are untrue. The position of trade and general matters continues still to be very unsafe.

CHINA.

HONG KONG.

! (From a Correspondent.)

The Mails from London of the 10th of April reached this on the 20th of May.

I have deferred writing until the latest moment, in hope that I should have some intelligence of importance to transmit from the North, by the mail leaving to-morrow, the 23rd. The Shanghai mail has, however, brought no items of importance, and with the exception of a *canard*, not received here, of the death of the Emperor of China, political news is stagnant; we hear, indeed, of large arrivals of French who have already begun to land, but active operations seem to be quiescent; this, however, is no sign of dilatoriness on the part of the Allied Powers, but must be attributed more to the news which you have yourselves forwarded from England. Until the arrival of the Ambassadors nothing demonstrative will take place; it seems to be an accepted thing that diplomacy will be carried to the utmost to produce a bloodless result. The great armaments which are assembled on and about the Chinese waters are at present to be regarded more as an *argumentum ad rationem* than a direct hostile force. The wish is, that the ends desired be obtained if possible without firing a shot, and unless Chinese obstinacy prevails to a more than usual degree, such will be the result. Those officers who were engaged at the disastrous attempts at the Peiho make no secret of their fears that the day for their quittance is far off, and that a peace will be arranged, which will not leave them the opportunity of wiping out the mud of that affair.

We hear also that the Chinese are fortifying the entrances with great activity, and if those who have received shot can judge of the senders, the commandants of the Chinese forts have European faces and names ending in "off." The general impression, in fact, is, that Russian engineers are engaged. Much of this, however, must be received *cum grano*. News from Peking is proverbially false, and the presence of a few Russian adventurers should not be allowed the weight which has been given to it by many here.

In all contests with Chinese the policy undoubtedly is procrastination, and in spite of their endeavours to make the country appear wealthy, we may be assured that the real truth is the reverse. The Chinese are not, as a nation, rich, though this is a secret which they studiously conceal, even from themselves. They will bluster to the last moment, and even deceive their own officials as to the results of any action which might take place. Fraudulent with worse than worst Thessalian fraud they are to be trusted only while the influence of the almighty dollar is patent. The very town of Hong Kong, under the rule of the English, is not safe from them at night, and in the north we hear that single individuals venturing amongst them are frequently murdered. A sergeant of Marine Artillery, who not long ago left the shore at Shanghai for his ship, was lost for three days, and then found floating with his skull beaten in. A private of the same corps was despatched in a similar way. It would appear that these unfortunate men left in boats when attacked from behind. They were soon rendered senseless. When I was in Rome and Naples I heard of assassination, but the cities of China will equal them, and that is saying much.

We hear to-day that the admiral is to leave his flag ship, the *Chesapeake*, stationed here, and will, on the 27th, take a steamer to the North. This may be true, and it is endorsed by the *Daily Press* here. I also hear that he will await the arrival of Lord Elgin and the Baron de Gros. It is not material which course he takes, as no manifestation of force will take place, except to repel force used against the passage of the diplomatists.

This town is now like a fair; streets thronged with every description of uniform and cast of countenance. The Parsee, the French, the Sikh, and the Jack Tar, make a confused medley amongst Malays, Chinamen, and nondescripts. To attempt any lengthened description would be to piracise on Albert Smith, and, after all, answer no practical purpose.

I leave from here the day after to-morrow for the north, and hope by next mail to have some intelligence of importance to

communicate, more than the fact of the existence of a large force at Hong Kong, and a general ignorance as to the ultimate uses to which it is to be turned.

The Commissariat department have in this expedition behaved so as to deserve great commendation; and the Crimea has been a very useful lesson, bitterly though it was bought. All our vessels have arrived, with the troops in an unusually healthy and satisfactory condition. If care in providing for the wants of an expeditionary force aid the success of it, ours has every chance of being victorious. Supplies are bought up and forwarded; arrangements for the sick and wounded are made, with every care for their comfort. The greatest good feeling seems to exist among all concerned, and if the attack is sounded it will be answered by a vigorous response.

The mail will close almost directly, and having touched upon the most important part of the expedition, I shall conclude, hoping for more matter and less argument next time.

At Swatow, Mr. McCunn, an Englishman in the Chinese Customs, has been murdered by the Chinese. An Englishman named Lawrence, in the Customs at Canton, was killed by the bursting of a gun.

Mr. Tarrant is still confined in the Debtors' Gaol. A correspondence with the Governor has been published.

The action of Mr. Caldwell against Mr. Murrow, the editor of the *Daily Press*, has been postponed owing to the illness of the latter. Mr. Anstey had been asked to proceed from Calcutta to conduct the defence. Mr. Ward, the American Minister, has taken some steps to contradict Lord Palmerston in regard to his statement in Parliament that the American Minister went to Peking in a box.

SHANGHAI.

No apparent change has occurred in the position of diplomatic affairs, except that Kweiliang has been made senior guardian to the heir apparent, and it is rumoured that another Mantchu of high rank has been appointed to deal with Foreign affairs. The *North China Herald* published a report that despatches had arrived from Peking, containing a pacific overture from Pang, one of the chief Secretaries of State, and contradicted it in its next issue.

The Shanghai races are said to have gone off most miserably. The first day was very cold and windy; it was therefore very unpleasant to stand and look on.

MALACCA STRAITS.

SINGAPORE.

The British steamer *Fanqui*, Captain Baker, from Glasgow the 3rd March last, arrived here on the 30th May, en route for Hong Kong.

The godowns occupied by Messrs. Spottiswoode and Co., and others, were sold, on the 23rd March, by public auction, for the large sum of \$86,500 dollars.

The Dutch steamer *Draak* has again started, for the purpose of underrunning and repairing the electric cable hence to Batavia, the communication by which continues interrupted.

COMMERCIAL REPORT.

The present mails bring us dates from Shanghai to the 15th from Hong Kong to the 23rd, and from Singapore to June 1.

The markets for imports continued to be depressed, owing to the certainty of hostilities on the Peiho. No interruption, except that of a normal nature, from the rebels is reported in the export trade.

A correspondent writing from Rajpore on the 24th May, says it was reported that the Union Bank of London had stopped payment, and that the Delhi Bank had arranged for a draft he held on the Union Bank, drawn by them, to be honored by the Agra Bank, in case the report proved true, which, happily, it is not. Another correspondent writing from Mussoorie, on 22nd May, also mentions the same report as current there. This report must have some connection with the Pullinger frauds, the news of which may have reached Bombay by the mail of 18th April, and been telegraphed erroneously to the upper provinces of India.

EXPORTS.

TEA.—At Foo Chow the new season's crop was daily expected, and the first shipment would be made in June. The prices are expected to open at 33 taels for the best Kaisows. The settlements of the fortnight are confined to 250 chests and 450 half-chests Congou, at 9 to 18½ tael for low dusty to middling flavoury, the stock being reduced to 1,500 chests very low and ordinary. At Can-

ton the settlements of the fortnight have been a mere bagatelle—say 1 chop, Congou to 31 taels; 5,000 boxes scented Orange Pekoe, 17 to 18 taels; 100 half chests plain Orange Pekoe; 800 taels Oolong, and 150 chests Flowery Pekoe. The stock unsold is 4 chops Congou; 3,000 half chests country packed Young Hyson; 800 half chests ditto; Imperial and Gunpowder, and 1,000 boxes scented teas. Regarding the new teas, the Tyshan Congous should have been at market some weeks ago—their detention is attributed to the transit duties on them not having been arranged. The tea men talk of 33 taels for them, which is double the usual price. The quality is good, but not so good as last year. The leaf for making scented teas is reported short and inferior. A few thousand piculs have been smuggled to Macao to the great chagrin of the Customs authorities. As for the new Oonams and Oopacks, musters are expected on the 20th of June, but no hope can be entertained of the stock arriving until the insurgents are put down. Shanghai: The transactions of the fortnight have been so insignificant, owing to the paucity of supply and the total absence of current descriptions of black, that they are hardly worth noticing, except to show the excessive rates shippers are willing to pay. The season may be said to be closed.

RAW SILK.—Shanghai: Buyers having evinced a strong disposition to invest, notwithstanding the refuse character of the remaining stock, more business has been transacted during the fortnight than could have been reasonably anticipated. The settlements reported exceed 2,000 bales, making a total to date of 64,500 bales (including 4,000 bales Japan) for the season, or 14,000 bales less than at same period last season. The settlements show an advance of 5 to 10 taels on the common sorts. The unsold stock is computed at 1,200 bales. The supplies from the country come in very sparingly, and consist of the lowest descriptions, being principally common Throws, and kinds usually considered unfit for export. In fact, it may be said that the season is over and the market swept. The new silk will be late, and it is not expected at market until the middle of next month—the extent of the yield is matter of conjecture. The following are the current quotations:—Tsatiee, No. 1 and 2, taels, none; 3, 385 to 390 per picul; 4 and 5, 350 to 370. Taysaam, No. 1, 350 to 360.

EXPORTS FROM SINGAPORE.

Per Rocket to Boston: Gambia, 1,000 bales, or 1,842 piculs; rattans 30,744 bundles, or 1,362 piculs; tea, 1,295 boxes.

EXPORTS FROM MANILA.

Per Malay, for Boston: hemp, 8,118 piculs; sugar, 4,000; sapan wood, 362; cigars, 327 mila.

Per Nautilus, for Boston: hemp, 2,240 piculs; sugar, 8,575; sapan wood, 274; cigars, 10 mila; indigo, 104 qqls.

Per Dorothy Jobson, for Melbourne: sugar, 6,000 piculs; cordage, 282; cigars, 10 mila.

The picul is 133½ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents. and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

	Bank. Gs. 7d.	Private. Gs. 7½d. to 6s. 8d.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From Liverpool: May 11, Sappho. From New York: 1, Pursuit.

At HONG KONG, MACAO, AND CANTON.—From London: May 10, Sir W. Peel; 17, Julia; 20, James Shepherd, Hoang Ho; 21, Flying Cloud; 22, Shakspeare. From Liverpool: 14, Albatross. From England: 15, H.M. G. B. Weazel; 21, H.M. G. B. Hardy. From New York: 22, Mandarin. From Cardiff: 10, Canton; 14, Frisia Westphalia; 17, El Dorado; 20, Ardenraig, Mischief; 22, Rebecca. From Newcastle: 9, Spray. From Hartlepool: 21, Carausius. From France: 7, Loire; 16, Andromache; 18, Perseverance. From Suez: 21, Imperatriz.

At SINGAPORE.—From London: May 16, Florence Nightingale; 22, Steamer Kersonese; 25, Pioneer. From Liverpool: 19, Hawthorn; 25, Bangoon; 31, Gazell. From Sunderland: 17, Sungwan; 24, Jacobus. From Falmouth: 26, Eliza Hands. From Glasgow: 30, Steamer Fan Qui. From England: Steamer Melbourne. From Boston: Hollander.

SAILED.

From SHANGHAI.—For London, May 13, Beverley.
From Foo-Chow-Foo.—For London: May 2, Clara; 5, Star of the North.

From HONG KONG, MACAO, AND CANTON.—For London: May 16, Carnatic. For New York: 15, Waverley. For Havana: 5, Governor Morton.
From SINGAPORE.—For London: May 23, Kate Cleather, Zambia; 29th, Hidalgo.

LOADING.

At SHANGHAI.—For London: Invincible, Kate Hooper. For New York: Union.

At HONG KONG, MACAO, AND CANTON.—For London: Southern Cross. For Europe: Mercedes. For New York: Judge Shaw. For Havana: J. Wakefield, Live Yankee. For San Francisco: Iconium, Moonlight.

At SINGAPORE.—For London: Jane Gray, John and Isabella, Napoleon III., Prince Alfred, William Stewart. For Liverpool: Eliza Hands, J. Waddington, Sebastian Cabot, Tigris, Versailles. For New York: Keystone, Steamer Louis. For France: Olivier.

FREIGHTS AND CHARTERS.

At SHANGHAI.—For London: £2 for tea, £4 for silk. For New York, \$12 for tea, \$20 for silk. A good demand has been experienced for coast work and Government transport service, but rates are the same as before.

At HONG KONG, MACAO, AND CANTON.—For London: £3. For New York: \$10 to \$12 general merchandize, \$20 silk. In consequence of the Government requirements not being satisfied, and the want of ships to proceed to the rice ports, a large business has been done during the past fortnight. The Norma, Alice, Thomdick, Jessamine, Alhuera, Negotiator, and Norden have been taken up by the British authorities at 17s. 6d. per ton with three months certain charter, who have purchased the steamer Feisun for \$120,000. The British Admiral has also chartered the steamer Scotland belonging to W. S. Lindsay and Co., of London, at \$8,000 per month—making about 92,000 tons taken up by the British Government for transport purposes.

At MANILA.—For Liverpool: £3 15s. for unclayed sugar, £4 for hemp. For New York: \$20 for sugar, and \$10 per 4 bales of hemp. Ships are still wanted both for Europe and United States, there being a good deal of produce awaiting shipment.

At SINGAPORE.—For England: £2. 10s. to £2. 12s. 6d. for tin, gambier and sago-flour, and £3 for pearl sago, black pepper, and similar light cargo. For New York: \$10 to \$11. There is scarcity of light freight, but dead weights is in abundance.

CASUALTIES.

HONG KONG.—H.I.M. transport Isere, with nearly 1,000 men on board, 400 barrels of gunpowder, add other stores, in steaming into the harbour of Amoy on May 17th struck on a rock, broke her back, and became a total wreck.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BURNS—On the 26th June, at Brompton, near Chatham, the wife of Dr. Burns, surgeon, R.N., of a son.
DE STACPOOLE—On the 21st ult., at her residence in Paris, 51, Rue Jean Goujon, Champs Elysées, La Marquise de Stacpoole, of a son.
GABRIEL—On the 25th May, at Singapore, the wife of Mr. Johannes Gabriel, of a daughter, stillborn.
LAZAROO—On the 13th May, at Singapore, Mrs. P. Lazaroo, of a daughter.
McMURDO—On the 20th May, at Hong Kong, the wife of Capt. McMurdo, of a daughter.
NICOLSON—On the 12th inst., at 15, William-street, Lowndes-square, the wife of Captain Sir F. Nicolson, Bart., of a daughter.
PARKES—June 26, at Upper Berkeley-street, the wife of H. S. Parkes, Esq., C.B., H.M. Commissioner, Canton, of a daughter.
PESTONJEE—On the 25th May, at Singapore, the wife of Pochajee Pestonjee, of a son.
SANDILANDS—On the 11th inst., at Cheltenham, the wife of the Rev. P. Sandilands, of a son.
WOOLLETT—On the 11th inst., at Doddington-grove, Kennington, Mrs. W. Woollett, of a daughter.

MARRIAGES.

LEVESON—IVESON.—On the 4th inst., at Christ Church, Savernake, by the Rev. H. G. Merriman, uncle of the bride, Edward John Leveson, Esq., of Singapore, to Mary, eldest daughter of John Iveson, Esq., of Furze Coppice, Savernake Forest.
LOGAN—RONALDSON.—On the 27th June, at St. John's, Hampstead, by the Rev. T. Ainger, incumbent, John Logan, Esq., of Mount Elephant, Victoria, to Barbara, youngest daughter of the late John Ronaldson, Esq.

DEATHS.

BONHAM—On the 26th ult., at Walpole-street, Chelsea, Sophia Elizabeth, daughter of Lieut.-Col. J. B. Bonham, late 50th Regt., aged 12.
COCHRANE—The infant son of Admiral Sir Thomas and Lady Cochrane.
DENT—On the 5th ult., on board the *Nemesis*, Capt. W. Dent, 22nd M.N.I.
LE MESURIER—On the 3rd inst., at Genoa, Augusta Rose, daughter of the late Edward Le Mesurier, Esq., aged 33.
PECHELL—On the 29th ult., at 27, Hill-street, Vice-Admiral Sir George Brooke Pechell, Bart., M.P. for Brighton, aged 71.
GOIS—On the 17th May, at Singapore, Ursula, the wife of Mr. H. Gois, aged 19 years.
HARVEY—On the 15th May, at Singapore, Mr. Wallace B. Harvey, of Glasgow, after a long illness.
LITTLEWOOD—On the 24th May, at the residence of Captain Merritt, at Singapore, Major R. J. Littlewood, of the Bombay army, aged 65 years.

COMMERCIAL POSTSCRIPT.

SATURDAY AFTERNOON.

The tea sales on the 10th and 11th included 17,000 packages—of which the large proportion of 10,000 were for unreserved sale—and passed off heavily at a reduction of one penny per lb. Some lots of common Congou sold at 1s. 3½d. to 1s. 4d. for cash.

Some of the shareholders in the Union Bank of London have threatened proceedings against the trustees and directors for the Pullinger frauds. At the meeting on the 11th, however, the report and resolutions, after some fiery discussion, were passed.

Sir James Brooke has purchased a screw steamer in Port Glasgow to act against the natives on the coast of Borneo.

Messrs. Robert Freeland and Co., of Manchester, have suspended.

ARRIVALS NOT INCLUDED IN TABLES.—July 9, at Deal, from Akyab, Bostonian. June 30, at Stockholm, from Batavia, Prins Carl. July 7, at Texel, from Batavia, Jan van Brakel; from Singapore, Johanna Catharina. June 9, at Demerara from China, Thomas Mitchell. May 20, at Valparaiso, from Shanghai, Clarendon's; 21, Illinani.

DEPARTURES.—July 7, from Queenstown, for Shanghai Dora; 5, from off Dungeness for Java, Elizabeth Antoinette; 6, Jawbus; 5, from off Dover, for Singapore, Lioness, (Dutch barque) from Cardiff, for Hong Kong, Pieler, for Singapore, Loopunt; 8, for Hong Kong, Lady Hobart; 8, from Liverpool, for Woosang, Greyhound; for Singapore, Frederick VII.; from off Hastings for Batavia, America; 9, from off Dover, for Batavia, Odilia Margrieta, Johannes Christian; 7, from Cardiff, for Hong Kong, Octavia. June 2, from Santa Cruz, for Manila, America. July 10, from off Dungeness, for Batavia, Maria Magdalena. July 9, from off the Start for Singapore, Louis; for Batavia, Valparaiso; 10, from Cardiff, for Shanghai, America; 11, from Liverpool, for Singapore, Lefanto; Harvest Home; 4, from Liverpool for Singapore, Suometar; 11, from Sunderland, for Hong Kong, Nelly; 13, from London, for Shanghai, Kent.

SPOKEN.—Oriental, Batavia to New York, June 17, off Nantucket South Shoat; Stad Dockum, Batavia to Amsterdam, May 23, 23 S. 68 E.

LAI'D ON AT LONDON.—For Singapore and Penang, Roseaw; Shanghai, George Washington Harkaway; Singapore, Sea Bell. At Liverpool.—For Woosung, Gorge West; Hong Kong, Emma Jane.

CASUALTIES.—The *Decima* (Dutch barque), Akkerman, from Batavia to Amsterdam, put into the Mauritius on the 1st of June leaky, and was discharging there on the 6th of June. The *Graaf van Heyden Reynestejn*, Wameteke, from Batavia, arrived at Amsterdam, 11th July, with bow stove and other damage, having been in contact, in the Great North Holland Canal, with the *Ortelius*, Groote, from thence to Batavia.

MERCHANT STEAMERS IN CHINA WATERS.—Engaged in the Canton, Hong Kong, and Macao traffic.—British: Feisun, Fei Ma, Sir Charles Forbes, Sir J. Jeejeebhoy, Hong Kong, Iron Prince, Mee Lee. American: Pak Wan, Willamette, Cumia, Spark. Portuguese: Inveigado, Shamrock.

ENGAGED IN THE COAST TRAFFIC BETWEEN SWATOW, AMOY FOO CHOW, AND SHANGHAI.—British: P. & O.'s steamers, Chusan, Formosa, and Rajah; Messrs. Jardine, Matheson, & Co., Chevy Chase, Hellespont; Messrs. Dent and Co., Yangtze; Mr. Lapraik's Undine; Messrs. Burd and Co.'s Toey-wan; Messrs. Remi, Schmidt, and Co.'s Remi.

POSTAL REGULATIONS.

LETTERS and Newspapers are despatched to China, Singapore, &c., by two routes, viz. via Southampton, on the 4th and 20th of each month; and via Marseilles, on the 10th and 26th. They reach their destination at the same time. Books are forwarded through the Post-office to China (Hong Kong only). Books must be packed in covers open at each end. Each packet may contain any number of Books or Pamphlets; but it must not exceed 3 lbs. in weight. The Postage on Books is payable in advance by stamps.

THIRD CHINA WAR.

(COMMUNICATED.)

Three millions eight hundred thousand pounds are asked by the Chancellor of the Exchequer as this year's estimated expenditure, for the expedition against China—sometimes called war in China, at other times with China—just as it best suits the purpose of the Speaker. First it was war in China, as the Premier called it; then came the Elgin treaty; and, finally, Mr. Bruce's peaceable mission, resulting in the Peiho disaster. Why? because, instead of going, or attempting to go, with a reasonable escort, he must go armed to the teeth, and thus set at naught all professions of perpetual peace and friendship. Mr. Bruce is fortunate; appointed under the Derby Administration, furnished with Lord Malmesbury's instructions, he is sustained by the Administration of which his brother is a member, and thus both parties support him. Called from an easy life in Egypt, with a salary of £8,000 per annum, supported by an outfit of £3,000, of course he could not do otherwise than endeavour to find work to justify this liberal remuneration.

Her Majesty's Government has approved Mr. Bruce's proceedings, and the people's representatives have sanctioned them; therefore, the *l'as* said about them the better.

No doubt this time it will be war with China, should its Government not become wise in time, and that it will be as, of this our faithful ally and partner in this concern will take care. I fear that the present affair settled, other difficulties will soon be created to cause another expedition. Toward China we act as to an uncivilised nation, but require her to *at t* wards us as one of the most civilised nation.

Mr. Bruce, in his letter to the Senior Secretary of State, Pang-Wan-Chang, dated in March, 1860, says, "The undersigned has further to observe, that the outrage at the Peiho has compelled her Majesty's Government to increase her forces in China at a considerable cost, and the contributions that may be required from the Chinese Government towards defraying this expense will be greater or less according to the promptitude with which the demands above made are satisfied in full by the Imperial Government." Mr. Bruce, in his despatches to Lord John Russell, dated Shanghai, the 7th of March, 1860, says, "I have been influenced in this decision by the consideration that the French were asking positively for an indemnity, while we were demanding none. Mature deliberation on all such intelligence as I have been able to collect assures me at the same time that it is not the money question which will drive the Chinese Government to war. *The treasury is empty, but the mercantile community continues solvent, and apprehend no difficulties on the score of indemnity.*" No doubt Mr. Bruce considers it advantageous, as regards the Chinese Government, that the proposals of the two Powers should be, as much as possible, in harmony. Most convenient this harmony is, as it enables now the one, and then the other, ambassador to justify his acts, because his honourable colleague suggested or coincided in his own suggestions.

Lord Elgin failed to discover how the indemnity could be obtained from an empty exchequer, but Mr. Bruce knows China better. He plainly suggests that the uncivilised China mandarins can squeeze any amount out of the Chinese commercial community.

Of course France will demand, say another four millions, making a sum of only eight millions sterling. Mr. Gladstone most probably, when the discussion about the vote comes on, will tell the House that it is only an advance, an investment, and of course the House will be satisfied, not troubling itself about the question if we go to war against the Chinese Government or against the Chinese commercial community. What will our Manchester friends say to a squeeze of eight millions from their customers?

PARLIAMENTARY INTELLIGENCE.

THE CHINA WAR.

In the HOUSE OF COMMONS, LAST NIGHT, Mr. B. COCHRANE moved, by way of amendment, "That in order to remove one great obstacle of peace with China, the British Plenipotentiary be instructed not to insist on the fulfilment of the third article of the Treaty of Tien-tsin, by which his Majesty the Emperor of China agrees that the ambassador, minister, or other diplomatic agent, appointed by her Majesty the Queen of Great Britain may reside with his family and establishment, permanently at the capital, or may visit it occasionally, at the option of the British Government." Lord JOHN RUSSELL objected to the form of the motion. The instructions to ambassadors emanated from the Sovereign, and could not with propriety be altered by the House of Commons. The proper mode of proceeding would have been by an address to the Crown. He proceeded to combat the policy advocated by the hon. member, insisting upon the expediency of securing for the British envoy the same privilege of residence at Peking already enjoyed by the Russian ambassador. The amendment was negatived without a division.—A vote of £443,000, as repayment to the East India Exchequer, on account of expenses incurred in China, was then moved by Mr. S. HERBERT. In the course of the discussion which ensued, the CHANCELLOR of the EXCHEQUER entered into various details respecting the financial and other results arising or anticipated from the war. He also vindicated his own consistency, and that of some of his colleagues, in opposing the war with China in 1857, and supporting the present one. Lord J. RUSSELL also justified the declaration of war, which he contended had become indispensable to vindicate the honour and dignity of England, after the outrage committed on the Peiho. It was a terrible calamity, but one which the present Government could not avoid, and which they had inherited from their predecessors. Mr. T. BARING observed that the war was said to be waged for the promotion of trade. The fact was that traders did not wish for war, and felt the gravest suspicions of diplomacy. Lord PALMERSTON said that trade could not be safe in any country where Englishmen did not enjoy rights and securities formally recognised and secured by treaty. The vote was agreed to.

The Times of this morning, in reference to this debate, says:—

"Mr. Gladstone washes his hands of the deficiency altogether. 'The truth of the matter is,' he says, 'that it is utterly impossible to estimate the entire charge for a war arising under circumstances such as those in which that with China originated.' This is a lofty style of dealing with all objectors; but common taxpaying people may persist in asking why Mr. Gladstone did not say all this before. Why is it that, believing it to be impossible to calculate for one year in advance the expense of a war in China, he committed himself to a distinct estimate four millions short of the reality, and, so far from suggesting that this estimate was necessarily fallacious, induced the House of Commons, upon the strength of it, to tamper with the fixed revenues of the country?"

Continental Intelligence.

FRANCE.

PARIS, July 11, 1860.

It is said at the War-office that two new regiments of the line are to be organised, the 103rd and 104th. The 101st and 102nd regiments were raised at the declaration of war against Austria. These regiments are now in China. All the French cavalry are in future to be armed with long rifled carbines.

TELEGRAPHIC COMMUNICATION WITH ASIA.

We understand that a vast plan for establishing a permanent telegraphic connection by land between Europe and the principal countries of Asia has been submitted to the Emperor Napoleon. The projector proposes to commence his line at Paris, conducting it through Belgrade, Constantinople, Teheran, Calcutta, Malacca, Canton, Peking, &c., to Ichings Straits, where a sub-marine cable will carry it over into North America. Skirting the western coast of that vast continent, the line would pass through San Francisco, and thence through Mexico, Panama, Lima, and Valparaiso. Here, turning off at a right angle, it is to cross the continent through Buenos Ayres, and end at Rio de Janeiro. Will not, we are inclined to ask, the barbarous state of many of the countries through which the line is to pass render its security extremely precarious?

RUSSIA.

ST. PETERSBURG, July 5.

According to an official report published in the *Wiadomosti*, two discoveries had been made by the Russian squadron, one of them being the port of Nachodka, in 42 deg. 45 min. N.L., and 133 deg. 3 min. 30 sec. E.L. from Greenwich; the other was a rocky island in the Sea of Japan, called by the Russians Waywoda—the name of the corvette that discovered it—and situated in 42 deg. 14 min. 30 sec. N.L., and 137 deg. 17 min. E.L. According to this report the English charts of the coasts of Corea and Nipon are very incorrect. The Russian surveying officers have gone over the whole of the ground and prepared a new and correct set of charts for those waters, which are now being engraved and will be published by the Russian Naval Department.

In the sitting of the Geographical Society M. Abramoff read an interesting paper on his late visit to the Lake of Nor-Zaissan in Chinese Djungaria, and situated to the south of the Altai chain of mountains. This vast and nearly unknown lake lies between 47 deg. 50 min., 48 deg. 30 min. N.L., and 101 deg. to 108 deg. 50 min., E.L., and measures 130 wersts in length, its breadth varying between 15 and 30 wersts:—

"According to M. Abramoff the area of the lake is 3,763 square wersts, and the surface of the water 1,800 English feet above the level of the sea. Its banks are low and mostly covered with reeds. From the month of November to the ensuing May the lake is frozen over. It contains great abundance of fish of all sorts. The surprising richness of this fishery has attracted a large number of Russians who, without much caring for its being on Chinese territory or obtaining permission from the Chinese authorities, have established themselves. The Chinese officials wink at the illegality of the proceedings, but are not averse to deriving some profit from them in the shape of an annual tribute. The Governor inquires most kindly after the health of the Czar, the inspector hopes most devoutly that the Emperor of China is quite well, the Amban would be delighted to hear that the Russians have no cause to complain of any excesses or irregularities committed by Chinese subjects, &c. These stereotype questions having been put and satisfactorily answered, the Amban expresses his hopes that the amicable relations existing between the two nations may never be interrupted. As for the presents he at first flatly refused to accept them, but on being pressed he relents by degrees till it ends in his accepting them with gratitude.

The duties of the Governor-General of East Siberia have so much increased since the annexation of the Amoor country, that it has been found needful to relieve him of a part of them. Major-General Korsakoff has been therefore appointed his *alter ego*, and carries on the business of the country as Vice Governor-General, till the return of Count Murawieff-Amoorsky to Irkutsk in the ensuing autumn.

Last week an Embassy from the Tycoon of Japan arrived in this city with some valuable presents from that potentate to the Emperor of Russia. Amongst them is a saddle of the most beautiful and novel workmanship, which is looked upon by all who have seen it as a most extraordinary production of Japanese art, and is the wonder of the day here.

HOLLAND.

AMSTERDAM, July 8.

The elections being now concluded, the Second Chamber of the States General is convoked for the despatch of business on the 10th inst., at two P.M. One half of the members went out by rotation, but a good many of them have been re-elected.

The Netherlands Trading Company has again advertised for

tenders for more vessels for Java. They must be either new ships or such as have already been chartered by the company in 1858 or 1859, and must be ready to sail by the middle of this month. Those tendered and now on their passage out must be placed at the disposal of the factory at Batavia on or before the 16th November next. The same company has also advertised for tenders to charter a vessel of 500 tons to load a cargo of piece goods from this country to Sumatra, and bring back a return cargo of native produce. This ship must be ready to sail by the 10th inst. either from Amsterdam or Rotterdam, as may be required. At the same time they advertise for tonnage in a vessel loading for Sourabaya to take out a steam engine of 80-horse power and about 16 tons weight, to sail the end of this month.

From Nieuwe Deep we learn that the chartered transport *Amsterdam*, Captain Wiegmont, has sailed from that port for Batavia with a detachment of colonial troops consisting of 125 men, under the command of Major Hood, of the Artillery, accompanied by the Lieutenants of the Infantry, W. A. Coblyn and P. van den Abeele.

The committee appointed last session, by the Second Chamber, to examine the Government plan for the emancipation of the slaves in the West Indies, has finished its labours. The report which has been printed for distribution among the members is very unfavourable. It denounces the measure as a decided step backwards, and stamps it as masked slavery. It will no doubt meet with violent opposition, and be eventually lost.

Mr. H. Kleyn van der Poll, hitherto Resident of Bezokie, is appointed to be Resident of Cheribon.

The Colonial Minister advertises for an efficient director of steam engine repairs for five years' service in India at the naval arsenal at Onrust, under the following favourable conditions:—Salary, 300 florins per month (£300 per annum), with a rise of 20 florins per month after three years' service, up to 400 florins; free passage out as Government official, with cabin accommodation and food as first-class passenger, together with a gratification of 500 florins for outfit, and salary to commence on the day of sailing.

UNITED STATES.

NEW YORK, June 30.

The *Great Eastern* arrived here to-day. She reached the dock without the least trouble. An immense crowd assembled and much enthusiasm was manifested. The greatest distance which the *Great Eastern* ran in one day was 333 miles; the short was 254 miles. The greatest speed attained during the voyage was 14½ knots per hour.

The Japanese embassy continued to be lionised in New York, where they arrived on the 16th of June. They received with great cordiality a committee of twenty-four gentlemen from the New York Chamber of Commerce; and, in response to an appropriate address, they replied that they hoped for more extended commercial intercourse between Japan and the United States, and courteously invited the committee to call again and inform the embassy more fully of the desires and designs of the Americans. The reported death of the Tycoon was soon contradicted.

The Embassy sailed this day in the *Niagara* round the Cape of Good Hope.

The brig *Julia D. Rogers* had arrived at San Francisco in twenty-eight days from Japan, bringing highly important intelligence. The Japanese Government is reported to be in a very unsettled state; a large political influence evidently being against the new policy with regard to intercourse to foreigners. It is stated that a battle had been fought near Jeddo, in which a prince had been killed, but no particulars are given. The captains of the foreign vessels in the harbour of Kamajama had been notified to be prepared for an attack, as the Government might not be able to afford them protection. The Government is represented to be considerably frightened at the extent of the defection, and its disposition with regard to carrying out the treaty with America was in consequence vacillating.

COMMERCIAL.

The reception of the Japanese has led to much excitement, and the ceremonies carried out in honour of their arrival on the 16th inst., tended to interfere, to some extent, with business. Considerable transactions have been made in some kinds of Indian goods; sales of 10,000 bags of Manila sugars were made at 7c., usual time, leaving a moderate stock in first hands. Manila hemp is unchanged; stocks in market, and in the hands of manufacturers, are large. Sales of 2,000 bales were made at 6c. to 8c. Sales of 40,000 mats of Cassia were made on the 16th, at 19c. to 19½c.

The market continues to be in good demand for cotton-piece goods for

shipment to China. The exports the past week embraced 3,765 packages, which amounted in value to \$206,199.

The Money Market continues easy at $4\frac{1}{2}$ to 5 on call, and at 5 to 6 per cent. on good 6 months' paper. United States' Bonds, and the better class Railway Bonds, are firm and in good demand. The speculation shares are irregular; standing bills on London closed to-day 109 $\frac{1}{2}$ to 109 $\frac{3}{4}$ asked for Bankers' Bills.

The imports at this port the past week amounted to \$3,860,147. Previously, since January 1st, \$100,182,243; total, \$104,041,390. The total exports for the same time to \$17,657,524.

The statement of the City Bank for the past week footed up as follows:—

	June 9.	June 16.	
Capital	\$69,404,527	\$69,404,527	
Loans	125,431,963	125,399,997	Dec...\$31,966
Specie	23,785,581	24,110,553	Inc. ..\$324,972
Circulation	8,999,948	8,825,786	Dec...171,162
Net Deposits	80,609,983	81,538,654	Inc. ..928,671

The Tariff Bill, be'ore the United States Senate, has been indefinitely postponed, as was predicted.

TEA.—The latest advices from China have imparted more confidence to operators, inasmuch as there seems no speedy prospect now of a peaceful settlement of the existing difficulties with the Western Powers, and the trade have purchased more freely. Speculators, too, have again entered the market, but we cannot learn their operations are based on any other than the ascertained short supply, the prospect of active hostilities, as we understand it, not entering into the chances for profit; &c. In this state of things holders are extremely firm, and business, in consequence, is restricted. We notice among the sales 2,000 half chests Green, in lots; 1,200 ditto Souchong, per *Intervale*; and 500 ditto Oolong, all at full prices, and almost entirely from second hands.

SPICES.—Cassia has again been in active speculative request, and the sales reach 46,000 mats at 19 to 20 cents, less 3 per cent. cash; besides which we notice 200 bags Pepper at 8 $\frac{1}{2}$ to 8 $\frac{3}{4}$ cents; 17 kegs and 10 cases No. 1 Nutmegs, part 45, 6 mos.; and 105 bags Pimento, 6 $\frac{1}{2}$ cash. There is now no Cassia to be had below 20 cents. The absorption of vessels at the China ports by the British Government for the transportation of troops promising materially to interfere with regular trade.

FIRM CRACKERS.—Since our last, 1,000 to 1,500 Canton No. 1, at terms we did not learn; also sales of 3,500 boxes ditto, at \$1 45c. to \$1 47 $\frac{1}{2}$ c. 6 mos.; the higher price for small parcels.

TIN.—Sales of Straits from second hands, at 32c. 6 months.

HEMP.—There is but little inquiry, and the market very quiet. At Boston 500 bales Manila sold at 6c., less 4 per cent. cash; 10 tons clean Russia, \$200, and 150 bales Jute, \$95 6 months.

SEEDS.—One hundred bags hemp seed sold, part at \$1 80c. 4 months; Calcutta Linseed has been very quiet lately, partly on account of the firmness of holders, and partly because buyers are not ready to pay the prices demanded.

SALTPETRE.—The Niagara Laboratory have advanced their price for pure to 14c., which is half a cent higher; the lower grades have not varied.

INDIGO.—The market is firm and quiet. We notice sales of five cases low quality Madras at 75c.; an invoice of 37 cases Manila, about 50c.; 42 ditto 45c. to 50c.

The following are the exports lately entered for China:—

Flour, bbls.	469	Drugs	311	Oars, No.	1,000
Beef	299	Preserved meats..	7	Coal, tons	1,387
Pork	105	Priming materials,		Boots & shoes, cs.	18
Hardware, boxes..	27	cases	16	Copper, bales....	20
Tobacco	313	Brandy	10	Iron, bbls.	6

Butter, lbs.	12,276	Woodenware, pkgs	1,000	I. B. goods, cases.	9
Bread, pkgs.	253	Candles, boxes ..	252	Groceries, pkgs...	18
Sugar	41				

ARRIVALS.—At New York from Shanghai: June 7, Canvas Back; 12, Edwin Forrest. From Manila: 12, Sweepstakes; 16, Superior. From Calcutta: 18, Miles Standish. At Boston from Calcutta: 9, Dashing Wave; 14, Norwester.

SAILED.—From New York for Shanghai: June 7, Western Continent; 14, Snow Squall. For Hong Kong: 5, Onward; 15, Samuel Russell. For Melbourne: 9, Kate Sweetland; 19, Joshua Bates. For Mauritius: Patmos. From Boston for Singapore: 13, Quickstep. For Bombay: 13, Inman. For Calcutta: 9, Ashburton. For Melbourne: 7, Clarissa Carrier.

LOADING.—At New York for Nagasaki: schr. New York. For Shanghai: Isar. For Singapore: John Jay.

THE ALLIED CONVENTION FOR PRIZES IN CHINA.

The following Convention entered into between her Majesty the Queen of Great Britain and his Majesty the Emperor of the French:—

Art. I. When a joint capture shall be made by the naval forces of the two countries, the adjudication thereof shall belong to the jurisdiction of the country whose flag shall have been borne by the officer having the superior command in the action.

Art. II. When a capture shall be made by a cruiser of either of the two allied nations in the presence and in the sight of a cruiser of the other, such cruiser having thus contributed to the intimidation of the enemy and encouragement of the captor, the adjudication thereof shall belong to the jurisdiction of the actual captor.

Art. III.—In case of the capture of a merchant vessel of one of the two countries, the adjudication of such capture shall always belong to the jurisdiction of the country of the captured vessel. The cargo shall be dealt with, as to the jurisdiction, in the same manner as the vessel.

Art. IV. In case of condemnation under the circumstances described in the preceding articles:—

1. If the capture shall have been made by the vessels of the two nations whilst acting in conjunction, the net proceeds of the prize, after deducting the necessary expenses, shall be divided into as many shares as there were men on board the capturing vessel, without reference to rank, and the shares belonging to the men on board the vessels of the ally shall be paid and delivered to such person as may be duly authorised on behalf of the allied Government to receive the same; and the distribution of the amount belonging to each vessel shall be made by each Government according to the laws and regulations of the country.

2. If the capture shall have been made by cruisers of either of the two allied nations in the presence, and in sight of a cruiser of the other, the division, the payment, and the distribution of the net proceeds of the prize, after deducting the necessary expenses, shall likewise be made in the manner above mentioned.

3. If a capture, made by a cruiser of one of the two countries, shall have been adjudicated by the courts of the other, the net proceeds of the prize, after deducting the necessary expenses, shall be made over in the same manner to the Government of the captor, to be distributed according to its laws and regulations.

Art. V. The commanders of the vessels of war of their Majesties shall, with regard to the sending in and delivering up of prizes, conform to the instructions annexed to the present convention, and which the two Governments reserve to themselves to modify by common consent, if it should become necessary.

Art. VI. When, with a view to the execution of the present convention, it shall become necessary to proceed to the valuation of a captured vessel of war, the calculation shall be according to the real value of the same; and the allied Government shall be entitled to delegate one or more competent officers to assist in the valuation. In case of disagreement, it shall be decided by lot which officer shall have the casting voice.

Art. VII. The crews of the captured vessels shall be dealt with according to the laws and regulations of the country to which the present convention attributes the adjudication of the prize.

Art. VIII. With regard to the mode of division of trophies and booty which may be captured by the combined land forces of their Majesties, it is agreed:—

1. That flags, cannon, and other articles which may be considered as trophies, captured by corps, or parts of corps, belonging to the land forces of the two countries, and acting in common, with or without the co-operation of the combined naval forces, shall be equally divided between the two Governments.

2. That such division shall be made by corps.

3. That the first choice for each kind of trophy shall be decided by lot, between the two Commanders-in-Chief.

4. That the division of booty and of the value of trophies, such as cannon, tumbrils, and other articles which are capable of being valued, shall be made between the two Governments, according to the number of men who shall have co-operated at the capture, without deducting those who shall have fallen in the action, in order that the proceeds may be distributed according to the law of each country.

5. That disputed questions which may arise with regard to the distribution of booty shall be decided by a mixed commission, which shall sit at Paris, and shall be composed of two delegates, one English and the other French, appointed by their respective Governments. Those delegates, before entering upon the performance of their duties, shall name two persons, of whom one shall be chosen by lot to act as an umpire in all cases in which they may themselves differ in opinion. The decision of the delegates or of the umpire, as the case may be, shall be final and without appeal.

6. That whenever it may be necessary to make a valuation upon the spot of any article captured, it shall be done by a mixed commission, composed of competent officers.

Art. IX. The present convention shall be ratified, and the ratifications shall be exchanged at Paris within ten days from this date or sooner if possible.

INSTRUCTIONS TO THE COMMANDERS OF THE FORCES.

Art. I. When, after a common action, it is your duty to prepare a report or statement of any capture, you will be careful to indicate precisely the names of the vessels of war present at the action, of their commanders, and, as far as possible, the number of men on board, without distinction of rank. You will send a copy of this report to the officer of the allied forces, who will have the chief command in the action, and you will confirm yourself to the instructions of that officer in all that concerns the measures to be taken in the adjudication of the prizes thus taken by common action. If the action has been commanded by an officer of your own country, you will confirm yourself to your national regulations, and you will send to the officer highest in rank of the allied Power present at the action a certified copy of the report.

Art. II. When you have effected a capture in presence and view of an allied vessel of war, you will mention precisely in your report if such capture is a vessel of war, and in your statement if it is a vessel of commerce, the number of men which you had on board at the commencement of the action, without distinction of rank, as well as the name of the vessel of war in view, and the number of men on board, likewise without distinction of rank. You will send a certified copy of your report or statement to the commander of such vessel.

Art. III. When, in case of violation of blockade of transport of contraband articles, of enemy's troops, of land or sea, or of official despatches of or for the enemy, it becomes your duty to arrest and seize a merchant vessel of the allied nation, as soon as required.

1. To prepare a statement declaring the place, date, and reason of the arrest, the name of the vessel, of the captain, the number of men on board, and, further, a precise description of the vessel and of its cargo.

2. To collect in a sealed paper, after having made out the inventory, all the papers on board, such as acts of nationality or of property, passports, charter-parties, and other documents necessary for the declaration of the vessel and cargo, and place seals on the packages.

3. To place on board an officer, with such number of men as you consider convenient, to take charge of the vessel, and look to its management.

4. To send the vessel to the nearest port of the nation whose flag it bears, and to remit the vessel to the authorities of such port, with a copy of your statement and inventory, and with the sealed packet containing the papers on board.

Art. IV. The officer conducting the captured vessel will demand a receipt setting forth your having so remitted the vessel, and your delivery of the sealed packet and of the statement and inventory before mentioned.

Art. V. In case of distress, if the captured vessel cannot proceed on its course, or if the port is too distant, the officer in charge is authorised to proceed to a port belonging to his own nation or into a neutral port, and will there deliver to the local authority if he enter one of his own ports, or to the consul of the allied nation if he enters a neutral port, without prejudice of ulterior measures to be taken for the adjudication of the capture. He will in that case see that the statement and the sealed packet are delivered to the constituted authorities.

Art. VI. You will not consider any prisoners, and you will permit freely to disembark the women, children, and other persons not bearing arms or belonging to the naval service found on board such vessel. Except so far as is needful for your security you will not put under constraint any person on board, but in all cases you will retain the captain, the supercargo, and all those whose testimony is necessary for the adjudication. You will treat as prisoners of war, with the above exceptions, all persons found on board the enemy's vessels. You will not put any further restraint on the subjects of allied or neutral Powers beyond what is necessary to the security of the vessel. As to your own countrymen, you will treat them according to your general instructions, and you will not remit them under any circumstances to a foreign authority. Persons found under exceptional circumstances on board the captured vessels are to be finally sent back to their country if they belong to the allied nation, and if they are neutral or enemies, are to be treated as if taken by yourself, without reference to any other Power.

TRADE CONVENTION.

Whereas, in the event of hostilities commencing between her Majesty and her august ally the Emperor of the French on the one hand, and the Emperor of China on the other hand, it is the intention and desire of her Majesty and of his Majesty the Emperor of the French, to act during such hostilities in strict conformity with the declaration respecting Maritime Law, signed by the Plenipotentiaries of Great Britain, Austria, France, Prussia, Russia, Sardinia, and Turkey, assembled in Congress at Paris, and dated April 16, 1856; and whereas her Majesty is willing to extend the benefits of the said Declaration of Paris to all powers which may be neutral in the said hostilities:

Now her Majesty is pleased, by and with the advice of her Privy Council, to order, and it is hereby ordered, that so far as regards the ships of any neutral Power, the flag of any such Power shall cover the enemy's goods, with the exception of contraband of war; so that no goods of enemies found on board any ship belonging to the subjects of such neutral Power, or to those inhabiting within the dominions of any such Power, and duly entitled to use the flag of such Power, shall be subject to capture or condemnation by reason only of such goods being enemies' goods; all other liabilities to capture and condemnation, respectively, of enemies' goods and neutral ships being reserved and remaining in all respects as before the declaration of the said Congress at Paris, of the 19th of April, 1856.

And it is hereby further ordered that neutral goods, with the exception of contraband of war, shall not be liable to capture, under the enemy's flag, by reason only of said goods being under the enemy's flag; all other liabilities to capture and condemnation of neutral goods being reserved, and remaining in all respects as before the declaration of the said Congress at Paris of the 16th of April, 1856; provided always, and it is hereby ordered, that nothing herein contained shall be applicable to or shall be construed, deemed, or taken so as to operate or apply to, or in favour of, any person, ship, or goods whatsoever, which may be captured for breaking, or attempting to break, or which may be lawfully adjudged to have broken or attempted to break any blockade maintained by a force sufficient really to prevent access to the coast of the enemy; but that all such persons, ships, and goods may be duly taken cognisance of, proceeded upon, adjudicated, dealt with, and treated, in all respects and to all purposes according to the course of Admiralty and the law of nations, as if this order had never been made, anything hereinbefore to the contrary in anywise notwithstanding.

And it is further ordered that, notwithstanding the existence of hostilities between her Majesty and her august ally on the one hand, and the Emperor of China on the other hand, and during the continuance thereof, all and every the subjects of her Majesty and of her august ally the Emperor of the French, shall and may, during such hostilities, freely trade at and with all ports and places wheresoever situate in the dominions of China, and also with all persons whomsoever, as well subjects of the Emperor of China as others residing or trading within any part of the dominions of the said Emperor.

And it is further ordered and declared that if any Chinese ship or vessels shall be captured or taken by any of her Majesty's vessels or forces, having on board any merchandise or goods being the *bona fide* property of any subject or subjects of her Majesty or of her august ally the Emperor of the French, such merchandise or goods shall not be subject or liable to be condemned as prize, but shall, on the proof of such property, as aforesaid, be restored to the owner or owners thereof; provided always, and it is hereby ordered, that this order shall not apply, or be construed, deemed, or taken to operate to, or apply to or in favour of, contraband of war, or to trading in supply of, or dealing with, any articles or things which it may be declared by her Majesty and her august ally shall be deemed and taken as contraband of war, or to any trading or attempt to trade with places subject to effective blockade by the ships or fleets of her Majesty and her august ally, or either of them; and it is further ordered, that her Majesty's officers and subjects, and especially her Majesty's courts and officers exercising any prize jurisdiction, do take notice hereof, and govern themselves accordingly.

Parliamentary Intelligence.

HOUSE OF LORDS.

HONG KONG.—(28.) Earl GREY presented a petition from certain persons in Sheffield and Newcastle, complaining that an officer of the local Government at Hong Kong had been mixed up with a proceeding of so improper a character as a piratical attack on a Chinese village. The noble earl said he knew nothing of the transactions adverted to by the petitioners beyond what had appeared in the newspapers, but he thought the state of affairs at Hong Kong required serious consideration.—The Duke of NEWCASTLE said he had as yet received no accounts from Hong Kong of the particular attack stated in the petition to have been made; and had he been aware that the noble earl intended to present the petition that night he would have inquired whether any despatches on the subject had been brought by the mail just arrived. He assured the House that there was not that neglect on the part of the Colonial Office which the petitioners—members of the foreign affairs committees of Sheffield and Newcastle—supposed to exist because every determination of the Government was not communicated to them. (Laughter.) An enormous blue-book had been printed by the Colonial Office in reference to all these transactions at Hong Kong, which reflected little credit on the parties concerned, and a careful inquiry had been instituted respecting them. On his appointment to the Colonial Office he found that his predecessor in office had nominated a new Governor for Hong Kong, in consequence of the anticipated return of Sir J. B. Wring. He, therefore, directed the new Governor to make an inquiry into the various charges raised by Mr. C. Anstey, cautioning him, however, against stirring up again all that mass of mud which appeared to have encumbered society in Hong Kong. He had not yet received an account of the result of the inquiry prosecuted by that gentleman. He was bound to add, though with the greatest possible regret, that in no part of her Majesty's dominions was libel so rife and flagrant as in Hong Kong. For men to libel one another in the most reckless manner seemed to have become the normal state of society in that island. There had been prosecutions for libel, some of which were successful, and some not successful, but he mentioned this to caution their lordships against placing the same amount of credit in statements in Hong Kong newspapers, unless authenticated by other circumstances, as, he was happy to say, they were accustomed to place in statements published in English newspapers. (Hear, hear!) The inquiries into these charges had not been neglected, and he hoped that those who were interested in the well-being and respectability of the society of Hong Kong would further any efforts which he might make to redeem the colony from the evil reputation which in consequence of these transactions attached to it. (Hear, hear!) The Earl of HARDWICK said it was quite impossible that the Government could undertake to enter into a correspondence with committees on foreign affairs; but he was rather inclined to applaud these associations, he believed generally of artisans—at all events, they were artisans who formed a deputation from one of the committees on foreign affairs which waited upon him. They took pains to read all the Parliamentary papers, and to instruct themselves, to the best of their ability, in foreign affairs. He believed they were extremely well-informed men, and he should be sorry if they imagined they were treated with indignity because the Secretary of State refrained from a correspondence upon subjects in which they took great interest. (Hear, hear!)

CHRISTIANITY IN INDIA.—(July 2.) The Duke of MARLBOROUGH, in spite of appeals from Lords Derby, Granville, Shaftesbury, and other peers, who all urged him to delay his motion, moved a resolution—"That the British Government, as representatives of a Christian nation, is charged with the duty of promoting the moral as well as the social welfare of the people of India; and that it was the opinion of the House that the authoritative exclusion of the Bible from the Government colleges and schools ought to be removed; and to address her Majesty to give directions for carrying the above object into effect.—Lord BROUGHAM was so convinced of the impolicy of discussing the subject at the present moment that he felt bound to move the previous question.—The motion was negatived without a division.—(6.) The Bishop of OXFORD presented a petition on the introduction of the Bible into the Government schools in India, and urged the Government to repeal the measure which excluded the Bible from those schools.—A short discussion ensued on the subject between Lord Galloway, the Duke of Marlborough, Lord Granville, and Lord Brougham.

HOUSE OF COMMONS.

TROTMAN'S ANCHORS.—(29.) Replying to inquiries from Mr. Mildmay, Lord C. PAGET observed that the Trotman anchors, though possessing some valuable qualities, exhibited certain defects which had hitherto prevented the Admiralty from adopting them for the naval service.

CEYLON.—(29.) In reply to Sir W. Galloway, Mr. C. FORTESCUE said he was unable to state whether the noble lord the Secretary of State for the Colonies had actually appointed a governor for Ceylon, but he was aware that the subject had very fully engaged the attention of that noble lord.

THE CHINA WAR.—(July 2.) Mr. LAING brought up the estimate of the expenses relative to the China war.—(5.) Sir H. WILLOUGHBY gave notice that upon going into committee of supply he should call the attention of the House to the unsatisfactory nature of the estimates for the China war.—Mr. COCHRANE gave notice that on the vote of credit for the China war he should move a resolution to the effect that in order to remove one great obstacle to the 3rd article of the treaty, which provided that a minister of Great Britain was to reside at Peking, or to visit that city from time to time.—(10.) Mr. B. COCHRANE moved that the House will, on a future day, resolve itself into a committee to consider of a humble address, to be presented to her Majesty, praying that her Majesty will be graciously pleased to place the officers, marines and seamen of the fleet serving in China on the same footing as her Majesty's troops, with respect to extra pay and allowances, and to assure her Majesty that this House will make good the same. He complained, at some length, that an undue preference was shown to the land forces, who received rewards denied to the navy for similar services. Sir M. SEYMOUR seconded the motion, urging the claims of the naval forces under his command. Lord C. PAGET said that, by the regulations, our naval forces could not be paid their extra allowance as events went on, like the land troops. They were paid by a specified vote when the operations

were closed. A vote would be proposed for the seamen under the command of Sir M. Seymour in China, and votes would be proposed for future operations. Colonel NORTH asked why these useless regulations were in force? Why not pay the men at once? Sir C. NAPIER said that the conduct of the Government in this matter was of a piece with the rest of their proceedings. They were always procrastinating and putting off acts of justice. But for the efforts of Mr. B. COCHRANE, the sailors under Sir M. Seymour would have sued in vain for the rewards due to them. Sir J. ELPHINSTONE pointed out the dangers and fatigues of the Chinese service, which called for better treatment. Mr. S. HERBERT observed that the soldier was not so much better treated than the sailor. His ordinary pay was not equal to that of the sailor, and he did not always get his increased allowance. Mr. BAILLIE COCHRANE, complaining of the tardiness of the Government, and urging them not to delay bringing forward their promised votes, withdrew his motion.—(11.) Sir J. PAKINGTON moved for return of statements showing the total amount of grants made by estimates submitted to Parliament in the present session to meet the expenses of hostilities in China, including the estimate lately presented to the House; the additions (as nearly as the same can be calculated) made to the army and navy estimates of the current year, on account of the contemplated operations; votes to cover deficiencies in the estimates of last year, arising from the expense of preparing for these operations; and votes of credit—showing, up to latest date to which the same can be given, the amounts expended under following heads: 1. Pay and allowances of troops sent to China. 2. Cost of transport of troops to China. 3. Cost and freight of naval and military stores sent to China, including coal. 4. Other charges. And, showing dates of various orders given for sending troops and stores to China. The motion was agreed to.—(12.) On the order for the Committee of Supply, Sir H. WILLOUGHBY called attention to the unsatisfactory state of the estimate for the expenses of the Chinese war, and insisted that a more detailed statement ought to be submitted to the House, distinguishing between the various heads of expenditure, and setting forth in particular the expenses on account of the British forces, and giving an abstract of the moneys that had already been paid or drawn for up to the present time on account of the Chinese war.—General PEEL entered into various details respecting the military expenditure, and remarked that as long since as February last he had declared that the £500,000 then asked for would prove altogether insufficient to defray the charges already incurred in anticipation of the war in China.—After a few words from Mr. B. COCHRANE and Mr. WARNER, the House divided. For going into committee, 198; against, 13—185.—The House having gone into Committee of Supply, Mr. S. HERBERT moved a vote of credit to the amount of £3,800,000 on account of the war with China. Admitting that the estimate now before the House was given in the gross, and to a great extent upon mere guess, he submitted that it was impossible to state details on the subject, and that any attempt to specify particular items must prove illusory. After giving some explanations touching the despatch of troops, transports, &c., he observed that the vote comprised a sum of about £443,000 due to the Indian Government, arising out of charges left unsettled from the last China war. Of the total amount now asked for, he believed, on a rough calculation, that two millions would be required for expenses incurred in India; £1,500,000 for military and £300,000 for naval expenses in England.—Sir H. WILLOUGHBY observed that the mixing up of India and home expenditure was introducing serious confusion in our finances. He trusted that means would be found hereafter to keep the accounts separate.—After some observations from Mr. T. Hankey, Sir S. Northcote, General Peel, and Sir F. Baring.—The CHANCELLOR of the EXCHEQUER said that the announcement of the enormous sum required for the war with China had taken himself by surprise, as it seemed to have surprised the House. The demand was also so recent that he knew nothing about it when making his budgetary statement, and could not then even introduce the £443,000 for past transactions. He proceeded to explain the methods by which charges incurred for wars in Asia were defrayed in part by the Indian Government, and which placed it out of the power of the home Ministry to frame detailed estimates, obliging them to submit merely conjectural statements of the probable expenditure to Parliament.—Sir J. PAKINGTON thought the House had a right to demand fuller information, not only as to the expense, but also as to the policy of the Government with regard to the China war. If the cost of the war could not be told when the budget was brought forward in February, the event was at any rate probable, and the Government were not justified, under the circumstances, in remitting taxes and tampering with the finance of the country. Mr. B. COCHRANE moved the adjournment of the debate. Lord J. RUSSELL recognised the serious responsibility arising out of the proceedings in China, but observed that the late Administration must share in that responsibility, the events which had culminated in war having occurred while they held office, and in consequence of orders from Lord Malmesbury and Sir J. Pakington himself. Sir J. ELPHINSTONE and Sir C. NAPIER having briefly spoken, Lord PALMERSTON hoped that the Committee would come to a vote that night. After some further discussion, in which Mr. B. COCHRANE and Mr. DISRAELI took part, the vote was reduced, at the suggestion of Sir H. WILLOUGHBY, by the sum of £443,896, to be voted separately. The vote of £3,356,104 was then agreed to, and the Chairman was ordered to report progress, the other vote being deferred.

POINT DE GALLE.—(6.) In reply to Mr. Baillie, Lord C. PAGET said he was not prepared to say that the Government at present intended to make any alteration in the arrangements in accordance with which the Peninsular and Oriental Steam Company's vessels called at Point de Galle, which, he was prepared to admit, was, during six months of the year, while the south-west monsoons prevailed, not a good harbour. At the same time it should be borne in mind that if any alteration in the present arrangements were to take place, great inconvenience to the Australian colonies by the prolongation of the voyage between them and this country, might be the result. Besides, there was this important point connected with the loss of the *Malabar*; that it was not due to the south-west monsoon at all, but to a very heavy squall of wind from the north-east; and the ship being made fast by her stern went on a reef of rocks. As far as appeared from present information it seemed doubtful whether she occupied the best berth in which she could have been placed on that occasion.

POST-OFFICE.—(12.) In reply to Sir G. BOWYER, Lord PALMERSTON said that as the Chinese question was not settled, it would be the duty of the Government to fill up Lord Elgin's office of Postmaster-General permanently.

Naval and Military.

THE CHINA EXPEDITION.

The *White Star*, with the following troops for Hong Kong, sailed on the 8th inst. No further announcement has been made, although there are rumours of further reinforcements being despatched:—

From Deptford, 2 officers and 162 non-commissioned officers and men of the 1st battalion 2nd Royals, from Walmer; 3 officers and 103 non-commissioned officers and men of the 31st Regiment, from Chatham; 2 officers and 91 men of the 44th Regiment from Colchester; and 4 officers and 192 non-commissioned officers and men of the 2nd battalion 60th Rifles, from Winchester. From Cork, 2 officers and 1 man of the 1st battalion 3rd Buffs, from Limerick; 1 officer and 102 non-commissioned officers and men of the 67th Regiment, from Athlone; 4 officers and 54 men of the 87th Royal Irish Fusiliers, from Youghal; and 4 officers and 244 non-commissioned officers and privates of the 99th Regiment, from Cork; giving a total of 22 officers and 949 men of all ranks. Staff Assist.-Surg. G. F. Spray embarked at Deptford, in medical charge of the troops, and Surg.-Major W. Home, M.D., and Staff Assist.-Surg. F. T. McCarthy, at Cork.

Capt. C. E. Gordon, late Adjutant of the Royal Engineers, at head-quarters, Chatham, has received orders to proceed to China, to take the command of the 8th company of Royal Engineers, and several officers will be found in the list of passengers by the present mail.

The Lords of the Admiralty have been pleased to promote Lieutenant W. H. Blake, first-lieutenant of the *Niger*, to the rank of Commander, for gallant conduct in New Zealand. The captain's coxswain will also receive a warrant.

The *Volcano*, paddle, late floating factory in China, is being stripped and surveyed in No. 4 dock at Portsmouth, with a view to her being repaired for further service.

Vice-Admiral Hope Johnstone has been appointed Commander-in-Chief at the Nore, vice Admiral Harvey, whose term of service is about to expire. Rear-Admiral Stopford has been appointed captain of the Channel Fleet, vice Rear-Admiral Elliott, who has resigned.

By an Admiralty order warrant officers in the Royal Navy may retire from active service at 60 years of age without survey or prejudice to their rate of pension. Warrant officers' widows will also be entitled to their annuity in the event of their husbands' death after one year's service as a warrant officer, instead of ten years' as heretofore. Seamen and Marines are also to be entitled to their good conduct badges at the end of three years, instead of five years as before.

Orders were received at Chatham for the following reinforcements of cavalry and infantry troops to embark at Gravesend for Madras:—Three officers and fifty non-commissioned officers and men of the 1st (the King's) Dragoon Guards, from Canterbury; three officers and 272 men of all ranks of the 91st Regiment, from Chatham; and one officer and 86 men of the Royal Artillery, from Woolwich—total, seven officers and 408 non-commissioned officers and privates, the whole of whom are to embark on board the *Marborough*: per *Hulme*—two officers and seventy men of all ranks of the 17th Lancers, from Canterbury; one officer and eighty men of the 1st Battalion, 1st Royals, from Colchester; one officer and 139 non-commissioned officers and men of the 74th Highlanders, from Aberdeen; and three officers and 186 men of all ranks of the 43rd Light Infantry, from Chatham—total, seven officers and 475 non-commissioned officers and men per *Coldstream*. Three officers and seventy-six men of the 1st Battalion, 18th Royal Irish, from Buttevant; two men of the 68th Light Infantry, and three officers and 120 men of the 69th Regiment, from Fermoy. Per *Cospatrik* *Peppers*: 50 non-commissioned officers and men of the 52nd Light Infantry; 35 men of the 81st Regiment; and 60 men of all ranks of the 94th Regiment. A detachment of the 24th Regiment was also ordered to embark for Kurrachee, but, owing to that regiment being about to return home, the reinforcements will not be despatched to India.

General Peel, when examined by the Transport Service Committee, said:—In calculating the expense of steamers and sailing vessels he made no allowance for the shortness of passage of the former; but he thought, taking even that into consideration, the expense of the steamers would be nearly double that of the sailing ships, because the Government had to find the coal, which was nearly one-third of the whole expense. The average passage of sailing ships from England to Hong Kong was from 100 to 110 days, and a steamer rarely did it in less than 90 days. He considered that a steamer would not carry so many troops as a sailing ship. Steamers were engaged by the gross tonnage, so that the Government derived no advantage from the room required in a large steamer for her engines.

A perfect squadron of line-of-battle and other frigates, and some screw steamers, are now building, and the greatest activity is observable in all the departments of that establishment, in order that the vessels now in hand may be completed with the least possible delay.

In order to substantiate the extreme strength claimed for the Armstrong gun, the gun was loaded and fired with every ounce of powder which the chamber was capable of containing, to which was added a long cylinder or bar of solid iron, equivalent to five ordinary shot. This charge was repeated and fired in a dozen rounds, and, after a careful searching of the interior, and the application of the ordinary means to test the solidity of the metal, the firing was continued, with the charge as above stated, up to the 50th round.

The *Bacchant*, 51, screw, Capt. D. Macleod Mackenzie, carrying the flag of Rear-Admiral Sir Thomas Maitland, C.B., sailed from Spithead for the Pacific.

The death of the Earl of Strafford (says the *Army and Navy Gazette*) has given somewhat more of a foundation to a rumour which has been from time to time mentioned lately, to the effect that the Duke of Cambridge, Sir Howard Douglas, and Lord Gough were likely to be created field-marshal. The two gallant veterans well deserve so great a mark of honour; while coupled with his high rank, the earnestness and good intention of the Royal Duke, while in command of the army, fairly entitle him to be associated

with them. It would be no expense to the country, as Lord Gough and Sir Howard Douglas would continue to receive their regimental pay only, while the Duke of Cambridge would doubtless readily follow the example of Lord Hardinge; who, on being appointed a field-marshal, accepted only the pay and allowances of a general on the staff.

The *Lord Pannure* delivered at the Tower the remnant of stores saved from the wreck of the ship *Harering*, stranded in Plymouth Sound, consisting of 1,000 cases and 440 hlds. of porter and ale, 500 bales of rugs and blankets, &c.

The Government, having decided on repairing the existing fortifications and erecting additional defences at the island of St. Helena, orders have been forwarded to Chatham, directing a party of the most experienced of the Royal Engineers to be selected for the purpose.

The *Gazette* contains a notice, dated from the Admiralty, July 3, giving a minute description of the uniforms which are in future to be worn by the officers, seamen, and boys of the Royal Navy. It also prescribes the uniforms to be worn by persons employed in the civil branches of the navy, and the inspector of machinery, and chief and assistant-engineers. The new regulations may be adopted immediately by officers requiring uniforms, and are to come into full force after the 1st of January next.

CHANGES AND PROMOTIONS IN HER MAJESTY'S ARMY AND NAVY.

WAR OFFICE, PALL-MALL.

MEMORANDUM.

Dated Horse Guards, June 29.

His Royal Highness the General Commanding-in-Chief has been pleased to appoint Major-General William Frederick Forster to be his military secretary, in succession to Lieutenant-General Sir Charles Yorke, K.C.B., who has resigned.

J. YORKE SCARLETT, Adjutant-General.

ROYAL ARTILLERY.—Brevet-Col. George Robert Harry Kennedy, to be col., vice Ingilby, removed as a general officer; Brevet-Major Edward Mounrier Boxer, on the supernumerary list, to be lieutenant-col.; Brevet-Major Charles Scudamore Longdon, to be lieutenant-col., vice Kennedy; Brevet-Major William Henry Randolph Simpson, to be capt., vice Longdon; Lieut. Noel Hamlyn Harris, to be second capt., vice Simpson.

GENTLEMEN CADETS TO BE LIEUTENANTS.—Charles Jones, Alexander Burton Brown, Henry Andrews Barker, Henry William Lovitt Hime, Charles Domett Egerton Parks-Smith, Leonard Downes, Banks Robinson Greig, James Walker Bernard, John Becher Ormsby, Frederick Augustus Hand, Rowland Walkey, John Walter Inge, Hardinge John Brown, Albert Edward England, William Augustus Cook, Edward Hunt Holley, Ferdinand Henry Wheeler Milner, Edward Albert Fitzroy, William Georges Mulloy, Richard Jackson Hezlet, George Arthur French, Robert Dundas Elliott Lockhart, Thomas Wood, Thomas Martyn Hitchins, Frank Galloway, James Fergusson Jenkin, Thomas Mickle Crutwell, Maitland Moore Lane, Francis Carminow Nicholas, Price Frederic Blackwood, John Archibald Campbell.

The commission of Paymaster Donald Stewart to be antedated to the 24th of April, 1860.

The commission of Paymaster Claudius Buchanan Piers to be antedated to the 26th of April, 1860.

ROYAL ENGINEERS.—The undermentioned lieutenants with temporary rank to be lieutenants with permanent rank, viz.:—William Innes, Robert Mitchell Campbell, Hamilton Tovey, Richard Nicholas Buckle, Robert Athorpe, James Fellowes, Richard Henry Beaumont Beaumont, Richard Harry Williams, Jasper Gustavus Sylvester Davies, Edmund Donoghue Collins O'Brien, William Joseph Carroll, Samuel Anderson, Charles Woodward.

GENTLEMEN CADETS TO BE LIEUTENANTS WITH TEMPORARY RANK.—William Charles O'Connor, Henry Fowler, John Henry Urquhart, Henry Horace Baker, James Devereux Bowly, Charles Cunningham, William Alexander Wildman Orange.

96th Foot.—Lieut. John Thomas French, to be captain, by purchase, vice Hallitt, who retires.

STAFF.—Lieut. Colonel and Brevet-Colonel Sir Alfred H. Horsford, K.C.B., from inspecting field-officer of a recruiting district to be deputy adjutant-general to the forces, vice Major-General William Frederick Forster.

RECRUITING DISTRICT.—Lieut. Colonel and Brevet Colonel Henry Hope Graham, C.B., from the 59th Foot, to be inspecting field-officer of a recruiting district, vice Brevet-Colonel Sir Alfred H. Horsford, K.C.B., appointed Deputy Adjutant-General to the Forces.

2nd West India Regiment.—Major-Gen. John Wharton Faith, to be col., vice Gen. Sir Robert John Harvey, C.B., deceased.

1st Dragoon Guards.—Serg.-Major John Nethercote, to be cornet, without purchase, vice Elliot, deceased.

4th Dragoon Guards.—Lieut. Edward Rowe Fisher, to be capt., by purchase, vice Webb, who retires; Cornet John Bosworth Smith Marriott, to be lieutenant, by purchase, vice Fisher.

6th Dragoon Guards.—Capt. Alexander George Dickson, to be major, by purchase, vice Brevet-Lieut.-Col. Bickerstaff, who retires; Lieut. George Silvester Davies, to be captain, by purchase, vice Dickson; Cornet Arthur George Smith, to be lieutenant, by purchase, vice Davies; Gentleman Cadet Owen Phibbs, from the Royal Military College, to be cornet, without purchase, vice Smith.

4th Light Dragoons.—Gentleman Cadet William Smith Cooke, from the Royal Military College, to be cornet, without purchase, vice Rowley, appointed to the 2nd Regiment of Life Guards.

5th Light Dragoons.—The promotion of Surg. Robert Carew Anderson, M.D., to be surg.-major, to be dated 22nd of May, 1860, and not the 22nd of May, 1858, as stated in the *Gazette* of the 22nd of June, 1860.

6th Dragoons.—Cornet Thomas Joseph FitzSimon, to be adjt., vice Lieut. Moule, who resigns the adjutancy only.

11th Light Dragoons.—Lieut. James Affleck Stewart, to be capt., by purchase, vice Daniel Shaw Stewart, who retires; Cornet Somerset Sanderson, to be lieutenant, by purchase, vice James Affleck Stewart.

15th Light Dragoons.—Lieut. Arthur Randolph Mullings, to be capt., by purchase, vice Parker, who retires; Cornet David Ricardo, to be lieutenant, by purchase, vice Mullings.

17th Light Dragoons.—Cornet Henry William Fortescue Harrison, to be lieutenant, by purchase, vice Waymouth, promoted.

1st Regiment of Foot.—Ensign Henry Sedley Bainbridge has been superseded, being absent without leave.

3rd Foot.—Gentleman Cadet Philip Walker, from the Royal Military College, to be ensign, without purchase, vice Barnes, who has resigned.

4th Foot.—Gentleman Cadet Edward Weyland Sawyer, from the Royal Military College, to be ensign, without purchase, vice Brockman, promoted.

5th Foot.—Ensign Thomas D'Almaine Mackinlay, to be lieutenant, by purchase, vice Cubitt, promoted; Gentleman Cadet Charles de Jersey Graeme, from the Royal Military College, to be ensign, without purchase, vice Overton, appointed to the 44th Foot.

11th Foot.—Gentleman Cadet John De Rune Dick, from the Royal Military College, to be ensign, without purchase, vice Maskell, who has resigned.

13th Foot.—Brevet-Major William Henry Kerr, to be major, by purchase, vice Mundell, who retires; Lieut. Richard Nugent Clayton, to be capt., by purchase, vice Kerr; Ensign Arthur McGillicuddy Denny, to be lieutenant, by purchase, vice Clayton; John Francis Bellis, gent., to be ensign, by purchase, vice Denny.

16th Foot.—John Munn, gent., to be ensign, by purchase, vice Wetherell, promoted.

22nd Foot.—Ensign William Pilsworth, to be lieutenant, by purchase, vice Tucker, promoted.

25th Foot.—Gentleman Cadet Sylvanus Roger Burnett Partridge, from the Royal Military College, to be ensign, by purchase, vice Wilkinson, appointed quartermaster.

26th Foot.—Gentleman Cadet William Blakeney Burton, from the Royal Military College, to be ensign, without purchase, vice the Hon. W. H. B. Ogilvy, promoted.

29th Foot.—Ensign Francis William Prittie, to be lieutenant, by purchase, vice Hart, who retires; John Charles Douglas, gent., to be ensign, by purchase, vice Prittie; Gentleman Cadet Thomas Camden Lambert, from the Royal Military College, to be ensign, without purchase, vice Everard, deceased.

32nd Foot.—Gentleman Cadet John Arthur Grattan, from the Royal Military College, to be ensign, without purchase, vice Goad, superseded for being absent without leave.

37th Foot.—Gentleman Cadet Handley Paul Kirkwood, from the Royal Military College, to be ensign, without purchase, vice Gilpin, appointed to the 84th Foot; Gentleman Cadet Russel Skinner, from the Royal Military College, to be ensign, without purchase, vice Reilly, appointed quartermaster.

44th Foot.—Lieut. George Cuthbertson Bower, to be capt., by purchase, vice Staveley, who retires; Ensign Constantine Maguire, to be lieutenant, by purchase, vice Bower.

46th Foot.—Gentleman Cadet Philip Piercy Dovel'n Clarke, from the Royal Military College, to be ensign, without purchase, vice Speke, promoted.

53rd Foot.—Major-General Frederick Maunsell, to be col., vice Lieut.-Gen. Sutherland, C.B., transferred to the 93rd Foot.

54th Foot.—Charles Frederick Colville, gent., to be ensign, by purchase, vice Evans, promoted.

57th Foot.—Assist.-Surg. William Astle Hope, H.B., from the Staff, to be assist.-surg., vice Griffin, appointed to the Staff.

69th Foot.—Gentleman Cadet John Augustus Dawson, from the Royal Military College, to be ensign, without purchase, vice Shuttleworth, promoted.

72nd Foot.—Ensign George McKay, to be lieutenant, by purchase, vice the Hon. Alexander Temple Fitz-Maurice, who retires; Ensign Walter Douglas Somerset Campbell, from the 79th Foot, to be ensign, vice McKay.

75th Foot.—Gentleman Cadet George Frederick Chambers, from the Royal Military College, to be ensign, without purchase, vice O'Brien, promoted; Sergt. William Henry Topp, to be Quartermaster, vice Dunlop, who retires upon half-pay.

76th Foot.—Gentleman Cadet Francis Elliot Lloyd, from the Royal Military College, to be ensign, without purchase, vice Faussett, promoted.

80th Foot.—Gentleman Cadet John Christopher Robinson, from the Royal Military College, to be ensign, without purchase, vice Brown, promoted.

90th Foot.—Gentleman Cadet William Wilmer, from the Royal Military College, to be ensign, without purchase, vice Haig, promoted.

91st Foot.—Ensign Horace Ralph Speerman to be lieutenant, without purchase, vice Obbard, deceased.

92nd Foot.—Ensign Penny Boleyn Williams, from the 97th Foot, to be ensign, vice Hope Johnstone, who retires.

93rd Foot.—Lieut.-General W. Sutherland, C.B., from the 53rd Foot, to be col., vice General the Lord Clyde, G.C.B., transferred to the Coldstream Guards.

97th Foot.—John Ianroy Tweedie, gent., to be ensign, by purchase, vice Stuart, promoted.

100th Foot.—Ensign Henry Edward Davidson, to be lieutenant, by purchase, vice McDout, whose promotion by purchase, as stated in the *Gazette* of the 15th of June, 1860, has been cancelled; Gentleman Cadet Henry William Ashford, from the Royal Military College, to be ensign without purchase, vice Jarvis, appointed to the 87th Foot; Gentleman Cadet George Upton Prior, from the Royal Military College, to be ensign, without purchase, vice Morris, promoted; Ensign Charles Arkoll Boulton, to be instructor of musketry, vice Lieut. Morris, appointed adjt.

3rd West India Regiment.—James Salterthwaite Rudd, gent., to be ensign, by purchase, vice Mather, whose appointment, as stated in the *Gazette* of the 25th of May, 1860, has been cancelled.

Gold Coast Artillery Corps.—Albert Sharp, gent., to be ensign, without purchase, vice Goodall, who resigns.

UNATTACHED.—Capt. and Brevet Lieut. Col. Edward Osborne Broadley, half-pay Unattached, Staff Officer of Pensioners, to be major, without purchase; Lieut. John Bond, from the 13th Foot, to be capt., by purchase.

COMMISSARIAT DEPARTMENT.

TO BE DEPUTY COMMISSARIES-GENERAL.—Assist.-Commissary-Gen. William Le Mesurier, vice Mends, deceased; Assist.-Commissary-Gen. John Salusbury Davenport, vice Williams, retired; Assist.-Commissary-Gen. Humphrey Stanley Herbert Jones; Assist.-Commissary-Gen. Thomas Wroot Midwood.

TO BE ASSISTANT-COMMISSARIES-GENERAL.—Deputy-Assist.-Commissary-Gen. Widdrington Tinling, vice W. S. Archer, retired; Deputy-Assist.-Commissary-Gen. Henry Maule, vice Le Mesurier, promoted; Deputy-Assist.-Commissary-Gen. Robert Henry Smith, vice M. Malassez, retired; Deputy-Assist.-Commissary-Gen. Charles Swain, vice Davenport, promoted; Deputy-Assist.-Commissary-Gen. Edward Archibald Ibbetson, vice Jones, promoted; Deputy-Assist.-Commissary-Gen. Robert Booth, vice Midwood, promoted; Deputy-Assist.-Commissary-Gen. Justus Henry Thompson; Deputy-Assist.-Commissary-Gen. John Henry Sale; Deputy-Assist. Commissary-Gen. William John Fagan.

HOSPITAL STAFF.—Assist. Surg. Michael James Griffin, from the 57th Foot, to be assist.-surg., vice Atkinson, placed upon half-pay; Assist.-Surg. Robert Brown Forsyth-Brown, from the 14th Light Dragoons, to be assist.-surg., vice Hope, appointed to the 57th Foot.

BREVET.—Major-Gen. Alexander MacLachlan, to be lieutenant-gen., vice Dyneley, deceased; Col. William Bates Ingilby, to be major-gen., vice MacLachlan; Lieut.-Colonel and Brevet-Col. Andrew T. Hemphill, 26th Foot, to have the temporary rank of brigadier-gen. while in command of a brigade; Lieut.-Col. and Brevet-Col. William Fanshaw Bedford, retired full-pay, 60th Foot, to be major-gen., the rank being honorary only; Major-gen. Sir Archdale Wilson, Bart., K.C.B., Bengal Artillery, promoted on the 14th of September, 1857, for distinguished services, to be placed on the Fixed Establishment of General Officers of Her Majesty's Indian Forces from the 21st of September, 1859; Brevet-Major Richard Buckley Prettejohn, 14th Light Dragoons, to be lieutenant-col. in the army; Capt. Charles Thompson, 64th Foot, to be major in the army; Capt. Thomas Penton, 8th Light Dragoons, to be major in the army; Quartermaster John Dunlop, half-pay, 75th Foot, to be capt. in the army, the rank being honorary only. The promotion to the rank of Major-gen. of Col. James Edward Gordon Morris, Bombay Infantry, on the 13th of April, 1860, has been cancelled.

The undermentioned promotions to take place consequent on the death of General John McKenzie, on the 14th of June, 1860:—Lieut.-Gen. Sir John Bell, G.C.B., Col. of the 4th Foot, to be gen.; Major-Gen. Horatio George Brooke, Col. of the 83th Foot, to be lieutenant-gen.; Brevet-Col. Charles Emilius Gold, from the 65th Foot, to be major-gen.; Lieut.-Col. Frederick Amelius Whimper, half-pay Unattached, Major of the Tower of London, to be col.; Brevet-Major Henry Charles Capel Somerset, half-pay 27th Foot, Staff Officer of Pensioners, to be lieutenant-col.; Capt. Charles Edmund Thornton, half-pay Unattached, Staff Officer of Pensioners, to be major.

The undermentioned promotions to take place consequent on the death of General Sir Robert John Harvey, C.B., Colonel of the 2nd West India Regiment on the 18th of June, 1860:—Lieut.-Gen. Sir Samuel Benjamin Auchmuty, K.C.B., Colonel of the 7th Foot, to be gen.; Major-Gen. Peter Edmondstone Craigie, C.B., Col. of the 31st Foot, to be lieutenant-gen.; Lieut.-Col. and Brevet-Col. Charles Algernon Lewis, from the Grenadier Guards, to be major-gen.; Lieut.-Col. George Augustus Filmer Sullivan, of the 5th Light Dragoons, to be col.; Major Francis Carey, 26th Foot, to be lieutenant-col.; Capt. George Lambbrick, Royal Marines, to be major.

The undermentioned promotions to take place in her Majesty's Indian Forces, consequent on the deaths of General Sir Edward Leighton, K.C.B., Bombay Infantry, on the 1st of June, 1860; Major-General Francis Spencer Hawkins, C.B., Bengal Infantry, on the 3rd of June, 1860; and General Samuel Goodfellow, Bombay Engineers, on the 15th of June, 1860:—

TO BE GENERALS.—Lieut.-Gen. James Stewart, Madras Infantry; Lieut.-Gen. Peter Delamotte, C.B., Bombay Cavalry.

TO BE LIEUTENANT-GENERALS.—Major-Gen. George William Aylmer Lloyd, C.B., Bengal Infantry; Major-Gen. Alexander Tulloch, C.B., Madras Infantry.

TO BE MAJOR-GENERALS.—Col. James Edward Gordon Morris, Bombay Infantry; Col. Claud Douglas, Bengal Infantry; Col. Joseph Hale, Bombay Infantry.

The commissions of the undermentioned officers of her Majesty's Indian Forces to bear date as follows, viz.:—Major-Gen. Robert Thorpe, Madras Infantry, instead of 21 September, 1859, 27 September, 1859; Major-Gen. James Scott, Bombay Infantry, instead of 27 September, 1859, 25 October, 1859; Major-Gen. Charlton Holl, Madras Infantry, instead of 25 October, 1859, 28 November, 1859; Major-Gen. Charles Hewetson, Madras Infantry, instead of 28 November, 1859, 21 December, 1859; Major-Gen. Morden Carthew, Madras Infantry, instead of 21 December, 1859, 30 December, 1859; Major-Gen. Augustus Abbott, C.B., Bengal Artillery, instead of 30 December, 1859, 13 April, 1860.

13th Regiment of Light Dragoons.—The promotion of Surgeon Robert Carew Anderson, M.D., to be surgeon-major, to bear date May 22, 1860, not May 22, 1858, as stated in the *Gazette* of the 22nd ult.

CHAPLAIN'S DEPARTMENT.—The commission of the Rev. Robert Halpin as Chaplain of the third class to bear date the 11th of February, 1859, instead of the 13th of November, 1849, as stated in the *Gazette* of the 8th of March 1859.

NAVY.

PROMOTIONS.

LIEUTENANT.—J. J. Martin who served as mate in the *Ata'tante*.

SECRETARY.—Paymaster A. Jones to be secretary to Vice-Admiral H. Johnstone.

MASTER.—G. H. Dowling who served as second master in the *Impregnable*.

ASSISTANT-ENGINEERS.—Second Class: Francis Thornton, to the *Bloodhound*.

LIEUTENANT TO BE COMMANDER.—H. B. Woolcombe, recently serving as senior of the *Doria*.

ASSISTANT PAYMASTERS TO BE PAYMASTERS.—J. C. Meagher, recently serving in the *Cressy*; E. W. Gordon, recently serving in the *Rhadamanthus*.

APPOINTMENTS.

COMMANDER.—C. F. Boughey, to the *Exmouth*.

CAPTAINS.—Charles Wise, Aide-de-Camp to the Queen, to be Captain-Superintendent of Sheerness Dockyard, vice Captain R. B. Watson, C.B.; William G. Luard, to the *Formidable*, to be commissioned as flag-ship to Vice-Admiral Johnstone, at Sheerness.

LIEUTENANTS.—William Seaward and Edward Hogge, to the *Wellesley*; Francis W. Bennett, to command the *Bloodhound*; Francis Osburn, to command the *Swanage Coast Guard Station*; C. G. T. Knowles, to the *Terrible*; S. G. Price, to the *Excellent*; John J. Martin, to the *Torch*.

Lieut. Edward F. Kerby, from the *Centaur* to the *Chesapeake*.

THIRD-CLASS ASSISTANT ENGINEER.—W. A. Houghton, to the *Cumberland*, for service in the *Adder*.

ACTING THIRD-CLASS ASSISTANT ENGINEERS.—A. King, to the *Torch*; J. Purdie, to the *Greyhound*.

MASTERS.—Daniel J. May, to the *Forte* (additional); Percy V. James, to the *Flying Fish*; John Jones to the *Geyser*; G. H. Dominy, confirmed in the *Styx*; E. J. Maitland, to the *Adventure*; J. Waye, to the *Wellington*, for the *Desperate*.

CHAPLAIN.—Rev. Henry Jones to the *Blenheim*.

PAYMASTERS.—E. D. Herbert and J. Seldon, to the *Impregnable*, for service as clerks; J. W. Maddock, to the *Neptune*; G. Granditier, Secretary to Vice-Admiral Stopford; J. Pittis (additional), to the *Victory*; and W. Hamilton, to the *Monarch*; J. Lyall, to the *Asia*; J. C. Aldridge, to the *Ajax*; W. L. Norcock, to the *Impregnable*; R. Deveson, to the *Saturn*; F. G. Pearce, to be additional to the *Blenheim*.

SECOND MASTERS.—James Symons, to the *Impregnable*; George J. Tomlin, to the *St. Jean d'Acre*; William G. Atkinson, to the *Nile*; Robert J. Barret, to the *Victory*; J. W. W. bster, to the *Ariadne*.

ASSISTANT-SURGEON.—R. Radcliff, to the *Melpomene*; J. Bishop, to the *Bloodhound*.

MASTER'S ASSISTANTS.—A. R. Brown, A. W. Aphorpe, and T. Coward, to the *St. George*; Thurston Stringer, to the *Bloodhound*; Percy C. Smith, to the *Impregnable*; Patrick O'Connor, to the *Algiers*.

ASSISTANT-PAYMASTERS.—N. G. Simmonds, to the *Imaum*; Francis H. Chown, Secretary's clerk to Vice-Admiral Stopford; M. O. N. W. Markham, to the *Castor*; H. W. Molesworth (in charge), to the *Rhadamanthus*.

ACTING ASSISTANT-SURGEONS.—Thomas Cann, to the *Geyser*; Gabriel M. Kyles, to the *Agamemnon*; John Mockridge, to the *Chesapeake*, supernumerary; George E. Farr, to the *Magicienne*; John B. Nicoll, to the *Centurion*; Henry Rickard, to the *Impregnable*.

ASSISTANT-ENGINEERS.—First Class: H. C. Jones, to the *St. George*; W. L. Robinson, to the *Orion*; T. F. Simmons, to the *Asia*, for service in the *Grinder*; Second Class: Alfred Smith, to the *Dasher*; H. G. Constantine, to the *Asia*, as supernumerary. Third Class: J. Young, to the *Asia*, as supernumerary.

ACTING ASSISTANT-ENGINEERS.—Third Class: T. F. P. Shelley, to the *Asia*, for service in the *Lucifer*; T. Pringle, to the *Flying Fish*; J. Kelly, to the *Asia*, for hospital treatment; T. Young, to the *Flying Fish*, as supernumerary; J. Kay, to the *Wellington*, as supernumerary; John Adams, to the *Diadem*; R. Anderson (b), to the *Himalaya*; Josh. V. B. Thompson, to the *Himalaya*; J. Symons, to the *Wellington*, as supernumerary; G. A. Moses, to the *Geyser*, as supernumerary; J. Ferguson, to the *Wellington*, for the *Avon*.

MIDSHIPMEN.—C. G. Whitelock, to the *Donegal*; A. W. Benyon, to the *Algiers*; E. C. Drummond, R. H. Harries, E. S. Watson, C. W. Talbot, T. P. W. Nesha n, H. A. Mandeville, E. Bourke, and the Hon. H. G. F. Meade, to the *St. George*.

London Gazette.

Her Majesty has been graciously pleased to command that the Rev. Hugh Huleatt, a Chaplain to the Forces, be promoted to be Chaplain of the Second Class, from the 17th May, 1860, in consideration of his meritorious services with the army in China. The announcement of this appeared in a previous issue of the *London and China Express*.

The Queen has been pleased to appoint William Henry Adams, Esq., to be Chief Justice for the colony of Hong Kong.

ANNOUNCEMENTS.

Sir Charles McCarthy, late Colonial Secretary at Ceylon, has been appointed Governor of the colony.

Major-General William Frederick Forster has been appointed military secretary to the Commander-in-Chief, in succession to Lieut.-General Sir Charles Yorke, K.C.B., resigned—salary £2,000; Assistant-Commissary-General Le Mesurier has been appointed Deputy-Commissary-General, vice Mends, deceased; Assistant-Commissary-General John Salusbury Davenport has been appointed Deputy-Commissary-General, vice Williams, retired.

Mr. D. Brooke Robertson who has been a few months in this country on leave of absence, returns by this mail to assume the duties of the Consulate at Canton, to which port he has been appointed in consequence of his long experience. This is now the senior post, owing to the transfer of the plenipotentiary to Shanghai. Mr. Russell Brooke Robertson, his son, has been appointed Student Interpreter at Japan, and proceeds also by the present mail to Yedo.

BRITISH AND FOREIGN SHIPPING.—Every year adds its contribution of experience in respect to the practical effect in the change in the navigation laws which was determined on in 1849. The general shipping trade of the country has more than doubled since 1843, the total entrances and clearances in that year having been 7,678,791 tons, while in 1859 they were 19,384,606 tons. The British tonnage which entered in ballast only was 625,813 tons in 1843, and 1,193,187 tons in 1859; and the foreign tonnage which entered in a similar manner was 296,056 tons in 1843, and 938,092 in 1859. The British clearances in ballast comprised 908,527 tons in 1843, and 503,985 tons in 1859; the foreign tonnage which cleared in a similar manner was 315,370 tons in 1843, and 931,389 tons in 1849. The total British entrances and clearances in ballast consequently exhibit an increase of nearly 11 per cent., and the foreign an increase of 206 per cent. in 1859 as compared with 1843, showing that foreign vessels now experience more difficulty than formerly in obtaining freights.

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

Suggestions for the insertion of information required by our subscribers will have due attention and acknowledgment.

A. G.—We are not aware of the result you name.

G. T.—There is every disposition to do so.

O. G.—Not in the present year.

We beg to call attention to the extension of our news from the United States from our special correspondent, including commercial and shipping intelligence, and we shall be happy to receive suggestions for any further information which may be desired. We intended giving the export manifest of vessels, but regret that our correspondent finds considerable difficulty in procuring the same in detail, but in our present issue it will be seen that we give an approximation to the exports.

We beg also to direct attention to a new form we have adopted for the exports from England.

A REGISTER is kept of the addresses of all persons connected with the FAR EAST, and reference can be made to the same by personal application at the office or by letter. Passengers arriving by either Overland route or sailing vessels, in England or on the Continent, are requested to forward their address in order that inquiring friends may be informed.

All applications for Advertisements, Subscriptions, and general business of the Paper to be addressed to the Manager, and not to the Editor. Post-office orders to be made payable at the Strand Office, to MORTIMER WRIGHT.

The London & China Telegraph.

LONDON, SATURDAY, JULY 14, 1866.

WRECK OF THE P. AND O. CO.'S STEAMER "MALABAR."

In the letter of the special correspondent of *The Times* from Galle, on the wreck of this vessel, the unfitness of Galle as a station for the P. and O. Company was, among other things, pointed out, and not the least prominent feature in the letter was, that Lord Elgin, Baron Gros, and the said correspondent, were the three leading men on board the vessel at the time of the wreck. Lord Elgin sitting calmly on deck, sending his compliments to the Captain wishing to know if he intended going to sea, and the curt reply, "going to sea, she is going down," certainly required an artist to photograph. The excitement at the time, however, must have been considerable, and it is perhaps hardly fair for us, not partaking of it, and "who sit at home at ease," to be too critical; certain it is that the public was once more indebted to that wonder of the world, *The Times*, for a full and interesting narrative of this addition to the many losses of the P. and O. Company's steamers, and no one can, we think, in this case blame the Captain. We do not agree with those who are of opinion that it was his duty to have had steam up, or rather the fires lighted and banked while lying there. The idea of going to sea was an error in judgment; the leak could not be expected to become less, and admitted that the engines would keep her from sinking, she must return to port sooner or later, and it was the wisest course to beach her before it was too late. That this decision, however, was adopted by the Captain, is not clear, it is only inferential. It is idle to quibble as to whether the Captain or Pilot was in charge at the time, we see no fault to find with either, the ship was properly moored at the time, and it was an accident which no human precaution could have prevented. *The Times* in a leading article condemning the discretion of the P. and O. Company in selecting Point de Galle—which appeared in the last issue of the *London and China Express*—has been addressed by the secretary of the company, with a copy of the following correspondence with the Admiralty, which clears the company from blame:—

"TO THE SECRETARY OF THE ADMIRALTY.

"Sir,—By order of the directors of the Peninsular and Oriental Steam Navigation Company, I have the honour to transmit to you, for the information of the Lords Commissioners of the Admiralty—

"1. An extract from a report made by Captain Twynam, the company's agent at Point de Galle, and

"2. A report from commanders of steam-vessels of the company, practically acquainted with the port of Point de Galle.

"A reference to these documents, the directors submit, will show that Point de Galle has, in consequence of the growing up of coral rocks and the large increase of steam communication with India, China, Australia, &c., become extremely inconvenient and even dangerous as a station for large steam packets.

"The directors, therefore, respectfully submit for their lordships' early

consideration and decision the expediency of making the harbour of Trincomalee the station for this company's steam-packets, conveying the East India, China, and Australian mails, in lieu of that of Point de Galle, as was contemplated and provided for in the former contract of the company for the India and China mail service, dated 26th of December, 1844.—I have, &c., C. W. HOWELL, Secretary.

REPLY.—"Gentlemen,—With reference to your letter of the 6th of June last, I am commanded by my Lords Commissioners of the Admiralty to acquaint you that they have received representations of the great inconvenience that would be imposed upon the commercial community, and upon the residents in the southern and western parts of Ceylon if the mails and passengers were disembarked at Trincomalee; and from the absence of effective means of communication between that port and Colombo, as well as from the delay which would arise from conveying the outward mails 260 miles beyond Point de Galle, and disembarking them at a distance of 185 miles of land carriage from Colombo, my lords fear that during the south-west monsoon it would not be safe to obviate this inconvenience by requiring the mails and passengers to be landed in the roads of Colombo. My lords have also had under their consideration the delay that would occur in the transmission of mails to and from China and Australia by requiring the packets to meet at Trincomalee, and therefore, without questioning the immense superiority of the latter port over Point de Galle for the reception of large steamers, their lordships are not prepared, at present, and without further consideration, to sanction the alteration.—I am, &c., W. A. B. HAMILTON.—25 Aug. 1854."

Point de Galle for situation is well selected as the terminus for the trunk steamers, but it is not the safest port in Ceylon. Trincomalee is undoubtedly more secure, being on the lee-side during the monsoon, but it is fully 100 miles out of the direct route for China and Australia. Some time since, when commenting on the loss of the P. and O. steamer *Alma*, we advocated the necessity of keeping always spare steamers at Galle and Aden for an emergency. This is more than ever manifest by the many "break-downs" of the P. and O. Company's ships. The *Jeddo* lately broke down, and the *Nubia*, with outward mails of the 26th of May, broke her main shaft in the Red Sea, in addition to the *Malabar* wreck. It is also open to dispute how far it is prudent to trust so many mails on board of one vessel. According to the present arrangement one vessel conveys the India, Australia, Straits, China, and Japan mails from this to Alexandria, and from Suez to Galle, and consequently any accident occurring to one of these boats the whole of these mails are jeopardised. The Australian interests should be sufficient to establish a separate line. An independent through line was bargained for when tenders were invited; but the Peninsular and Oriental Company having underbid other competitors, it has thrown the safety of the Australian postal despatches on to the Indian Mail Service.

The loss of this screw vessel has also opened another question, and that is the respective qualities of the screw and paddle. On this subject we quote the following from *Mitchell's Steam Shipping Journal*:—

"A few years ago, such was the rage for the stern screw, a man who should have predicted the building of a steamer to be propelled by a side wheel, in 1860, would have been considered either an enthusiast or a person with strong prejudices. The Peninsular and Oriental Steam Navigation Company, who are among the most enterprising of Steam-Shipping Proprietors, were so infatuated with the stern propeller that they had several of their vessels converted from paddle to screw, and went on building ships to be driven by screws. Mr. Anderson placed a beautiful working model of the *Simla's* screw machinery in the Crystal Palace. The Company have purchased, within the last few years, screw vessels, but they now appear to be building paddle-wheel ships. This change is owing, we suspect, to the dislike to their screw fleet so openly expressed by the travellers along their line, but more particularly to the constant breaking of the fans. Cunard's paddle-wheel ships, and the same description of vessels belonging to the Royal Mail Company, are notorious for their immunity from accidents. As a general rule, they are never driven into port with deranged machinery, and they manage to make their passages under steam. But is it not possible to have propellers that shall avoid, on the one hand, the necessity for ponderous paddle-boxes, or, on the other, screws at the extreme end of a ship? We have seen working models of a double screw; that is, a screw fitted on each quarter, and called "quarter" screws. Then why not try this medium between the side wheel and the stern screw? In a merchant steamer there would be a loss of space by the fans, on revolving, having to pass into a semi-circular box-formed recess; that is to say, the fans, after becoming level with the shaft on which they were set, would enter a covered way, and, as they emerged again, they would strike the water, propel the ship, and again revolve as before. The aperture in the fore part of the after run of the ship would be lost to passenger space, or cargo; but as only one-half of the blades of the screw would be covered by it, the space forfeited would not be of any serious consequence. The noise of the screw, working thus in a recess, would be very trifling; and the propulsion, in this manner, from underneath the quarter, would be more desirable than the present plan. The fins of the swiftest fish are on what may be termed the quarter; and if power can be got from a propeller under the broad part of the run, on each side of the ship, what has been so long desired will thus be accomplished. We observed the other day a small French steamer, with a double propeller, on the hard at Scott Russell's factory at Millwall; but the screws in this instance were in the ordinary place—near the stern, by the dead wood; and as the machinery was amidships, the objectionable shaft along the keelson, which assists so much the rolling propensity of vessels driven by the stern, could not be dispensed with. There are one or more vessels

propelled by double shafts and two screws, but we have not been favoured with the results of their steaming. Those we have seen have very small blades, and seem to take no hold of the water. By allowing the screw, on its upper round, to revolve in a kind of well, the fans can be nearly double the length, and their grip would be thereby greatly enhanced. When the blades of a screw vessel get fouled, or are broken, no matter what the emergency of the moment, the motive or mechanical power is destroyed. If a paddle-wheel is broken, there is still one wing left to work with. When a screw ship presents her stern to the shore, working ahead to gain sea-room, if there is a heavy in-shore swell, the chances are she strikes abast, and breaks the propeller. The screw also is liable to be fouled by chains or wreckage; but if the propellers are set further forward, there is less danger from accident from such causes. It has been proved in many instances, but in a marked manner in the burning of the *Austriar*, that the vortex made by the turning of the screw sucks everything to it. The boats of the *Austriar* were drawn towards the screw and disabled by the blades. Everything thrown overboard, or lowered from a ship when in motion, is carried aft; and if it is a rope, or chain, and the end is fastened on board, it is certain to swing into the stern and be caught in the screw. This is the insuperable objection to a stern propeller."

THE INDIAN ARMY.

THE journalist who loves only to ride the winning horse has of course 'ere this discovered that the local European Army of India is a hack which will not suit his purpose. *The Thunderer*, as Mr. Anthony Trollope styles our most influential contemporary, has for some time discarded that much abused animal. The Government, the House of Commons, and *The Times* have ridden him in turn, but his day is past—with wild whoops of exultation he is consigned to the slaughter. "The Horse Guards for ever! Down with Leadenhall Street!" is now the cry; but we did not think so well of the former when we contemplated the arrangements during the Crimean campaign, nor so badly of the latter when we first heard how the servants of the East India Company were with almost superhuman exertions and unconquerable heroism preserving our Empire in the East. On the evening of the 2nd inst. the Bill for the Repeal of the Act so recently passed empowering the Government to raise 30,000 troops for service in India was read a second time in the House of Commons. We have not been sorry to observe that the Opposition members, with a due sense of its importance, have refrained from treating this as a party question. The support which General Peel has given to the Government proposal as opposed to the views of his late colleague, Lord Stanley, is sufficient evidence of this. Each has doubtless only given utterance to his conscientious convictions. As it is not probable that Lord Derby will array the forces of the Opposition in support of the views so ably propounded by his son, the measure will doubtless secure the assent of the House of Lords. We suspect, therefore, that the Government scheme, or rather that part which they have been pleased to unfold, is practically carried. We are, nevertheless, scarcely prepared to credit the rumours which daily thicken around us. Surely that recent convert to the doctrine of Horse Guards infallibility, Sir Charles Wood, will pause before he proposes to disband the entire Indian Army, but if not, we trust Parliament will well consider before they overturn the military and political systems of India by reducing the men, high caste and low caste alike, who have won renown in countless battle-fields, to the position of an ordinary constabulary.

The scheme as at present unfolded is, however, of sufficient importance to occupy our attention. We submit that *prima facie* the matter stands in favour of the local European Army for India. It was for the Government to prove their case. It was for them to show that the system they were about to subvert had worked ill, and that the system they were desirous of substituting was one which, in the balance of experience, had not been found wanting. Now we are disposed to think that neither of these things is proved. They wisely decline to say much in favour of home efficiency, knowing that it is a phrase bearing too close an affinity with that rather ugly word *patronage*, but they detail with evident relish the evils which the existing organisation has generated. More particularly are we told to look to the acts of insubordination committed by the local European troops in 1858 and 1859. It appears, in truth, to have been the contemplation of their depravity that secured for the amalgamation scheme the glorious result of Sir Charles Wood's conversion. But the Governor-General Lord Palmerston appointed

wrote strongly on this subject to Lord Palmerston's Government. Scarcely more than two months since (the date of the despatch is only 6th May, 1860,) Lord Canning thus refers to these troops:—"I doubt whether due allowance has been made for the very exceptional circumstances which attended them. . . . The men themselves were at a disadvantage." And again,—“I do not think that the occurrences to which I refer furnish grounds for abolishing that army as being incapable of being brought into order.” Such is the deliberately recorded opinion of the statesman who has possessed, of all others, the best opportunities of forming a correct estimate of what the advocates of the Government scheme now term the “mutiny” of the local European forces. It is no doubt true that at the time Lord Canning wrote thus he was not aware of the decision at which the Home Government had arrived, but we cannot see how the feature in the Government plan of making a Separate Staff Corps would have altered the grounds upon which that decision was based. Unfortunately for the Government case, we all too well remember that, at the time, Lord Palmerston went quite as far as a statesman could go in excusing the disaffection of these men. Mr. Sidney Herbert must have forgotten this when, at the close of the recent debate, he so triumphantly contrasted the Queen's army with the European Indian army. “What,” he asks, “happened the other day?” He proceeds to tell us—“Some regiments were detached from India to go to China, under the command of Sir Hope Grant, and by some inexplicable blunder the authorities proceeded to pay the officers on a scale calculated according to Indian allowances, because they were drawn from the army in India, but did not pay the soldiers in the same manner. The men remonstrated.” Of course they did. “Ay,” says our War Minister, “but they didn't mutiny.” It would have been strange if they had. Their remonstrances gained them the extra pay, but the other men's remonstrances did not procure for them the coveted bonus.

The advocates of the amalgamation scheme leave the region of argument with all convenient speed, and fall back on “authority.” Here, however, if the case be fairly stated, the victory is not with them. *Vanitas vanitatum!* So sang Solomon; so sings Mr. Thackeray. The Governor whom our Ministers have recalled, Sir Charles Trevelyan (a man whose opinion is undoubtedly of considerable value *except where subordination is an element of the question*), is with them. The Governor they retain emphatically reiterates that “the interests of India require that there should be an army devoted to India.” Next let us bear in mind on this point of authorities that the Council chosen to assist the Secretary of State for India is, as we believe,—but if not it ought to be—composed of the men most capable of advising him on these difficult questions. It is well known that there is not one man who sits at that Board, with the exception of Sir Charles Wood himself, who is not opposed to this amalgamation scheme. We shall make no attempt to enumerate all the experienced advocates of the local European army, but where, we ask, shall we find men whose opinions are more entitled to consideration than Sir Archdale Wilson, Sir James Outram, and “the Saviour of India,” Sir John Lawrence? We admit that on either side high authorities are ranged, and we by no means contend that the United Army does not present some advantages, but to our minds they are small when contrasted with the benefits that will be lost: and we must at any rate remember that those now enjoyed are tangible, while such as may accrue are, of course, only prospective. It would be a work of supererogation were we to enlarge upon the objections which have been urged against the proposal of the Government, but we cannot refrain from expressing our earnest hope that in the arrangements which will be made consequent upon its acceptance by Parliament and the Crown, our ministers will not be unmindful of the immeasurable importance of the interests involved. This, viewed as a whole, is not a mere question of etiquette, of patronage, or of military organisation, but one on the right decision of which is probably dependent the retention of that vast empire which sprung from the enterprise and energy of some of the worthiest of our ancestors—which was consolidated by the genius of Clive and Hastings—which has been recently secured to us at so enormous a cost of treasure and of blood, and in our maintenance of which is bound up not alone much of the commercial prosperity of this great country, but, also, it may be, the safety, honour, and welfare of countless millions of the human race.

GENERAL HANCOCK'S SCHEME FOR THE EUROPEAN REGIMENTS IN INDIA.

The new regiments to consist each of two battalions; each battalion to be of the same strength as other local regiments. The non-commissioned officers and rank and file for each battalion, to the extent of three-fifths of the established strength, to be obtained by volunteering from the regiments of the line in India, to be confined to approved men of from three to twelve years' service. The remainder to be supplied partly by volunteering from regiments of the line in England, and partly by recruiting. The commissioned officers for one-half the number of battalions to be supplied from the local army by transfer, according to the established system on occasions of augmentation; and for the other half by volunteering from the regiments of the line in India. The regimental promotion of commissioned officers up to the rank of major to be made in each battalion, as in other local regiments, and to the superior grades in the line, agreeably to the established system; but the officers of each regiment to be liable to serve with either of its battalions, at the discretion of the Commander-in-Chief, and to be so posted by him for that purpose in the first instance as to equalise in each the numbers of each grade received from the line and from the local army. The commandant of each battalion to be appointed by selection from the whole of the infantry lieutenant-colonels of the local army of each Presidency; the adjutant and other commissioned staff from the subalterns posted to serve with it. The volunteers (non-commissioned and rank and file) to be enlisted into the local army for ten years, receiving the usual bounty; to be held entitled to count for pension all their previous service in and out of India; and to a full participation in all the advantages and privileges guaranteed to the non-commissioned officers and soldiers of the local army by the Act of Victoria, 1858. The volunteers (commissioned officers) to be held entitled to full participation in all the advantages and privileges, of whatever kind, guaranteed to the officers of the local army by the Act of Victoria, 1858, and to count for pension all their previous service in and out of India. The non-commissioned officers and soldiers of the battalions of the line to be reduced, to be draughted into other regiments of their own selection, to fill vacancies occasioned by the volunteering into the local army or that may subsequently occur; the recruiting for such regiments as may thus obtain supernumeraries to be suspended until the same shall be absorbed. The commissioned officers to be held entitled to succeed without purchase to the vacancies occasioned in other regiments by the volunteering into the local army; those who may remain undisposed of by that arrangement to be placed on half-pay, agreeably to the established system in the line army. The infantry regiments of the line, which will become supernumerary on the Indian establishment on the formation of the new local regiments, to be withdrawn to England as early as practicable after the completion of the arrangements; all recruits for those corps being retained in the meantime with their respective depots.

Literature.

MAGAZINES, SERIALS, &c.

Macmillan's Magazine.—The first paper in this number is on "Swiss-French Literature; Madame de Gasparin." Mr. Ludlow refers therein to several of the names which have made French Switzerland famous, and not unworthily closes the list with M. Guizot and Madame de Gasparin. We cannot accept her theology as orthodox, but her works overflow with beautiful thoughts, and have for their distinctive feature, as Mr. Ludlow well observes, their *passionate humanity*. "The Fair at Keady" comes next in order. We suspect that when Mr. Alexander Smith wrote this paper he was fresh from the perusal of the Heenan-Sayers fight. It is not by such contributions as this that the poet who wrote "The Life Drama" will fulfil the promise of his youth. "Tom Brown at Oxford," despite its fine gentleman's slang, progresses well. Garibaldi and Italy are treated of both in prose and rhyme. The number is not, however, the best we have seen of this magazine.

Colburn's New Monthly.—"Sicily" is the subject of the first essay, "Garibaldi" that of the last. They are both suggestive and well-written articles, the latter furnishing many interesting particulars of the hero. Of still greater interest, at least to Englishmen, is the paper on "Our National Defences," which, like that on the same subject in the *Cornhill Magazine* a month or two since, deserves more than cursory perusal. The other articles are for the most part of more than average merit.

Blackwood's Magazine.—*Blackwood* opens this month with a long criticism upon Sir Robert Wilson's "Secret History of the Russian Campaign of 1812." *Maga* accepts the work as a very valuable addition to our historical literature. In the third part of "Captain Speke's Adventures in Somali Land," we have, as usual, many interesting details of African travel. An essay upon poetry follows, in which the tendency of modern poetic writing is dwelt upon, Mr. Owen Meredith's works forming the subject of the concluding portion of the reviewer's remarks.

Fraser's Magazine.—The first essay in this month's *Fraser* is a review of the lately published volumes of Mr. Froude's "History of England," containing the reigns of Edward VI. and Mary. The essay on "Rifle Shooting," by Viscount Bury,

Lieut.-Colonel of the Civil Service Volunteers, is written in a lucid, fluent, easy style. In the beginning he makes a few remarks on the good feeling that exists between the Line and the Volunteers. The author of "Gryll Grange" retains his old partiality for classical quotations. The following article on the "Importance of Energy in Life" is interesting and sensible. The essay on the "Physical Theories of Human Life" is a sort of analysis and review of Mr. Darwin's "Origin of Species."

Constitutional Press Magazine.—The most noticeable article in the present number of this Magazine is on "China." It embodies a narrative of the reception and the journey of the American Embassy to Peking, condensed from a paper written by Dr. Williams, the secretary of the Mission, and read by him before the Shanghai branch of the Asiatic Society. The writer is scarcely just to Lord Elgin, and is decidedly pro-American.

The Cornhill Magazine.—We regard the Lecture on "George the First" as an admirable substitute for the chapters of fiction with which Mr. Thackeray has been recently regaling his readers. We have ever numbered ourselves among his heartiest admirers, but we are bound to declare that we think "Lovel the Widower" as little worthy the author of "Vanity Fair" and the "Newcomes," as was "Little Dorrit" of the writer of "Pickwick" and "Oliver Twist." We wish, too, that Mr. Thackeray would not meddle with verse. The lines he has contributed to this number, though not without merit, are unworthy of him. Mrs. Browning furnishes some lines on the "Great God Pan," of which much the same may be said. Is it quite honest for such writers as Elizabeth Browning and Alfred Tennyson to contribute a few ordinary verses now and then in order that their names may be placed in the editorial programmes? Mr. Sala furnishes a further instalment of his "Hogarth Papers." His examination of the eight plates of the "Rake's Progress" is admirable. "Framley Parsonage" progresses in interest, and is written with Mr. Trollope's accustomed talent.

Cassell's Illustrated Bible. Part 14.—*Family Paper*. Part 31: Vol. 6.—*Illustrated History of England*. Part 6.—*Ladies' Treasury*. Vol. 4: No. 41.—*Popular Natural History*. Part 16.—These serials are this month of quite their average merit. The illustrations to the Bible it is scarcely possible to commend too highly.

The Grand Volunteer Review, by G. A. Sala, is the most graphic account we have read of that memorable event.

NOTES.

Messrs. Trubner and Co., of Paternoster-row, are shortly to publish the very valuable "Results of a Scientific Mission to India and High Asia," by Hermann, Adolphe, and Robert de Schlagintweit; undertaken between the years 1854 and 1858, by order of the Court of Directors of the Honourable East India Company. The work will consist of nine volumes of scientific text, and of an atlas in three volumes folio, containing views and maps, with explanatory letter-press.

Messrs. Blackwood and Sons announce "Patriots and Filibusters; or, Incidents of Political and Exploratory Travel," by Laurence Oliphant; and "The Spanish Campaign in Morocco," by Frederick Hardman, Special Correspondent of *The Times*. They have also in preparation an authorised translation of M. de Montalembert's forthcoming historical work, "The Monks of the West" (*Les Moines d'Occident*). Messrs. Macmillan and Co. have in the press a second edition of Dr. Vaughan's "Memorials of Harrow School," and a new volume of sermons by the Rev. J. Llewellyn Davies, of Marylebone. Messrs. Saunders and Otley have in preparation "The Voyage of the Novara," the "Austrian Expedition Round the World," "An Autumn Tour in Spain," &c.; also "Life in China," by Chin Chin. Messrs. Smith, Elder, and Co. have in the press a new work on China, by Sir John Bowring. Messrs. Longman announce as forthcoming, "Central India in 1857 and 1858, including Generals Rose and Stuart's Campaigns," from the pen of Mr. T. Lowe, of the Madras Medical Establishment, and "The Philosophy of Nature; a Treatise on the Causes and Laws of Natural Phenomena," by Henry S. Boase, F.R.S. Messrs. J. W. Parker and Son have in the press a "Journey across the Desert into Sindh," by J. Thomas Prichard, late of the Bengal army. Messrs. Huret and Blackett announce for publication during the present month "The Narrative of a Residence at the Court of Nér Ali Moorad, with Wild Sports in the Valley of the Indus," by Captain Langley; "Bond and Free," a new novel by the author of "Caste," and another novel entitled "High Church."

An illustrated copy of the works of Shakspeare, based upon the text of Boydell's edition, and by the addition of engravings and drawings extended to 44 large volumes, has been sold by auction by Messrs. Puttick and Simpson. It was formed by the late Thomas Turner, Esq., of Gloucester, and sold for £495. A goblet made from the Shakspeare mulberry tree, also in the same collection, sold for £21.

The friends of Mrs. Gore, the popular authoress, will regret to learn that the recent operation for the restoration of her sight has not been successful.

The Times is now sold at the railway stations at 4d. per copy, instead of 5d. as heretofore.

A prospectus has just been issued of a Greek illustrated newspaper, entitled, *O Bretanikos Aster* (*The British Star*), to be published weekly in London, in the living language of modern Hellas. Its great object will be to promote the interchange of authentic and accurate information between the East and the West."

The facsimile of a Japanese work on Botany, with interlinear translation and notes, has been brought out by Messrs. Lippincott and Co., of Philadelphia, during the stay of the Japanese embassy in the United States.

The first number of *The London Review*, conducted by Charles Mackay, appeared on the 7th inst. It seems to be worthy its accomplished editor.

The value of gifts and loans liberally contributed by the public to the South Kensington Museum are estimated at £460,000.

Mr. Baily's noble bust of Blake has been received at Taunton, temporarily in the new Shire Hall.

Count Platen's "Diary" has just appeared (Stuttgart: Cotta), and promises to be a gift of value to the many admirers and friends of the late poet.

The first number of *Punch's* rival, *The British Lion*, has appeared, and promises a good addition to our weekly stock of jokes.

Spirit of the Press.

CHUSAN.

By the last mail we learn that Chusan is re-occupied, and that the first act of the new Chinese drama has commenced without opposition or bloodshed, although the long Bund and the fort on Joss House Hill, which cover Ting-hai, were tempting places to mount guns upon, and would have proved formidable obstacles to an enemy in any other than Chinese hands. Possibly the mandarins of Ningpo and Chipoo may remember the ineffectual struggle, and the terrible slaughter they twice endured in the first war, and probably the people of Chusan may not yet have forgotten the security and prosperity they enjoyed under the firm and mild rule of Brigadier Campbell and his Brigade-Major, now Lord Clyde and Colonel Haythorn, the latter just promoted from Chief of the Staff in China to be Adjutant-General in India, to the great loss of the former, and equal gain of the latter command. In re-occupying a spot with which we were so long acquainted, we have a great advantage, if we know sufficiently how to profit by the experience of our former campaign. We have, in the first place, to remember the terrible morality which all but exterminated the 26th Cameronians on the lonely range of wooded hills above Ting-hai, and the comparative immunity from disease of the 98th and of the Madras troops after they were quartered in the cantonment under the Bund, on the level of the paddy swamps; and it is the more indispensable to remember this, as the special correspondent of the *Times*, in his admirable report of his visit to Chusan, has pointed to the latter cantonment as having been, from its ill-chosen site, the cause of a frightful mortality, which might have been escaped on the hills. Actual experiment proved this very justifiable theory to be incorrect. The beautiful hills were so deadly as to give to Chusan the reputation of being so pestilential, that it was not worth retaining, when it might have been had for the asking; while the hospital and cantonment in the plain proved to be the healthiest place in China, or perhaps in the East; they quite reinstated the island in public opinion, and caused many a subsequent regret that it had not, rather than Hong Kong, been the military headquarters in China. It is well known among residents in malarious climates, that on the level of the plains there is less risk than on the hill-sides, owing to the gases evolved from decaying vegetation being slightly lighter than the air, which causes them to rise to a certain, but not considerable height, where they remain stagnant, unless not dissipated by sea-breezes or strong currents of air; thus the sides of tropical hills are often uninhabitable, when the plain at the foot or the exposed summit, are both comparatively free from malarious influences. It must, however, for the credit of the Chusan hills, be remembered, that other besides local agencies were at work to cause sickness. The force had just returned from Yang-tse-Kiang, where the seeds of fever must have been generally contracted. It had also been greatly exposed to the sun at the capture of Chin-Kiang-Foo, where numbers of men perished by *coup-de-soleil*, besides many other hardships and fatigues on shore, varied by long intervals of confinement on board ship. Thus the 98th Regiment, nearly 1,200 strong, were for six months shut up on board the *Belleisle*, till they landed under Colonel Coln Campbell for the attack on the Tartar camp, as a diversion in favour of Sir Hugh Gough's assault on the city. A sun which would have grilled a beef-steak, and made gun-barrels too hot to be handled, had a fearful effect, as may readily be imagined, on men whom want of condition, from long confinement and ship diet, had rendered too feeble for such exposure. More than twenty men fell dead in the ranks, and the entire regiment sickened; and it was only after long sojourn and rest in the Chusan Paddy fields, and with large contributions to the hospital and cemetery, and large drafts from home, that it recovered its original effective condition, and earned for itself and its officers in India the honours and rewards which a long and patient struggle with adversity of all kinds in China had so well merited. When first Chusan was occupied by the 26th Regiment, the men were chiefly fed on salt meat, cured at Calcutta, of a detestably bad quality. They were marched at daybreak from the hills to the Bund, there to wait for their rations to be served out, and to carry them back in the hot sun. They lived in tents, and got for a mere trifle as much Sam-shoo as would have poisoned a regiment. Moreover—and this perhaps was the chief cause of fever—the peasants were frightened for a time from their cultivation, and the paddy rotted over thousands of acres of irrigated fields, causing an amount of vegetable decomposition which even under a cooler sun would have been deadly. We have made an excellent step in the right direction from Hong Kong; and whatever may be the final result of the negotiations, whether peace or war, we have every reason to rejoice that our troops and depôts are so well placed. In Chusan, life will be less of a burden than at Hong Kong. The artist and sportsman may find ample congenial occupation. There is much to explore and to learn, and much good to be done in confirming and extending, by useful works and just treatment of the people, the good reputation we acquired in our last sojourn in these parts.—*The Army and Navy Gazette*.

THE THIRD CHINA WAR.

From time to time there has fallen upon the House of Commons, much meditating upon financial topics, startling hints of demands yet to be made for the war with China. In those alternations of deep despondency and high jubilation which took their turn while Mr. Gladstone was sounding the deep abysses of deficit and piling up the fanciful mound of increasing revenue, the minds of his hearers often turned to this unmeasured responsibility. The long shadow of a truculent Tartar stretched across the floor of the House, and when the Chancellor of the Exchequer drew out his balances the thoughtful representatives of the millions of rueful taxpayers were concluding within themselves that the truth or falsehood of all the arithmetic they were trying to understand must depend very much upon what might be the frame of mind of a small knot of ignorant and obstinate Mandarins, who were intriguing in a barbarous city of the extreme East. These distant forebodings are now assuming a palpable shape. They have not yet taken the form of a printed reality, we do not see them yet in units and ciphers, but in the Parliamtary report of our yesterday's impression these ominous words occur:—"Mr. Laing brought up the Estimate of the expenditure for operations in China." The phrase is gently worded. It is called the "Estimate;" in reality it is the Bill. The money is already spent. Months ago the dockyards were in full activity, the arsenals resounded with the din of metal upon metal, the stores were being shipped, the troops were moving from all points of our dominion to this one threatened spot; and, a little late as usual, the force of the Empire was being concentrated upon that shallow, muddy, prospectless bay, which receives the waters of the Peiho. Thither gunboats have been long ago struggling through the wide ocean, and round the Stormy Cape, and larger ships have been more deliberately following, freighted with British red-coats. From India, Generals and armies have been passing in a quick stream to the designated rendezvous. Across the Isthmus of Suez Plenipotentiaries of high fame, great titles, and tremendous powers, have been speeding to the spot of union. Gorgeous military and diplomatic staffs have been seen on the road of the general pilgrimage. In the House of Commons they may call this an Estimate; taxpayers who read the newspapers know that it is a Bill. It is not an obligation we may incur or refuse; it is an account of money spent. How much is it? Is it a matter of small importance? We have, according to the revenue accounts published on Monday a little surplus. Shall we toss this godsend into the China budget, and clear our memory of the matter? We fear we are not quit of the matter so easily. The sum has not yet been named in print, but it may be two, and it may even amount to three, millions. Three millions represent a threepenny income-tax; and however proud we may be of the seamanship of the lieutenants who navigate our gunboats, and of the promptitude which assembles such a force, just a little too late, in the Gulf of Pecheli; and of the generalship which will, as we may fairly anticipate, advance this force without much dysentery or ophthalmia across a hundred and twenty miles of flat undefended country; still we cannot but think of those three pennies to be surrendered out of every pound of earnings, and feel some curiosity as to whether there is to be any actual advantage forthcoming from the sacrifice. If we saw our way clear to a final settlement we would pay for it, not very willingly, but we would pay it, and wash our hands of all the dusty foolery and grotesque upholstery of these automaton Celestials. If we could be quite sure that all these ships and regiments, and magnificent staff, military and diplomatic, would settle all that requires to be settled, abate everything that requires to be abated, and for ever rout and discountenance, and put out of the possibility of future noxiousness, all these impregnable old gentlemen who are always hatching mischief at a safe distance, we should be inclined to make a great gulp and swallow this unpleasant demand. But is this so? What is going to be done for these our hardly earned two or three millions? If it is merely to keep the trade open, it would seem that the money is thrown away. According to all accounts Canton is very happy, Hong Kong goes on with its old comfortable routine of libel-trials and official squabbles much as usual, Shanghai increases in commercial movement every quarter, the teas come down to Foochow more regularly than the resident merchants choose always to admit, opium makes its way into the interior, and the exchanges can be so worked as to give reasonable inducements to a residence within the tropics. We have not heard of any massacre at Amoy, or of any difficulties at Ningpo. Tea and silk are coming out, and opium and cotton goods are going in. We are aware that if any difficulty occurred in any matter of this kind it would be the duty of the property-classes and professional-classes of England to turn their pockets inside out, and tumble all their coin into a heap to protect the China merchants, while they continue to make quick fortunes in short generations. But no necessity of this kind has occurred, or seems even to threaten. What, then, is going to be done for these two or three millions? Before we pay the money we think this ought to be thoroughly explained. Of course we must pay. The expedition is gone, and the cost has been incurred under the public eye and with out Parliamentary protest. There seems, however, to be some probability of this vast amount being utterly thrown away. There is at Peking a stupid, obstinate, faithless faction of old Mandarins who direct the affairs of the Chinese Empire. They have never yet been reached, and they do not believe that they ever can be reached. They hear of cities sacked by rebels, and of cities taken by foreigners, but they do not believe in Peking being reached by either. They have no notion that there is any arm long enough to extend to their haunts. At the worst they trust always to stop a barbarian envoy at Tien-tsin, or to buy a rebel leader before he gets inconveniently near. If we destroy this superstition, if we go straight up to Peking, as we might as easily as we might march from Salisbury to Devizes, this wretched clique might run or might stay, but we should never have occasion to go there again. The Mandarins would have had their lesson. If, however, all these plenipotentiaries and staff officers, and soldiers and sailors, with their Armstrong guns and their tremendous stores, are only going to rectify some wordy diplomatic subtlety, and to make something plain upon paper, our money is cast uselessly away. There may be some use in giving the Chinese a lesson at Peking, but we have positive proof that there is no use in making them sign any quantity of paper. We have got all that paper can give us; we have the Yangtse opened, and the North opened, according to paper right. All that we can possibly now usefully do is to show what happens when these paper rights

are violated. As to pressing, under such circumstances, for more paper rights it would be like prosecuting a man who had given you a forged note, and compromising the matter upon his giving you more forged notes. In the first instance the acknowledgment of the right to free transit in China was invaluable; but, this having been obtained, any mere diplomatic recognition of that right is, instead of being worth three millions and a three-penny income-tax, not worth the peacock's feather of the Mandarin who, with his tongue in his cheek, may sign it. A Chinese war properly conducted, and with a just and practical object, would be a paying and a decisive thing, justifiable upon every ground of morality and expediency; but a war for a certain number of scratches of Indian ink upon a certain quantity of bamboo paper—and this is what we fear this is likely to be—is something so absurd that we think it will be well for the English public to say of Chinese as they have said of Arctic expeditions, that the last has gone forth, and that, let who will get into a difficulty in those latitudes, we will spend no more lives and money there.—*Times*.

CHINA TO PAY FOR THE WAR.

Whether the £3,800,000 that are to form the expenses of the China war are introduced as a Bill or as an estimate is of little consequence, the important consideration, which seems to be left wholly out of sight, is the probability that this is rather money advanced than money expended. We certainly hope that the definite treaty of peace which will be concluded as the result of the present war will contain a stipulation, to be protected by adequate guarantees, for the repayment of the expenses which we have at present to defray. We have seen that this is an expectation to be defended by precedent. And not only was it a stipulation made in the treaty of 1842, and faithfully observed—material guarantees being had for its performance—but Mr. Bruce is represented as demanding the payment of the expenses lately incurred by the British Government in the ultimatum which he presented to the Court of Peking. We are compelled to find the money on the present occasion, much as Mr. Spring Rice and Mr. Goulburn were compelled to find the money for the war ended in 1842; but during the three years stipulated as the period of repayment in that case, the greater part, as we have said, of our expenditure was reimbursed to our Exchequer; and we need hardly apprehend, with such excellent prospects for the success of our arms, that we shall not elicit equally favourable terms from the enemy at the close of the present operations.—*Morning Post*.

THE CHANCELLOR OF THE EXCHEQUER AND THE CHINA WAR.

Mr. Gladstone is one of those unhappy victims of superstition who are always under some dire necessity of passing the dearest children of their brain through the fire before some inexorable Moloch. He "never loved a tree or flower" but it somehow or other became his fate to pluck it up with his own hands. He cherished the design of relieving the country from the oppression of the income-tax, and, instead of removing it, he has confirmed it, increased it, and carried it to a height it never before reached in time of peace; he set his face against all expenditure for providing against the possibility of aggression from France, and behold it is becoming his duty to find money to fortify the arsenals and dockyards, which are the iron closets and strong boxes of the nation; he walked in the High Church altitudes and so revered authority that Oxford saw in him the incarnation of her own fond ideas, yet he is at this moment gathering around him all the desperate political condottieri of the time, and is hallooing them on to an onslaught upon the House of Peers. Lastly, but most inconsistently of all this composite giant, with head of brass and feet of clay, spent all his energies a while ago to paralyse the exertions of his countrymen when those exertions were directed to the vindication of our national honour and our military and naval prowess in the China seas; and he is now about to propose to the House of Commons to vote no less a sum than £3,800,000 for an expedition against China. Before we give Mr. Gladstone this very large sum we should like to know what he is going to do with the powerful fleet and army for which he requires it. If he has sent it out to take Lord Elgin up to Tien-tsin again, and to obtain a confirmation of the Treaty of 1858, or of any portion of that Treaty, will not only not be worth four millions, but not four farthings. All that paper can give us we have. If we are to be constantly making pressure with an army and a navy whenever we require performances of those paper promises, advancing as the promises are disavowed and retiring when they are renewed, it will be very much better to have no foreign relations with China whatever. We must hold these people to their treaty obligations, just as we should any other people, or we must let them alone. We must go at the head of an army to Peking, and show this truculent knot of intriguers that we can reach them, or we shall have to perform this march to Tien-tsin once every five years, till a wiser generation springs up in England.—*Times*.

THE CHINA VOTE DEBATE.

Mr. Bright, to whom the word "China" is what a bit of red rag is to a turkey-cock, may be expected to come out in full fury now that he is relieved from the pressure which his close alliance with the Ministry placed upon his combative instincts upon a former occasion. All the economists of the House of Commons will be inclined to second any crotchet which may stay the outpouring from the Treasury, and we must confess to great sympathy with this very practical section of the House. But these are only the normal and natural elements of the debate. John Bright protecting the Mandarins and justifying the slaughter at the Peiho, and Mr. Williams making awkward fight for the British Treasury, would be nothing remarkable. The curious spectacle will be the change of parts to be taken by the chief actors in the coming drama. Mr. Gladstone, the apologist and defender of Yeh—the English statesman who could shut his eyes to the evils of a system of government which comprehended the massacres of the execution-ground and the tortures of the prisons at Canton, and who could give all his sympathies to the cunning phrases which covered this pleasant system, and reserve all his vehement denunciations for those who ventured to interfere with it—Mr. Gladstone is to come forward and ask the House of Commons for a vote of £3,800,000 in order to enable himself and his colleagues to carry on a war with China. On the other hand, Sir John Pakington, who was the first to give voice to the general indignation when the news of the Peiho treachery arrived, and who had made public profession that the Tory policy had changed, and that they no longer preferred the glory of the Emperor

Hienfung to the lives of their own fellow-citizens—Sir John Pakington is about to make a motion which has all the superficial appearance of hostility to the war for which Mr. Gladstone is providing the sinews. No doubt, each of these gentlemen will show that he is perfectly consistent in all he is doing, but it cannot but be interesting to witness the dexterity of rhetorical fence by which this will be accomplished.—*Times*, July 12th.

[The italics are our own. The *Times* parliamentary reporter and the writer of this leading article alike seem to have been unaware that Sir J. Pakington moved for these returns at the morning sitting on the 11th inst. The motion will be found in our parliamentary intelligence.]

THE THIRD CHINA WAR.

In another part of our impression will be found two "Conventions" entered into between England and France, for the purposes of the present war, and for "regulating the jurisdiction to which shall belong the joint captures made by the allied naval forces, or of the captures of merchantmen belonging to the subjects of either of the two countries, which shall be made by the cruisers of the other, as likewise the mode of distribution of the proceeds of such joint captures."

The various States by these conventions who have commercial relations with China will be enabled to carry on their trade during the ensuing hostilities without let or hindrance. This concession on the part of France and England will, of course, be as great an advantage to China as to the neutral States with which the Chinese have dealings. The tendency of modern international policy is to mitigate in every way the evils of war, more especially where it presses upon the industrial energies of nations. If the Chinese have not the full advantage of that policy in the exemption of the goods of neutrals, if found in a Chinese vessel, it is because the Chinese Government is no party to an arrangement entered into between the Maritime States of the West. The time, it may be hoped, is not far distant when a better spirit will prevail in the councils of the Celestial Empire, and when it will be possible to include China in the comity of civilised States. There is a remarkable point in one of these conventions, we allude to the sentence which provides "that the subjects of Great Britain and France shall and may freely trade at and with all forts and places wheresoever situate in the dominions of China." Our readers will observe that no reservation is made, but we presume it is intended to apply to the Consular ports only, but a subject trading to others would have strong grounds in his favour, and we expect to see some use it.

THE VOTE FOR THE THIRD CHINA WAR.

A Parliamentary paper informs us that the amount required at present is £3,356,104 for naval and military expenses, to which add a repayment of £443,896 to the Government of India for advances on account of former expeditions, making together £3,800,000, or, in round numbers, Four Millions. A few years ago this would have seemed a large sum. In 1845-1846 it would have been equal to one-fourth of our war expenditure. However, there it is; if it do but settle our relations with the Chinese for the next half century the money will not be badly spent, but this is the doubt. The treaty was extracted, as Lord Elgin wrote at the time, from their fears, "and involving the surrender of some of the most cherished principles of the traditional policy of the Chinese Empire," and, as we designated it at first, it was too good to be true. The result to the farce of the ultimatum lately despatched to Peking by Mr. Bruce must have been well known to the interpreters. Our precedents in our dealings with the Chinese have shown that our demands are never rightly interpreted or understood, and the consequences of an evasive reply are not sufficiently appreciated or dreaded. Had our ambassador—after the Peiho disaster had been reported, and replied to by our Government—applied to the Court of Peking to send a special high commissioner to Shanghai to receive our demands on the subject of the Peiho affair, and the intentions of the Imperial Court in reference to this treaty entered into with Lord Elgin, we should have been spared the further subversion of a Government already crumbling and unable to control its subjects to the manifest injury of our trade. How can we push the sale of our manufactures among the Chinese, while they are being squeezed to the utmost to pay for the expenses of a war waged by us, and their exports on the other hand black mailed by the rebels who are fast increasing all over the kingdom in consequence of the destruction into which the Government is driven by our acts?

The *Army and Navy Gazette* has the following comments:—"We hope and pray that the omen of our peaceful occupation of Chusan may be auspicious, that we may not be called upon to renew the massacres of Chinghae and Ningpo, and that, even at this ninth hour, some loop-hole may

be found to escape from the toils of a mad and mischievous policy of our own warring. In folly it resembles the recent act of the mischievous fool who for a lark toppled over the rocking-stone in Cornwall. A very small impulse sufficed to send the tottering mass crashing and thundering down the cliff, but 'all the king's horses and all the king's men' might have vainly exerted every effort to replace and poise it on its base again. So with the present weak and unfortunate Government of China, which, though long, shaky, and tottering, ruled over half the world's population, after a fashion of its own, but pretty efficiently till we meddled with it. A very slight shock will now overthrow it, and no earthly power will be able to replace it, and we, the agents of the mischief, must repair as well as we can the evil work of our hands. Russia will look on with glee; for while we and China are doing ourselves mutual harm, she stands by and collects the spoil. While we were busy at mischief in Canton she acquired Saphaliere and part of Manchouria. Our presence at Peking will justify her annexing Corea and the remainder of Manchouria, whence she can exercise an overwhelming influence over Japan. We have already afforded a pretext for a further advance by our occupation of Chusan and Foofoo, and by the ominous pact we have made with the French for a division of the plunder which is to gild our unholy alliance."

INDIA MUTINY RELIEF FUND.—The committee entrusted with the management of the fund raised for the relief of sufferers in the late Indian mutiny, have issued their third annual report. In this document ample details are given respecting the administration of the large fund contributed in England by way of supplement to the Governmental provision for losses sustained during the mutiny, and for the benefit of sufferers whose misfortunes from particular circumstances conferred no claim for compensation either from the Company or the Imperial Government. The total amount raised for this purpose from the beginning to the 31st of December last was £453,737, including the sums received for interest or investments; and it tells well for the careful management of the committee that the deductions from this amount, on account of salaries, cost of collection, and other miscellaneous expenses, fall short of £8,000, being exactly £7,939 11s. 4d., or about 1½ per cent. of the whole fund. Of the amount contributed, £137,286 were remitted to India, and £71,450 appropriated in England for the relief of immediate distress, or as temporary loans. The residue, amounting to £239,145 has been invested as a provision for the more permanent claims upon the fund. These arise from the allowances granted to the widows and orphans of soldiers and sailors who have no pension from Government, and it appears that no less than 1,458 persons of these classes are now dependent on the fund who would otherwise be left destitute. The allowances to widows cease upon re-marriage, and are reduced if the recipient obtains remunerative employment; those to orphans last until the children attain the age, if boys, of thirteen; and, if girls, of fifteen. The committee had at one time resolved that all temporary relief should be discontinued at the end of 1859. They have, however, relaxed this rule so far as to continue allowances for a further period of two years, that is to say, to the end of 1861, to about 1,370 widows and orphans of soldiers, besides paying pensions to 362 disabled soldiers for another year, unless they find means of earning a livelihood meanwhile for themselves. For the claims of all sorts which the committee have undertaken, it is calculated, by the ordinary rates at which assurance companies compute similar risks, that the balance now in hand, and invested in Government or Indian securities, will prove amply sufficient. The committee have, of course, carefully confined their liberality within this safe and prudent limit. With larger funds they might have done more, as the distress which required relief was wide-spread and intense.

THE P. AND O. CO.'S STEAMER "ORISSA."—The screw steamer *Orissa*, which has undergone a complete overhaul and refit, went out for an official trial trip before leaving for the India station. The maximum speed attained was 13·235 knots, and the average of four runs 11·688; indicated horse power, maximum 11000, average 950; weights on board, 670 tons; draught of water, 16ft. 7in. forward, 7ft. aft. The speed would have been greater under more favourable circumstances; a very strong tide, a high wind, and the large quantity of coal and stores on board combining to retard her.

EAST INDIA COMPANY.—A General Court of Directors of this Company was held at the East India House on the 29th of June to consider the provisions of a Bill for the future management of the affairs of the Company, proposed to be introduced into Parliament by the Secretary of State for India. Colonel Sykes, M.P., occupied the chair. The minutes of the last meeting having been read, he stated that the Bill in question was now before them; it was exceedingly long, and would occupy a considerable time to read in detail, but the marginal notes would give information as to the contents. No notice of motion for leave to introduce the Bill had yet been given to the House of Commons, and therefore they were not yet in a position to present any petition. The preparation having been left to the directors, they had put themselves in the hands of counsel, and a petition had been drawn by them, fully meeting all the points in the Bill it was necessary they should refer to.—Mr. Beddome addressed the court at length, condemning the proposition to give up the security fund to the Secretary of State for India, and suggesting some minor amendments in the petition. He concluded by moving that the petition be revised by three of the directors, and printed and circulated, together with the Bill, amongst the proprietors.—Mr. Arbuthnot concurred with the preceding speakers as to the advisability of printing and circulating the petition, but he did not entertain the same alarm that many gentlemen seemed to do as to the result of this Bill if it were passed.—Mr. John Jones contended that Sir C. Wood was attempting to break up the Company entirely. The effect of this Bill was such that the Secretary of State would have to treat with each member of the Company individually. They then lost their organisation, and with it their power. So long as they continued to be a corporate body, with all the prestige that its age gave it, they could make themselves heard effectually. It was impossible to say what the Government would do; they might put on an income-tax of 10 per cent. on their shares, or an absentee tax, and if they did so, individually the proprietors could not protest effectually against it; but if they retained their corporate character they could remonstrate and protest against such impositions, and by some of their number who were in Parliament have their views properly represented there. He also suggested that the various proprietors should call the attention of the members representing the districts in which they resided to this matter.

SIR JAMSETJEE JEJEEBHoy.—The will of this renowned merchant prince of India, who died on the 14th of April, 1859, at his residence at Bombay, at the age of 77, was proved in London on the 21st of June, 1860, by his eldest son, Sir Cursetjee Jamsetjee Jejeebhoy, Bart., one of the executors—the deceased having property in this country which has been estimated for probate duty at £18,000. The will was first proved in the Supreme Court at Bombay on the 4th of August last, by his three sons, as executors. The deceased's relict, Dowager Lady Jejeebhoy, is executrix, but is not acting. The will, bearing date 9th of April, 1853, is in English. He bequeaths to his wife, Dame Awaboye Jejeebhoy, a furnished residence and all her acquired property, and requests that she will dispose of her "joys and jewels" to her children, one half to her daughter, and the other half equally among her three sons; and he also leaves her a sum of 200,000 rupees. To his only daughter (besides his former bestowals upon her) he leaves a sum of 100,000 rupees, and to his eldest son (the baronet) he leaves 300,000 rupees, and an equal share with his two brothers in the entire residue. There is a legacy of 50,000 rupees to his sister, and legacies to his friends and others connected with him in his public pursuits. The decorations presented to him by her Majesty Queen Victoria, and all other presents and tokens from public bodies he leaves to his eldest son, to be kept as heirloom.

THE MUSEUM OF THE LATE ALBERT SMITH.—The Chinese curiosities, forming the museum collected by the late Mr. Albert Smith, together with the large series of dioramic views of China, France, Italy, Holland, Germany, the Rhine, and Switzerland, have been sold under the hammer of Messrs. Oxenham, in the Chinese room of the Egyptian Hall, Piccadilly. Among the lots disposed of were a pair of the finest painted old Mandarin enamelled vases, 36 inches high, 14 guineas; a rare and curious ancient Nankin blue bottle-shaped vase and stand, painted with dragons, 30 inches high; and a Nankin blue vase, carved wood cover and stand, with elephant's head handle, of fine and brilliant colour, same size, £14 7s. 6d.; two very curious Chinese pictures, formed of numerous groups of figures, elaborately worked and raised in silk, representing Chinese theatricals, 8 guineas; the coat in which Yeh was taken fetched £2 8s., and several other dresses found in his house, £4 4s. The rolling panorama of the Canton river, painted by Mr. Beverley, the views from sketches by Mr. Baptista, of Hong Kong, and Yowqua, a native artist, and the figures from sketches by Mr. Chinnery, realised only £7 17s. 6d. A carved ivory junk, large size, in glass case, £8 5s. The well-known rolling panorama of the Rhine fetched twenty-five guineas. The two days' sale was well attended.

WRECK OF THE "FIERY CROSS."—A correspondent, signing himself "A Voice from Labuan," calls attention to the loss of this vessel on a coral reef in the China Sea. He observes that it is a wonder more vessels are not lost during the prevalence of the N.E. monsoon, as instead of going the Palawan passage they beat up amongst the coral reefs, where the *Fiery Cross* was wrecked. Our correspondent adds, that every rock and reef in the Palawan passage is laid down in the charts, and he insists, with considerable force, on its advantages. We are also reminded of the facilities which the position of Labuan gives as a harbour of refuge. Our correspondent observes, that neither the captain, officers, nor passengers on board the *Fiery Cross* were certain Labuan was still in the possession of the British; in fact, they appear to have been in complete ignorance of its existence as a British colony. They found in "The China Pilot" that Labuan was a coal station, but was soon to be abandoned, and landing as they did, first at the coal mines at the north end of the island, and finding the coal works abandoned, they mournfully made up their minds to go to Sarawak, 400 miles distant, when a policeman, who fortunately spoke English, came to their rescue, and piloted them to Victoria Harbour, where they joyfully found a flourishing settlement, and such hospitality as the island could afford.

THE P. AND O. STEAMER "MALABAR."—In the letter of *The Times* correspondent from Galle, on the wreck of this vessel, it is narrated that "some time ago a plan was submitted to the Imperial Government which would give Galle a secure harbour of 210 acres, with 7½ fathoms' water, at a cost of £300,000, instead of the present limited and frightfully insecure anchorage. It was proposed to make a breakwater from Watering Point to Duemba-Deva Rock, behind which ships would ride securely in any weather. The dues from steamers alone would pay a large interest on the outlay, there being an average of twelve a month in Galle harbour. The work would present few difficulties, as the granite rock forming Watering Point could be easily blasted and tumbled into the sea. Sir Henry Ward strongly supported the scheme, and undertook that if the money were raised by loan one-third should be taken in the island. The home Government, however, did not consider itself justified in such an outlay on a colony, and the colony declares itself too poor for such an undertaking. Colombo is the shipping place for all the island produce, and Galle is a rendezvous for the China, Calcutta, Madras, and Australian steamers. The work is Imperial and not local; Galle is the key of our present communication with the East, and nothing whatever has been done to improve its port. The coaling and loading are performed by coolies who go above their waists in water to the barges which cannot approach the beach on account of the surf. Little more than half the value of the *Malabar* and her cargo would complete this harbour; and last year the Peninsular and Oriental steamer *Brugal* nearly experienced a similar fate to the *Malabar*, and only escaped with considerable damage. In the new harbour steamers would lie alongside the wharf to receive their coal and cargoes, saving the expense, inconvenience, and danger incurred at present." Will it be done now, or shall we wait for another steamer, mails, and specie to be lost?

LOSS OF THE "MALABAR."—A second letter, dated from Galle, June 5, has been published by *The Times* from its own correspondent, condemning the laxity of the P. and O. Company, and the repudiation of the expenses of the passengers while detained in Galle.

MESSRS. DENT AND CO.'S STEAMER *Ly-ee-moon* made the passage from Greenhithe to Southampton in sixteen hours, and sailed from that port for Hong Kong on the 4th inst. She is to call at St. Vincent, Cape of Good Hope, and Singapore, en route.

DR. MACGOWAN delivered his lecture on Japan on the 3rd inst. in St. James's School Room, Clapham.

Sir Charles McCarthy has been appointed Governor of Ceylon, and proceeds by the September mail.

MR. JAMES WHITE, late M.P. for Plymouth, has presented himself as a candidate for Brighton, rendered vacant by the death of Sir G. Pecheil.

Monetary and Commercial.

According to the last accounts from the Far East the "Labuan Coal Company" have established at a happy moment. Coals at Manila were fetching \$30 per ton; at Singapore the Government supplies were entirely exhausted, and rates were at \$16 to \$17; at Hong Kong, \$18; at Shanghai, 12 taels.

It is reported that news has arrived *via* Panama and the United States to the effect that the colony of New South Wales has granted £75,000 as a subsidy to an English line of steamers to run from Australia to Panama; also that the British Government have agreed to take possession of the Feejee Islands.

There are scarcely any transactions in the Russian Loan. A quotation is made of par to $\frac{1}{2}$ premium, but it is merely nominal. The Committee of the Stock Exchange are engaged in seeking an explanation of the fact of the last loan of £12,000,000 having been stated by Messrs. Thomson, Bonar, and Co. to be fully subscribed, while an announcement is now put forth by the Russian Government that only £7,000,000 was actually placed.

It is said that there are now 1,300,000 bales of cotton stored in and about Liverpool, and in order to watch the warehouses efficiently, and prevent any fires which might break out gaining head, twenty additional police officers have been taken from their ordinary duties, and added to the fire brigade, while 1,200 yards of spare hose had been placed in stock at the various stations.

The bankruptcy case of Bishop and Farbridge, East India merchants, in which the Mercantile Bank of India are interested, is not yet decided.

The quarterly returns of the revenue ending June 30, show an increase on all inland items of £702,559, and a decrease of £326,918 on the Customs, which is mainly attributable to the French Treaty.

The estate of Messrs. Reid, Irving, and Co., paid a further 1s. in the pound, making the seventh, and another one may be expected.

A new journal has been established called the *Money Market Review*, which in some measure is a rival to the *Economist*, and from the great care and ability displayed in its production it will be no mean one.

Since the issue of the notice, stating that the Australian mail packets from Point de Galle would thenceforth proceed no further than Melbourne, and would land at that port the mails for New South Wales and New Zealand, arrangements have been made with the Peninsular and Oriental Steam Navigation Company for those packets to continue their voyage to Sydney, to which point, therefore, the mails for New South Wales and New Zealand will continue to be carried.

The amount of bullion by the last mail is £283,338 as follows:—For Hong Kong, in silver £147,414, of which £93,894 is on account of Government; for Singapore, £45,050 and £80 in gold; for Foo-Chow, £2,777; for Shanghai, £55,577; for Calcutta, £31,955; and £485 in gold for Madras.

The East India and China Association have just published their comparative statement of the number and tonnage of ships, both British and foreign, entered inwards and cleared outwards with cargo from and to places within the limits of the East India Company's charter, from the 1st of January to 30th of June, 1859 and 1860. According to the statistics of vessels entered inwards, the Port of London shows an increase of 93 vessels, with a capacity of 46,814 tons; the difference between 421 vessels and 285,084 tons in 1859, and 514 vessels and 331,898 tons in 1860. The Port of Liverpool also exhibits an increase of 28 vessels, with a capacity of 13,428 tons, the arrivals in 1859 having been 123 vessels and 113,688 tons, and, in 1860, 151 vessels and 127,116 tons. The port of Bristol exhibits a decrease of seven vessels, with a capacity of 3,554 tons, the difference between 20 vessels and 9,660 tons in 1859, and 13 vessels and 6,106 tons in 1860. In the case of the Clyde, also, a decrease is presented of 9 vessels, with a capacity of 2,700 tons, the arrivals in 1859 having been 14 vessels with a capacity of 5,977 tons, and in 1860 only 5 vessels and 3,277 tons. The net increase has been 105 vessels with a capacity of 53,988 tons, the difference between 578 vessels and 414,409 tons in 1859, and 683 vessels and 468,397 tons in 1860. The principal increase has been in the arrivals of vessels from Calcutta, China, Ceylon, Singapore, and the Cape of Good Hope.

ARTICLES OF IMPORT.

TEA.—There have been a few sales of good common Congou at 1s. 5d. per lb. The broken leaf and low descriptions have sold at a decline of about $\frac{1}{2}$ d. per lb. Fair to good flavory kinds have been difficult of sale at a decline of 1d. per lb. The advance quoted in our last for fair to good Haws and Ning-Chows has been lost, fair quality having been sold at 1s. 7d. per lb. Second-class Monings and Wopaks show a reduction of fully 1d. per lb. Good and fine Kaisows have participated in the general flatness. Tayshans have been less in demand, and low descriptions have sold 1d. per lb. below last month's prices. In Oolongs there has been but little alteration, the demand being limited. In Souchongs and Flowery Pekoes transactions have been very small, and we have no material alteration to quote. Scented Capers of common to fair descriptions are still in over supply, and remain difficult of sale; good and fine have realised about former prices. In Scented Orange Pekoes there is scarcely any change to notice. Business in Green teas has been to a fair extent out of recent arrivals, which have brought a larger proportion than usual of Young Hysons, and these have commanded a ready sale at very full prices. Hysons up to 2s. per lb. are in demand at the full advance last quoted, but the finer descriptions are of very uncertain value. Gunpowders under 2s. per lb. have realised fully former rates, but good and fine are but little inquired for, and are difficult of sale at former prices. Canton Young Hysons have commanded a ready sale at former rates; but common Gunpowders were sold at a decline of 1d. to 2d. per lb. at the auctions of the 27th ultimo. At the public sales of the 27th ultimo, 41,830 packages were brought forward, of which 1,741 packages were Assam teas, and 10,325 packages for sale without reserve. Of these the whole of the Assams, and 15,000 packages China teas, found buyers. The Assams sold with spirit at an advance of 1d. to 2d. per lb.

RAW SILK.—The improved demand has resulted in a large business at advanced prices. During the last week there has been rather less doing, the accounts from the Continent inducing the idea that the European crop may be more favourable than was at first anticipated. The deliveries of the month were very large in all classes—in Chinese Thrown Silk especially, and this the first time for many months the had approached a paying figure. The sold stock on the 1st instant amounted to 8,098 bales, and of un-sold 6,114. Of Japan 543 and 602 respectively Thrown Silk 1,253 and 3,385. Total deliveries from 1st January to the 7th inst. have been 32,836, and 2,183 Japan.

SUGAR.—Sales of 60,000 bags Clayed Manilla at 36 to 37s. 3d., and a floating cargo of 9,300 bags, for an out-port, at 24s. 3d.; 200 bags low greyish white Sam at 42s. to 42s. 6d.; 1700 baskets Java, good brown 39s., middling and good yellow 42s. 6d. to 43s. 6d., fine yellow to superior strong grey 45s. to 47.

COFFEE.—The improving tendency of the Colonial market previously noticed, has been maintained. The total sales since the 8th ultimo, comprise:—2,600 casks, 1,100 barrels and bags plantation Ceylon, fine ord. and low mid. 66s. to 72s., mid. to good m. d. 73s. to 77s., fine mid. 81s. 6d. to 83s.; 300 casks 5,000 bags native, good and fine ord. 60s. 6d. to 63s., ord. 59s. 6d., with par. lings from 41s. to 55s.

RICE has not maintained the extraordinary activity reported in our last: prices have gone back 3d. to 6d. per cwt., and only a moderate stroke of business has been done. Sales of middling at 9s. 3d. to 10s.; Rangoon, 9s. to 10s.; common old Moulmein, 9s. 3d. to 9s. 6d.; Madras, 10s. to 11s.; Bengal, fine white, at first, 14s 6d. to 15s.; recently, 14s. to 14s. 9d.; low to good old white, 10s. 3d. to 12s. 6d.; Moonghy, 10s. 3d. to 10s. 6d. Cochin China, 10s. cash, and a few Java, low middling white, 11s. 6d.; good middling, 13s. 6d.

PEPPER.—The demand has continued very steady, more particularly for the shipping qualities. The total deliveries of Black have reached 340 tons (fully two-thirds being for export), so that the large supplies by auction have been cleared off with freedom at fully our former quotations, comprising 7,600 bags Singapore, grey to fair Black, 4d. to 4 $\frac{1}{2}$ d., and 3,000 bags common to fair dusty Penang, at 3 $\frac{1}{2}$ d. to 3 $\frac{1}{2}$ d.; in home-trade sorts, however, little of importance has taken place; a trifling parcel of heavy Malabar sold at 5 $\frac{1}{2}$ d. White descriptions have been more easily disposed of, 600 bags having been sold at full prices, mostly common and middling Penang, at 6d. to 6 $\frac{1}{2}$ d.; middling to good Singapore, 6d. to 6 $\frac{1}{2}$ d.

SAGO has been difficult to sell, and excepting superior small Peal has been disposed of at rather easier rates, only about 2,500 boxes being sold; mid

dling to good small, 16s. 6d. to 18s.; ordinary large and medium, 15s. 9d. to 16s.; good large, 17s. 6d., and fine small, which brought 22s. Sago flour has been neglected.

SPICES.—Cinnamon: The business in this article has been of the same partial character, as usual, in the period intervening the quarterly sales. Cassia Ligna: There has been an absence of inquiry during the month, and as holders have refused to accept the very reduced offers, only trifling lots have been purchased. Cloves are still neglected, and the quantity brought forward being small business in Zanzibar is again inconsiderable; the small parcels Penang of recent import also have found buyers only on rather easier terms, viz., 22 cases middling to fair, 1s. 1½d. to 1s. 2½d.; good and fine, 1s. 3½d. to 1s. 4d. Mace: The limited business done has been at the previous value, viz., 40 cases ordinary to bright red, 10d. to 1s. 4d. Nutmegs continue in fair request, chiefly by the home trade, and 150 cases at public sale brought steady prices: small and middling, 1s. 3d. to 1s. 9d.; good middling to good, 1s. 10d. to 2s. 6d.

HEMP steady, and 859 bales Manila at auction mostly sold at £22 10s. to £23 7s. 6d. per ton for fair roping.

COTTON.—Uninterrupted dullness has existed in this market throughout the month, and only about 4,000 bales have been sold at prices which, for the common kinds of Surat, are ½d. to ¼d. per lb. lower, ord. to fully fair 2½d. to 4½d., good fair Tinnivelli Madras 5½d.

JAPAN WAX.—No sales since the last report.

TIN.—This market has become both more firm and more animated: limited trade in Banca upon fully former terms, but large business in Straits at a further slight advance, chiefly at £132 per ton. Regulus of Antimony £52.

TOBACCO.—Java: in good demand for all the better sorts; prices firm. Manila: a few bales of damaged and repacked sold privately at prices beyond all expectation.

MISCELLANEOUS.—Rum, East India, dear and very slack quotations, 1s. 5d. to 1s. 6d. India Rubber as last quoted but firm. Camphor, small sales at 150s. to 155s. Rafans, no sales. Sapanwood, 36 tons Manila sold at auction at £6 per ton. Small sales of Siam effected privately upon former terms. Soy, sales at 4s. and 4s. 1d.

RHUBARB.—Small sales, at 2s. 7d. for good flat. Mother o' Pearl Shells no change. Tortoise Shell, no sales. Coco Nut Oil market active sales £43 to £46 10s. for Ceylon. Elephants' Teeth: for Siam, 70lbs. and upwards £42 to £44. Stic-lac, sales of 100 packages at 47s. 6d. to 57s. 6d. for good Siam in block.

On Hong Kong, ditto	4s. 9d.	Do. 4s. 3d.

ARTICLES OF EXPORT.

IRON AND STEEL.—The quotations for the various descriptions are the same as those last given.

TIN AND LEAD.—No change has taken place in these markets.

EXPORT OF METALS TO CHINA.—The exports for June have been 1,164 tons of bars and nail rod, 12 tons of hoop, 5 tons of steel, 2 tons of copper sheathing, and 50 of yellow metal, 356 pig head, 150 boxes of zinc plates, and 150 bottles of quicksilver.

MANCHESTER MARKETS.—With the exceedingly large production going on, and with the India and China trade very much crippled, the supply is somewhat greater than the demand, and prices have a constant tendency to decline. The depression, as shown in previous trade reports, has already been very great, and is still progressing. Still, there are many circumstances interfering with this rule, which cause much irregularity in prices. The fine weather, giving hopes of an improvement in the home demand, has caused many spinners and manufacturers to refuse sales at the lowest rates previously accepted, and this is more particularly the case in the finer yarns, from 60's to 80's, and in printers, good T-cloths, and the better class of 40-inch shirtings. The general tone of the market, however, is one of dullness, and in the great majority of cloths and yarns the inclination of prices is in favour of buyers.

HAZE, New York to Hong Kong, April 30, 22 N., 30 W.
EDITH ROSE, New York to Hong Kong, May 11, 18 S., 31 W.

CASUALTIES.

The Dora, from Liverpool for Shanghai, put into Queenstown, June 27, with mizen mast sprung.

The Ulysses, Mullinger, from Grimsby for Macassar, arrived at Simon Bay, May 13, with rudder damaged, loss of sails, spars, &c., having encountered heavy weather from N.W., in lat. 39 S., long. 20 E.

The Augusta, Barbot, arrived at Falmouth from Sourabaya, reports as follows:—Passed, June 16, part of a lower mast, with iron cap on, supposed to

belong to a ship of about 600 tons, also a quantity of bulwarks, part of a deckhouse and a deckhatch; same evening wind light from the E.N.E., passed two broken spars and a studding sail boom; wind light from the northward during the night, and at daylight picked up a case containing 24 boxes of cigars, lashed with bamboo, case marked 'R F & Co. 82,' boxes marked 'Fabri a de Tabaccos, Manila, Dec. 28, 1859,' by the appearance of the case it had been in the water about a week.

The Alma, Pellien, from Samarang for Nantes, put into Cayenne, May 17, in distress; she was leaky, and would have to land her cargo.

The Alblasserward, Newcastle to Macassar, was spoken March 19, 37 S., 20 W. She had lost foretop-mast, maintop-gallant-mast and jib-boom.

At St. Helena, May 10.—From Batavia, Nieun, Holland; 24, from Macao, Sophie, Martin, and sailed for London; 28, from Shanghai, Maori, Petherbridge, and sailed for London; 31, from Singapore, Calder, Griffiths.

At St. Vincent, Cape de Verdes, May 31.—H.I.M.'s str. Imperatrice, Eugenie, from Toulon, and left June 2, for China; Hebe, Kiehl, sailed May 23, for Batavia, having repaired.

At TABLE BAY, May 1, from Canton.—Thomas Mitchell, Paul, and sailed 4, for Demerara; 4; H.I.M.S. Weser, from Toulon, and sailed 9, for China; Kitty, Simpson, Caulfield, from Macao, and sailed 10, for Havana; sailed, May 2, for Manila, Kate Howe.

At SIMON'S BAY, May 13, from Grimsby for Macassar.—Ulysses, Mullinger (see Casualties); 15, from Batavia, H.D.M.'s steamer, Prinz Mauritz; sailed May 1, for Singapore, Little Eastern, Bruce; 10, H.I.R.M.'s steamer, Razibonick, for China.

The Banian, Capt. Graham, got aground on the Toolong bank, on the East coast of Sumatra, on her passage from Hong Kong to London. The vessel was on the shoal for three days, and but for the great perseverance of the captain, officers, and crew, she would have remained there. Her run from the Cape was only forty-two days.

FREIGHTS AND CHARTERS.

Several vessels have been taken up by the Government for troops to India, and emigrants to Australia, at even lower rates than those accepted in the previous week. For troops to Kurrachee, the Cospatrick was taken at £10. 6s. 6d. for 380 men, and the Peeress at £10. 18s. for 230 men; and for Calcutta the following vessels were accepted for 2,265 men, at rates ranging from a trifle over £9 to £10—say the Conflict, Tyburnia, Canning, Newcastle, Kate, and Surry.

Tonnage for rice from Arracan and Burmah has been in better demand, and engagements have been made this week at 62s. 6d., United Kingdom. 65s. Continent, or 70s. with the option of teak from Moulmein at 80s. United Kingdom, 85s. Continent, 90s. Mediterranean; Java to Great Britain, 60s. Calcutta, 62s. 6d., Bombay or neighbouring ports 57s. 6d., or Mauritius, 42s. 6d., &c.

Berth freights to India and China are dull—50s. per register ton for Bombay or Calcutta, 62s. 6d. Kurrachee, 60s. Madras, Pondicherry, Singapore, or Penang, being the full rates offered. Coal freights in this direction are also without animation, the current quotations being £50 Aden, £35 Bombay, £48 Calcutta, £43 Ceylon, £35 Rangoon, £35 Andamans, £37. 10s. Kurrachee, &c. For Hong Kong, 57s. 6d. from Cardiff is still offered, and 62s. 6d. Shanghai.

Two vessels have been invited to tender for emigrants from Hong Kong or Whampoa to British Guiana.

The coal charters for 20,000 tons for Hong Kong are to leave in this and next month.

The tonnage required for guano to Mauritius has all been taken up at 65s. and chartering for this service has again closed. For United Kingdom or Continent the rate is still 60s., and for French ships to France 25 francs for orders.

The berth-freights for small parcels of goods and insurance is as last quoted. At New York and Boston rates are also unaltered.

IMPORTANT improvements in diving apparatus have been made and patented by Mr. C. E. Heinke, submarine engineer, of London. His apparatus has been lately used at Spithead for submarine operations in connection with the fortifications there, and has given great satisfaction. It has also been very successfully employed at the works of the New Westminster Bridge. It is stated that the apparatus is completely under the immediate control of the diver, and that it enables him to remain for several hours under water at great depths, without inconvenience, and with great freedom of action.

PASSENGERS INWARDS.—Per Johannis Lodewyk, Capt. van der Wall, at Rotterdam, from Java: Messrs. J. Reiniersen and F. C. Luykx. Per Nieuw Holland, Capt. Tuck, at Texel, from Batavia: Mr. and Mrs. E. H. Bletterman and family, Lieut.-Col. and Mrs. Netscher, Mr. Doyer and family, Madame Schultz and two children, Madame Engels, Mr. Loman, jun., and three Javanese servants. Per Diligencia, Capt. Bentwelt, at the Texel, from Banjoewangie: Messrs. A. Martini and J. van Geffen. Per Willemina and Clara, Capt. Abrahams, at Amsterdam, from Batavia: Mr. and Mrs. J. Simmer and four children, Mrs. Ravensway and child, Mrs. Muhlmitchel and three children, Mrs. van Rott and three children, Mrs. Osseman and three children, and three native servants. Per Agatha Maria, Capt. van Zyp, at Amsterdam, from Batavia: Messrs. H. F. van der Ree, W. Leverstein, and J. M. Huiskens and two children. Per Copernicus, Capt. Visser, at Rotterdam, from Batavia: Colonel and Mrs. Bade, Major and Mrs. Haitink and two children, Miss Voss Meyer, two invalided soldiers, and one Java servant. Per Twee Antonys, Capt. van Ryn, at Rotterdam, from Batavia: Major and Mrs. Shukking and five children, Mr. J. H. Appellius, Mr. van Hoboken, three invalided soldiers. Per Graaf van Heyden Reynesteyn, Capt. Wamsteker, at Amsterdam, from Batavia: Messrs. M. A. Herven, W. A. Rapper, J. Meyer, and A. C. Westenrood.

ASTOR HOUSE. SHANGHAI.

The Anti-Corrosion Paint is now used extensively

FOR ALL KINDS OF OUT-DOOR WORK,

Such as WOOD, STONE, BRICK, COMPO, CEMENT, &c. Also IRON STEAM VESSELS, BRIDGES PIERS, or any description of Iron, and from its being expressly manufactured for exterior purposes, is peculiarly adapted for tropical Climates, resisting the rays of the sun more effectually than any other Paint. It can be easily applied by any Labourer, being sent in various Colours, requiring simply to be mixed (no grinding is needed).

Merchants and Shippers' attention is particularly drawn to it as a most serviceable article for exportation.

A List of Colours, Prices, &c., also Copy of Testimonials, will be sent.

WALTER CARSON AND SONS,

(Successors to the Inventors), 9, GREAT WINCHESTER-STREET, LONDON, E.C.

JOHN GOSNELL AND CO.'S PERFUMERY, PATRONISED BY HER MAJESTY and the ROYAL FAMILY.

Among the celebrated articles for the Toilet prepared by J. G. and Co., the following are of the choicest kind, and universally admired:—

JOHN GOSNELL and Co.'s COURT PERFUMES.—Queen Victoria's Bouquet, The Bride's Bouquet, Jockey Club, Guard's Own, Eas Bouquet, Military, Royal Yacht Club, New Perfume—Extract of Flowers, Eugenie, Napoleon III., Frangipanni, Wood Violet, Opera Bouquet, &c.

JOHN GOSNELL and Co.'s FOUNTAIN PERFUMES for the BALL-ROOM.—A most elegant and useful invention, which cannot fail to be appreciated by the Ladies.

JOHN GOSNELL and Co.'s TREBLE DISTILLED LAVENDER WATER possesses in the highest degree the full fragrance of the flowers.

JOHN GOSNELL and Co.'s REAL OLD BROWN WINDSOR SOAP.—A Toilet Soap of the finest quality and very superior fragrance. It differs so widely in composition from the ordinary Alkaline Soaps, that its frequent use is highly beneficial in removing all harshness and redness of the skin.

JOHN GOSNELL and Co.'s MOELLINE, GOLDEN OIL, for the Hair.

JOHN GOSNELL and Co.'s INSTANTANEOUS HAIR DYE.—The only Hair Dye which produces a good natural colour with perfect certainty, and with the least possible trouble.

JOHN GOSNELL and Co.'s PATENT TRICHOSARON.—The obvious utility and improved construction of the Trichosaron Hair Brush adapt it for general use, and render it the most suitable Hair Brush for the Toilet. Sold by all Perfumers, Chemists, &c.

JOHN GOSNELL and Co.'s STEREOESMIC TOOTHBRUSHES, highly recommended by the most eminent Dentists.

JOHN GOSNELL and Co.'s ESSENCE of GINGER. Merchants and Shippers supplied on liberal terms.

12, THREE KINGS COURT, LOMBARD-STREET LONDON.

KEATING'S PERSIAN INSECT DESTROYING POWDER.—This powder is quite harmless to Animal Life, but is unrivalled in destroying Fleas, Bugs, Emmets, Flies, Cockroaches, Beetles, Gnats, Mosquitos, Moths in furs, and every other species of Insect in all stages of metamorphosis. It is perfectly harmless in its nature, and may be applied without any apprehension, as it has no qualities deleterious to animal life. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

FAMILY ARMS, &c., Emblazoned for Painting on Carriages or Needlework, 6s.; Best Style, 12s., Gothic and Modern Monograms Designed, 6s. Arms Quartered, Impaled, and Painted on Vellum, according to the laws of Heraldry. By T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

THE PEN SUPERSEDED.—Mark your Linen. The best and only method of Marking Linen, Silk, Stockings, Coarse Towels, or Books, so as to prevent the ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATES. By means of this novel invention a thousand pieces of linen can be marked in a few hours. Initials, 1s. each. Name, 2s. 6d. Set of Moveable Numbers, 2s. 6d.; Crest Plate, 6s., with the necessary directions for use. Post free. Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c.

"Several trials with Mr. Culleton's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters are beautifully marked in a deep black colour, without blotting, and after a long boiling, with either potash or soda, they remain unaltered. Other plates which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Culleton's Plates are incorrodible, and will not hurt the finest fabric.—(Signed) SHERIDAN MUSPRATT, College of Chemistry, Liverpool."

"May, 15, 1864."

All orders to be sent to the Patentee and Sole Maker. T. CULLETON, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

All Orders executed by Return of Post.

KAYE'S WORSDELL'S PILLS cannot be equalled as a Family Medicine.—Testimonials are constantly arriving from all parts of the world as to their astonishing efficacy in destroying the cause, and removing the effects of disease. They purify the blood and correct such derangements of the stomach, liver, and other organs as are the primary causes of disease, bring all the bodily functions into healthful exercise, and strengthen and invigorate the entire system.

Hundreds of cases of cure accompany each box. Sold by all Druggists and Medicine Vendors, in boxes at 1s. 1½d., 2s. 9d., and 4s. 6d. Wholesale Depot, 23, Broad-street, London.

KEATING'S

PALE NEWFOUNDLAND COD LIVER OIL, perfectly pure, nearly tasteless, having been analysed, reported on, and recommended by Professors Faylor and Thomson, of Guy's and St. Thomas's Hospitals, who, in the words of the late Dr. Pereira, say that "The finest oil is that most devoid of colour, odour, and flavour." Half-pint, 1s. 6d.; Pint, 2s. 6d.; Quarts, 4s. 6d.; and Five-pint Bottles, 10s. 6d., Imperial measure.—79, St. Paul's Churchyard, London.

RIMMEL'S TOILET VINEGAR supercedes EAU DE COLOGNE, as a TONIC and BRACING LOTION, a reviving scent, and a powerful disinfectant. 1s., 2s. 6d., and 5s. Sold by all the trade.
E. RIMMEL, Perfumer, 96, Strand, and 24, Cornhill London, and 17, Boulevard des Italiens, Paris.

TO CAPTAINS, MERCHANTS, EMIGRANTS AND OTHERS.

TOZER'S PATENT PORTABLE KITCHEN.—It is adapted for Boiling, Stewing, Steaming, &c., in which a dinner can be cooked for three or four persons. To small families, pic nic parties, and to invalids in particular, its varied application will be duly appreciated. Officers at home or on a foreign station will find it a most desirable article. A prospectus with drawings and prices will be forwarded on application to THOMAS TOZER, Ironmonger and Manufacturer, 55, Dean-street, Soho, London; or may be obtained of Mr. GEORGE HOLMES, Hong Kong.

NELSON'S MEDICATED BELT.
(Ed. Nelson, Naval Surgeon from 1832 to 1857.)

Gentlemen who are subject to pains in the back or loins, Rheumatism, Lumbago, or who are given to corpulence, are advised to wear NELSON'S MEDICATED BELT, as it gives a great support to the entire frame, and a comfortable and genial warmth to the back and abdomen, promoting health and digestion. Gentlemen who ride for business or pleasure should wear this belt as a preventive of Rupture, &c.

NELSON'S MEDICATED MARINE BELT for the prevention of Sea Sickness and the support of the back and loins during a long voyage.

"All those whose duty or pleasure calls them to sea should possess this Belt, for, putting aside its use on board ship, it is invaluable as a riding belt, fitting easily, and supporting the back."
"MARK PERCIVAL, Lower Parade, Leamington, August 3, 1858."

These Belts are sold by Mr. WHITBURN, Chemist, 174, Regent-street, price 21s. each, or direct from the Maker, WM. ELSTON, 12, Avery-row, New Bond-street. Circulars free. Orders from the country must have the size of waist and hips, and a post-office order for 21s., payable to Wm. Elston, at Cavendish-street.

These belts can be had of any tailor in the kingdom.

HOLLOWAY'S OINTMENT AND PILLS.

PLEASURE TO THE HEALTHY.—There are many ailments which, without endangering life, sadly prevent its enjoyment. The patient says he "is neither ill nor well;" things once pleasing to him now cease to be pleasurable. Let such an individual try the corrective powers of Holloway's medicaments. When this Ointment is rubbed over the stomach, liver, or kidneys, it penetrates and regulates each function that is disordered; expels all noxious matters, and adjusts the secretions of every organ respectively so as to secure happiness to the healthy. Nausea, bilious attacks, sick-headache, and diarrhoea all succumb to this treatment, aided by the proper use of Holloway's Pills; the appropriate doses of which are printed to accompany each box.

PUMPING MACHINERY.

GWYNNE AND CO., ENGINEERS, LONDON, manufacture and supply the following machinery, of the most improved construction, and with all the latest improvements:—Portable and Fixed Steam Engines and Boilers of every description; Water-wheels, Windmills, Horse and Hand-power Machines; Pumping Machinery for the supply of towns, cities, and districts, and for the irrigation of coffee, cotton, indigo, sugar-cane, and rice estates, for pumping out coffer dams, canals, dry docks, reservoirs, &c. They also manufacture and supply the Pumping and other machinery for paper, pulp, and fulling mills, breweries, distilleries, tanneries, starch works, bleaching, dyeing, and calico-printing works, chemical works, silk, cotton, and flax mills, and manufactories in general.

Price Lists and further particulars obtained on application to GWYNNE and CO., Hydraulic and Mechanical Engineers, Essex-street Wharves, Strand, London.

For Dock work, and large Pumping operations, Gwynne and Co.'s Machinery stands unequalled.

TWINBERROW'S DANDELION, CAMOMILE, and RHUBARB PILLS, an effectual cure of indigestion, all stomach complaints and liver affections.

In cases of constipation these pills never fail in producing a healthy and permanent action of the bowels, so that in short time aperients will not be required, and, being quite as innocent as castor oil, they may be given to children.

From Dr. Dick, Lansdown-terrace, Kensington.

"Sir,—Send me another bottle of your Dandelion, Camomile, and Rhubarb Pills for my own use. I lose no occasion of recommending these Pills, as I can conscientiously do so."

Prepared by TWINBERROW, Operating and Dispensing Chemist, 2, Edwards-street, Portman-square, London; and may be had of all Patent Medicine Vendors.

BLAIR'S GOUT and RHEUMATIC PILLS.

Price 1s. 1½d. and 2s. 9d. per box.

This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century to demonstrate by unsolicited testimonials from persons speak of a cure for the Gout was considered a romance; but now the efficacy and safety of this medicine is so fully in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age.

These Pills require no restraint of diet or confinement during their use, and are certain to prevent the disease attacking any vital part.

Sold by all medicine vendors. Observe "Thomas Prout, 229, Strand, London," on the Government Stamp.

**NOTICE TO PASSENGERS BY THE OVER-
LAND ROUTE, via EGYPT.**

PHILIP ZECH, Proprietor of the two well-known Hotels in Alexandria, the Hotel d'Europe, and the Peninsular and Oriental Hotel, begs to inform his friends, and Travellers in Egypt in general, that he has purchased **SHEPHEARD'S HOTEL in CAIRO**, which will still continue to bear the same name; and in returning thanks for the extensive patronage enjoyed by his two houses in Alexandria, hopes that the preference may likewise be extended to his house in Cairo, which will be managed in first-rate style, and in a manner intended to give every satisfaction to its frequenters, both as far as table, wines, internal and external service are concerned. Many alterations and ameliorations are being carried out at the present moment.

Curtis on Manhood.—New Edition.—A Medical Essay on Nervous Diseases.

Just published, the 120th thousand, with numerous plates in a sealed envelope, price half-a-dollar.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE, with plain directions for perfect restoration to health and vigour. By J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

CONTENTS:

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhoea and Impotence; Early Vicious Indulgences; Dangers of Neglect.

CHAPTER III.—A Review of the various Disqualifications of Marriage—whether resulting from the Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection.

CHAPTER IV.—The Author's plan of Treatment, Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhoea and other Urethral discharges by microscopic examination.

CHAPTER V. and VI. on the modern Treatment of Gonorrhoea and Syphilis.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

"We feel no hesitation in saying, there is no member of society by whom the book will not be found useful—whether such person hold the relation of Parent, Preceptor, or Clergyman."—Sun.

Mr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by letter, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Mr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty Years; nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

A message was received on the 18th, announcing the Aden portion of the Red Sea cable was in order, and that the incoming mails were at Aden. On the 21st the cable was announced again broken.

A telegram was received on the 2nd inst. announcing that the P. and O. str. "Simla" had put back to Aden with main shaft broken. Her mails, passengers, and cargo were transferred to the "Norma" and "Malta," and arrived here with the Bombay and Australian mails ten days over due. The Red Sea Cable continues out of order.

The Publication of THE LONDON AND CHINA TELEGRAPH
commenced at 3 P.M.

List of Passengers.

PASSENGERS INWARD.

By this mail, from Hong Kong for Singapore: Messrs. W. C. Hartmanns, R. H. Dana, Burgoon, Hernandez, C. G. Allen, and Kniffier. For Bombay: Capt. King. For Southampton: Major Mowbray, Lieut. Mason, 3rd B.N.L., Messrs. A. F. Lee, clerk to Naval Yard, T. M. Brown, M. Thompson, Wm. Druiner, Mr. and Mrs. Hooper, Capt. and Mrs. Blackhead, child, and nurse, and Lieut. Hickman. Per P. and O. str., 20th Sept., from Southampton to Singapore: Mrs. Bernard and infant. To Hong Kong: Mr. H. Dickinson. From Marseilles, 28th Sept., to Hong Kong: Mr. Lawrence. From Suez to Penang: Mr. E. J. Leveson and friend.

Per P. and O. str., 27th Sept., from Southampton to Shanghai: Mrs. Marshall, Mr. Maclean. From Marseilles, 5th Oct., to Hong Kong, Mr. and Mrs. T. Borrodaile.

Per P. and O. str., 4th Oct., from Southampton to Hong Kong: Mr. G. Smith, Miss Harmer. To Shanghai: Mrs. Davies. From Marseilles, 12th Oct., for Hong Kong: Mr. R. Westall. To Singapore: Mr. Matzen. To Shanghai: Mr. and Mrs. J. P. Tate. From Alexandria to Singapore: Mr. R. B. Reid.

Per P. and O. str., 20th Oct., from Southampton to Singapore: Mr. and Mrs. Gemmell, Mr. L. van Pabst. From Marseilles, 28th Oct., for Singapore: Mr. and Mrs. C. Hill and infant, 3 children, Miss Symons and governess. From Alexandria to Hong Kong: Mr. J. Hogg.

Per Japan, for Shanghai: Mr. Mackenzie. Per Whirlwind from Hong Kong, Mr. and Mrs. Buchan.

Summary of News from the Far East.

THIRD CHINA WAR.

(FROM A CORRESPONDENT.)

HONG KONG, June 6.

When last I wrote I was expecting to be away before this, and, in fact, I have made one attempt, but was obliged to return with the rest of the fleet. This makes the second little episode of the kind which has occurred lately. Admiral Hope justifies an old saying, if a little altered, "Hope delaying makes the heart sick."

It is necessary for me to observe that the summer season is the only time when foreign troops, especially those whose base is a sea force, can act against the Chinese at the north. The date at which I write from Hong Kong will show you that no wonderful energy has been pursued to advance our troops. Five days since we made a move to Deep-water Bay by we, I mean steamers, transports, gunboats, and all the etceteras. Bumboats were in despair; and as we steamed away we left the harbour looking comparatively desolate. It was not for long, however; the Admiral sent for us back again, and we once more adorn the harbour of Victoria. The cause of all this cannot be divined.

Admiral Hope is, I am told, a man of sufficient private property to enable him generously to refuse the pay which his appointment would give him, and raising a pedestal to himself out of this; he seems to feel that he may from its summit dispense the nation's money with even a more liberal hand. To those who look upon the Chinese expedition as a mere excrescence of the strength of England, I can inform them that, exclusive of men-of-war, gunboats, &c., Admiral Hope has detained for two months in inactivity vessels which, if it be allowable, to use Whitbread's way of explaining the number of his casks to George the Third, would, if joined end to end without bowsprits, reach to six miles. Of steam transports alone we have one mile and a half, and of sailing vessels four and a half, all these be it remembered at a monthly charge to the taxpayer of England.

So much now is he laughed at, that the Chinese merchants of Canton offered, some time ago, a bet of \$50,000 that whenever we reached the Peiho we should again be disabled.

After so dismal a tale you will not be astonished to hear that one of the finest vessels in our service has been wrecked, irretrievably wrecked. The *Assistance* now lies with only her topgallant forecabin above water, and this the result of what

every one calls incapacity, or something worse. In my last I had to congratulate the arrival of the troops as being without disaster. The luck was too good to last, and at least £30,000 now lies at the entrance of Deep Bay. It is possible that Lord Elgin may, amongst other items, include this derelict, in his claims; if so, it will be of a piece with the justice of the war, and the British Lion may receive payment for its cub, although lost by its own officers. The facts are these, which I take from an eye-witness and give in his own words, not being present myself.

"Ship ———"

"June 1, Friday.

"Left Hong Kong in the afternoon (with three ships in tow for Tee-liu-hisa-Bay) for the North, but obliged to put back through stress of weather into Deep Bay, about twelve miles from Hong Kong, where we found several other vessels similarly situated. About 7 P.M. a gun was fired from the *Assistance* troop ship as a signal of distress. We immediately got under weigh and proceeded to where she was at anchor, and found that she was on a rock. It appears that she anchored at 3 P.M. in nine fathoms of water, apparently in perfect safety, but very close to the land. As the tide receded she sank, when her forefoot struck upon a rock, which soon beat a hole in her bottom, through which the water rushed, and soon found its way astern, not being divided into bulkheads. Down she went. Gunboats and boats were rapidly at the scene of the disaster, who took out her crew and the coolies that were on board; not being able to render any assistance we returned to our former anchorage."

During the next days hands and boats were employed in doing all they could to save, if possible, the vessel. Her masts were cut away, and all that could be got out was brought away, with a view of lightening her. This, however, had no effect, and she is now left as a memento of the incapacity of her commander and master. This much appears certain, that had she escaped the rock which was under her, she could hardly have escaped the jutting portions of the point she anchored off, not being 120 yards from the shore.

With the exception of this, and our yachting trips, we have done literally nothing. A murmur, not loud but deep, is heard against the Government who have entrusted the carrying out of this expedition to the hands of one who, through his being headstrong and unable to govern himself on the first occasion, brought dishonour on the British flag at the Peiho, and now leaves it floating idly at Hong Kong to be scoffed at by every Tartar who mans a junk.

The French troop-ship *Reine des Clippers* took fire at Macao, and was scuttled; all hands saved. The *Stone* put into Amoy leaky. General Robert Napier arrived at Chusan on the 18th May, en route to Shanghai. The vessel which conveyed him, the *Encounter*, proceeded on to the Gulf of Pechele.

The weather at Chusan had been very fine and cool, and the health of the troops most satisfactory. The natives are all kindly disposed towards them.

It is announced that according to instructions from home, Colonels Haythorne and Bruce, and Major Howe, leave the China staff and proceed to India. The work of the Indian commissariat has merged into the English.

The number of merchant vessels and steamers under charter to the British Government, on account of the expedition, amount to 114.

(FROM ANOTHER CORRESPONDENT.)

HONG KONG, 6th June.

During the past week a good deal of the obscurity which hitherto has hung over the proceedings of the authorities in reference to the scene of active operations in the north, has been removed; as it is now clear, that whether an attack is forthwith to be made on the forts of the Peiho or not, at any rate the naval and military forces of the English portion of the expedition are to rendezvous—not at Chusan, as was supposed, but in Talienswan Bay, a harbour on the eastern side of the point of land in the Gulf of Petchele, known as Lian-tie-Shan Peninsula, and which is on the side of the gulf opposite the Taku forts, distant from them by sea about 200 miles. Talienswan Bay, it is presumed, will be the base of our operations; the permanent store and hospital ships will be stationed there, the sick and wounded from the Peiho being brought over in steam hospital ships. The following is the detail of the expeditionary force as at present determined on, though it is by no means improbable that the disturbed state of Chinese affairs at Canton and Shanghai, contingent on the approach of the rebels, may render some changes indispensable. Already it is rumoured that the regiment of Loodiannah will have to reinforce the garrison at Canton, and the 99th garrison Shanghai. Be that as it may, the following is the official detail of the force at the present time:—

Commander-in-Chief: Lieut.-General Sir Hope Grant, K.C.B.

Artillery Reserve: Rotton's, Bedford's, and Pennyquick's Batteries; two Batteries Madras Artillery.

Engineer Reserve: Head-quarters, and one half of 8th Passellow's Company Royal Engineers; two Companies Madras Sappers and Miners, Expeditionary Force.

1st Division: Major-General Sir John Michael, K.C.B.; Royal Artillery: Desborough's Battery; Royal Artillery, Barry Battery, (Armstrong); Royal Engineers: Fisher's Company.

1st Brigade: Brigadier General Staveland, 44th Foot; 2nd Battalion Royals, 31st Foot, the Regiment of Loodiannah.

2nd Brigade: 1st Battalion 2nd Foot; 2nd Battalion 60th Rifles; 15th Punjab Infantry.

2nd Division: Major-General Sir Robert Napier, K.C.B.; Royal Artillery, Moubay's Battery; Royal Artillery, Govan's Battery; Royal Engineers, Gordon's Company.

1st Brigade: Brigadier General Jephson, 2nd Foot; 1st Battalion, 3rd Foot; 44th Regiment, 8th Punjab Infantry.

2nd Brigade: Brigadier-General Reeves, 99th Foot, 67th Regiment, 99th Regiment 19th Punjab Infantry.

Cavalry Division: Brigadier-General Pattel, King's Dragoon Guards. King's Dragoon Guards, two squadrons, Royal Artillery; Millward's Armstrong Battery, Probyn's Horse, Fane's Horse.

Three hospital ships have been already prepared and furnished with their permanent staffs. 1st: The *Mauritius*, steamer, Staff-Surgeon Lewins; Staff Assistant-Surgeons Barnwell and White. 2nd: The *Sir William Peel*, steamer, Staff-Surgeon D. R. Rennie; Staff Assistant-Surgeons Watson and Low. 3rd: The *Lancashire Witch*, Staff-Surgeon C. C. Rutherford; Staff Assistant-Surgeons Kearns and Bailey.

The two first vessels, being steamers, will be employed solely in the conveyance of sick and wounded to the station or hospital ships, of which the *Lancashire Witch* is the first that has been taken up—she will be stationed in Talienswan Bay. It is intended to take several other vessels up for the same purpose; as soon as they shall have completed the transport of troops to the North. The *Earl of Clare* is one named. The *Melbourne* steamer will also be employed as a stationary hospital ship, her machinery being so much injured as to render her unfit for steam service. She arrived here yesterday, having left Rio, under canvass on the 4th of March. Staff-Surgeon Martin, and five assistant-surgeons arrived in her.

In my last communications I gave the details of the force that had already started north, indicating Chusan as their probable destination—from facts, however, which have since transpired, Talienswan Bay is the most probable place they have started for.

It was determined by Admiral Hope to start off the remainder of the expeditionary force prior to the arrival of Lord Elgin, and one of the days of most unusual bustle was Friday last, the 1st June; the whole day steamers with transports in tow leaving the harbour. As evening was closing in, H.M.'s steamer *Vulcan*, with the head-quarters of the 2nd Foot on board was seen leaving the harbour with the transports *Daniel Runkine* and *Clarendon*, in tow, both containing portions of Probyn's Horse—immediately following her was the *Bentinck* (recently purchased by H.M.'s Government from the P. and O. Company) with the Artillery transports *Pioneer* and *Queen of the East* in tow, both laden with Armstrong Batteries. Just as these vessels were emerging from the harbour by the Lymoon pass, the news was received in Hong Kong of the total loss of H.M.'s ship *Assistance*, a magnificent steamer of 2,000 tons. She left Hong Kong Harbour that morning, and was on her way round to Deep-water Bay to take in tow for the North ships with Artillery on board, when, unfortunately, she struck on a rock just as she was entering the Bay, and soon became a wreck; time, however, was afforded to save her live cargo, consisting of some troops and 850 of the Chinese Coolie Corps (Bamboo Rifle Brigade)—the latter were in considerable tribulation when the vessel first struck, and were, with difficulty, prevented from jumping overboard and making for the shore, but in a short time they became reassured and were all safely landed. At the period of her striking, the *Assistance* was not much over her own length of the shore. A considerable quantity of government stores have been lost in her, and all idea of saving the vessel has been abandoned. Only seven of the Bamboo Rifles deserted after they got on shore. Fortunately, about 400 of them were veterans who had served in the late operations against Canton; and therefore, from their being familiar with the service, were probably mainly instrumental in preventing a general bolt of the coolies the moment they were landed, more especially as they had all received two months' pay in advance. Deep-water Bay is an anchorage on the opposite side of the island from Victoria, and has been used as a rendezvous for Cavalry transports for some weeks back, owing to its affording some little facilities for giving the horses a run on shore. The

greater portion of the expedition was got fairly afloat and out at sea by the 2nd instant. The start was an unfortunate one, as the wind was foul outside, and the practical result of it has been that between the 3rd and the present date upwards of sixty transports have put back to Hong Kong, where they are now laying, and likely to remain for some days. This has involved a sad and useless expenditure of coal, which is the more to be regretted, the article in question being very scarce at the present time.

There is now no prospect of the expedition sailing until the arrival of Lord Elgin, who is hourly expected with the mail of the 20th April from Southampton. The force to be left for the defence of Hong Kong consists of a Provisional Battalion composed of various depôts of the various regiments serving at the North—the 21st Madras Native Infantry, and detachments of Royal Artillery and Engineers, with a corps of Gun Lascars. At Canton, the garrison consists of the 87th Regt., Barstow's Battery of Royal Artillery, two regiments of Bombay Native Infantry, a corps of Mounted Police, and 500 French Marine Artillery. The troops in harbour at Hong Kong at the present time are the head quarters, 31st Foot in the steamer *Armenian*; the 2nd Foot in H.M.'s ship *Vulcan*; the 3rd Foot in the *Simoom* and the *Sidney*; the whole of the Cavalry and Artillery, and detachments of the 44th Foot, in several vessels taking up the Coolie corps—a considerable number of which corps has already sailed, amongst others 200 in the *Forerunner*, with a large detachment of the 44th Foot and Military Train. The enlistment of Coolies continues to be vigorously prosecuted, but desertions, after receiving the advance for service in the North, are so numerous as seriously to counteract the endeavours which are being made to complete the corps to 5000.

The only corps remaining in camp at Kowloon, is the Lodiannah Regiment, and I have just heard that in place of forming the 3rd Regiment of the 1st Brigade, or proceeding to Canton, it is forthwith to be dispatched to Shanghai, to aid the Chinese authorities in defending the town against the rebels; this information is authentic, and involves a national anomaly that could not possibly occur anywhere but in the Celestial empire, where, at the same moment, we are the ally and enemy of his Celestial Majesty; what it will all end in, time will only show; but my own belief is that the ultimate fate of the great expedition to China of 1860, will be to form an auxiliary force to support the Chinese monarchy, and prevent the ancient structure, rotten as it is, tumbling to pieces under the pressure of domestic troubles; of the French we know nothing, we hear as little of them as if they were still at Toulon; report says, however, that they are not yet ready to take the field. In the *Isere*, the wreck of which was alluded to in my last, they have lost two rifled cannon, as well as equipments for field artillery. The camp ground at Cooloon is hired from the local authorities of the Chinese Government, at a rental of 500 taels per annum, equal to about £200 per annum; another of the anomalies of this most anomalous campaign.

JAPAN.

A correspondent, writing from Nagasaki, on the 24th May, says:—"We shall soon be able to supply any quantity of tea, of good quality and cheap. As for tonnage, there is none to be got, we are giving beastly old tubs \$6 per ton hence to Shanghai! which not long ago was the rate from Shanghai to New York, and we should now ourselves be glad to charter a 1,000 ton ship (at the present moment I mean) at a high rate, to go over to Shanghai—nothing to be got but little barques and brigs, owing to the Government taking up every available vessel of decent size; of course they will all be released by and bye, and we shall have too much tonnage for a time. At present we are hard up. We ourselves work three vessels constantly between this and Shanghai (*Syrian*, *Neva*, and *Emma*), and they are not near enough, although they make the round each in three weeks.

"This is a most magnificent place. Reams of paper would not describe its beauties,—the splendid scenery, the glorious climate, and delightful contrast it makes with China."

CHINA.

SHANGHAI.

The London mail of the 10th of April arrived on the 26th May, being forty-six days en route.

A panic of considerable extent has taken place at this port. The following summary is taken from the *China Overland Trade Report*:—"An Imperial army had for some time in-

vested the city of Nankin, the stronghold of the rebels, on three sides. The river face was open, and as the communication with the opposite bank could not be cut off, it is needless to say that the investiture was a tedious operation. So much vigor however appeared to have been instilled into the Imperial ranks, that it is generally supposed a result highly favourable to their cause must ensue. The alarm and consternation were so excessive as to stop all communication between the two places for three days, during which period the panic which existed in Shanghai is beyond description. At the solicitation of the Taoutai, the French and British Ministers took military possession of the city. A notice issued to that effect tended to pacify the people somewhat, but trade was utterly stagnated and was the last thing thought of.

The steamer *Remi*, under charter to the Russian government through Messrs. Augustine, Heard, and Co., was totally lost on the 25th April, on the Korean coast, in lat. 33 degs. 56 mins., and long. 126 degs. 16 mins. Crew all saved, and well treated by the natives. The vessel was bound from Hakodadi to Gulf of Pechalee.

The following narrative of the landing of the crew, &c., at a Korean village, is taken from the *North China Herald*:—

We obtained permission from the natives to erect our tents a little way up the hill, and through the kindness of these people we were regularly supplied, night and morning, each with a cup of hot congee. The vessel was broken in small pieces, and the remains cast high and dry upon the rocks. April 30: strong wind with rain; not visited by the Koreans, their guard, consisting of about fifty men, never leaving us day or night. All our people employed making themselves as comfortable as circumstances would permit—congee supplied by the natives—built a second tent for the servants, preparing the boats, drying and arranging the stores saved from the wreck.

On the 7th May five officers held a second interview under a tent which they had erected for themselves, but came to no definite arrangement for sending us away. On this occasion they alluded to sending us away on horses; from this inferred that they would send us across to the mainland, and from thence on horseback around the Gulf of Leontung into China.

"The island on which we were wrecked is called by the natives Chow-a-Sing, the centre being in lat. 33.58 N., with Mount Auckland on Quelpert Island bearing S. by E. $\frac{1}{2}$ E. On May 12th, wind fair but light, all the boats leaking, the chief officer's in particular. Taking to our oars we reached Port Hamilton at 6 p.m. May 14th, we left our anchorage, the boats running well before a fresh westerly breeze shipping but little water. Continuing favourable we anchored at Nagasaki on the 16th after a trip free from accidents. The crew were disposed of by the British Consul, and the *Nimrod*, with Captain Laen and Russian officer (his passenger), was despatched to the wreck to bring away the party left there, which she reached on the 20th: during our absence the people had been well taken care of by the Koreans, who visited the *Nimrod* and were received and well treated by Commander Wynniatt. Stopping but a sufficient time to embark all our people, we parted from our Korean friends with very favourable impressions of them, and arrived at Shanghai on the 22nd.

The British and French Ministers had issued the following notification:—

"Shanghai is a port open to foreign trade, and the native dealers residing therein have large transactions with the foreigners who resort to the place to carry on their business. Were it to become the scene of attack and of civil war, commerce would receive a severe blow, and the interests of those, whether foreign or native, who wish to pursue their peaceful avocations in quiet, would suffer great loss. Her Majesty's naval and military authorities will take proper measures to prevent the inhabitants from being exposed to massacre and pillage."

HONG KONG.

The London mail of the 20th April, which was wrecked at Galle, had not arrived at the latest date, 7th June.

Sir Hope Grant and Amiral Hope are still at this place awaiting the arrival of Lord Elgin. The details of the progress—or rather non-progress—will be found under the head of "Third China War." Telegraphic news from London to the 18th April had been received *via* Calcutta, per *Lancefield*, at Singapore, and from thence to this place, per Russian war steamer *Seeltam*.

The British steamer *Cheney Chase*, belonging to Messrs. Jardine, Matheson, and Co., was in Aberdeen Dock undergoing repairs, having struck on a rock in the river Nien, when coming out of Foo-chow on the 24th May. Considerable injury has been done to her hull and machinery, and it is expected she will have to be sent home for efficient repairs.

The *China Mail* makes the following announcement in reference to the Colonial Government:—"There is some talk at present, in quarters not unlikely to be well informed, on the subject of the establishment of a new arrangement in this part of the world, in the shape of a Governor-General of H.M.'s Insular Possessions in the East. The insular possessions which would be placed under him would be Ceylon, Penang, Singapore, Labaun, and also, we trust, Hong Kong. Mauritius is so far distant, and has so little connection with the Anglo-Asiatic islands, that it is not likely it would be included.

Returns of shipping and emigration at Hong Kong and Canton have been published—particulars of which will appear in our next.

The case Caldwell v. Murrow has not yet come on for trial.

CANTON.

It is reported that the revenue of the Chinese Custom House is to be appropriated towards paying the French indemnity to the extent of two millions of dollars, the instalments to run over six years, the first having actually been paid. The English authorities, it is stated, have also received the sum of 150,000 dollars, which, it is supposed, is intended for distribution amongst the claimants whose property was burnt and destroyed at Canton in 1856.

The rebels continue their incursions in the neighbourhood.

The price of rice has fallen, and arracan is quoted \$2.10 to 2.25. Siam, best, \$2.50 to 2.55.

The *Cumfa* has been quite busy of late with her exploratory expeditions on behalf of the Chinese Imperial Customs. There was a sale of confiscated goods, consisting of opium, &c.

The refugees from the rebel villages are no longer to be met with in the streets, for whom a mat shed has been erected by the aid of subscriptions collected from the foreign community, through the indefatigable exertions of our esteemed chaplain.

The *Melée*, which was built at Tatu, and which has since undergone alterations in her machinery, promises to become a powerful competitor to the *Spark*. Report has it that her expenses of fuel are comparatively trifling, only \$25 for the run, and as she gets up in less than nine hours from Macao with adverse tide part of the way, her builder and owner may well be proud of her.

COCHIN CHINA.

It is reported, although not officially announced, that hostilities have recommenced in Cochin China, and the blockade of Saigon has been renewed. This intelligence has had the effect of putting a stop to any further engagements for shipping to that quarter, as it is said that the ships already in Saigon cannot procure cargo.

MALACCA STRAITS.

SINGAPORE.

The telegraphic cable between this and Batavia has been broken for the last six weeks, and great difficulty is experienced in repairing it. The fracture is close to this; but what with the rocky bottom and the coral banks, it is a matter of great difficulty to overhaul it without breaking it; added to which, the current, generally running four to five knots an hour, increases the difficulty of the operation.

ALEXANDRIA.

The Red Sea cable only worked for three days. H.H. II Haim Pasha, son-in-law to the Sultan, left for Constantinople; at the last moment, the manager of the Bank of Egypt applied to the viceroy unsuccessfully to stop him, as it appears that the Bank has advanced him something like £170,000. There has been a great deal of talk on this subject, and opinion generally condemns the bank for its hasty and ungenerous mode of acting, and says that the produce of his estates have been mortgaged to the bank for some time to come.

COMMERCIAL REPORT.

The mails delivered this morning are ten days overdue, owing to an accident to the steamer *Simla* in the Red Sea, the dates are from Shanghai to the 30th May, Hong Kong 7th June, and Singapore 16th June. The markets in China for imports continue to be moderately active. At Shanghai, owing to the rebel panic, sales had ceased. The *Simla*, with these mails, left Aden on the 9th, at 10 a.m., and on the following night, when near Gibbel Teer, her main shaft gave way. The *Candia*, which sailed from Suez on the 7th, fell in with her on the morning of the 11th, and remained by her for 36 hours, in hopes that she might continue her voyage with one engine. This was found to be impossible, and she was towed back to Aden. The *Simla* mails and passengers were taken on to Suez by the *Norna*.

TEA.—Notwithstanding the black mail levied on the new teas on its transit to the various stripping ports, there appears to be no delay in its arrival. The prices, however, must necessarily be high on this account. At Foo Chow the market has been opened for the "New Season's Congous," by the settlement of some 10,000 to 11,000 chests, at 32 to 35½ taels ship off—which is fully one tael over last year, taking quality into consideration. About 35,000 chests have arrived. The quality is considered an average one.

The picul is 133½ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

	Bank.	Private.
	6s. 7½d.	6s. 8d. to 6s. 8½d.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From London: May 19, Peterborough. From Cardiff: 27, Dakotah. From London at Hong Kong: May 24, Robin Hood; 26, Esmeralda; 28, Polmaise. From Cardiff at Hong Kong: May 22, Rebecca; 27, Flying Cloud; 28, Carin; 29, Nabob. From New York at Hong Kong: May 26, Winged Racer; 28, Lucy E. Ashbey.

At HONG KONG, MACAO, and CANTON.—From London: June 5, Melbourne. From Cardiff: 5, Salem, Bertha; 6, Tollens. From Swansea: 1, King Fisher. From Newcastle: 4, Ardville; 5, Golden Eagle. From New York: 4, Penguin. N.B., Palmer. From Boston, May 28, Fearless. From Liverpool.—May 27: Christopher Hall, Chrysolite; 28, Glendune, Crest of the Wave, Romeo. From Sunderland: 25, Hellevoetsluis; 27, Electric, Beatrice; 29, Willie. From Plymouth: 27, Brederode. From England: 30, steamer Ad-laide.

At MANILA.—From London: May 18, Idas; 28, Amoor; 29, Clifton. From Liverpool: 27, P. A. Santander, Julian de Unzueta; 31, B. del Oceana.

At SINGAPORE.—From Cardiff: May 31, Joanna Maria Christiana. From Glasgow: June 14, Commodore.

SAILED.

From NAGASAKI.—For London: May 5, Acastus; 17, Veloz.
From SHANGHAI.—For London: May 16, Invincible.
From HONG KONG, MACAO, and CANTON.—For London: May 26, Asia.
For Cowes: 29, Jupiter.
From MANILA.—For New York: May 31, Free Trade; June 1, Home.
From PENANG.—For London: June 4, Golconda. For New York: 2, Borneo; 14, Resolute.
From SINGAPORE.—For London: June 5, William Gilles. For Liverpool: 9, Sebastian Cabot. For Boston: 12, Minstrel.

LOADING.

At SHANGHAI.—For New York: Union.
At Foo-Chow-Foo.—For London: Ellen Rodger, Falcon, Ziba.
At HONG KONG, MACAO, and CANTON.—For London: Southern Cross.
For Europe: Mercedes. For Hambur: Prince Regent. For New York: Judge Shaw, Waverley. For Havana: J. Wakefield, Live Yankee, Santa Lucia.
For San Francisco: Meta, Moonlight, Oracle.
At MANILA.—For London: Ethereal. For Liverpool: Cervantes, Idas. For Cork: Casas. For Boston: Indianman. For Havana: Enigrante.

At PENANG.—For London: Rob Roy, Sir Robert Peel. For Boston: Rocket

At SINGAPORE.—For London: Jane Gray, John and Isabella, Napoleon III., Prince, Alfred, William Stewart. For Liverpool: Eliza Hands, J. Waddington, Tigris, Versailles. For Boston: Hollander. For New York: Keystone, St. Louis.

PASSED STRAITS OF SUNDA.

From England and Continent to China: May 24, Bold Eagle; 27, Emperor; 30, Planter, Sea Serpent, Magna Bona. To Singapore: May 23, Resident Van Son; 25, Johanna, M. Christiana. From China to England and Continent: 30, Malacca. To New York: 25, Kureka. To Havana: 24, Aq ila. From Singapore to New York: 23, C. C. Dow. From Manila to Liverpool: 28, Oshawa.

CASUALTIES.

SINGAPORE.—The B. barque *Exolite*, for Bassein, was abandoned off that coast, as she was sinking rapidly; captain and crew arrived safely at their destination.

HONG KONG.—The Am. barque *Bersha*, from Cardiff, encountered strong gales on the 27th Feb., and lost everything attached to the masts. On the 9th April shipped a very heavy sea, which stove in bulwarks, after-hatch-house, and cabin windows, filling it with water.

FREIGHTS AND CHARTERS.

At SHANGHAI.—No vessels loading for London, and the Union is full for New York. Although there is no trade doing, there is a good demand for ships, especially small ones, which arises from the offers still made by the Allied Powers at 22s. per ton per month for suitable craft, and from the Chinese desiring to remove their property from this place. The *Kate Hooper* and *F. McHenry* have been taken up by the British Government at 20s. per ton per month, and the *Richard Busted* by the French at \$150 per day.

At AMOY there is a good demand for shipping, and rates are upwards. There are no disengaged ships in port.

At HONG KONG, MACAO, and CANTON.—For London: £3. For New York: \$10 general cargo; \$25 silks. A good business has been done since our last, although nothing has been dispatched either to London or United States. The *Albatross*, *Edouard*, *Albion*, *Drie*, *Gebroeders*, and *Hollands Frow*, have been taken up by the British Government at 17s. 6d. per ton per month for the transport service. The *Flying Fish* was sold for \$17,000, and then chartered by the French as the *Fama Fillipina* to take horses from Manila to the Gulf of Pechelee for 40,000 francs. The *Caroline Chisholm* has been chartered to Shanghai, Japan and back, for \$5,000. The *Cowasjee Family* to Saigon and back, at 75 cents. The *Myrtle* and *War Eagle* to Bangkok and back, at 55 cents.

At MANILA.—For London: £4. For Liverpool: £3 to £3. 10s. For Boston: \$10 per 4 bales hemp.

At SINGAPORE.—For London: £3. For New York: \$10 for cargo, \$25 silk. Tonnage is not so much in demand, and those at present on the berth have great difficulty in filling, owing to the scarcity of produce. The *William Giles* has been chartered to load from Penang to London at £3 per ton dead weight, £3. 10s. light weight, and 4d. per gallon for rum; and the *Louisa* to Adras and back, from Singapore, for \$4,200 in full.

EXPORTS FROM MANILA.

Per Free Trade, for New York.—Hemp, 12,800 piculs; sugar, 8,018; sapanwood, 592; hides and cuttings, 355; indigo, 114 qts.; cigars, 458 mls.

Per Home, for New York.—Hemp, 3,970 piculs; Sugar, 1,620; sapanwood, 200; hides and cuttings, 191.

EXPORTS FROM SINGAPORE.

Per Hidalgo to London: 1,629 bales gambier, 2,644 piculs; 2,329 bags black pepper, 1,634 piculs; 113 bags white pepper, 112 piculs; 217 baskets India rubber, 294 piculs; 83 boxes camphor, 78 piculs; 134 bags Cutch, 104 piculs; 5 bags cubebs, 8 piculs; gutta percha, 209 piculs; sapanwood, 60 piculs.

Per Zambia to London: 2,432 slabs tin, 1,883 piculs; 74 cases tin ore, 2,363 bales gambier, 4,923 piculs; 2,131 bags sago flour, 2,310 piculs; 102 boxes pearl sago, 112 piculs; 4,925 bags sugar, 4,273 piculs; 6,377 bags black pepper, 4,462 piculs; 539 bags white pepper, 526 piculs; 243 bags coffee, 215 piculs; 120 bags betel nut, 107 piculs; 74 bags cubebs, 84 piculs; 99 baskets India rubber, 201 piculs; 18 boxes dragon's blood, 16 piculs; 2,627 pieces sapanwood, 341 piculs; 78 bags galangal root, 78 piculs; 10,336 blocks, 85 baskets, gutta percha, 1,106 piculs; 1,207 buffalo hides, 215 piculs; 1,389 cow hides, 78 piculs; 11,208 buffalo horns, 253 piculs; 649 deer hides, 33 piculs; 2,927 boxes tea, 149 piculs; 197 boxes nutmegs, 3 piculs; 18 boxes mace, 19 piculs; 12 boxes of benjamin, 100 piculs; 110 boxes dammer, 18 piculs; 3 boxes tortoiseshell, 279 boxes shells, 64 bales tobacco, 6 bales sponge, 29,030 bales Malacca canes, 3 boxes Japan ware, 32 packages private effects, 1 package sandalwood, 8 cases transhipped.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

CAPEL.—On the 20th inst., at Higham-hill, Walthamstow, the wife of James Bury Capel, Esq., prematurely, of a daughter, stillborn.

HARDING.—On the 10th inst., at Camberwell, Mrs. William Harding, of a daughter.

HARWARD.—On the 30th May, at Saugor, Central India, the wife of Captain T. N. Harward, H.M.'s Bengal Artillery, of a son.

HEAD.—On the 24th inst., at Dorking, the wife of Charles H. Head, Esq. of a son.

MACLEOD.—On the 19th inst., at Lee, Kent, the wife of Malcolm Anderson Macleod, Esq., of Hong Kong, of a son.

FITTON.—At Shanghai, on the 22nd of May, the wife of Edward Brown Fitton, Esq., of a daughter.

FITZGIBBON.—At Amoy, on the 27th of May, the wife of Captain Fitzgibbon, of the receiving ship *Pathfinder*, of a daughter.

MARQUES.—At Hong Kong, on the 6th of June, the wife of F. F. Marques, Esq., of a daughter.

MEDHURST.—At Foo-chow, the wife of W. H. Medhurst, Esq., H. B. M. Consul, of a daughter.

MARRIAGES.

CAZALAS—WOODFORD.—At Singapore, on the 5th June, by the Very Rev. J. M. Beurel, at the Church of the Good Shepherd, Mr. Joseph Cazalas, to Miss Rose Regina Woodford.

WOODFORD—WITTY.—At Singapore, on the 5th June, by the Very Rev. J. M. Beurel, at the Church of the Good Shepherd, Mr. Henry Benjamin Woodford to Miss Ada Anne Witty.

DEATHS.

BLAND.—On the 23rd inst., at Poyle Cottage, near Stanwell, Middlesex Maria, wife of Joseph Bland, Esq., and third daughter of the late Rev. S. Hemming, D.D., of Hampton, Middlesex, in the 54th year of her age.

CRANE.—On the 23rd inst., Maria Henrietta, the beloved wife of Mr. George Crane, of Park-treet, Camden-town, in her 35th year, greatly respected.

COTTON.—On the 16th inst., at 78, Westbourne-terrace, Hyde park, John Cotton, Esq., late Director of the East India Company, aged 76.

CHAPE.—On the 22nd of May, on the passage from Saigon, of fever, Captain George Chape, late of the steamer *Toeywan*.

CURTIS.—At Singapore, on the 5th June, at his residence, Charles Julius Curtis, Esq., Coroner and J. P., aged 51, years, deeply lamented.

D'SOUZA.—At Singapore, on the 2nd of June, Maria Jane, the infant daughter of Mr. R. D'Souza, aged 3 months and 4 days.

FREELY.—At Hong Kong, on the 31st of May, Edmund Freely, aged 40, late chief officer of the barque *Sarah Lucy*.

FAGAN.—On the 11th inst., at Charlcombe Rectory, near Bath, Eliza Lucilla, widow of Captain Mitchell Henry Fagan, late of H.M.'s 64th Regt.

MACLELLAN.—On the 27th April, at Shanghai, on board U.S. vessel *Forest Eagle*, after a few hours' illness, deeply regretted by a numerous circle of friends, Capt. Charles A. Maclellan.

COMMERCIAL POSTSCRIPT.

MONDAY AFTERNOON.

The tea has continued very dull, and the delivery of the letters this morning will operate in keeping prices down. No change in the silk market. Bar silver and Mexican dollars as quoted.

From Rio de Janeiro we learn that the Prussian frigates *Ancona* and *Thetis* sailed from that port early in June on a scientific expedition to China and Japan, calling at the Cape.

ARRIVALS.—July 24, at Helvoet, from Padang, Benin; at Havana, 26 June, Solid; 23, at Callao, from Shanghai, Oscar; and sailed, 26, for Chinchas; July 29, at Liverpool, from China, Corea; 2, at Martinique, from Whampoa, Galilee; Aug. 1, at Falmouth, from Aykab, Selene; 2, Ballarat; 3, Gustav; 1, at Liverpool, from Macao, Glaucus; at Queenstown, from Aykab Alarm; 3, at Deal, from Hong Kong, Anna; 4, in the Downs, from China, Kanchaha IV.; Aug. 4, at London, from Hong Kong, Anna; 3, at Falmouth, from Whampoa, Helene; 4, Jane Henderson, from Aykab, Valkyrien; 3, at Liverpool, from Singapore, Crisis; 1, at Queenstown, from Rangoon, Scotsman; 4, at Deal from Batavia, Cortgene; 6, in Downs from Whampoa, Osprey; from China, Dominion; from Queenstown, from Sourabaya, Delphine; from Manila, Sappho; at Falmouth, from Aykab, Seringapatam; at Ascension, June 8, Nathalie, from Singapore, for Nantes.

DEPARTURES.—July 25, from Glasgow for Batavia, and Singapore, Ralston; 23, from Queenstown for Hong Kong, Octavia; 25, from London for Cardiff, Hong Kong, Pioneer. July 25, from Cardiff for Hong Kong, Vier Gezusters. From Liverpool for Hong Kong, Leonidas; 23, from off Lundy Island, for Singapore, Nederwaard; 26, from Liverpool for Manila, Hero. For Hong Kong: Hollandia; 30, from London for Hong Kong, Marion; 27, from Liverpool for Hong Kong, Emma Jane; 28, for Manila, Saes; 22, from off the Start for Batavia, Bezoikie; 26, from Cardiff for Singapore, Apollo; 28, from Sunderland for Singapore, Aristides. August 1, from London for Shanghai, Japan. July 26, from off Dungeness for Singapore, Notos; 29, from Sund island for Singapore, Macao; 30, from off Dungeness for Sourabaya, Herman, Louise Roeloffiene. August 1, from Newport for Singapore, Ferdinand and Louis. Aug. 4, from London, for Cardiff and Shanghai, Anna Maria; 2, from Cardiff, for Manila, Elvezia; for Singapore, Japan; 4, from Deal, for Batavia, Prins v. Orange.

A St. Helena.—June 3, from Padang, Benin, Graafthuis, and sailed 4th for Rotterdam. 4, Cortgene, Dunlop, from Batavia, and sailed 5th for Rotterdam; Edmond Wulpan, Roullier, from Singapore, and sailed 5th for Bordeaux; Johannes Antonius, Mantz, from Batavia, and sailed 6th for Schiedam; 5, Galilee, Le Blanc, from Canton.

SPOKEN.—Atheletan, Singapore to Liverpool, 12th May, 35 S. 21 E.; Delphin, Sourabaya to Queenstown, 6th June, 15 S. 6 W.; Carmen (Spanish ship), Manila to Falmouth, 18th May, 35 S. 20 E.

CASUALTIES.—The *Solides* (French ship) *Forneau*, which arrived at Havana on June 26, from Macao, with coolies, had been on shore on Cape Verde, near Meritas, but got off with the assistance of a boat's crew from the *Crusader*. The *O'Thyen* Addicks, from Somabaya to Rotterdam, put into St. Helena. 7 June, very leaky, and was ordered by the surveyors to discharge the cargo between decks. A further survey has been held, and the leak found to have decreased five inches, the vessel making then only four. She has been recommended to have her top sides caulked, and proceed for her destination. The cargo landed is to be forwarded, and is being loaded by the *Renshaw* and *Circassian* (schooners). The *Admiral de Ruyter* de Witt, from Passarveang to Amsterdam, put into Simon's Bay, June 8, leaky, and with part o cargo thrown overboard, and is discharging the cargo to get at the leak. The *Tellus* (Hambro' ship), from Batavia, was spoken June 8, in lat. 35 S., lon. 21 E., with loss of fore and main-topgallant masts. Helvoet, July 29.—The *Henriette Elizabeth* Susanna Meyboom, bound to Somabaya, has anchored near Goree, after being aground on the North Pampers.

THE ISLAND OF FORMOSA.

(COMMUNICATED.)

In a late number of your journal you noticed the Island of Formosa. As I have taken much interest in that place, I shall be glad if you can find space for the following, which, to make it more readable, I have encroached on the privilege of the Fourth Estate, and adopted the immaculate "we."

Let us first glance at the population of Formosa, which, by unanimous descriptions, given by the most recent authorities, appears to consist of three distinct elements, viz., 1, the natives dwelling on the west coast who have been subjugated by the Chinese; 2, the free and independent Aborigines on the east side of the island; and 3, the Chinese who have emigrated from the opposite parts of the Continent, and located themselves chiefly on the west coast of Formosa. These Chinese colonists appear to form the principal part of the population of the towns, whilst the agriculture is carried on by the natives of the soil, who inhabit the numerous villages which so thickly dot the country on that coast. They are divided into forty-seven rural districts, of which, according to Ritter, thirty-eight are in the northern, and nine in the southern part of the island. Separated as they are from the eastern half of Formosa, by the natural barrier of an impassable range of lofty mountains, there is no communication between the respective inhabitants, and of the Aborigines on the eastern side, but little is known, and that little is not of a favourable character. They were described to Commander Brooker as "bad people; very strong and blood-thirsty, who wear large rings in their ears, and eat for supper their Chinese captives." A German of the name of Hartman, who accompanied the expedition of Commodore Perry, had an opportunity of seeing three of these "bad people," who, however, did not appear to be so bad as they were popularly represented; for he fearlessly went up to them, and for a Mexican dollar bought the bow and arrows of one of the three. He describes them as a tall and well-made race of people, with prominent cheekbones and projecting chin, straight black hair reaching to the shoulders, and wearing no clothing except a piece of coloured cotton print over their shoulders. He says they reminded him very strongly of some tribes of North American Indians.

When the Americans coasted up the east side of Formosa, in the *Old John*, to examine these wild tribes, and search for a safe harbour, they could not find a place even to land at, as the whole coast consisted of an unbroken line of reefs and rocks, on which the waves, continually impelled by the drift of the current, broke with incessant roar, forming a most dangerous surf, in which no boat of theirs could have lived, though with seaman-like courage they made several ineffectual attempts to land. From the decks of their ship, however, they had several opportunities of seeing large groups of the natives, "an excited concourse of good looking, copper-coloured people, of both sexes, but very scantily clothed, as they had only a piece of cotton wrapped round their head to preserve them from the rays of the sun, and the women were dressed in a loose bag, closed at the neck and reaching to the knee. Some of the men were armed with bows and arrows, whilst others carried very formidable-looking mat blocks. The women all carried something in their hands, as if to invite us to land and trade with them, and when they found we were prevented by the surf from landing, they expressed their disappointment by setting up a loud howling, accompanied by the most frantic gestures. With their telescopes the officers could plainly perceive the dwellings of the natives, which they describe as comfortable well-built stone houses, surrounded by large patches of green fields and well cultivated gardens; no doubt those alluded to by the natives of the West coast, who had told them that they were cultivated by the captive Chinese before being eaten up by the savages.

Commander Brooker, of H.M.S. *Inflexible*, was more fortunate, for he found in Sawo or Suau a good harbour for that inhospitable iron-bound coast, where he anchored, and allowed some of his men to go ashore, who visited several native villages and found the inhabitants peaceably inclined. They are described as a remarkably fine race of people, much finer than the Chinese, with a lighter coloured skin, and in figure, language, and general bearing more nearly approaching the Malayan type. The country was here found to be well watered and extensively cultivated. The natives took the Europeans for inhabitants of the Loo-choo Islands, the only foreigners with whose existence they were acquainted.

For what information, imperfect as it is, we have been able to glean of the north part of Formosa, we are chiefly indebted to the report of Captain Abbot, U.S.N., who, in obedience to his instructions, proceeded in his ship to Keelung or Kylong (called by the Dutch Quelou). It is situated in 25 degs. 16 min. 48 secs. north latitude. According to the sketch map compiled by the above officer, but which he confesses to be made merely by the eye, the town is built on the Eastern coast of a bay that runs into the interior to a considerable distance. Further up on the same side of the bay, which widens very much, there is a smaller town among hills, in front of which is the anchorage ground of the native junks, and which from that circumstance he called "Junk Town." Before the entrance of the bay, and half closing it to the east, is a small island surrounded by high mountains, with a village on the south-east side. Between this island and the coast of Formosa is a narrow passage for boats and junks. At the head of the bay are two semicircular creeks, called by the natives Quasekou and Keulaou. The chaplain, the Rev. G. Jones, here executed the special orders he received from his commodore, to examine the coal mines. His report has not been officially published, but there is a German translation of it in W. Heine's "Reise nach Japan" (Vol. 2, pp. 318-335), the author of which, though a painter by profession, accompanied Commodore Perry's expedition in the capacity of master's mate. The reverend chaplain speaks in his report very highly of the quality of the coal, as being admirably adapted for steamers, and the coalfields are able to supply inexhaustible quantities at very moderate prices. The following extract gives his description of Keelung and its neighbourhood:—

"On doubling the north cape of Formosa, the three little islands Agincourt, Pinnacle, and Crag, came in view—good landmarks in coming in from the north, but rather dangerous for sailing-ships, on account of the current. The entrance to the harbour of Keelung is not visible at a distance, but a high rocky islet lies about three miles to the north, and prevents the possibility of making a mistake. In going to the westward of this rock and steering south one can't go wrong. The harbour is about two miles long, and is surrounded by a pretty and well-cultivated district. On the western side are two villages, and one on the eastern part (the

above-mentioned Junk-town), with a number of junks lying at anchor. Keelung is a town of about three thousand inhabitants. It is surrounded by walls which are sufficiently strong to ensure it against a sudden attack, and the fronts of the houses project so much over the street as to form a covered sort of arcade. This mode of building is good for keeping off the sun, but it also excludes the fresh air, and makes the atmosphere close and disagreeable."

To the eastward of the town opens a valley with a navigable river running through it into the bay. It was up this valley that Mr. Jones proceeded in paying his visit to the coalfields, which are situated on both sides of the stream. On the following day that gentleman visited some of the islands at the mouth of the harbour in company with Capt. Abbot. These islands have a very peculiar and extraordinary appearance. The substratum of the rocks all about is a soft white sandstone, above which lie a hard black formation (which he omits to describe more geologically); the winds and waves have the usual effect of washing away the soft sandstone exposed to their influence, and have thus reduced them to a number of white columns, each covered by a broad flat black cap, which have a most curious effect, and induced Capt. Abbot to call the place "Image Point."

In the execution of his orders to examine the coalfields, Mr. Jones went in a boat through the above-mentioned passage for junks between the island to the east of the harbour of Keelung and the coast of Formosa. They then rounded a promontory about two miles distant, and there perceived several coal mines quite close to the shore. At this spot the rocks rise suddenly about 200 feet out of the water, and plainly show their stratification. The place was considered highly favourable for the shipment of coals. They then proceeded still more to the east, and came to a village on the west side of the Bay of Keelung, the inhabitants of which conducted them to another village on the other side of the creek, and about two miles off, where they found several large stocks of coal, heaped up ready for shipment, which the natives assured them were brought from a place in the interior twelve miles distant. A few days afterwards, when Mr. Jones visited this village again, he obtained a guide to these coalfields, which were, however, not twelve miles distant, but not more than half a mile off. After examining the beds of coal, Mr. Jones returned to Keelung by land (distant about seven miles), and reports the whole district he traversed as one large coalfield. The natives had built up terraces along the shores of the river for their paddy-fields, and in doing so had cut away in many places the steepest part of the hills, so that in several directions he found the coal exposed to view and cropping out at the surface.

The Americans experienced no difficulty in their dealings with the natives, who, on the whole, appear inclined to cultivate friendly relations with foreigners. They furnished the ship with large supplies of fresh provisions. There were plenty of fowls, ducks and geese, and they could obtain as many oxen as they wanted, whilst the market afforded an abundance of fruit and vegetables—pine apples, mangoes, bananas, pears, potatoes, &c., of excellent quality and remarkably cheap. Mr. Jones bought a full-sized fowl for a bright button. Four small (waistcoat) uniform buttons were considered the equivalent of a dollar, and two large buttons passed current for 1 dollar 25 cents.

H.M.S. *Inflexible* also anchored in the Bay of Keelung, and Commander Brooker found the coal mines in full operation. An excursion was made into the interior to visit some sulphuric springs near a volcano among the hills. They found a large quantity of sulphur in its most perfect state of purity, but the mandarins objected to their collecting any of it. This excursion lasted three days, and the distance they performed was about twenty-five miles. On her return from the North, the *Inflexible* again visited the ports of Tamshui, Lampaw, Go-chee, and the Ta-wan, everywhere being kindly received by the natives, and exchanging courtesies with the Mandarins. They here learned from the latter the shipwreck of the Ham-burgh schooner *Alba*, Captain Meinecke, at Lokhinun, but ascertained that the crew had escaped and proceeded in a native lorcha to Amoy, where they subsequently arrived in safety.

This beautiful island is about 240 miles long by 40 wide—equal to the length of Ireland, with half its width—most favourably situated for commercial purposes, being just opposite the important Chinese ports of Swatow, Amoy, Foo-chow, and other places of trade on the continental coast. Though in about the same latitude as Calcutta—the Tropic of Cancer runs through the centre of the island; its climate is salubrious, and not so severely hot, the temperature being cooled by the sea-breezes and the immediate vicinity of the magnificent chain of mountains which, towering up to the height of ten or twelve thousand feet, run through the whole length of the island, forming as it were its back bone. Now that the recommencement of hostilities with China appears to be an accomplished fact, it will no doubt become a part of the policy of this country to demand a material guarantee for the future good behaviour of the Chinese, and under these circumstances we would venture to suggest the expediency of either stipulating for the cession of the whole of the island to Great Britain, or taking forcible possession of it by our army and navy. No one can pretend to deny that our foreign possessions and colonial empire are sufficiently varied and extensive, and excite the admiration and wonder—and in some instances the jealousy—of foreign nations. But still the expediency of obtaining possession of Formosa may be urged as an exceptional case on the plea of humanity, civilisation and trade, to say nothing of its importance in containing inexhaustible coal fields of easy access and excellent quality, an article now of paramount value in these days of steam navigation. It would, moreover, form our advanced post in the North Pacific, give us a naval station commanding the whole of the Chinese coast, and tend to check the future encroachments of Russia, which in that quarter have assumed of late a very marked character; whilst situated as it is within a few days sail of Japan, its importance would be greatly increased, for there is every reason to believe that our commercial relations with that empire will never be satisfactorily adjusted till they have had an opportunity of learning to their cost the full weight of Britain's arm.

The late Commodore Perry, who commanded the United States expedition to China and Japan, was fully impressed with the importance of Formosa, and the advantages to be derived from the possession of it, pointing out to his Government how desirable it would be to form a settlement at Keelung. In concluding our observations on this subject we cannot do better than lay before our readers the following extract from Commodore Perry's official report:—

"The geographical position of Formosa stamps it as a well situated central spot eminently adapted for becoming the staple market for the commerce of America in the Chinese seas, from which centre-point the trade would radiate to China, Japan, the Amoor, Loo Choo, Cochin China, Cambogia, Siam, the Philippines, and the other numerous groups of islands in the North Pacific ocean. The importance of the island is vastly increased from its being able to supply inexhaustible stocks of coal, an article of such general and increasing consumption, especially for our trade to the East. A further recommendation may be found in the advantages the island possesses from its situation in a maritime and strategical point of view, exactly opposite some of the most important trading ports of China. With sufficient naval forces at command, the possession of Formosa would secure and cover the approaches to the whole of the north eastern part of China, just as Cuba, in the hands of a powerful maritime nation could defend the coast of America, south of Cape Florida, and command the entrance of the Gulf of Mexico. At the same time it ought not to be overlooked that the extent of Formosa, and the fertility of its soil, would render it capable not only of producing its own natural requirements, but of furnishing a large quota for export to other countries. The formation of a settlement in the shape of a free port, and without any restrictions on import or export trade, would soon attract the attention of merchants and shipowners of all countries, and it is no exaggeration to anticipate that in a very short space of time it might successfully compete with Singapore and Hong Kong.

Continental Intelligence.

FRANCE.

THE PARIS POST-OFFICE.

The Correspondent of the *Morning Advertiser* gives the following:—
"It is the fashion to extol loudly the administration of affairs in France; and by none have these laudations been so loudly bawled as by those who are utterly ignorant of the subject—*omne ignotum pro magifico*. People are too apt to apply Sterne's ejaculation, as he set forth on his sentimental journey, 'They manage these matters better in France,' to everything that goes wrong at home. Will you permit me to draw the curtain, and let you behold the scenes at the French Post-office, that you may listen to a dialogue, the *dramatis personæ* being your Correspondent and the French Post-office employees? To the clerks in the office—'Will you be so good as to tell me the days of departure of the China mails?' Clerk searches for precedents, like the House of Commons in their dispute with the Lords; at last, from the depths of bundles of dusty papers, he replies—but not without some hesitation—'The 11th and 26th.' As this information was not delivered by him with the air of a settled conviction, I pressed him upon the subject; when he inquired whether the letter which I held was for an officer in the army. On my modestly disclaiming the honour of knowing any French officers in the flowery land, the clerk admitted this impression that the dates which he had given to me applied only to letters for the army, and suggested that I should institute inquiries with the director. On wending my way through a labyrinth of dusty passages where the nasal organs revealed the intensity of the struggle raging between choler and lime and ammonia, I discovered a hui-sier in the Post-office livery or uniform; he bore my compliments to the Director, with a request for information about the China mail, and presently returned, 'The mail leaves Paris for China on the 27th of each month.' I expressed the conviction that there were two departures monthly. He was of an opposite opinion; but, after instituting searching inquiries in other quarters, he again returned, and reported that the head clerks believed that letters posted during the night of the 10th for China might be forwarded, but he was not certain. The impartiality of these officials is beyond all praise. None have any particular preference for any day or any hour. Some tell you that these letters must be posted during night, others early in the morning; and some strongly recommend the usual post hour—six P.M. After a short experience, you come to the conclusion that putting a letter into the French Post-office is much like putting it into a lottery, unless your letter contains money, in which case you may as well invest it in Pennsylvania or Spanish bonds, or even derive some little amusement from it, by standing on a bridge and watching the bubbles as you drop your money into the water below."

HOLLAND.

AMSTERDAM, July 24.

By Royal decree of the 8th inst. (No. 74) the King has been pleased to raise the salaries of ministers of the Reformed Church in Netherlands India as follows:—Of the twenty-nine clergymen doing duty in those colonies, the eight senior ones are to receive a remuneration of 6,000 florins (£500) per annum, and the remainder a salary of 4,800 florins (£400), with the usual allowances for house-rent, which have also been raised.

The Second Chamber reopened on the 12th inst. The greater part of the members who had to retire by rotation have been re-elected, and two ministerial supporters lost their seats. Mynheer van Hall's cabinet finds itself therefore with an opposition equally strong as that in the last session, and must prepare itself for a severe struggle. This had already commenced during the recess, as is abundantly proved by the reports of the sections charged with the task of investigating several ministerial measures, the most important of which are the Railway and Emancipation Bills. This result goes to show that the Chamber is determined not to sanction any measure originating with the present Cabinet, and it will probably end with another ministerial crisis; for although it is true that more than 500,000 electors have abstained from making use of their constitutional prerogative from political apathy, yet the result

of the elections plainly demonstrates how deep-rooted is the opposition, and how its ramifications are extended all over the country.

The *Staats Courant* publishes the text of a Bill for regulating the cultivation of sugar in the island of Java, which the Government are about to introduce for the approval of the States General. This Bill will not, however, interfere with the arrangements of private planters, but has merely reference to the cultivation of the sugar-cane on Government lands.

According to the published draft of the Bill the existing contracts are to be prolonged for a term of ten years, under new conditions more favourable alike for the Government and the inhabitants of Java generally. Grants of land intended for new plantations will be made in blocks of 400 to 500 bouws (a bouw is equal to 500 square rods). The remuneration to the native workmen is fixed at the following rates:—For the production of sugar not exceeding 30 piculs, 3 florins per bouw; for a larger quantity up to 45 piculs, 2 florins more per bouw; and for a still greater product on, an additional florin per bouw. Native chieftains are to receive, besides the pay, an additional remuneration of from 1 florin 50 cents to 2 florins 25 cents per bouw, in proportion to the increased produce. The Bill also regulates the quantity of sugar which the contractors are bound to furnish to the Government, and which varies from 30 to 70 per cent. of the total produce, according to the quality of the sugar.

The only embarkation of troops for India that has taken place this month was a small detachment of thirty recruits, under command of Captain Heiligers, accompanied by First Lieut. Schiebelhout and the Second Lieuts. H. Boers and H. J. Schwartz, who embarked at Rotterdam last week, on board the *Burgomester Hoffman*, Captain de Wit, for Batavia, which vessel is under orders to call at St. George d'Elmina, on the African coast, to take on board a further detachment of 150 negro recruits, enlisted there for service in Netherlands India.

Mr. A. Fraser has received his exequatur as consul at Batavia for the Emperor of Austria.

The Commander of the Forces in India having offered a premium of 500 florins to the first transport that should arrive at Batavia with troops, on their return from the expedition to Boni, the prize has been awarded to the *Aegidia and Pauline*, the captain of which died on the passage, when the chief officer assumed the command.

Mr. Stieltjes, whose appointment as chief railroad engineer in Java I mentioned in my last letter, is to receive 15,000 florins for his outfit and passage, with a salary of 1,250 florins per month (£1,250 per annum), during his stay in Java, to commence from the day he quits Holland.

On the 12th inst. the first stone of the new military hospital for invalided soldiers of the E. I. army was laid at Bronbeck, with the usual masonic honours and ceremonies.

The examination for medical officers for the Indian army took place last week, and about a dozen gentlemen were selected.

As all attempts to form private companies for the construction of the railways have hitherto failed, and as the necessary funds are ready, the nation has a right to claim the active interference of the State. The making of the railways will not in any way affect our financial prospects, as we take annually ten millions of florins from the surplus of the colonial revenues.

The murder of the Dutch Consul in Syria has caused orders to be given for three vessels of war to proceed to that coast.

HAMBURG.

July 25.

From the official tables of the trade and navigation of this city for the year 1859, published annually by the Statistical Department of the Board of Trade, and which have just appeared, I am enabled to give you the following information respecting our commerce to the East during the past year.

The number of vessels that arrived at this port direct in 1859 was as follows:—

From China.....	4 vessels.....	2,325 tons
" Dutch East Indies.....	16 ".....	10,324 "
" Singapore.....	4 ".....	1,329 "
Amongst the departures are the following:—		
To China.....	17 vessels.....	6,837 tons
" Dutch East Indies.....	4 ".....	1,336 "
" Singapore.....	2 ".....	474 "
" Asiatic Russia.....	2 ".....	992 "
" Philippine Islands.....	3 ".....	2,016 "

The direct imports from China consisted of 13,953 chests and 12,000 mats

cassia lignea,	
1,188 chests tea	115,560 canes
162 " oil of star anise	74 chests rhubarb
41 " " cassia	154 " galls
380 bales gallanga root	30 " vermillion
81 chests silk manufactures	64 " camphor, &c.
100 " cassia flores	

and various other articles, of the total value of 719,080 marks banco.

From Singapore the principal imports were—

7,132 bags pepper	1,113 packages terra catechu
3,550 chests terra japonica	19,441 bundles rattans
3,084 " sago	10,483 buffalo horns
and other articles, of the aggregate value of 355,330 marks banco.	
The imports from Netherlands India comprised 86,654 bags rice,	
3,427 baskets and 3,557 bags sugar	374 chests vegetable wax
501 baskets India-rubber	178,792 canes
170,481 bundles rattans	2,019 centner sapanwood
207 pipes arrac	404 packages terra catechu
and other articles, of the total value of 1,629,650 marks banco.	

It must here be observed, that by far the greater part of the East India produce was imported into this city indirectly.

The following is a table of the general imports of the principal Eastern articles brought to Hamburg in 1859:—

538,202 bags coffee	542 chests rhubarb
20,805 chests tea	1,621 bales gallanga root
167,038 bags sugar	206 chests star annis
188,796 " rice	2,591 centner camphor
11,057 chests sago	346 " gutta percha
13,379 bags pepper	1,344 chests and 1,022 bags
10,170 centner cassia lignea	India-rubber
194 " " flores	114 casks and 1,296 chests
1,250 bales cinnamon	gum damar
2,280 gounjes cloves	424 chests oil of star annis
473 centner mace	109 " " cassia
469 " nutmegs	6,043 blocks of tin
773 " preserved ginger	49,541 buffalo hides
736 pipes arrac	40 chests tortoiseshell
837 centner galls	8,514 centner mother-o'-pearl
16,006 packages terra catechu	84,221 buffalo horns
4,209 " japonica	625,495 bundles rattans
43 lbs. musk	1,418,555 canes

In the sittings of the commonalty of citizens, the Constitution, as proposed by the Senate, was adopted by 116 against 23.

The old aristocratic, but free, Constitution of the Republic of Hamburg is no more. An extensive scheme of reform, in the sense of representative institutions of modern shape, which, under the name of "Constitution of the Nine," has been ventilated since 1848, has been first, with but little variations, adopted by the Senate, and now by the body of freeholders, or, as they are called at Hamburg, hereditary burghesses.

ALEXANDRIA.

The Red Sea and India Telegraph Cable is now repaired between Suakim and Aden. The first message after this long interruption was sent on Sunday morning last, the 8th inst. Large numbers of Christians continue to arrive from Syria, and they report that an outbreak was feared at Jaffa. The town of Alexandria is now fully supplied with water, the new water works erected by a French Company being entirely finished. The large square is now likewise finished, the trees around it are in a very promising state, and the fountains which ornament it at either end are playing daily. This embellishment of our square has cost the Pasha £25,000, and he has to pay for the water laid on to his palaces, &c., and otherwise used by the Government, 1,000*l.* per day, which more than covers the interest of the capital expended on the water-works.—[Since this was in type we have news of the cable again breaking].

SPAIN.

The inhabitants of Cuba have petitioned for the maintenance of the Chinese coolie trade, and it is believed a new code of regulations will be enforced for that purpose.

General Mac Rohon has been appointed Captain-General of the Philippine Islands.

UNITED STATES.

NEW YORK, July 16, 1860.

The past fortnight has been one of great excitement, attendant upon the Japanese Ambassadors, and the arrival of the *Great Eastern*. The former, after having been entertained at an immense expense, embarked on board the United States steam-frigate *Niagara*, on the 29th ult., and sailed on the following day. They had made preparations for their departure, previous to the arrival of the *Great Eastern*, and went on board the day after she entered our harbour. After taking passage in the U.S. revenue steamer *Harriet Lane* they were conveyed by her to view the *Great Eastern*; and in the afternoon of the same day, the *Niagara*, after having received them on board, set sail for Japan, via the Cape of Good Hope. The Government of the United States appropriated \$50,000 for their entertainment; about \$26,000 of which was expended, and the remainder was returned to the treasury. The City of New York exceeded the Federal Government in liberality and hospitality of the General Government. The corporation at first appropriated \$30,000 for their entertainment, but it is said that the total expense will not fall much short of about \$100,000. The grandest, and, at the same time, the most costly fete got up in their honour, was the grand ball at the Metropolitan Hotel, at which at least 10,000 persons of both sexes were present.

On their relations with China and Japan the *New York Herald* says:—

"Scarcely have the ambassadors from the Government of Japan left this country, after an interchange of the commercial treaty which opens to us the trade of that exclusive nation, when the Secretary of our Legation in China arrives at Washington bearing the ratified treaty between our Government and that of the Celestial Empire, together with an autograph letter from the Emperor to the President of the United States, as announced in our special

despatch from Washington yesterday. It is a matter of some congratulation for us to reflect upon that while England and France are fitting out hostile armies against the Chinese, our administration is receiving assurance of the most peaceful and friendly relations with that people, and the ratification of a highly advantageous treaty from the hands of the Emperor of China.

The arrival of coolie ships from China is thus reported:—

"*Kitty Simpson*, from Macao, some days since, reported took on board 342 coolies; she delivered here alive, and in good health, 313; died *en sea*, 29. In regard to the American ship *Messenger*, an article from THE CHINA TELEGRAPH has been travelling the rounds of the British and American press stating that on the voyage of that vessel down the China sea, that ship was the scene of a terrible conflict, and that before order could be enforced, and the coolies subdued, one hundred were killed, or words to the same effect. No coolies died on board of that ship from violence—no such conflict took place. 378 coolies were taken on board at Macao, of which sixteen died of the ordinary ship diseases, and two fell or threw themselves overboard. 260 were delivered here in good health, and none even with wounds from any violence in the enforcement of discipline. The deliveries made by American vessels to this date, of this more than slave traffic, show in transit a loss of eleven per cent. In British vessels the loss goes up to fourteen per cent. It is feared that the story was got up through jealousy, to do injury to the American ship *Messenger* in particular, and to our vessels generally looking for this sort of business in those waters. The injury, if any has been done, will be corrected by this notice in the *Herald*, which states all the facts, and neither more nor less."—[Our readers in China will be aware that such a report was made, and we noticed it in the LONDON AND CHINA TELEGRAPH, and in the same issue gave the particulars of the affray on board the American ship *Staghound*, about which, at all events, there was not mistake.]

The Havana correspondent of the *New York Herald* reports a conversation he had with one of the crew of the *Messenger*, from Whampoa, with coolies, who confirmed all the statements published in the Hong Kong papers as to the system of kidnapping and harsh treatment of the victims.

British Columbia dates are to the 9th. The ship *Lawson* had arrived at Victoria from China, with 70 passengers. The *Leonidas* and *Daniel Elliot* were overdue with 600 more. The taxable property in Victoria was estimated at 15,000,000 dollars.

COMMERCIAL.

Since my last the Money Market has become firmer, and rates of interest have undergone a decided advance.

We now quote loans on call at 5½ to 6 per cent., and at 90 days to six months, at 6 to 7 per cent. These were the ruling rates up to yesterday, when a large amount of dividends was paid off, which relieved the market, and the quotations to day were easier. The closing rates were 5½ to 6 on call, and 5½ to 7 for 90 days and six months, and dull at that. Sterling closed without animation at 109 to 109½ per cent. for Commercial Bills on London, and at 109½ to 109¾ for six day bills. French bills were unchanged.

United States Five per Cents. of 1874 we quote at 101½ to 103 asked; Virginia Six per Cents., 92; Tennessee Six per Cents. 89½; Panama Shares, 124½ to 125; Illinois Central, 62½ to 63; Ditto, ditto, Bonds, 91 to 91½.

TEA.—The market is active and firm. We notice 1,500 half-chests Blacks, mostly Oolongs, per *Flying Childers*, and 2,000 ditto, in two or three parcels, at full prices. Greens are quiet, with sales of 2,000 half-chests assorted green on private terms.

TIN.—In Straits Pig there have been further sales of 850 slabs here and to arrive at 31½ to 32 cents 6 mos., and 235 ditto on the spot, 30½ cash; with 400 ditto at 30½ cash. Banca is without change; 200 slabs sold, to arrive, at 32½ cents cash.

GUNNY BAGS are firm and rather higher. Sales of 1,500 bales, and 300 ditto in Boston, the former at 11 cents for 425*lb.*; less 3 per cent cash. The latter, 425 to 440 *lb.*, at 11½ cents; 380 ditto, also there; 375 to 390 *lb.*, 10½ to 10¾; and 100 ditto, here; 440 *lb.*, 11¼, 6 mos.

GUNNY CLOTH remains quiet, but is held at previous rates; sales of 500 and 100 bags ranging from 16 to 16½ cents; part less 3 per cent. cash; and part 6 mos.; 170 and 100 in Boston at 16 to 17 cents for 6 mos.

FIRE CRACKERS.—Since our last sales have been made of 1,400 boxes Canton, No. 1, prices ranging from \$1 42½c. to \$1 50c.

SALT-PETER.—We have heard of transactions in Crude since those noted in our last. At Boston 200 bags Crude sold at 11c. to 11¼c. for 6 mos.

HEMP.—At this season of the year business is very small, and we have but to notice sales of 200 bales Tampico at 6¼c., 6 mos., and 30 ditto, Sinal, 6, less 3 per cent. cash.

SPICES.—Within the past few weeks large sales have been made, and the market is active and unsettled; the sales embrace 28,000 mats Cassia at 21c., part at 6 mos.; and 60,000 ditto, and 22,000 ditto, in Boston, on private terms. The business besides is small; 100 bags Pepper sold at 8¼c., 6 mos., and 150 cases Nutmegs on private terms.

INDIA RUBBER.—We have only to note sales of Para Fine, in small lots, at 70c., 6 mos.

INDIGO is steady and firm; 23 cases Manila sold at 45 c., 6 mos; 5 chests Madras on private terms, and a small parcel Caracas, equal to \$1 05 cash.

SEEDS.—Clover is dull, but in few hands, and not offered; quotations nominal. Linseed is without material change, though apparently rather firmer, especially for lots to arrive.

ARRIVALS.—Sarah H. Snow, Higgins, at New York, June 19th, from Foochow. Arthur Cloutman, Pickering, at Salem, June 19th, from Zanzibar. Abbott Lawrence, Paris, at Boston, June 20, from Calcutta. Saracen, Osgood, at Boston, June 25, from Calcutta. Golden Rule, Mayo, at New York, June 27, from Shanghai. Vindolana (br), Lorain, at New York, June 27, from Ceylon. Art Union, Nicklason, at Boston, June 26, from Calcutta. St. Bede (Br.), Wood, Colombo (Ceylon), at New York, July 2. Belle of the West, Howes, at Boston, July 6, from Manila. Beaver, Smith, at New York, July 9, from Shanghai.

SAILED.—Uriel, Walker, from Boston, June 20, for Calcutta. Norway Major, from Philadelphia, June 21, for Hong Kong (and put into New York June 30, leaky, &c., where she would repair). R. B. Forbes, Ballard, from Boston, June 22, for East Indies. Philomela, Ellms, from Boston, June 23, for East Indies. Fortuna, Hansen, from Boston, June 25, for Manila. John Jay, Dotz, from New York, June 30, for Singapore. Bold Hunter, Crosby, from Boston, June 30, for Melbourne.

ARRIVAL OF LORD CLYDE IN ENGLAND.

Lord Clyde arrived from Calais at Dover on the 18th ult., in the mail packet *Alliance*, on his return from India. As soon as the *Alliance* drew towards the pier, the figure of Sir Colin (as he was still called by everybody) was easily discernible on the quarter-deck. He was standing with his usual erectness, and looking much the same as when he embarked from the very spot to which the boat was now approaching, except that the bronze on his countenance was a tinge deeper, and his hair a trifle grayer. The characteristic decision and firmness of the old General were as easily recognisable as ever in his slightest movement. On the vessel being moored, the Mayor of Dover (Mr. J. C. Ottaway), accompanied by the town clerk, Mr. E. Knocker, proceeded on board to solicit from his lordship the honour of presenting an address. A minute or two's conversation ensued, during which the crowd lining the Admiralty pier waved their hats and handkerchiefs and cheered enthusiastically. The Artillery Volunteers, under Capt. Wollaston, with their band, were in attendance as a guard of honour; but, owing to the short notice which had been given of his lordship's arrival, Genl. Craufurd, the commandant of the garrison, and the other official personages, who under other circumstances would have been there, were not in attendance. The reception, therefore, was in all respects a civil one, Lord Clyde walking with the mayor, and preceded by the mace, from the landing pier to Birmingham's Lord Warden Hotel, in the principal saloon of which an address was presented to his lordship in the presence of a very distinguished assemblage.

At the conclusion of his reply, Lord Clyde, who throughout was visibly affected, shook hands with the gentlemen of the corporation near him, who then withdrew. His lordship, who was accompanied by Major Alison and Col. Stirling, his aides-de-camp, left by the 3.45 train for London, amid further demonstrations of joy at his safe return to the shores of England.

We understand that his lordship has received her Majesty's commands to pass a few days at Osborne, on a visit to the Queen and Prince Consort.

The *Times* has the following account on his lordship's return:—

"It has been observed of Wellington, and was certainly felt by himself, that, whatever his powers, he had not the opportunity of those brilliant enterprises which have placed his chief antagonist among the half-dozen great conquerors of history. Fortune itself had dictated his tasks, and impressed duty rather than glory on the successful results. Something of the kind may be said of Lord Clyde's career, but in a much more evident degree. His services show rather a struggle with fortune, and a rolling of the stone up the hill, than the sort of career the young cadet would choose for himself. Walcheren, Vimiera, the retreat of Sir John Moore, Corunna, Barossa, Vittoria, the siege of San Sebastian, and the passage of the Bidassoa, were some of the trials which made the hard cradle of this career. Sent, like many other brave soldiers, to America, Captain Campbell missed Waterloo, and except in quelling an insurrection in Demerara, he passed a long period of inactivity till the first expedition to China in 1842. Twenty years ago there seemed very little prospect of a soldier past the meridian of life beginning a career of usefulness and fame, and having the alternative of a Peerage or Westminster Abbey. The Punjab, Peshawur, and the mountains of the North-Western frontier, as they have contributed the materials for the suppression of the Indian mutiny, so have they been the school, and Colonel Campbell there acquired the experience which he was afterwards to find so valuable. But few would have guessed six years ago the work still in reserve for the man who had been hunting down savages in their strongholds of Central Asia, and was now glad to be relieved of that duty, even at the expense of idleness and poverty. There were greater men than in the service than Colonel Campbell, but none wiser, or safer, or more fortunate. It was, doubtless, through a just appreciation of these qualities that he commanded the Highland Brigade and Highland Division throughout the war in the Crimea. So good a man and such good troops were not to be thrown away. General Campbell led his Highlanders at the Alma, and no doubt it was a comfort to everybody in the camp to know they were at Balaklava, which the 'thin red line' nobly defended when the foe had the temerity to attack it."

Parliamentary Intelligence.

HOUSE OF COMMONS.

THE CHINA WAR.—The House having gone into Committee of Supply, Mr. S. HERBERT moved a vote of credit to the amount of £3,800,000 on account of the war with China. Admitting that the estimate now before the House was given in the gross, and to a great extent upon mere guess, he submitted that it was impossible to state details on the subject, and that any attempt to specify particular items must prove illusory. After giving some explanations touching the despatch of troops, transports, &c., he observed that the vote comprised a sum of about £443,000 due to the Indian Government, arising out of charges left unsettled from the last China war. Of the total amount now asked for, he believed, on a rough calculation, that two millions would be required for expenses incurred in India; £1,500,000 for military and £300,000 for naval expenses in England.—Sir H. WILLOUGHBY observed that the mixing up of India and home expenditure was introducing serious confusion in our finances. He trusted that means would be found hereafter to keep the accounts separate.—After some observations from Mr. T. Hankey, Sir S. Northcote, General Peel, and Sir F. Baring, the CHANCELLOR of the EXCHEQUER said that the announcement of the enormous sum required for the war with China had taken himself by surprise, as it seemed to have surprised the House. The demand was also so recent that he knew nothing about it when making his budgetary statement, and could not then even introduce the £443,000 for past transactions. He proceeded to explain the methods by which charges incurred for wars in Asia were defrayed in part by the Indian Government, and which placed it out of the power of the home Ministry to frame detailed estimates, obliging them to submit merely conjectural statements of the probable expenditure to Parliament.—Sir J. PAKINGTON thought the House had a right to demand fuller information, not only as to the expense, but also as to the policy of the Government with regard to the China war. If the cost of the war could not be told when the budget was brought forward in February, the event was at any rate probable, and the Government were not justified, under the circum-

stances, in remitting taxes and tampering with the finance of the country. Mr. B. COCHRANE moved the adjournment of the debate. Lord J. RUSSELL recognised the serious responsibility arising out of the proceedings in China, but observed that the late Administration must share in that responsibility, the events which had culminated in war having occurred while they held office, and in consequence of orders from Lord Malmesbury and Sir J. Pakington himself. Sir J. ELPHINSTONE and Sir C. NAPIER having briefly spoken, Lord PALMERSTON hoped that the Committee would come to a vote that night. After some further discussion, in which Mr. B. COCHRANE and Mr. DISRAELI took part, the vote was reduced, at the suggestion of Sir H. WILLOUGHBY, by the sum of £443,896, to be voted separately. The vote of £3,356,104 was then agreed to, and the Chairman was ordered to report progress, the other vote being deferred.—(13.) Mr. COCHRANE moved, "That in order to remove one great obstacle of peace with China, the British Plenipotentiary be instructed not to insist on the fulfilment of the third article of the Treaty of Tien-tsin, by which his Majesty the Emperor of China agrees that the ambassador, minister, or other diplomatic agent, appointed by her Majesty the Queen of Great Britain may reside with his family and establishment, permanently at the capital, or may visit it occasionally, at the option of the British Government."—Lord JOHN RUSSELL objected to the form of the motion. The instructions to ambassadors emanated from the Sovereign, and could not with propriety be altered by the House of Commons. The proper mode of proceeding would have been by an address to the Crown. He proceeded to combat the policy advocated by the hon. member, insisting upon the expediency of securing for the British envoy the same privilege of residence at Peking already enjoyed by the Russian ambassador. The amendment was negatively without a division.—A vote of £443,000, as repayment to the East India Exchequer, on account of expenses incurred in China, was then moved by Mr. S. HERBERT. In the course of the discussion which ensued, the CHANCELLOR of the EXCHEQUER entered into various details respecting the financial and other results arising or anticipated from the war. He also vindicated his own consistency, and that of some of his colleagues, in opposing the war with China in 1857, and supporting the present one. Lord J. RUSSELL also justified the declaration of war, which he contended had become indispensable to vindicate the honour and dignity of England, after the outrage committed on the Peiho. It was a terrible calamity, but one which the present Government could not avoid, and which they had inherited from their predecessors. Mr. T. BARING observed that the war was said to be waged for the promotion of trade. The fact was that traders did not wish for war, and felt the gravest suspicions of diplomacy. Lord PALMERSTON said that trade could not be safe in any country where Englishmen did not enjoy rights and securities formally recognised and secured by treaty. The vote was agreed to. Colonel DUNNE asked the Secretary of State for War what knapsacks had been forwarded to our troops in China by the ship *Clavering*; whether those knapsacks were fit for immediate use, by whose orders they were sent, and by whom supplied. The knapsacks were not fit for the soldiers who had gone to China. They required to be altered, and they had no means of altering them. The forks and knives also were very inferior in quality. He wished to know who were responsible for sending these stores to our army in China. Mr. S. HERBERT admitted that these stores sent out to China were not of the latest pattern. It was only just to say that no practical evil had arisen, because the stores in question, though called second class, were so called from no inferiority in the material, but only because of some little difference between them and those of the last pattern. The whole matter had been referred to Colonel Hudson, on whose judgment every reliance could be placed.—(16.) On the report of the Committee of Supply of the vote of £443,896, Mr. RUSSELL took occasion to condemn the war with China as utterly indefensible as regarded either the interests or the honour of England. The war began, he said, by an attempt to force opium upon the people of China, and he asked whether the people of this country would tolerate the forcible introduction of arrack into Liverpool. We bombarded Canton, and compelled the Chinese Government to agree to a treaty stipulating, among other things, to allow a British Minister to reside at Peking. But the origin of the war being unjust—and this had been admitted by the Chancellor of the Exchequer—we were now sending a large force and spending millions of money to enforce a treaty the result of that unjust war. The CHANCELLOR of the EXCHEQUER admitted that this was a question which could hardly be too much discussed, and that, in dealing with Eastern nations, we should adopt the principles of truth and fair dealing. As to the merits of the quarrel with China, he denied that the treaty was one which the Chinese Government was not bound to fulfil; he thought it was a valid contract. The question was not whether this or that provision in it ought to be enforced, but whether a treaty recognised by the Emperor of China should be set at naught.—(3.) Mr. GREGSON inquired whether the four million taels stipulated by the treaty of Tien-tsin on account of losses sustained by British subjects, and for the expenses of the war, were in course of payment?—The CHANCELLOR of the EXCHEQUER said that none of the money had yet been paid. Under the French treaty a larger amount had to be paid, but there was a distinct stipulation for payment at certain fixed periods, and he believed the French Government had received between £300,000 and £400,000 on account of their expenditure in the Chinese war. The British claim had been reiterated in the last despatch from Mr. Bruce to the Chinese Government, and would not be allowed to drop out of sight.—[This statement is totally incorrect, the French like ourselves have not yet received any portion of their indemnity.]—ED. of L. and C. T.

INDIAN BUSINESS.—(19.) Sir Minto Farquhar, Mr. Vansittart, and Sir J. Elphinstone expressed alarm at the proposal of the Secretary for India to introduce a Bill affecting the civil service in India. The Minister was at issue with his council on the subject, and any attempt at present to modify further the Indian administration would be highly dangerous.

CANTON BOOTY.—(27.) Sir M. SEYMOUR asked the Secretary to the Admiralty the cause of the delay in the payment, and when the distribution of the Canton booty to those engaged in the capture of that city would take place.—Lord C. PAGET said the delay had arisen in consequence of the claims which had been made by his hon. and gallant friend subsequently to his original return of the numbers engaged. Those further claims had been allowed, and as soon as the amount due to the troops engaged could be adjusted, the money would be paid.

Naval and Military.

No further reinforcements for the CHINA EXPEDITION have taken place, nor are there any in progress at present. Stores and coals continue to go forward by merchant vessels.

The *White Star*, with the troops for Hong Kong, as already detailed, sailed from Queenstown on the 14th ult.

The *Army and Navy Gazette* has the following in reference to General Mansfield. We stated at the time that the announcement was indiscreet and premature.

"Some time ago it was stated in this journal that Sir William Mansfield had declined or refused to go to China as second in command to Sir Hope Grant, and the information thus given, though somewhat modified in a subsequent number of the *Army and Navy Gazette*, was rather confirmed by the general tenour of the news from India. We have, however, been informed, on the best authority, that Sir William Mansfield neither declined nor refused to go as Sir Hope Grant's Lieutenant-General. When the Government requested him to accept that office, as much on their own confidence in his ability as on the urgent representations of the Indian Government, General Mansfield did indeed strongly represent the inconvenience to which the course of the public services might be exposed if the Government persisted in an arrangement which would place him under the orders of an officer to whom for nearly three years he had been giving orders, and whose senior in rank he had been during warlike operations in India. He further pointed out that Generals Mitchell and Napier had actually left India for their commands in China, and that considerable difficulty would therefore be experienced in arranging those matters with his own; but, in conclusion, Sir William Mansfield having thus stated his case, informed the Government that he would proceed to Bombay and there await their orders. This statement is due to General Mansfield, and it shows that the general was ready to obey orders."

The following officers and troops are embarking for India:—2 officers and 63 men of the 1st Battalion 23rd Royal Welsh Fusiliers; 2 officers and 81 men of the 38th Regiment; 2 officers and 100 men of the 42nd Royal Highlanders; 2 officers and 88 men of the 54th Regiment; 3 officers and 93 men of the 75th Regiment; 1 officer Royal Artillery and one assistant staff-surgeon; 4 officers and 76 men of the 34th Regiment; 3 officers and 146 men of the 2nd Battalion Rifle Brigade; 4 officers and 77 men of the 3rd Battalion Rifle Brigade; 2 officers and 25 men of the 3rd (Prince of Wales's) Dragoon Guards; 47 men of the 6th Dragoon Guards; 2 officers and 55 men of the 1st Battalion 4th King's Own; 1 officer and 68 men of the 83rd Regiment; 9 officers and 122 men of the Royal Artillery; 2 officers and 40 men of the 1st Battalion 6th Regiment; 1 officer and 156 men of the 88th Connaught Rangers; 1 officer and 72 men of the 97th Regiment; and 4 officers and 60 men of the 1st Battalion 19th Regiment.

The colonelcy of the 2nd (or Royal North British) Dragoons has become at the disposal of the General Commanding-in-Chief by the death of Lieut.-General Lord Sandys, making the sixth Waterloo officer within little more than a month.

In reply to an application recently forwarded by the clerks employed in her Majesty's naval service, soliciting the indulgence of twenty-eight days' leave of absence as an annual relaxation from duty, a circular memorandum has been received at Woolwich dockyard from the Board of Admiralty, announcing that their lordships were pleased to accede to the request.

The largest brass gun in England, bored as an eighty-pounder, was recently cast at Woolwich. Upwards of eleven tons of metal were required to fill the gun mould, which, with the dead head, was twenty feet deep.

Ten of the Armstrong forty-pounders arrive weekly at Woolwich from Elswick, and are proved and stored with others for the service. The first proof of the 100-pounder guns took place yesterday at the Royal Arsenal butt, and it is stated that by the end of the year there will be upwards of 400 of that class of guns ready to be shipped for naval service.

An experiment has been made on the London and North Western line, of transporting troops by rail. The point from which the combined force departed was the Caledonian-road station; it consisted of the Grey battery of the Royal Artillery, which had arrived from Woolwich on the previous night, and between 400 and 500 cavalry, composed of the 2nd Life Guards and the 10th Hussars. It required six immense trains, each of more than thirty carriages, to bring them down from the Islington station. The last train started thence at a quarter past 11, and had not disposed of its martial freight till nearly 4 o'clock. The first train down arrived within sight of the platform at 10 o'clock, but, for some reason—it was, perhaps, part of the test—was halted there, and the men kept locked up in the carriages till 1 o'clock. When released, the men rushed and leaped out, halt stewed. The horses, being in open carriages, did not suffer so much. They stood, seven in each carriage, ready harnessed. The guns and ammunition-carts were on railway-trucks. The nicest part of the operation was adjusting the train to the platforms, so that each carriage should have its roadway exactly leading from it. That arranged the rest was easy.

The Channel fleet has been anchored in Bantry Bay, and are to proceed to Dublin.

CHANGES AND PROMOTIONS IN HER MAJESTY'S ARMY AND NAVY.

WAR OFFICE, PALL-MALL.

2nd Regt. of Dragoon Guards—Capt. Arthur Cassidy, from the Military Train, to be capt., vice Bushman, who exchanges, receiving the former difference between in'antry and cavalry; Ensign Thomas Gerard Edrington, from the 91st Foot, to be cornet, without purchase, vice Betty, promoted.

4th Regt. of Light Dragoons—Capt. Fienes Cornwallis, to be major, by purchase, vice the Hon. Charles James Keith-Falconer, who retires; Lieut. Warden Sergison, to be capt., by purchase, vice Cornwallis; Cornet Theophilus Gist, to be lieut., by purchase, vice Sergison.

5th Light Dragoons—Lieut. Henry Norman Salis, to be capt., by purchase, vice Rendall, who retires; Lieut. William Lloyd Browne, from the 12th Light Dragoons, to be lieut., vice Ridley, superseded for being

absent without leave; Cornet John Chaffey, to be lieut., by purchase, vice Salis.

7th Light Dragoons—Lieut. William Edward Shaw, from the 18th Light Dragoons, to be lieut., vice Giles, whose transfer from the 14th Light Dragoons has been cancelled.

Royal Artillery—Assist.-Surg. George Evans, from the Staff, to be assist.-surg., vice Cumming, deceased.

Royal Engineers—Brevet-Col. Richard John Nelson, to be col., vice Wright, removed as a general officer; Brevet-Major Paul Bernard Whittingham, to be lieut.-col., vice Nelson; Second Capt. Richard Hugh Stothard, to be capt., vice Whittingham; Lieut. Constantine Phipps Carey, to be second capt., vice Stothard.

Grenadier Regt. of Foot Guards—Major and Brevet-Col. Frederick William Hamilton, C.B., to be lieut.-col., without purchase, vice Brevet-Col. Charles Algernon Lewis, promoted to the rank of major-gen.; Capt. and Lieut.-Col. and Brevet-Col. the Hon. Henry Hugh Manvers Percy, to be major, without purchase, vice Brevet-Col. Hamilton; Lieut. and Capt. and Brevet-Major William Andrew M. Barnard, to be capt. and lieut.-col., without purchase, vice Brevet-Col. the Hon. H. H. M. Percy; Ensign and Lieut. and Adj. the Hon. William Edward Sackville West, to have the rank of lieut. and capt.; Ensign and Lieut. Henry Osborne Gould, to be lieut. and capt., without purchase, vice Brevet-Major Barnard; Richard Byam Martin, gent., to be ensign and lieut., by purchase, vice Gould.

Coldstream Regt. of Foot Guards—Capt. FitzRoy William Fremantle, from the Rifle Brigade, to be lieut. and capt., vice Frederick Horace Arthur Seymour, who exchanges.

Military Train—Capt. George Rushman, from the 2nd Dragoon Guards, to be captain, vice Cassidy, who exchanges.

1st Regiment of Foot—Gentleman Cadet George Paterson, from the Royal Military College, to be ensign, without purchase, vice Bainbridge, superseded for being absent without leave; Assist.-Surgeon Thomas Turnville Gardner, from the Staff, to be assist.-surgeon, vice Atkinson, appointed to the Staff.

2nd Foot—Gentleman Cadet William Charles Hood, from the Royal Military College, to be ensign, without purchase, vice Robinson, appointed to the 17th Light Dragoons.

3rd Foot—Gentleman Cadet Edward Girdleston Graham, from the Royal Military College, to be ensign, without purchase, vice Twining, appointed to the 35th Foot.

4th Foot—Gentleman Cadet Francis Plummer, from the Royal Military College, to be ensign, without purchase, vice Bayly, deceased.

8th Foot—Lieut. William Unwin, from the 20th Foot, to be lieut., vice Lovekin, who exchanges; Gentleman Cadet Bowland Ganard Moffatt, from the Royal Military College, to be ensign, without purchase, vice Wingate, appointed to the 74th Foot; Gentleman Cadet Thomas George Crawley, from the Royal Military College, to be ensign, without purchase, vice Cooper, who resigns.

11th Foot—Ensign Henry Ralph Lewis, to be lieut., by purchase, vice Dixon, who retires.

13th Foot—Assist. Surgeon John Clarke, M.D., from the Staff, to be assist.-surgeon, vice O'Brien, appointed to the Staff.

14th Foot—Capt. William Henry Gresson, from the 27th Foot, to be capt., vice Cowell, who exchanges.

15th Foot—Gentleman Cadet Howard Molyneux Edward Brunker, from the Royal Military College, to be ensign, without purchase, vice Shaw, promoted in the Military Train; Lieut. William Starke, to be capt., by purchase, vice William Henry Eliot, who retires; Ensign John Joseph Forsyth Grant, to be lieut., by purchase, vice Starke.

16th Foot—Gentleman Cadet George Griffiths, from the Royal Military College, to be ensign, without purchase, vice Cooch, promoted.

17th Foot—Lieut. James William Mitchell, from the 42nd Foot, to be lieut., vice Elgin, who exchanges.

20th Foot—Lieut. John Henry Herbert St. John, to be capt., by purchase, vice O'Shea, who retires; Lieut. James Magenis Lovekin, from the 8th Foot, to be lieut., vice Unwin, who exchanges; Ensign Clifford Gabourel Gibaut, to be lieut., by purchase, vice St. John; Gentleman Cadet Charles Thomas Dooly, from the Royal Military College, to be ensign, without purchase, vice Gibbs, promoted.

21st Foot—Gentleman Cadet Henry Beresford Nangle, from the Royal Military College, to be ensign, without purchase, vice Cox, deceased.

23rd Foot—Assist.-Surg. Francis Alfred Turton, from the Staff, to be Assist.-Surg., vice Sylvester, appointed to the Staff.

24th Foot—Gentleman Cadet William Dinwiddie, from the Royal Military College, to be ensign, without purchase, vice Hennessey, appointed to the 46th Foot.

27th Foot—Capt. Henry Cowell, from the 14th Foot, to be Capt., vice Gresson, who exchanges.

32nd Foot—Lieut. Henry Elkins Bennett, to be captain, by purchase, vice Brevet-Major Mag-nis, who retires; Ensign Arthur Bishop, to be lieut., by purchase, vice Bennett.

33rd Foot—Ensign James Maurice Shipton, to be lieut., by purchase, vice Willis, promoted.

42nd Foot—Lieut. Edward Arthur Elgin, from the 17th Foot, to be lieut., vice Mitchell, who exchanges; Assist.-Surg. Edwin Wilkes, from the Staff, to be assist.-surg., vice Mackinnon, appointed to the Staff.

46th Foot—Ensign Alexander Carden Hennessey, from the 24th Foot, to be ensign, vice Priestley, deceased.

52nd Foot—Assist.-Surg. George Park, M.D., from the Staff, to be assist.-surg., vice Innes, appointed to the Staff.

58th Foot—Lieut. William Russell Russell, to be capt., by purchase, vice Andrew H. Russell, who retires; Ensign Frederick Florence Murray, to be lieut., by purchase, vice Russell.

60th Foot—Capt. and Brevet Lieut.-Col. Dumbard Douglas Muter, to be major, by purchase, vice Bligh, who retires; Lieut. Philip Julian Curtis, to be capt., by purchase, vice Brevet Lieut.-Col. Muter.

65th Foot—Major and Brevet-Col. Alfred Francis W. Wyatt, to be lieut.-col., without purchase, vice Brevet-Col. Charles Emilius Gold, promoted to the rank of Major-Gen.; Capt. and Brevet Lieut.-Col. George Freeman Murray, to be major, without purchase, vice Wyatt; Lieut. George Buck, to be capt. ain, without purchase, vice Murray; Ensign John Shrews Talbot, to be lieut., without purchase, vice Buck; Charles Yarrow Gold, gent., to be ensign, without purchase, vice Talbot, promoted.

72nd Foot—The transfer of Ensign Walter Douglas Somerset Campbell from the 79th Foot, as stated in the *Gazette* of the 3rd of July, 1860, has been cancelled; Lieut. Gustavus Lambert Bassett to be capt., by purchase, vice the Hon. H. W. Fitz-Maurice, who retires; Ensign Francis George Sherlock to be lieut., by purchase, vice Bassett.

74th Foot—Lieut. Norman Scalpa McCrummen to be capt., by purchase, vice Venables, who retires.

75th Foot—Lieut.-Col. and Brevet-Col. Augustus Halifax Ferryman, C.B., from the 89th Foot, to be lieut.-col., vice Bouchier, who exchanges.

76th Foot—Capt. Henry Fowler Mackay, from half-pay unattached, to be capt., vice Capt. and Brevet Lieut.-Col. Mortimer, who exchanges; Lieut. John Vincent to be capt., by purchase, vice Mackay, who retires; Ensign Henry Bouverie Pusey to be lieut., by purchase, vice Vincent.

79th Foot—Lieut.-Col. and Brevet-Col. George Monkland, from half-pay unattached, to be lieut.-col., vice Brevet Col. Richard C. H. Taylor, C.B., appointed to a depot battalion; Major William Chauval Hodgson to be lieut.-col., by purchase, vice Monkland, who retires; Capt. and Brevet Major Alexander Cockburn M'Barnet to be major, by purchase, vice Hodgson; Lieut. John Miller M'Nair to be capt., by purchase, vice M'Barnet.

80th Foot—Thomas Theobald Willington, gent., to be ensign, by purchase, vice Dowling, who retires; Assist.-Surgeon Robert Muir Gilchrist, M.D., from the Staff, to be assist.-surgeon, vice Frank, appointed to the Staff.

89th Foot—Lieut.-Col. Legendre Charles Bouchier, from the 75th Foot, to be lieut.-col., vice Brevet Col. Ferryman, C.B., who exchanges.

91st Foot—Ensign Charles Lacon Harvey to be lieut., by purchase, vice Spearman, whose promotion, by purchase, on the 11th May, 1860, has been cancelled.

94th Foot—Ensign Ramsay Steuart to be lieut., without purchase, vice Aytoun, killed in action; Sergeant-Major John Humphreys, to be ensign, without purchase, vice Steuart.

95th Foot—Assist.-Surg. John Smeaton Allanby, M.D., from the Staff, to be assist.-surg., vice Sharpe, appointed to the Staff.

3rd West India Regiment—Alexander Stewart Hincks, gent., to be ensign, by purchase, vice M'Cormick, promoted.

Rifle Brigade—Lieut. and Capt. Frederick Horace Arthur Seymour, from the Coldstream Guards, to be capt., vice Fremantle, who exchanges.

DEPOT BATTALION—Lieut.-Colonel Fowler Burton, from the 97th Foot, to be lieut.-col., vice Brevet-Col. R. C. H. Taylor, retired upon half-pay.

UNATTACHED—Lieut. Frederick Richard Solly Flood, from the 53rd Foot, to be captain, without purchase.

COMMISSARIAT DEPARTMENT.—Commissariat Clerk Joseph Frederick Wallatt Des Barres, to be deputy assist.-commissary-gen.; Commissariat Clerk William Fryer, to be deputy assist.-commissary-gen.

VETERINARY MEDICAL DEPARTMENT.—First-class Veterinary Surgeon F. Delany, from the 1st Dragoon Guards, to be staff veterinary surgeon, vice James George Philips, appointed to the Cavalry Depot at Maidstone.

CHAPLAINS DEPARTMENT.—The Rev. Thomas Carter Stanley, to be Chaplain of the Fourth Class.

BREVET.—Col. Charles Wright, of the Royal Engineers, to be major-gen., vice Bolton, deceased; Capt. William Peddie, on half-pay unattached, Staff Officer of Pensioners, retired on full pay, to be major in the Army, the rank being honorary only; the commission as Brevet-Major of Brevet-Major William Malcolm Leckie, 13th Regiment Bombay Native Infantry, to be antedated to the 20th of July, 1858. The undermentioned promotions to take place consequent on the promotion of Col. W. B. Ingilby, Royal Artillery, to be major-gen., in succession to Lieut.-Gen. Dyneley, C.B., Royal Artillery, who died on the 21st of June, 1860:—Lieut.-Col. Henry Edward McGee, 3rd West India Regiment, to be col.; Major Henry J. Savage, 91st Foot, to be lieut.-col.; Captain Charles Edward Astell, half-pay 45th Foot, Staff Officer of Pensioners, to be major. To be Aides-de-Camp to the Queen, with the hon. rank of Colonel in the Army:—Col. the Hon. Sir Alan Napier Macnab, Bart., Commanding 7th Military District, Upper Canada; Col. the Hon. Sir Etienne Paschal Taché, Commanding 2nd Military District, Lower Canada; Brevet-Major William Ready, Captain on half-pay unattached, Staff Officer of Pensioners, retired on full pay, to be lieut.-col. in the Army, the rank being honorary only; Capt. Henry Fowler Mackay, 76th Foot, to be major in the Army.

MEMORANDUM.—Her Majesty has been graciously pleased to approve the 6th Lancashire Militia bearing for the future the title of "Royal."

11th Regiment of Light Dragoons—Lieut. J. M'Loughlin has been permitted to resign the adjutancy.

16th Light Dragoons—Lieut. B. F. Morrison to be adjt., vice Cowtan, who resigns the adjutancy only.

4th Regiment of Foot—The second Christian name of Ensign Sawyer is "Wayland," and not "Weyland," as stated in the *Gazette* of July 3.

17th Foot—Sergeant-Major J. Emmett to be ensign, without purchase, vice Harris, promoted.

18th Foot—Captain J. Baird, from the 41st Foot, to be captain, vice Haydock, who exchanges.

21st Foot—Ensign W. C. Ralston to be lieut., by purchase, vice G. O'Connell, who retires.

25th Foot—Capt. H. H. St. Leger, from the 80th Foot, to be capt., vice Wilkinson, who exchanges.

32nd Foot—W. M. Rose, gent., to be ensign, by purchase, vice Bishop, promoted.

37th Foot—The appointment of Gentleman Cadet H. P. Kirkwood, from the Royal Military College, to an ensigncy, without purchase, as stated in the *Gazette* of the 3rd July, 1860, has been cancelled.

40th Foot—Asst.-Surg. H. Scott, from the Staff, to be ast.-surg., vice Mines, deceased.

41st Foot—Capt. H. J. Haydock, from the 18th Foot, to be capt., vice Baird, who exchanges.

44th Foot—Ensign H. W. Feilden, from the 42nd Foot, to be lieut., by purchase, vice M'Innis, who retires.

46th Foot—The Christian names of Ensign Clarke are Philip Percy Doveton, and not Philip Peircy Dovelin, as stated in the *Gazette* of the 3rd inst.

53rd Foot—H. H. Stewart, gent., to be ensign, without purchase, in succession to Lieut. Flood, promoted to an Unattached Company, without purchase.

54th Foot—Surgeon W. Poole, from the Staff, to be surgeon, vice Dowding, appointed to the Staff.

64th Foot—Ensign W. J. Voules, to be lieutenant, without purchase, vice Fennessey, deceased; Sergeant J. O'Dell to be ensign, without purchase, vice Voules.

76th Foot—Brevet Major Morley Stratford Tynte Dennis to be major, without purchase, vice Brevet Lieut. Colonel O. Fenwick, deceased; Lieut. J. H. Tripp to be captain, without purchase, vice Dennis; Ensign E. Austin to be lieutenant, without purchase, vice Tripp.

80th Foot—Captain J. Wilkinson, from the 25th Foot, to be captain, vice St. Leger, who exchanges.

83rd Foot—Ensign J. Healey to be lieutenant, without purchase, vice Colebrook, deceased.

INVALID DEPOT (Cape of Good Hope).—Lieut. S. J. Timbrell, from Paymaster, on half-pay 58th Foot, to be paymaster.

ROYAL MILITARY COLLEGE—Captain W. T. E. Fosbery, from the 77th Foot, to be captain of a Company of Gentlemen Cadets, vice Captain W. Paterson, appointed Instructor of Military Drawing, vice Lieut. Foy, 86th Foot, who has resigned that appointment.

HOSPITAL STAFF.—Surgeon-Major J. Maitland, M.D., who retires on half-pay, to have the honorary rank of Deputy Inspector-General of Hospitals, in accordance with the Royal warrant of Oct. 1, 1858; Surgeon W. M. Dowling, from the 54th Foot, to be surgeon, vice Poole, appointed to the 54th Foot; Assistant-Surgeon T. J. Tuffnell to be surgeon (this appointment to be supernumerary to the establishment); Assistant-Surgeon S. Gibson, M.B., from the 12th Light Dragoons, to be Assistant-Surgeon, vice Scott, appointed to the 40th Foot.

VETERINARY MEDICAL DEPARTMENT.—J. H. Burbage, gent., to be acting veterinary surgeon; D. Paley, gent., to be acting veterinary surgeon.

BREVET.—Colonel R. F. Crawford, Royal Artillery, to have the temporary rank of brigadier general while in command of a brigade. Major H. Boye, 22nd Bombay Native Infantry, to be lieutenant colonel in the army. Major L. S. Hough, 31st Bombay Native Infantry, to be lieutenant colonel in the army. Second Captain C. E. Cumberland, Royal Engineers, to be major in the army. Second Captain A. H. Bogle, Bengal Artillery, to be major in the army. Captain W. F. Hunter, 2nd Bombay Light Cavalry, to be major in the army. Captain J. A. Wood, 20th Bombay Native Infantry, to be major in the army. Lieut. S. J. Timbrell, Paymaster Invalid Depot, Cape of Good Hope, to have the honorary rank of major under the Royal Warrant of 27th January, 1860.

NAVY.

PROMOTIONS.

COMMANDERS TO BE CAPTAINS.—E. G. Hore, J. G. Bickford, W. E. A. Gordon, and C. Vesey.

LIEUTENANTS TO BE COMMANDERS.—W. Strickland, D. Herbert, Iltid T. M. Nicholl, J. Simpson (b.), H. West, J. W. Pike, H. B. Woolcombe, R. Gordon Douglas, late flag lieutenant.

PAYMASTERS.—J. Colwell to the rank of Paymaster-in-Chief.

ASSISTANT-PAYMASTERS TO BE PAYMASTERS.—J. C. Meagher and E. W. Gordon.

APPOINTMENTS.

COMMANDERS.—W. B. Elphinstone to the Hornet (commissioned).

LIEUTENANTS.—B. J. Cooper to the Hannibal; T. C. Bruce and W. H. Wright to the Royal Adelaide; G. D. Bushe to the Orion; J. D'Arcy Irvine to the Britannia; E. F. Kirby, from the Centaur to the Chesapeake; H. Smith to the Monarch; W. G. Silverlock to the Geyser; B. J. Cooper to the Centurion; R. E. Travery to the Conqueror; J. T. Pringle to the Megeera; W. Brogden to the Hornet; Lord Walter T. Kerr to the Emerald.

MASTERS.—G. Allen to the Hornet; W. C. Buck to the Dongal; C. G. Johnson, to the Asia, for the Immortalité; D. H. Speer to the Cassack; E. J. Jameson, to the Mersey.

STAFF SURGEON.—Junius Bank to the Russell.

SURGEONS.—James Vaughan to the Royal Adelaide; Dr. D. Finucane to the Hornet; W. Loney to the Emerald; J. McSwiney to the Retribution; M. Walling to the Atholl.

PAYMASTERS.—R. Taylor to the Hornet; G. W. D. Simmonds to the Hastings; H. J. Kelly to the Castor; W. Drury to the Royal Adelaide; W. H. Mills (additional) to the Impregnable; J. Lewis (additional) to the Britannia; Hugh H. Burnisvan (additional) to the Cambridge; E. Thorne to the St. Vincent; Wm. Waver advanced to the first class; George J. Starr, advanced to the second class; E. W. M. Millman, advanced to the third class; E. B. Walker to the Porcupine.

ASSISTANT SURGEONS.—W. J. James to the Bloodhound; G. H. Maunsell (acting) to the Hornet; W. H. Carter to the Cumberland; A. C. Johnston to the Monarch; J. N. Anderson (additional) to the Fiskard.

MASTERS ASSISTANT.—W. Taylor to the Geyser, S. G. Tattersall to the Hornet.

ASSISTANT PAYMASTERS.—Francis St. J. O'Neill to the Royal Adelaide; G. Prince to the Hornet.

CHIEF ENGINEERS.—E. W. Baker to the Dongal; J. Henty to the Hogue.

ASSISTANT ENGINEERS.—First Class: J. Marsh to the Fiskard, as supernumerary; B. L. Canney to the Asia, as supernumerary; W. M'Dowell to the Hornet. Second Class: F. C. Ford to the Skipjack; J. W. Nott to the Urgent; W. C. Moreton to the Hecate; E. Dooley to the Furious. Third Class: E. Gage to the Hornet; W. A. Houghton to the Cumberland, for service in the Adder.

ACTING ASSISTANT ENGINEERS.—Second Class: M. Litt to the Cumberland, for Myrtle; H. W. White to the Niger; James N. Slade to the Cumberland, for charge of the machinery of the Fly. Third Class: J. Taylor to the Indus, for service in the Constance; A. King to the Torch; J. Furdie to the Greyhound; E. Chambers to the Bloodhound, as supernumerary; J. Wootton to the Asia; W. Willings to the Hornet, for temporary service; G. Quick to the Asia, for service in the Bullfinch; J. Howey, H. Clyde, and W. Gentles, to the Nile, as supernumeraries for disposal.

MIDSHIPMEN.—W. F. Boughey to the Mersey; C. J. H. Bliss to the Orion; H. V. Smith and H. C. Walker to the Barracouta.

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

Suggestions for the insertion of information required by our subscribers will have due attention and acknowledgment.

A REGISTER is kept of the addresses of all persons connected with the FAR EAST, and reference can be made to the same by personal application at the office or by letter. Passengers arriving by either Overland route or sailing vessels, in England or on the Continent, are requested to forward their address, in order that inquiring friends may be informed.

T. E.—The last mail did not bring the documents expected.

R. O.—We are quite willing to insert the matter under the usual conditions.

We beg to call attention to the extension of our news from the United States from our special correspondent, including commercial and shipping intelligence, and we shall be happy to receive suggestions for any further information which may be desired. We intended giving the export manifest of vessels, but regret that our correspondent finds considerable difficulty in procuring the same in detail, as the Customs do not publish them.

In our present number will be found a Tabular Statement of the Exports from China, in addition to our Tea and Silk Table, but as the published statements in China contain a large proportion of packages entered as "Sundries," we intend giving another statement of the cargo, compiled from the vessels' report to the Custom House at the port of her arrival in Great Britain, as also the consignees.

Our OFFICES in this City have been REMOVED from 337, Strand, to 7, George-yard, Lombard-street, E.C. Newspapers and literary communications should be addressed to the Editor. Correspondence relative to Advertisements, Subscriptions, and the general business of the Paper should be addressed to the Manager, and not to the Editor.

Correspondents and Newspaper Publishers in INDIA, CHINA, JAPAN, and the EASTERN ARCHIPELAGO are requested to address all communications, newspapers, &c., to the Editor, Box No. 70, General Post-office, London, E.C., via Marseilles, which has been opened specially for the same.

Books sent by post and not prepaid are charged letter rate.

Post-office orders payable at Lombard-street, to MORTIMER WRIGHT.

WE BEG TO NOTIFY THAT OUR AGENCY AT HONG KONG, HAS BEEN TRANSFERRED FROM MR. GEO. HOLMES TO MESSRS. JOHN ROBERTS AND SON, WHO ARE AUTHORISED TO COLLECT SUBSCRIPTIONS AND OUTSTANDING ACCOUNTS.

The London & China Telegraph.

LONDON, MONDAY, AUGUST 6, 1860.

OUR POLICY TOWARDS CHINA.

ALTHOUGH Mr. Cochrane was altogether in error, in point of form, on the evening of the 13th ult., when he moved "That the British plenipotentiary be instructed not to insist on the fulfilment of the third article of the treaty of Tien-tsin, by which the Emperor of China agrees that the ambassador, or other diplomatic agent appointed by her Majesty, may reside permanently at the capital, or visit it occasionally, at the option of the British Government," and although we should have a better opportunity, yet we are disposed to comment again on this much-vexed "residential clause." It was in one of Lord Elgin's despatches of 1858 that he made use of the following words:—"Any attempt on our part to compel the literal fulfilment of our treaty right on this point would oblige the Emperor of China to choose between a desperate resistance and passive acquiescence in what he believes to be the greatest calamity that could befall the empire." It is true that there may be some of our statesmen who believe in the utility of having a minister residing in Peking, who fancy that our rights would be more carefully guarded, and that the presence of a representative would act as a preventative against future acts of hostility! Making every allowance for these sentiments, we believe, on the other hand, that a resident minister would be the constant source of annoyance to the Chinese Government, and that it would be quite as likely to foment quarrels as to prevent them. So far as we are already involved in this unfortunate struggle, events have proved Lord Elgin's words true; a "desperate resistance" has been shown, and so far as the news we have received goes, a still more "desperate resistance" is determined on; it would be well, then, to ascertain how far a political residence in Peking would be useful to England before an attempt is made to force it again upon the Chinese, and it would also be well

to find out whether there would be the slightest chance of a "passive acquiescence" on the part of the Emperor, in the event of the matter being settled by bloodshed or diplomacy. If Lord Elgin is still impressed with this sentiment, and we trust he is, then he will give it up. Mean time it is our duty to examine the observations of Lord John Russell on the same evening. His lordship said:—"So far from the residence of a British Minister at Peking being considered by the Chinese Government as a degradation, they did not object to a Russian minister, whom they had received with great distinction, and who had been resident many months at Peking. This had entirely changed the question; the Chinese Government could not refuse to Great Britain what had been readily granted to Russia." Lord John Russell is, doubtless, perfectly correct in the abstract, but the question is whether he is right in practice. Because a gentleman who has a valuable estate chooses to allow a neighbour the right and privilege of shooting and fishing over his domain, that is no reason why he should allow a stranger to do the same thing. This simile may be carried still further, for it is useless to deny that Russia and China have more interests in common than England and China, notwithstanding the larger trade carried on by the latter. The frontiers of the two empires are divided only by imaginary lines; the people inhabiting the region of those frontiers are almost identical in manner, habits, religion, and language.

OUR POLICY IN JAPAN.

WE all remember the mutual admiration of our diplomatists, naval officers, and letter-writing attachés connected with our expedition from China to Japan. We were called upon to admire the "happy audacity" displayed in the dashing run up the bay of Yedo. We believed that our countrymen, in giving Lord Elgin all the credit of opening that country, awarded to his lordship only his due, particularly as he was silent when the Shanghai merchants saluted him as the creator of the "good time coming" for us in Japan. Now, however, that a few months have rolled by, we find the English public mistrusting our success in Japan. We receive from our consuls and merchants in that country complaints upon complaints, but hear nothing of the kind from Americans. Are our cousins so favoured as to be exempt from annoyances, or do they exhibit more of the virtue of forbearance? Is Mr. Harris a better manager than Mr. Alcock? We know not how to answer these questions. We find the Japanese embassy assuring the New York Chamber of Commerce that they hope to see the relations between their respective countries extending. We expect to hear demands made upon our too willing naval officers to turn again from the shores of China to intimidate the Japanese, but we cannot hold out to our commercial and manufacturing interests much ground of hope of great improvement in our relations from those sources. One mistake has certainly been committed; we have regarded the Japanese much as we have the Chinese, and have treated them accordingly. The beginning that Lord Elgin made was very different from that of Commodore Perry—one pursuing intimidation, the other conciliation. Mr. Alcock was received consequently with very different feelings from those entertained for Mr. Harris; the former has had to counteract preconceived evil impressions, and has not been successful. We can believe him when he tells us that our inconsiderate countrymen complicate the difficulties which beset him, and if the truth were known we should probably discover that his subordinates have no excess of discretion; in truth, the Blue Book reveals that much. In one of the reports of Dr. Macgowan's lectures on the Japanese, we find that gentleman describing them as being not less prompt in avenging injuries than North American Indians, and he cautions travellers against adopting the course pursued towards other Asiatics, referring to the assassinations that have already taken place—an evidence not of Japanese looseness, but of spirit; which, when rightly directed and properly appreciated will, in the end, cause foreign relations to be placed on a more stable footing than they are ever likely to be in China. We concur in these views, and trust that what has too often been represented as an undignified course on the part of the Americans may be imitated by our countrymen. We are getting tired of those costly expeditions, which seem to imperil rather than establish our commercial and manufacturing interests.

SINGAPORE AND THE COLONIAL OFFICE.

It is now nearly a year and a-half since the inhabitants of Singapore petitioned Parliament to be transferred from the rule of the Secretary of State for India to that of the Secretary for the Colonies. We expressed our opinion of the transfer at the time,* and recent events have certainly not tended to alter our conviction that the petition was an ill-advised proceeding. It is not, however, our present purpose to discuss this part of the question, but simply to present a brief narrative of the fate of the petition, and of an official exploit in connection therewith, as some hints may, we think, be thence deduced on the future prospects of the settlement.

A few weeks ago an influential deputation had an interview with the Duke of Newcastle, for the purpose of ascertaining what had become of the Singapore petition. They learnt—as we expected—nothing. The petition was doubtless thrown months ago into that huge waste paper basket provided as the receptacle for all such documents. In answer to numerous inquiries which our correspondents have from time to time urged us to make, we have invariably received the stereotyped reply that the subject was under consideration. At last, however, the light breaks through: after all these long months of silence we hear “the bird in the solitude singing,” and doubtless the petitioners will deem its notes most melodious. But whence comes the charmer? All must admit from an unexpected quarter. We craved our readers’ attention to the narrative, which is alike curious and instructive. A few evenings since a measure was read the first time in the House of Lords, entitled “The Coast of Africa, &c., Act Amendment Bill.” Of course no one expected the grass was covering a rather venomous snake; or, to use what our Singapore friends may think a more apposite illustration, no one guessed so exquisite an Eastern flower was hidden under that African foliage. Yet so it was; spring time had come at last, the colonists’ prayer was heard. In the folds of this seemingly insignificant bit of legislation was wrapped up the boon. The Bill was introduced to amend existing Acts for the Government of our Settlements on the Coast of Africa and in the Falkland Islands, and was the handiwork, as Sir Charles Wood tells us, of the Under-Secretary of State for the Colonies. As there are two, we would gladly know which is indicated, that we may record the hero’s name. It occurred, however, to one of them—most likely Mr. Fortescue—that a fitting opportunity had presented itself for the display of his eminent legislative ability. It may be that geography, like spelling, is too ordinary an acquirement for legislators; if so, we shall not, perhaps, be deemed presumptuous in suggesting to the Under-Secretary that Singapore is *not* in Africa, nor yet one of the Falkland Islands.

We have given, however, only part of the tale. If the inhabitants of Singapore possess any of the milk of human kindness, they will be delighted to learn that the clause in this “Africa” Bill was so comprehensively drawn that some few millions besides were to partake of the blessings they sought for themselves. “This Bill,” said Mr. Horsman, and Mr. Horsman was quite correct, “gives power to the Secretary of State to transfer the whole of her Majesty’s dominions in “India to the Colonial Department.” Sir Charles Wood was about to have two hundred million souls removed “at one fell swoop” from his paternal care; but deeply engaged in arranging the Indian Army patronage with H.R.H. the Commander-in-Chief, that astute Statesman knew nothing of the matter. It was not until Mr. Horsman gave him notice of his intention to refer to the subject in the House of Commons that the Secretary for India awoke to the consciousness that he was about to lose the rule of an empire. When the Under-Secretary for the Colonies had completed the draught of the Bill containing this rather important clause, it was sent to the India House. The Assistant Under-Secretary Mr. Melvill, (an official of quite another order), at once detected the blunder, and (to quote Sir Charles Wood), “sent an answer back that it was impossible “that those particular words could be inserted in the Bill.” Will it be believed that even after this chance of escape the Bill was introduced “by inadvertence” to the House of Lords without the slightest alteration? After Mr. Horsman had enlightened the Government on the measure prepared by the Under-Secretary, adopted by the Cabinet, and submitted to the Legislature by one of its leading members, it was deemed necessary to amend it. The Bill has therefore been read a second time *pro forma*, and is to be reprinted with amendments, and we join in Lord Derby’s hope that it may be made intelligible.

It is of course difficult to guess, after these extraordinary freaks, what may be the next proposition of the Government—whether the petitioners are still to pine under the Indian rule, or to be removed in a body to the Great Desert of Sahara; but we shall be much surprised if, after this specimen of legislation, the inhabitants of Singapore are not of our opinion, and we express it in all sincerity that it is very much better to endure the forgetfulness of Sir Charles Wood, than to live under the maladministration of the Colonial Office.—[Since the foregoing was in type, the Bill, as amended, has passed through Committee of the House of Lords. The Singapore petitioners will find themselves excluded in toto.

SIR JOHN BOWRING.

Sir John Bowring is mentioned as a candidate for the representation in Parliament of Exeter, one of the seats being about to become vacant. Sir John Bowring was born at Exeter on the 17th October, 1792, and is therefore now sixty-eight years of age. He is also mentioned as the likely Governor of the Isle of Man, by the people of which he seems held in remembrance for the services rendered them. A local journal in 1846 said:—“When the learned gentleman visited the Isle of Man “in 1843, he found its commerce tied up by a paltry license “system, which, in practical operation, proved an instrument “of favouritism, fraud, oppression, and petty tyranny. He “found our ports and harbours shut against mariners, unless a “large sum were paid in harbour-dues. The Doctor brought “these grievances before Government, got the licenses abolished, “trade put on a favourable footing, and the ports opened.”

Mona’s Herald and Faragher’s Isle of Man Advertiser of 25th July last says, as regards the suggested succession of Sir John Bowring to Lieutenant-Governorship of that island:—

“In our opinion, a more acceptable selection could not be made from all the eligible politicians of the kingdom than the one proposed.

“In the first place, we want a man to fill that high and responsible office who has experience and acquirements in political life, and who is well versed in the constitution and general laws of the British Empire.” And shortly, recapitulating Sir John Bowring’s political career, it says:—“He is, therefore, well qualified to discharge the duties of Lieutenant-Governor of the Isle of Man.”

Secondly, it says, “We want a man for that office acquainted with Man affairs, one who knows our wants and takes an interest in them.” Then, stating what Sir John had done for them from 1843 to the close of his Parliamentary career, it says:—“If Sir John Bowring were now to visit the island he would be surprised and delighted at the happy change it has undergone since he was last here. Standing on the elevated ground at Rose Mount, and beholding a splendid new town of terraces, villas, and mansion-houses started up around him, looking down towards the harbour, and seeing it thronged with merchant vessels and steamers, and then riding through the country and revelling amid smiling fields of corn, and stock-farms covered with flocks and herds, he might exclaim, with good Las Casas, ‘these are the works of my hand!’ for, indeed, without the commercial changes wrought out for us by the ‘good Doctor,’ as we used to call Sir John, such prosperity had never been ours.”

CHRISTIANITY IN CHINA.

A PARLIAMENTARY paper has been published on this subject containing two letters (with inclosures) from Mr. Bruce to Lord John Russell, with the object of showing that the Chinese had violated the American treaty. The inclosure in No. 1 is an extract from the *North China Herald* of February 11, 1860; that in No. 2 is a copy of a proclamation issued last October by the chief magistrate of the district town of Loo-ling-heen, in the province of Kiang-si, against the preachers and professors of Christianity. From this proclamation we extract the following:

“Any native of the Western Ocean (Europe) who shall propagate or teach the religion of the Lord of Heaven in the interior of China, or who shall clandestinely engrave or cause to be published any books of religion, or who shall establish places of meeting therein, to propound that religion and deceive the people; and any member of the Eight Banners, or any of the Chinese people who shall receive the doctrine from a native of the West, and use it to convert the people, or who shall privately assume another title or decree (i. e., the title of the Holy Father or Priest) to mislead the multitude shall, on conviction, be sentenced as follows:—the principals to be strangled, with immediate execution; and any who shall propagate that religion, without taking a separate title, and the number of people imposed upon be not large, shall be condemned to be strangled, awaiting in prison the execution of the sentence. And any who shall have allowed themselves to be converted, and shall not reform, shall be sent to the cities in Turkistan, and be given to the high and low orders of Beggars, and those able to control them, to be their slaves; and the bannerman shall be struck off the muster-roll of the banner.”

EMIGRATION FROM CANTON.

Government despatches between Sir John Bowring, Mr. Alcock, and other consuls with the Home Government, have been published in the form of a Parliamentary Paper extending over 139 pages, and dating from 15th April, 1859, to 11th

* *London and China Telegraph*, March 30, 1859.

July, 1860. It contains also the depositions of coolies examined.

Lord John Russell says in regard to this traffic, "Great abuses have unfortunately prevailed in the Chinese ports where the emigration of coolies has been carried on. Men have been kidnapped by unscrupulous agents, employed by European contractors, and the scenes of oppression and misery which have taken place in the barracoons and on board the ships have borne only too close a resemblance to the African slave-trade." The enormities far exceed those in the African trade, inasmuch as the Chinese are a more civilised and domestic race. Some time since we urged on Lord John Russell, by personal interview, the stoppage of this nefarious traffic in British ships, and that he would intercede with the French and Americans to the same end, we are glad to see some steps have been taken in that direction. We had the influence of an eye-witness, and could corroborate to Lord John the published accounts of this iniquitous traffic. A large proportion of the despatches in this correspondence refers to the details of the rescue of the coolies from on board the United States ship *Messenger*, about which it will be seen in our New York news our American contemporary has taken us up sharply, but we are quite sure he knew nothing of the real state of things in regard to the coolies by this ship, and has been imposed upon by some of the interested. It is amusing that the same paper, the *New York Herald*, contains a statement from its Havana correspondent that he had, in a conversation with one of the crew of the *Messenger*, ascertained all the particulars of the atrocities committed at Whampoa. We wish we could take credit to the British merchants and ships that they had none of it.

MR. JAMES WHITE, LATE OF CHINA.—This gentleman has been elected member for Brighton by a large majority over his Conservative opponent. The following speech, made by Mr. Catt in proposing Mr. White, is a very fair sample of the general ignorance prevailing on matters connected with China; in this case it is simply amusing, but in others the statements are productive of considerable injury to the welfare of our relations with that country; and as the special journal in connection with events in the Far East, it is our unpleasant duty to point them out; but some statements, even by most reputable writers and journalists, are so palpably ridiculous, that we are constrained to pass them; but we have misgivings that we are performing our mission in doing so, the very enormity and abundance of them disarms us from noticing some. It should be the duty, however, of any journal similar to ours to correct all published errors in connection with our field, even at the risk of becoming egotistical. Late residents in China now resident in this country, know what an Augean stable we have to deal with, and how largely it would tax us to point out all the errors printed. It was only last month that Lord John Russell stated in the House, that no Chinese custom-house existed at Swatow, and knew nothing of the affair with the British bark *Chin Chin*. The Duke of Newcastle, in like manner, knew nothing of the Tam Achoy expedition. Mr. Catt said:—"With respect to Mr. White, he had, as a merchant, met with reverses, but having struggled through his difficulties, he went to China, where he founded the colony of Shanghai, and even edited a paper in the Chinese language."

HONG KONG AFFAIRS.—The following comments on the late discussion in the House of Lords on the Tam Achoy raid are from the *Neveus le Chronicle*:—"The Duke of Newcastle has been forced to explain what it is he has done to purify Hong Kong. He says there has been no neglect. 'He ordered the new Governor to make an inquiry into the various charges raised by Mr. C. Anstey, cautioning him, however, against stirring up again that mass of mud which appeared to have encumbered society at Kong Kong.' When a Secretary of State resorts to a metaphor it is time to be on our guard. Official metaphors are intended to confuse unlearned people. The way to save one's self from being obfuscated by a metaphor is to follow it out. Society in Hong Kong is encumbered with mud, but the mud is not to be stirred.' Would not an upright Minister have said, 'it has to be removed. It will be a nasty job, but it must be done?' When the new Governor, Sir Hercules Robinson, went out it was said of him that he had only one qualification for his office, and that was his name, Hong Kong being an Augean stable. The Duke of Newcastle has clenched the sarcasm by his order 'not to stir the mud.' We have entered thus fully into this matter because it is of an importance far transcending the circumstances in which it originated."

NEWSPAPERS FOR CHINA AND PLACES EASTWARD OF INDIA.—A many newspapers intended to be sent to China and other places eastward of India, via Southampton and Suez, continue to be posted insufficiently prepaid, the public are reminded that newspapers for any of those places are liable to a postage of twopence each, and that, unless that postage be prepaid, the newspapers will not be forwarded.—By command of the Postmaster-General, ROWLAND HILL. General Post office, 27th July, 1860.

THE AMERICAN GOVERNMENT, through its Minister here, has presented to Mr. John Jenkins, late lieutenant, R.N., commanding her Majesty's gunboat *Bancker*, a sword of honour, as a mark of its appreciation of the gallant services rendered by him in China, in numerous engagements with the pirates.

ABOUT THIRTY miles of telegraphic wires are about to be despatched to China. Several of the Sappers of the Royal Engineers will be sent to superintend the laying down the wires, &c.

THE BOOK postage to Labuan comes into operation on the 1st proximo; the rates are the same as published in our scale for India and China.

DURING THE stay of the American ship *Connecticut* at Plymouth, en route to China, the crew charged the captain and officers with most inhuman treatment.

THE PEOPLE in the Isle of Man are trying to get up a feeling in favour of Sir John Bowring, as the new governor of the island.

Spirit of the Press.

THE THIRD CHINA WAR.

TIMES.

Why is it that there is no defined national policy in our relations with China? The answer is very easy. We have only to note the men who rise to take part in the debates in the House of Commons to recollect their previous conduct, and to know their connections, and we see at once why every one advocates a different line of action, and why nearly all would be ready to combine against any really national policy which a Minister should be bold enough, and we are afraid we must say, indelicate enough to declare. There are a dozen different objects which a dozen different classes see in this war. First, and, perhaps, most contemptible of all, is the vanity of a few antiquated military and naval men, who desire to avail themselves of the accident of a seat in Parliament to direct from their places at Westminster operations which would never have been committed to their professional control. These unemployed officers are anxious to override in the quality of bourgeois the responsible counsels which ministers obtain from the heads of their respective professions. They are ready to dispute with a Minister every military probability, and to demonstrate that every thing is impossible, and that ships and armies are good only to be paid for. It is only by concealing every military or naval plan that the anxious and obtuse interference of these zealous volunteer advisers can be avoided. They are men with votes and men with tongues, and a Minister dares not say to them, "This is a professional matter which has been considered by your superiors in your own profession; I am unable to argue it with you in detail, but the Crown, in whose province it is to make choice, has confidence in their judgment, and has none in yours." The House of Commons would resent so curt a truth, and the public will listen to a Parliament man who talks. Next to these in persistency, and before these in influence, we have the China commercial interest. To them the British public owes nearly all that harrowing news which from time to time disturbs its equanimity. The rebels are always threatening Canton or destroying the young teas just at some critical moment for the markets. The silk crop is always going to fail. British manufactures are very dull, and the markets overstocked. The exchanges are very bad. The interest of this class is to keep things exactly as they are,—to buy things cheap in China and to sell them dear in England, and to buy things cheap in England and to sell them dear in China. That is their business. It is the spirit of commerce, the true policy of the trader. No one complains of it, but it gives a special channel to their desires and carves out for them their object. In their eyes the object of a China war must be to keep things exactly as they are,—ships of war always on the coast, troops always within hail, the Chinese authorities always in alarm. Mandarins too frightened to be very particular about dues, and too much in dread of barbarian force to make much noise, even if a Chinese Custom-house officer should be slain, and a Hong Kong jury should acquit the slayer. These are the natural objects of one class which has great authority in England, and in order to attain these objects that class must, of course, oppose any large measure which would put our relations upon a solid footing, open the whole country to trade, and destroy that profitable mystery in which China has ever been shrouded.

DAILY NEWS.

And this absurdity about forcing an extension of trade is once more set up as an excuse for forcing on the Mandarins of Peking the adoption of diplomatic usages which, stripped of their moral significance and mutual sincerity, are little better than the tomfoolery of pantomime. The practical result to the taxpayers of England is, that we are "at a guess" toiling three millions and a half into the Gulf of Elgin, with a horrible suspicion that we shall be called upon next year to throw as much or twice as much more after it.

MORNING POST.

The House of Commons having now agreed to vote the ways and means necessary for the conduct of the Chinese war, it certainly appears somewhat late in the day to criticise the unfortunate circumstances which have compelled the English and French Governments to engage in so expensive and distant a contest. This, however, is not the opinion of Mr. Baillie Cochrane, who, having three years ago lost his seat in consequence of his vote against one Chinese war, has now had the temerity to impugn and attack the policy which her Majesty's Ministers have pursued towards China under circumstances of insult and outrage ten times more flagrant than any which accompanied the seizure of the *lorcha Arrow*. If Mr. Baillie Cochrane's argument were to prevail, the House of Commons, usurping the prerogative of the Crown, and ignoring the responsibility of Ministers, ought to send out an ambassador of its own, surrender Hong Kong and Canton, retire from Shanghai and the other commercial ports, and give the Chinese compensation for the three wars in which this country has been reluctantly compelled to engage with China. For such a mission the hon. member for Birmingham (Mr. Bright) would be admirably qualified; though perhaps his friends at Birmingham and Manchester would not be exactly gratified to witness the purchase of peace at a price which would exclude their goods from the Chinese market.

MORNING HERALD.

At length we have something like a glimpse of Mr. Gladstone's Celestial scheme. We have a full glance at the round figures. But this did not come all at once. The art of the showman is to divide his pictures; now one and now another, and any of them, meaning all the rest. Our first peep was "The Chinese Expedition," only £2,500,000. While we are gazing at the figures and trying to make them out—hey, presto!—the scene changes; 1859 passes away, and 1860 is on—the 10th of February, 1860. "Look to the right, and you will see the war with China; just half a million and no more!" While the public is asking some little explanation of this,—another change! £500,000 means nearly eight times the amount—the bare £3,800,000. The total is only six millions—a very modest transformation for a financial showman. Thus, we had first a provision for a Chinese "expedition," and now for a Chinese "war," sums displayed in various shapes which amount as a whole to the large figure just stated, £6,000,000. This, of course, is not the end of the exhibition. The strings will be drawn again, the showman will once more display, and we shall

have vote after vote proposed under various representations of "the live lion stuffed with straw" character, till the total amounts to a sum almost too formidable to mention. It ought to be borne in mind that Mr. Gladstone is one of those members of the House of Commons who was loudest in his denunciations of the origin of this contention with the Chinese.

GLOBE.

The Chinese war is the subject of a great deal of mystification in the House of Commons. It is oddly treated, too. The House voted on Thursday the money needed to carry it forward, and last night discussed the propriety of Thursday's proceedings! Perhaps we are wrong in saying the House. The main body of members find no difficulty in seeing what the simple state of the case is. Not so that notable watch-dog, "Tear'em;" those wonderful gentlemen, the ex-Ministers, and that great military authority, Mr. Bright. "Tear'em" was fossilized on the China question in 1857. He opposed the Lorch war, and was one of those who suffered huge rebuke at the hands of the country. Mention the word China, and his mind flies back to 1857. The Lorch war was wrong; *ergo*, all wars with China are wrong. Therefore Lord John Russell, and Mr. Milner Gibson, and Mr. Gladstone must be guilty of gross inconsistency, because they opposed a war in 1857 and support a war in 1860. A good talker never loses sight of a plausible case. What was it to Mr. Roebuck that the two wars are essentially different? No more than it was to Sir John Pakington and Lord John Manners that the present war arose, not in consequence, but certainly out of their instructions and the conduct of their officers. What course either Mr. Roebuck or any ex-Minister would have taken, after the action in the Peiho, we know not. They are not responsible. But one thing we do know. If they, being Ministers, had not determined to vindicate the position we lost on the Peiho, and taken measures for the protection of life and property in China, the country would have done by them the reverse of what it did by Lord Palmerston in 1857. Instead of confirming the course taken by a majority so overwhelming that no one dared to challenge the decision, the country would have expelled those Ministers and their abettors from power.

MORNING CHRONICLE.

Money for a war already commenced is necessarily demanded from the House of Commons very much in the "stand and deliver" style. Under this conviction of utter helplessness, the Commons last night voted nearly four millions, in a lump sum, to the Government, as a "credit" towards the charges of the war in China, after less than two hours' discussion. Sir Henry Willoughby, of course, improved the opportunity to trot out his hobby of the "Appropriation Audit;" and Sir J. Pakington expressed the very general feeling of the House when he urged their title to fuller information, both as to the way in which the money was to be spent, and the ultimate objects.

DAILY TELEGRAPH.

The opposition leaders have adopted a system of tactics testifying to their want of faith in their own policy. It was with this view and with no other that Sir John Pakington framed his motion with respect to the cost of the expedition to China. He and his friends are eager, it appears, to know how much will be paid for bringing the Chinese to their senses. In this particular the rat-payers generally will coincide with him. We may as well console ourselves with the assurance that, amid all the figures which Sir John Pakington is so anxious to investigate, there will be none setting forth, at a rough estimate, how the Bologhagh may be conquered, or how the tea districts of Seychulu may be united by a bridle path with the southern slopes of the Himalayas. If we were to listen to all the complaints against our Chinese policy, we might imagine that England had been for the last ten years proposing an invasion of the moon; but the truth is, that we once coerced the Chinese Government so effectually, that they not only ceded us an island, but gave way on the opium question, and sent wagon-loads of silver to Threadneedle-street. The only error we then committed was to give up our claim of an ambassadorial establishment at Peking, and that is the very point for which our plenipotentiary, backed by our naval and military commanders, must now definitively contend.

STAR.

The House of Commons has voted three millions and a half to defray the charges of the expedition to China. That, of course, is only a beginning; and unless the policy of the British Government be reversed, and directed into the path of legality, honesty, and common sense, heaven only knows when these demands on the substance of our people may cease. Mr. Sidney Herbert makes it depend on a change in the policy of the Chinese Government; but why? Is the policy of the Chinese Government so clearly wrong, and that of our own so indisputably right, that, until the former be abandoned, we must continue to provide for hostile operations? Is it the opinion even of her Majesty's Government that the war with China is a just and necessary one? We say just and necessary, because, undertaking to go on with it they seem to think it necessary, and yet the evidence furnished by the language of some of the most eminent among them forbids us to believe that they can consider it just. And what is that necessity, then, which constrains this Government to send a hostile expedition across half the globe, at an enormous expenditure of the already lavishly wasted money of the taxpayers—an expedition not sanctioned by justice, and so far from promising to lead to an immediate or ultimate gain in the shape of robbery, is even now destroying a profitable trade, and is likely, for time to come, to retard irrevocably the extension of our commerce in those quarters, which the period of peace had given such ample promise of? Why has it been undertaken? Why is it persevered in? What is the subtle, pernicious—we had almost written diabolical—influence which sways the British Cabinet to this insanely felonious course—to waste the lives and treasures of their royal mistress's subjects in earning for the nation deep loss and enduring infamy? It is a question to be seriously pondered, but which yet admits of easy solution.

ECONOMIST.

In the debate, Mr. Gladstone, as his custom is, deduced for us a very wholesome lesson from the unwelcome circumstances which necessitate the

Supplementary Budget. "It is very desirable that we should, if possible, draw some lesson from it, and I confess the lesson I draw is this, that it is impossible to check proceedings of this kind growing out of transactions such as the deplorable events at the mouth of the Peiho, when once they begin. What you should really look to is your mode of conducting your ordinary communications with such distant Powers, and the responsibility under which they are conducted. It is an extremely dangerous system of policy which sends forth treaties to be exchanged at the sword's point and at the cannon's mouth." We entirely agree with these observations, and we scarcely know any element in the finances of this year which causes us greater regret than the China loan which now seems imminent. It is not simply that it is a loan; for the two millions or upwards which will probably be borrowed at once by way of beginning to carry out the scheme of the Commission on National Defence will cause us no uneasiness. It is not the extent of the loan; for even coupling it with the first instalment of the Defence Loan,—which will, we believe, be borrowed in terminable annuities,—a loan of five millions, or a little more, will not greatly affect the resources of England. But it is the knowledge that the money is to be spent on redeeming a fatal error, and that in all probability the means chosen to do what we can in redemption of that error will in every way darken, instead of brightening, the prospect of our future relations with China.

EXAMINER.

Every one hates this Chinese war, the ministers in not less than the ministers out, though both are more or less to blame for it. Lord Malmesbury's instructions allowed of (to say the least, induced might be the apter word) Mr. Bruce's rash and violent proceedings; and the present Government was unwise enough to approve of the envoy's fatal use of the force placed at his disposal. To send a mission of peace with "a sufficient force" was a stark absurdity, defeating the object. How can force minister to a mission of peace? but it is too easy, as Mr. Bruce has shown, to turn the force to the purposes of war. The ancient type of wisdom, wishing to avoid violence, desires some arms to be put out of sight, saying the sight of the iron tempts men. Trade is our only real concern in China; but, as Sir John Pakington observes, instead of confining its cares to that one object, our Government has endeavoured to force the forms of European diplomacy on the distant and half-civilised empire of China. We are spending millions and lavishing heaven knows how much generous blood in order to force a resident minister on the court of Peking. This is really the Helen of our Iliad, a diplomatist at Peking! Such a man as Mr. Bruce at Peking instead of at Taku. Put it to the sense of the country how much it would give, how much it would suffer, how many millions it will consent to spend, and how many thousands of lives to throw away, for the great end and object of a diplomatist at Peking, and the response would be that a pin's head would be too high a price. But the foreign minister talks as if a diplomatist at Peking were the only security for trade. He has as much faith in the charm of a diplomatist at Peking for the interests of trade as people of old had in the horse-shoe nailed to the threshold. For our own parts, we are firmly persuaded that nothing would be so dangerous to trade in China as a resident envoy always meddling and finding something to do in order to keep up his own importance, and to show he is not what he ought to be, not to be mischievous, a cipher. "*Laissez aller, laissez faire*" is the true policy for trade in China; and in proof of it trade will be going on even while we are burning and destroying to compass the great security of a resident envoy at Peking, at the cost, perhaps, of revolutionising the empire. We have been engaged in many foolish wars for inadequate causes, but in none so insane as this.

LONDON REVIEW.

If the Speaker's gallery had been filled during the debate on the China War, on Friday night, with an assemblage of Mandarins, we can imagine the astonishment which would have been depicted on the countenances of those dignified personages at the opinions expressed by certain honourable members who took part in the discussion, some of whom displayed about as much knowledge of China, and the policy which it is the interest of this country to pursue there, as we might expect to find in a Chinese parliament, did such an institution exist, upon the occasion of a debate to consider the expediency of invading England. Our Celestial friends would have heard Mr. Bright express his belief that "the accumulation of a large force in China increased the temptation of the authorities there to enter into warlike proceedings;" while Sir James Elphinstone, charging Mr. Bright with being the cause of the war, expressed his opinion that, although we had 17,000 men "out there, he did not see any end to it." Colonel Sykes thought that the inevitable result of a treaty, if we got one, would be a garrison at Shanghai; and the Chancellor of the Exchequer, after demanding more than three millions and a half to pay the expenses of the war, gave vent to the consolatory and original remark, that "he must frankly state that the whole matter was full of uncertainty." Lord John Manners earnestly hoped that "in the prosecution of this melancholy and miserable contest, the utmost consideration might be shown for the feelings of the Chinese people;" and Mr. T. Baring put a climax to these forcible observations by the stupendous misstatement, that "the one great mistake that we have made all along in China is, that we seem to think that country is like France, or any of the other Powers of Europe, and we must force on China the same arrangements we have established with those Powers with which we have been for a long time connected." So long as Englishmen are expected to demean themselves in China as inferior to Chinamen, and this Government, by not insisting upon asserting its equality, sanctions the Chinese view of their own superiority, the irritation must be incessant. The only remedy is to be found in the establishment of a resident minister at or near Peking; and the only mode by which this great concession can be wrung from the Chinese Government is by the point of the bayonet. The sum of three millions and a half may be a high price to pay for this object, and the *modus operandi* somewhat severe; but the Chinese have brought it upon themselves, and we can assure Mr. Bright that, although we think hostilities imminent, the accumulation of troops has not the effect of encouraging the Chinese to resistance, while we hope that Sir James Elphinstone may live to see the end of the war, that Colonel Sykes may not live to see a garrison at Shanghai, and that Mr. Baring will refrain for the future from talking about China until he has acquired some knowledge of the subject.

Literature.

From Eve till Morn in Europe. By MRS. AGAR. T. C. Newby, Welbeck-street.

The subject of this book is well chosen, though we can scarcely say so much for the title. The manners, customs, and religions of the middle ages furnish a theme on which some of the best historians have dwelt, and a text book to their more laborious compilations is a desideratum. The work before us is neither sufficiently complete, nor, we are bound to add, sufficiently accurate to be of much service to the student; but such was not the writer's aim. Mrs. Agar designed only to give "a brief and popular sketch," and in this she has succeeded. Here and there we have evidences of bookmaking (as an instance we think the local guide book tells us all about the St. Alban's saint), but we are nevertheless able to say that the work affords abundant proof of the writer's talent and research, and that it is well calculated for the instruction of the general reader in the events of a period in reference to which he does not often possess too profound a knowledge.

The Two Households. By TERENCE DOYLE: 2 vols. T. C. Newby, Welbeck-street.

This is a very well written "autobiography," gloomy in tone, arising from the nature of the subject (incarceration in a private lunatic asylum), but in other respects unobjectionable. It is painfully interesting, and if it be as we suspect, a first production, it gives undoubted promise of future excellence. The pathetic scenes are sketched with unusual power, and although the composition is not perfect, we await the next work by Terence Doyle with more than ordinary interest.

NOTES.

Messrs. Longman and Co.'s new list includes "A Historical and Chronological Cyclopædia," by B. B. Woodward; "Political Ballads of the 17th and 18th Century," annotated, by W. W. Wilkins; "The Philosophy of Nature," by Boase; "Lectures on the History of the Fine and Ornamental Arts," by W. B. Scott; "Facts and Figures relating to Vancouver's Island and British Columbia," by J. D. Pemberton; "Air and Water," by Dr. Angus Smith; "A Manual of Chemistry," by Dr. William Odling; "A Handbook of Farm Labour," by Mr. J. C. Morton; and numerous other works. Messrs. W. H. Allen and Co. have published a work on "Management of the Horse," from the pen of Mr. Edward Mayhew. The same publishers announce a "History of Chess," by Dr. Forbes; and "The Russians at Home," by Mr. Sutherland Edwards. Mr. Bentley announces "A History of English Literature, Critical and Anecdotal"; and "The English Satirists, from Hall to Byron." Mr. Hotten is preparing to publish a curious little work, said to be edited by Martin Luther, entitled "The Book of Vagabonds and Beggars, with a Vocabulary of their Language." Mr. Hotten, who is himself the translator, will furnish explanatory notes. The book is not mentioned by Luther's biographers, and its existence, in this country at least, is scarcely known. Mr. Henry Mayhew is preparing a "Life of Benjamin Franklin" in popular form, embodying the new facts which recent publications of letters and other biographical materials afford. Messrs. Ward and Lock will shortly publish "Marston Lynch," a novel, by the late Mr. Robert Brough (originally published, we believe, in the *Train Magazine*), with a portrait and memoir, by G. A. Sala; also "Mont Blanc," by the late Mr. Albert Smith, with a memoir by his friend, Mr. Edmund Yates. Messrs. Saunders, Otley, and Co. will shortly publish a new work, entitled "The Newspaper Press of the Present Age." Messrs. Marlborough and Co. announce a new edition of "Colonel Wilford's Lectures on the Rifle;" also a novel entitled "Aunt Dorothy's Will," by the author of "Passing Clouds," "Warfare and Work," &c., &c., in 2 vols. Messrs. Griffin and Co. have purchased Cobbett's Works, long kept out of general sale from their high price.

A new work, by Count de Montalembert, entitled "Les Moines d'Occident," has appeared in Paris. An "authorised" translation will soon be published by Messrs. Blackwood and Sons.

The speeches and miscellaneous writings of the late Henry Drummond are announced for publication.

Mr. Hawkins has tendered his resignation as Keeper of the Department of Antiquities in the British Museum. Great changes are likely to take place in the administration of the various branches of our antiquarian collections.

We are glad to hear that Mrs. Austin is engaged in preparing for the press a collection of her deceased husband's lectures and papers.

Her Majesty has appointed William A. Ross, Esq., the author of "An Old Road and an Old River," to which we have recently called our readers' attention, to the Colonial Secretaryship of the Gold Coast.

A movement is on foot for raising a monument to the memory of the late Augustus Walby Pugin; and we are glad to hear that it is taking so practical and useful a form.

Messrs. Trubner and Co., of Paternoster-row, are shortly to publish the very valuable "Results of a Scientific Mission to India and High Asia," by Hermann, Adolphe, and Robert de Schlagintweit; undertaken between the years 1854 and 1858, by order of the Court of Directors of the Honourable East India Company. The work will consist of nine volumes of scientific text, and of an atlas in three volumes folio, containing views and maps, with explanatory letter-press.

Dr. James R. Ballantyne (of the College at Benares), the candidate for the Boden Professorship at Oxford, has received the appointment of librarian at the East India House, vacant through the death of Professor H. H. Wilson.

Monetary and Commercial.

The Labuan Coal Company are sending out, by an early mail, a full staff of engineers and various officers, which will probably number twelve in all.

The new Bill for the protection of shipowners authorises the landing and storage of goods within forty-eight hours after the report of the ship at the customs, in the event of the consignee's not taking delivery of the same.

The report of the Bank of Egypt states that the net profit for the past half-year is £11,148, out of which a dividend is recommended at the rate of 7 per cent. per annum, free of Income-tax, leaving £2,398 to be carried forward.

The dividend of the Bank of London has been announced for the past half-year at 5 per cent. per annum, and the affair was most prosperous.

The Mediterranean Extension Telegraph Company (Limited) will hold their next general meeting on 17th August, when it is rumoured that important propositions will be placed before the shareholders.

The East India and China Association have just published their comparative statement of the number and tonnage of ships, both British and foreign, entered inwards and cleared outwards with cargo from and to places within the limits of the East India Company's charter, from the 1st of January to the 30th of June, 1859 and 1860. According to the statistics of vessels entered inwards, the Port of London shows an increase of 93 vessels, with a capacity of 46,814 tons; the difference between 421 vessels and 285,084 tons in 1859, and 514 vessels and 331,898 tons in 1860. The Port of Liverpool also exhibits an increase of 28 vessels, with a capacity of 13,428 tons, the arrivals in 1859 having been 123 vessels and 113,688 tons, and, in 1860, 151 vessels and 127,116 tons. The port of Bristol exhibits a decrease of seven vessels, with a capacity of 3,554 tons, the difference between 20 vessels and 9,660 tons in 1859, and 13 vessels and 6,106 tons in 1860. In the case of the Clyde, also, a decrease is presented of 9 vessels, with a capacity of 2,700 tons, the arrivals in 1859 having been 14 vessels with a capacity of 5,977 tons, and in 1860 only 5 vessels and 3,277 tons. The net increase has been 105 vessels with a capacity of 53,988 tons, the difference between 578 vessels and 414,409 tons in 1859, and 683 vessels and 468,397 tons in 1860. The principal increase has been in the arrivals of vessels from Calcutta, China, Ceylon, Singapore, and the Cape of Good Hope.

The statistics of clearances outwards exhibit, so far as the port of London is concerned, a decrease of 11 vessels, but an increase of 3,234 tons; the departures in 1859 having been 423 vessels and 262,956 tons, and in 1860, 412 vessels and 266,190 tons. Liverpool, on the other hand, exhibits an increase of 79 vessels, with a capacity of 93,502 tons; the difference between 230 vessels and 187,083 tons in 1859, and 309 vessels and 280,585 tons in 1860. Scarcely any variation whatever has occurred in the return for Bristol, the number of vessels being the same, namely, 2 vessels, a slight increase having occurred in the tonnage; the amount in 1859 being 987 tons, and in 1860, 1,475 tons. The statistics for the Clyde exhibit a decrease of 4 vessels, with a capacity of 3,549 tons; the departures in 1859 having been 54 vessels and 34,771 tons, and 50 vessels and 31,222 tons in 1860. The net increase has therefore been 64 vessels, with a capacity of 93,675 tons; the difference between 709 vessels and 485,797 tons in 1859, and 773 vessels and 579,472 tons in 1860. The chief increase has been in the clearances of vessels for Calcutta, China, Cape of Good Hope, and Arabia, while there has been a decline in the trade with Bombay, New South Wales, and New Zealand.

The annual meeting of the Union Bank of London was held on the 11th of July, Mr. Northall Laurie in the chair. With reference to the mode of dealing with the deficiency by the late frauds, two courses are open—the first, to appropriate the reserve and profits to clear off the loss and to debit the remaining £84,000 against capital, or to follow the plan proposed by the directors, viz.:—to appropriate £120,000 of the paid-up capital, the reserve, and a portion only of the profits, leaving sufficient of the latter to enable a dividend to be paid at the rate of 5 per cent. for the past half-year. An opinion in favour of the legality of the latter course, which has been disputed, has been obtained from Sir Hugh Cairns and Mr. Daniel, Q.C. No apprehension is therefore felt with regard to the proceedings that have been threatened in the Court of Chancery. The present plan will not reduce the nominal value of the shares, which

will stand at £12 each, and dividends will be paid upon that amount. The accounts have been rigorously examined, and are believed to be perfectly correct. The fact that every penny of the defalcations has been traced through the books shows the accuracy with which they were kept. (This remark caused some laughter.) Since the commencement of the bank £1,000,000 has been paid in dividends, besides £1,400,000 in interest on deposits. The losses by Pullinger have been a severe blow, but the confidence of the public has not been shaken. In the week succeeding the announcement of the defalcations nine accounts were withdrawn, but since then 68 new ones have been added. The aggregate amount of deposits has also increased. In answer to questions, it was stated that the balance in the bank on the 30th of June, 1857, was £391,347, and at the Bank of England £198,188; on the 30th of June, 1858, the balances were respectively £378,557 and £294,832; and on the 30th of June, 1859, £452,564 and £343,255. In the present year the balances stood thus—at the Union Bank, £355,271; and at the Bank of England, £668,457. The deficiency by the Pullinger frauds was £23,900 on the 30th of June, 1855; £35,400 in 1856; £66,222 in 1857; £109,969 in 1858; £234,924 in 1859; and on the 19th of April, 1860, £263,125. The pass-book of the Bank of England was in more than one handwriting. The past due bills held amount to £11,738, out of an aggregate of nearly 10 millions, and against these are securities valued at £15,000. The accounts are audited by a committee of the board. Messrs. Scrimgeour have resigned the office of brokers to the company. No loss whatever will be incurred by the late failures in the leather trade. A desultory discussion took place, in the course of which it was suggested that the whole of the profit ought to be applied to cover the deficiency by Pullinger, and that no dividend should be declared. An independent audit was also proposed. Eventually the report was adopted, with scarcely any dissentients, the recommended dividend was declared at the rate of 5 per cent. for the half-year, making 12½ for the year ending in June, and votes of confidence were passed in the directors and manager.

A bill in Chancery was filed against the directors of the Union Bank of London by Mr. Fawcett, a shareholder, praying that the defendants may be restrained from paying any dividend except out of profits or surplus funds, and that it may be declared they are personally liable for their wilful neglect or default in conducting the affairs of the bank. The injunction was refused, so far as the payment of the dividend is concerned; but the general merits of the case will be brought to trial. *The Times* takes the following very severe but very correct view of the case:—

"On this matter there was originally but one feeling—namely, that the loss having arisen solely from oversight and error of judgment, it would be altogether unjust and impolitic to visit the directors with individual punishment, more especially as the shareholders were still upon balance indebted to them for a highly prosperous condition of their property. But just in proportion as this argument makes in favour of the directors in one way, it makes against them in another. By their treatment of Mr. Henderson and others they have proclaimed to the world that, in their opinion, so far from faithfulness of service, integrity of character, or absence of wrong intention being counted as pleas in mitigation of mistakes or omissions, severity in such cases should be carried to the extreme point of turning forth the offenders to utter destitution, and if possible with blighted reputations. Let them be judged, therefore, by their own doctrines and practice, and even the exaction from them of the full amount of Pullinger's defalcations would appear an inadequate penalty. Of course, even in the face of their own proceedings, it is still not wished that any such result should take place. Forbearance is the best reproach to those who render none. But there can be no question that the facts which have transpired in this respect have created an almost universal change in the feeling of the public, and that there would now be little sympathy with the directors even if the steps commenced were to end unfavourably. It is necessary to put this on record, not merely in justice to English sentiment, but also in the interests of that large and valuable body of upright men who pass their lives in the routine duties of clerkship, and who, when they have arrived at a stage too late to begin the world again, are entirely dependent on the honour of their employers for their future existence and the due recognition of their services."

The project for opening a communication into Western China by Esmok from British Pegue, which has been detailed in previous issues of this journal, is receiving the attention of the Chambers of Commerce of Liverpool, Manchester, and Leeds, also the East India and China Association, and it is expected that the subject will soon form the matter of a special deputation to the Ministry. *Burns' Manchester Circular*, after alluding to the great trade of India and China, proceeds with the following comments on this project:—

"It is a known fact that British goods have never yet gone 500 miles into the interior of China from the East coast of that extensive empire. Nor is this all; for the line of road would traverse a most extensive cotton district, from whence China is now, to a large extent, supplied. Here we have

opened to us the double advantage of increasing our supply of cotton, and opening up a new and extensive market for our manufactures; and it must not be overlooked that in so extensively augmenting our consuming powers, we must seek new markets for the increase of our products. This project is eminently calculated to effect all this, and, we think, warrants us in giving it every possible support."

A comparison of the imports of sugar in 1834, when the anti-Slavery Bill was introduced into the West India colonies, and in 1857, shows an increase in the imports from foreign and slave grown countries of 128,700 tons. The impetus is owing to the equalisation of the duty on British and foreign-grown, which is alike 14½ per cent. on each. This is of course the principal stimulant to the China Coolie trade to Cuba.

John W. Armstrong, of Manchester, yarn merchant, has been declared bankrupt, and Messrs. Robert Freeland and Co., of Manchester, have suspended, the assets in this country being only 2s. 6d. in the pound.

The Commissioner in the case of the bankrupt firm of Messrs. Bishop and Farbridge passed some severe comments upon the reckless trading which had been manifested. The most serious part of the case was their obtaining goods dishonestly from Messrs. Ward and Co., and Messrs. Andrews, of Leeds, which they immediately pledged. He thought that Messrs. Ward had good reason to complain of the Mercantile Bank having received the goods of Messrs. Ward and Messrs. Andrews through the medium of a worthless referee. The bankrupts' certificate has been suspended for three years from the date of their application, when granted to be of the third class, and protection would be withheld for six months.

The specie by the last mail is as follows:—For Alexandria, gold, £4,500; Madras, gold, £3,798; Singapore, gold, £1,060; Singapore, silver, £2,900; Hong Kong, silver, £228,654, of which £75,067 is for Government; Hong Kong, gold, £8,060; Foochow, in silver, £250; and Shanghai, £41,655.

The Board of Trade returns for June have been published, from which we gather that the exports to China, including Hong Kong, have been as follows:—Cottons, £140,369 against £103,525 in 1859, and £205,103 in 1858. Cotton Yarn, £2,090 against £34,950 in 1859, and £8,835 in 1858. Woollens (Cloths), £42,763 against £18,395 in 1859, and £34,053 in 1858. Woollens (Worsted Stuffs), £40,022 against £10,340 in 1859, and £6,742 in 1858. Imports of Tea, 4,384,896 lbs., entered for home consumption, 6,354,452 lbs.

Exports to Java (Cottons)—£35,646 against £63,075 in 1859, and £69,074 in 1858. Philippine Islands—£650 against £56,166 in 1859, and £37,477 in 1858.

The following notice of the China trade is from the *Money Market Review*:—"Whilst the export trade to India has fallen off, that to China has increased considerably. Of woollen cloths, for example, China has taken, in the month of June, £42,763 worth, against £18,395 in 1859, and £34,053 in 1858. For the six months of the present year the figures are £284,627 against £161,040 in 1859, and £122,781 in 1858. Again, of worsted stuffs, China has taken in the month £40,022 against £10,340 and £6,742, and in the six months, £263,870 against £138,223 and £84,052.

AN EASTERN AGENCY has been established at 40, Lime-street, by Captain John Pook, many years trading to the East Indies and China, for a general agency business, including the purchase and sale of goods.

The Dutch Company's sales of Java sugar in Holland were held on the 26th, and went at an average advance of one florin on the May sales, the refining qualities being most in demand.

ARTICLES OF IMPORT.

TEA.—The public sales alluded to in our last comprised over 10,000 packages, without reserve, put a stop to business by private contract. These sales having gone off very heavily, have entirely destroyed the confidence of the trade, who, after having bought freely by private contract, find all their purchases unsaleable in consequence of the reduction quoted at public sales; and we fear if this system is to be continued to the extent which now prevails, it will materially affect the permanent position of the wholesale trade, as it prevents them obtaining a legitimate return for their capital employed. Since these sales business has been so trifling as to leave no subject for remark under the different descriptions of tea; but we quote all kinds of Congou 4d. to a 1d. per lb. lower during the fortnight, and difficult of sale at the decline, whilst in common sd. Capers a decline has been established of fully 1d. per lb. Other fancy teas remain nominally the same as before. In green teas a moderate business continues to be done in the kinds under 2s. per lb., but the demand is only to supply immediate wants.

SILK.—The market has been moderately active, and the quotations about as last given, which will be found in the table.

SUGAR.—With a continuance of large deliveries, the comparative excess in our stock is somewhat further diminished; nevertheless, a quieter tone is observable in the market, but, although operations have been rather limited, the rates have been tolerably well maintained. At public sale 4,832 bags Mauritius were taken off freely; low middling to fine brown 33s. to 38s.; low to fine yellow, bright grain, 38s. 6d. to 43s.; 168 baskets grey and white Java (part 16s. duty), were realised at 46s. to 47s.

COFFEE.—Notwithstanding the quantity offered has been still more considerable this week, the market for Colonial sorts retains great firmness, and the public sales of Plantation Ceylon, amounting to 1,957 casks, 1,150 barrels and bags, have gone off with readiness, the whole finding buyers at full prices to a slight advance, more particularly for the better qualities, viz., fine fine ordinary to low middling 67s. to 71s., middling and good middling 72s. to 76s. 6d., fine middling 77s. to 79s. 6d. Native continues in good request: 56 casks, 3,230 bags, offered by auction, were held for stiff prices, at which about half was realized; good and fine ordinary 61s. to 63s. 6d., garblings 42s. to 54s.

RICE.—Business has been extremely limited at about former prices, viz., 15,000 bags privately, low middling to fine white Bengal, 10s. 9d. to 14s. 6d.; some good Madras at 11s., and middling Rangoon 9s. 3d. to 9s. 6d. Sales of Java at 13s. for fair.

PEPPER.—Firm: and of 1,086 bags Penang and 104 Singapore at auction, half the former sold at 37d. to 4d. per lb., and all the latter at 4d. to 4½d. White, also firm: but of 397 bags Penang at auction, a small portion only sold at 6½d. to 6½d. per lb.: 121 cases and 9 bags Tellicherry found buyers at 1s. 3d. to 1s. 5d. for good to fine; Coriander kind, 9½d. to 10d., and ord. 8½d.

SAGO.—At auction, 561 boxes middling, large, and medium pearl were disposed of at 16s. to 16s. 6d., being rather cheaper. 96 bags sago flour were withdrawn at 17s.

SPEICES.—Cinnamon: Quotations remain the same. The quarterly sales will take place. Cassia Lignea: Demand somewhat improved; and 325 cases at auction all sold at 86s. to 92s. per cwt. for second to first pile, and 78s. to 80s. for mouldy, averaging former rates. Cloves: Of 23 cases Penang at auction, one-fourth sold at 1s. 2½d. to 1s. 4d. per lb., being the previous worth. Mace: Firm, and at auction 22 cases Penang, and 34 cases Singapore, all sold at 1s. to 1s. 5d. per lb. for ordinary to good reddish. Nutmegs: Command fully former terms; 109 cases Penang, and 79 cases Singapore at auction, all sold at 1s. 3d. to 2s. 4d. per lb. for ordinary small to good medium, with very low and wormeaten at 9d. to 11d.

HEMP.—Small transactions in Manila at previous quotations.

COTTON.—A better demand has existed, but prices of Timneville Madras have experienced a reduction corresponding with that previously established on other sorts, viz., 750 bales fair and good at 4½d. and 5d.; 1,250 bales very middling to good fair Surat, however, have been sold 3d. to 4½d.

JAPAN WAX.—Sales have been 750 boxes block at 60s., and saucer at 63s.

TOBACCO.—No change.

TIN.—Market flat; Banca is quoted at 135s. to 136s., and Straits at 131s. to 132s. Regulus of Antimony, £52.

MISCELLANEOUS.—Rum: Sales of Penang at 1s. 4½d. India Rubber: Market dull at a slight reduction in rates. Camphor: Market improved, and large sales at an advance of 10s. Rattans: Sales of 2,000 bundles Penang, at 2s. 8d. to 3s. 7d. Sapanwood: Transactions have been important; 500 tons of Siam at auction having been nearly all sold, and readily, fine sound wood realising an advance of 10s. per ton upon previous very low rates; second, and damaged, going very generally at nearly as great a reduction. Sound ranged from £7. 5s. to £9. 12s. 6d. per ton. 115 tons Manila all retired. Soy: No sales of China; Japan at 21s. per case of 36 bottles; Rhubarb sales 4d. to 4½d. for middling. Mother-of-Pearl Shells, 116 cases of Manila retired at 11s. Tortoise-shell, sales of Singapore at 16s. per lb. Cocoa-nut Oil: Market firm; Ceylon, £43 to £46. 10s. Star Aniseed, no sales. Elephant's teeth: Siam sorts nominal at last quotations. Stick lac; small sales of Siam at 55s. to 60s. for r-d. Gum Benjamin: Auctions limited to 15 cases of Siam and 52 cases Sumatra: of the former two-thirds sold at £11 to £30. 5s. per cwt. for low third to first quality; and of the latter half sold at 41s. to 105s. for fourth to inferior third quality.

ARTICLES OF EXPORT.

IRON.—Griffiths's Wolverhampton Circular states that all the leading firms in Staffordshire are supplied with orders sufficient to keep their mills steadily employed for the present, and the reports of the quarterly contracts entered into by the Derbyshire and Middlesbrough houses are considered satisfactory. North Staffordshire, it now turns out, took a very large share of the orders given out for bars and plates. The demand for sheet iron for galvanising purposes continues unabated, and a great number of the small mills in South Staffordshire are entirely occupied in rolling these thin gauges. The quotations in London for nail rod is £6 17s. 6d. to £8; hoop, £9 to £9 10s.; sheet, £9 10s. to £10.

STEEL.—Swedish Keg, £19 to £20.

COPPER.—Sheathing, 11½d. Yellow metal, 9½d.

TIN. 136s. for block, 137s. for bar. Tin plates, best charcoal, J. C. 31s. to 32s. 6d. per box.

LEAD.—English Pig, £21 10s. to £23 5s.; Shot, £25; Sheet, £22 10s. to £23; Spelter, £20 to £20 10s. Zinc, English Sheet, £27. Quicksilver, £7 per bottle.

MANCHESTER MARKETS.

The export of plain calicoes entered for Shanghai in all ports of Great Britain from Jan. 1 to June 30 is 44,007,268 yards; of printed and dyed, 9,878,697; of yarns, 4,400 lbs.; linens, exclusive of yarns, £2,676; woollens and woollen mixtures, exclusive of yarns, £320,158. For Hong Kong and Canton during the same period: plain calicoes, 27,361,651 yards; printed and dyed calicoes, 3,963,012 yards; twist, 2,665,012 yards; linens, exclusive of yarns, £2,845; woollens and woollen mixtures, exclusive of yarns, £153,298. For other Chinese ports: plain calicoes, 24,355,647 yards; calicoes, printed and dyed, 3,869,909 yards; twist, 1,198,050 lbs.; linens, exclusive of yarns, £342; woollens and woollen mixtures, exclusive of yarns, £133,064. For Singapore: plain calicoes, 22,060,792 yards; calicoes, printed and dyed, 2,810,672 yards; twist, 827,960 lbs.; linens, exclusive of yarns, £28,567; woollens and woollen mixtures, exclusive of yarns, £36,262. For Manila, plain calicoes, 9,680,827 yards; calicoes, printed and dyed, 6,846,041 yards; twist, 28,394 lbs.; linens, exclusive of yarns, £9,033; woollens and woollen mixtures, £12,185. For Batavia: plain calicoes, 13,048,057 yards; calicoes, printed and dyed, 12,205,326 yards; twist, 387,678 lbs.; linens, exclusive of yarns, £1,801; woollens and woollen mixtures, £7,280.

The market has been for the most part dull, and slightly lower prices have been accepted for the little business which has been done. Notwithstanding discouraging accounts from China, some considerable transactions appear to have been undertaken for markets. There have also been a few buyers at low rates for Bombay; but otherwise, generally, there has been no feature beyond a rather prevalent impression that prices for our staples have yet to undergo some further decline.

FREIGHTS AND CHARTERS.

A small amount of tonnage has been taken for coals to Callao at 37s. 6d. from Sunderland, and 32s. 6d. is offered from Bristol Channel to Valparaiso, 47s. 6d. Panama.

Rates of freight current for vessels on berth to Shanghai 60s. per ton dead weight; 45s. per ton of 40-feet measurement. To Hong Kong, 50s. weight, 45s. measurement. To Singapore, 35s. to 40s. weight or measurement. To Manila, 35s. and 40s. To Japan, £5 weight, 90s. measurement. To Batavia, 50s. weight, 40s. measurement. At the United States:—To Shanghai, coal and measurement goods, \$9 to \$10.

CASUALTIES.

The Decima (Dutch barque), Akkerman, from Batavia to Amsterdam, put into the Mauritius on the 1st of June, leaky, and was discharging there on the 6th of June. The Graaf van Heyden Reynesteyn, Wamsteker, from Batavia, arrived at Amster am 11th July, with bow stove and other damage, having been in contact, in the Great North Holland Canal, with the Ortelius, Groot, from thence to Batavia.

The Norway (ship), of New York, Major, from Philadelphia for Hong Kong, was below New York on the 30th June, returning in a leaky condition. She has since put into that port, and will have to discharge.

Octavia, Miesner, from Cardiff for Hong Kong, arrived at Queenstown 15th July, with master sick.

The Cezard, of Havre, Ros, from Java to Nantes, arrived off St. Nazaire 16th July, in tow of a steamer, which had assisted her off the Trois Pierres, near La Blanche, where she had gone ashore the previous day. Later accounts from St. Nazaire, dated 17th July, state that she had been towed into the basin there and was discharging. She was making much water, and had 1m. 33c. in her hold; the pumps were gaining very little on the leak; her rudder was also broken and unshipped.

The Henriette, of St. Malo, from Singapore to Bordeaux, was spoken on the 18th of May, in lat. 36 S., long. 17 E., with fore topgallant mast and jibboom sprung.

ASTOR HOUSE. SHANGHAI.

THIS PRIVATE HOTEL is admirably suited for Commercial Purposes. It is between the English and French Legations, and commands an entire view of the river.

It is especially recommended to

GENTLEMEN AND FAMILIES TRAVELLING,

For the comfort of the Table, elegance of Furniture, and Moderate Charges.

P. F. RICHARDS, PROPRIETOR.

CRICKETING OUTFITTER. JOHN LILLYWHITE.

(LATE LILLYWHITE AND SONS, AND LILLYWHITE, BROTHERS),

5, SETMOUR STREET, EUSTON SQUARE, LONDON, N.W.

THE largest wholesale Cricketing Outfitter in England. Every article connected with the game may be had. His celebrated Cane-handle Bat, manufactured expressly for foreign use; the handle warranted not to break. Batting and Wicket-keeping Gloves, Leg Guards (warranted), Boxing Gloves, Foot Balls, Quoits, Dumb Bells, and every article for British sports.

First-class goods only kept, and every article warranted. Export orders with immediate despatch.

Illustrated lists of prices post free. No connection with any other house.

BY SPECIAL APPOINTMENT TO H.R.H. PRINCE ALBERT.

ROBERT DARK, Sole Inventor and Original Manufacturer of the TUBULAR INDIA-RUBBER GLOVES, Improved LEG GUARDS, and WICKET-KEEPING GAUNTLETS, (vide "Bell's Life" and "Denison's Cricket Companion," 1844) which are warranted to be made of the best materials and workmanship; as are also his celebrated CRICKET BALLS. The above may be had of the Proprietors of Cricket Grounds; or of the respectable Shopkeepers and Fancy Warehouses that sell Cricketing articles in all towns in the United Kingdom; and of the Foreign Agents at Calcutta, Madras, Bombay, Quebec, New York, Adelaide, Sydney, Melbourne, &c., and may be ordered through Mr. George Holmes, Hong Kong.—N.B. The M. C. C. "Laws of Cricket."

DARK'S CRICKET BALLS.—The Prize Medal and honourable mention Class XXIX., No. 198, of the late Great Exhibition, has been awarded to ROBERT DARK for his Cricket Balls, Tubular India-Rubber Gloves, Leg-Guards, Gauntlets, &c. The lovers of this truly national game are respectfully informed that R. D. has manufactured several hundred dozens of Cricket Balls, from carefully selected materials, and of the best workmanship. He, therefore, feels confident that they will give perfect satisfaction in the cricket field, as they are the only balls used by the Marylebone Club for many years in all their Grand Matches at Lords, and now in play at Oxford, Cambridge, Eton, Harrow, and Winchester Colleges. A List of Prices forwarded.

ROBERT DARK, Tennis-court, Lord's Cricket Ground, Marylebone, London.

CRICKETING OUTFITTERS.

JOHN WISDEN AND CO.,

LATE F. LILLYWHITE AND WISDEN,

2, NEW COVENTRY STREET, LEICESTER SQUARE, LONDON, W.

EVERY article connected with Cricket may be had at this Establishment. Their large stock of **OLD AND WELL-SEASONED BATS** cannot be equalled, and they invite noblemen and gentlemen to inspect them. The wants of clubs, regiments, colleges, schools, &c., are particularly paid attention to, and their list of prices will convince officials that a great saving is effected by purchasing at their establishment, which contains articles, not only of their own manufacture, but of those who are acknowledged first-rate makers, and whose goods are selected by J. W. & Co., themselves, and therefore will be warranted. Models of L. & W.'s New Patent Catapults can be seen and worked at the above address.

Illustrated List of Prices forwarded Post Free. Export Orders with immediate despatch.

TESTIMONIAL RECEIVED BY

TUCKER AND SON,

MANUFACTURERS OF IMPROVED INDIAN LAMPS.

"Messrs. TUCKER & SON.

"Sir,—I have much pleasure in bearing my testimony to the excellence of the Lamps supplied by you to me when in India last year. They give a brilliant light, are not affected by the punkah, and are in every way suited to the Indian climate. In short, they are the best lamps I have seen in the country.

(Signed)

"A. Ross, Bengal Civil Service."

NOTICE TO PASSENGERS BY THE OVERLAND ROUTE via EGYPT.

PHILIP ZECH, Proprietor of the two well-known Hotels in Alexandria, the Hotel d'Europe, and the Peninsular and Oriental Hotel, begs to inform his friends, and Travellers in Egypt in general, that he has purchased **SHEPHERD'S HOTEL in CAIRO**, which will still continue, under the same name; and in returning thanks for the extensive patronage enjoyed by his two houses in Alexandria, hopes that the preference may likewise be extended to his house in Cairo, which will be managed in first-rate style, and in a manner intended to give every satisfaction to its frequenters, both as far as table, wines, internal and external service are concerned. Many alterations and ameliorations are being carried out at the present moment.

Curtis on Manhood.—New Edition.—A Medical Essay on Nervous Diseases.

Just published, the 120th thousand, with numerous plates in a sealed envelope, price half-a-dollar.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE, with plain directions for perfect restoration to health and vigour. By J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

CONTENTS:
INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhoea and Impotence; Early Vicious Indulgences; Dangers of Neglect.

CHAPTER III.—A Review of the various Disqualifications of Marriage—whether resulting from the Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection.

CHAPTER IV.—The Author's plan of Treatment, Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhoea and other Urinary discharges by microscopic examination.

CHAPTER V. and VI. on the modern Treatment of Gonorrhoea and Syphilis.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

"We feel no hesitation in saying, there is no number of society by whom the book will not be found useful—whether such person hold the relation of Parent, Preceptor, or Clergyman."—Sun.

Mr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by letter, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Mr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of twenty years; nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINNAM, QUEEN'S ROAD, HONG KONG.

ing on Cofferings or Needlework, 6s.; Best Style, 12s., Gothic and Modern Monograms Designed, 5s. Arms Quartered, Impaled, and Painted on Vellum, according to the laws of Heraldry. By T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

THE PEN SUPERSEDED.—Mark your

Linon. The best and only method of Marking Linon, Silk, Stockings, Coarse Towels, or Books, so as to prevent the Ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATES. By means of this novel invention a thousand pieces of linen can be marked in a few hours. Initials, 1s. each; Name, 2s. 6d. Set of Moveable Numbers, 2s. 6d.; Crest Plate, 5s., with the necessary directions for use. Post free. Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c.

"Several trials with Mr. Culleton's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters are beautifully marked in a deep black colour, without blotting, and after a long boiling, with either potash or soda, they remain unaltered. Other plates which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Culleton's Plates are incorrodible, and will not hurt the finest fabric.—(Signed) "SHERIDAN MUSPRATT,"

College of Chemistry, Liverpool.

"May, 15, 1854."

All orders to be sent to the Patentee and Sole Maker. T. CULLETON, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

HOLLOWAY'S OINTMENT AND PILLS.

—IN DISPUTABLE FACTS.—The merits of these remedies have been, and are acknowledged in both hemispheres, and few would presume to impugn the experience of the whole world. Testimonials from all parts vouch for their efficiency as curatives. The Ointment soon displays its virtues in overcoming abscesses swellings of the joints, enlargement of the glands, cutaneous eruptions, sores, ulcers, and in allaying inflammation and pain in rheumatism and gout. It heals by causing all animal fluids with which it comes in contact, and promotes a sound and permanent cure. It removes all obstructions to the free circulation through the minutest vessels, and repairs mischief by constantly securing pure blood. The Pills effect generally what the Ointment accomplishes locally.

PREPARATORY EDUCATION, BRIGHTON.

A LADY residing in a healthy locality of Brighton, receives a limited number of BOYS for EDUCATION, and offers superior advantages on moderate terms. Parents who reside abroad would find this a desirable home for their children from 3 to 11 years of age. Satisfactory references given. Address to "Alpha," at the office of this Paper, 337, Strand, London, W.C.

GEYELIN'S PATENTS.—HYGIENIC

SPRING LATHS BEDSTEADS, invaluable for invalids and hot climates; cannot possibly harbour vermin. Endless Power Brick and Socket Pipe Machines, Universal Gas Burners' Regulator, Magic Horse-Taming Nose-Pinchers; fit any bridle.

Agents (wholesale and retail): J. GRIGG, 47, Baker-street, W.; and W. H. KENNEDY, 462, Oxford-street, W.C.

MOREWOOD AND CO.,

PATENT GALVANISED TINNED IRON, GALVANISED IRON and TILES for ROOFING, &c. The best description for Iron Roofing is the well-known Patent Tiles, as they pack closely for Export, may be used in thinner gauges than Corrugated Iron, are more portable, and more easily laid by any ordinary workmen.

Price lists of all kinds of Galvanised Material, and estimates sent by return mail in reply to applications.

TO CAPTAINS, MERCHANTS, EMIGRANTS AND OTHERS.**TOZER'S PATENT PORTABLE**

KITCHEN.—It is adapted for Boiling, Steaming, &c., in which a dinner can be cooked for three or four persons. To small families, pic-nic parties, and to invalids in particular, its varied application will be duly appreciated. Officers at home or on a foreign station will find it a most desirable article. A prospectus with drawings and prices will be forwarded on application to THOMAS TOZER, Ironmonger and Manufacturer, 57, Dean-street, Soho, London; or may be obtained of Mr. GEORGE HOLMES, Hong Kong.

TWINBERROW'S DANDELION, CAMO-

MILE, and RHUBARB PILLS, an effectual cure of indigestion, all stomach complaints and liver affections. In cases of constipation these pills never fail in producing a healthy and permanent action of the bowels, so that in a short time aperients will not be required, and, being quite as innocent as castor oil, they may be given to children.

From Dr. Dick, Lansdown-terrace, Kensington.

"Sir.—Send me another bottle of your Dandelion, Camomile, and Rhubarb Pills for my own use. I lose no occasion of recommending these Pills, as I can conscientiously do so."

Prepared by TWINBERROW, Operating and Dispensing Chemist, 2, Edwards-street, Portman-square, London; and may be had of all Patent Medicine Vendors.

BLAIR'S GOUT and RHEUMATIC PILLS.

Price 1s. 14d. and 2s. 6d. per box.

This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century to demonstrate by unsolicited testimonials from persons speak of a cure for the Gout was considered a romance; but now the efficacy and safety of this medicine is so fully in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age.

These Pills require no restraint of diet or confinement during their use, and are certain to prevent the disease attacking any vital part.

Sold by all medicine vendors. Observe "Thomas Prout, 229, Strand, London," on the Government Stamp.

KEATING'S PERSIAN INSECT

DESTROYING POWDER.—This powder is quite harmless to Animal Life, but is unrivalled in destroying Fleas, Bugs, Beetles, Flies, Cockroaches, Beetles, Gnats, Mosquitoes, Moths in furs, and every other species of Insect in all stages of metamorphosis. It is perfectly harmless in its nature, and may be applied without any apprehension, as it has no qualities deleterious to animal life. Sold in packets, 1s., 2s. 6d., and 4s. 6d. each; or post-free for 14, or treble size for 36 postage-stamps, by THOMAS KEATING, Chemist, 79, St. Paul's Church-yard, London, E.C.

Take notice each genuine packet bears the above name and address.—See "The Field," Oct. 2nd and 9th, pp. 263, 283, and 294.

FREEZING WITHOUT ICE.

LEA and PERRINS' CELEBRATED**WORCESTERSHIRE SAUCE.**

PRONOUNCED BY CONNOISSEURS TO BE THE ONLY GOOD SAUCE, AND APPLICABLE TO EVERY VARIETY OF DISH.

EXTRACT of a LETTER from a MEDICAL GENTLEMAN, at Madras, to his Brother, at WORCESTER, May, 1851.

"Tell LEA and PERRINS that their Sauce is highly esteemed in India, and is, in my opinion, the most palatable as well as the most wholesome Sauce that is made."

EXTENSIVE FRAUDS.—Lea and Perrins having discovered that several of the Foreign Markets have been supplied with spurious imitations of their "Worcestershire Sauce," the labels of which closely resemble those of the genuine Sauce, and in one or more instances with the name of L. and P. forged, they have deemed it their duty to caution the public, and request purchasers to see that the names of Lea and Perrins are upon the Wrapper, Label, Stopper, and Bottle.

L. and P. further give notice that they will proceed against any one who may infringe upon their right, either by manufacturing or vending such imitations, and have instructed their correspondents in the various parts of the world to advise them of such infringements.

Wholesale and for Exportation by the Proprietors, Lea and Perrins, Worcester; Croxall and Blackwell, and other Oilmen and Merchants, London.

TO CHEMISTS, STATIONERS, AND CONFECTIONERS.—AGENTS WANTED.**PLUMBE'S GENUINE ARROW-ROOT**

should be used in preference to any other. It is greatly preferred by the most eminent Physicians in London for invalids, and as the best food for infants.

REPORT ON PLUMBE'S ARROW-ROOT, BY DR. HASSALL. "I have subjected Plumbe's Arrow-root to careful examination, microscopical and chemical. I find it to be perfectly genuine, and of superior quality; equal in all respects to the best Bermuda, for which so high a price is usually charged. (Signed) ARTHUR HILL HASSALL, M.D."

Directions and testimonials with each packet, which bears the signature of A. S. PLUMBE, 3, All-place.

Retailed in London by Snow, Paternoster-row; Ford, Islington; Morgan, Sloane-street; Williams and Lloyd, Moorgate-st.; Starling, Islington; Weatherley, Peckham.

JOHN GOSNELL AND CO.'S

PERFUMERY, PATRONISED BY

HER MAJESTY and the ROYAL FAMILY.

Among the celebrated articles for the Toilet prepared by J. G. and Co., the following are of the choicest kind, and universally admired:—

JOHN GOSNELL and Co.'s COURT PERFUMES.—Queen Victoria's Bouquet, The Bride's Bouquet, Jockey Club, Guard's Own, Ess Bouquet, Military, Royal Yacht Club, New Perfume—Extract of Flowers, Eugenie, Napoleon III., Frangipanni, Wood Violet, Opera Bouquet, &c.

JOHN GOSNELL and Co.'s FOUNTAIN PERFUMES for the BALL-ROOM.—A most elegant and useful invention, which cannot fail to be appreciated by the Ladies.

JOHN GOSNELL and Co.'s TREBLE DISTILLED LAVENDER WATER possesses in the highest degree the full fragrance of the flowers.

JOHN GOSNELL and Co.'s REAL OLD BROWN WINDSOR SOAP.—A Toilet Soap of the finest quality and very superior fragrance. It differs so widely in composition from the ordinary Alkaline Soaps, that its frequent use is highly beneficial in removing all harshness and redness of the skin.

JOHN GOSNELL and Co.'s MOELLINE, GOLDEN OIL, for the Hair.

JOHN GOSNELL and Co.'s INSTANTANEOUS HAIR DYE.—The only Hair Dye which produces a good natural colour with perfect certainty, and with the least possible trouble.

JOHN GOSNELL and Co.'s PATENT TRICHOSARON.—The obvious utility and improved construction of the Trichosaron Hair Brush adapt it for general use, and render it the most suitable Hair Brush for the Toilet. Sold by all Perfumers, Chemists, &c.

JOHN GOSNELL and Co.'s STEREOESMIC TOOTHBRUSHES, highly recommended by the most eminent Dentists.

JOHN GOSNELL and Co.'s ESSENCE of GINGER. Merchants and Shippers supplied on liberal terms.

12, THREE KINGS COURT, LOMBARD-STREET LONDON.

FALSIFICATION OF DIPLOMATIC DOCUMENTS.

Just ready, Price 6d.

THE AFFGHAN PAPERS.—REPORT and PETITION of the NEWCASTLE FOREIGN AFFAIRS ASSOCIATION.

"Those collections of State Papers which are supposed to furnish the best materials for history are often in reality one-sided compilations of garbled documents, counterfeits which the ministerial stamp forces into currency, defrauding a present generation, and handing down to posterity a chain of dangerous lies."—*Kaye's Afghanistan*.

London: EFFINGHAM WILSON, Royal Exchange.

To prevent disappointment, be sure to ask for Piesse and Lubin's Vermouth.

Agents will be found in every city where English is spoken.

ADDITIONAL PASSENGERS OUTWARD.

Per P. & O. Str., 20th August.—From Southampton to Hong Kong: Capt. J. H. Archer. From Alexandria for Hong Kong: Mr. J. F. Trautman. Per P. & O. Str., 4th Sept.—From Southampton to Hong Kong for China: Lieut. Pauli. Per P. & O. Str., 20th Sept.—From Southampton to Penang: Mr. A. Cree. Per P. & O. Str., 4th Nov.—From Southampton to Hong Kong: Mr. Murray. Per P. & O. Str., 20th Nov.—From Alexandria to Penang: Mr. and Mrs. C. J. Leveson.

THIRD CHINA WAR.

(FROM A SPECIAL CORRESPONDENT.)

HONG KONG, June 22, 1860.

DURING the fortnight that has elapsed since my last communication to you the subject which has engrossed the largest share of public attention has been the non-arrival of the steamer with the mails from England of the 20th and 26th of April: along with which, by telegraph from Aden, it was known that Lord Elgin and Baron Gros were on their way to China. All doubt, however, about the fate of the missing steamer was removed yesterday morning by the arrival of the *Pekin*, bringing the mails of 4th and 10th May, and the passengers by the ill-fated *Malabar*, wrecked in Galle harbour; Lord Elgin and Baron Gros were amongst the passengers, and the fact was speedily announced by two salutes of 19 guns each, which were fired from the flag-ship of Admiral Le Page, commanding the French fleet in China. There was no English man of war, with complement of guns warranting her to salute, at the time lying in the harbour, Sir Robert McClure having sent the *Esk* round to aid in saving stores from the wreck of the *Assistance*. In the meantime Sir Robert is discharging the duties of senior naval officer on board the receiving and military hospital ship *Princess Charlotte*; in former days the flag-ship of Sir Robert Stopford at the storming of Acre, now destined to spend the evening of her days in peaceful retirement in the waters of Hong Kong; she is also remarkable as the first and only three-decker that has ever rounded the Cape of Good Hope. Her two lower decks are given up to the military authorities as hospital accommodation; the remainder of the vessel is occupied in one way or other by stores and officers belonging to the Royal Navy. The *Hercules* is another line-of-battle ship at present employed in Hong Kong harbour as a hospital.

Immediately on Lord Elgin's arrival being communicated to the authorities, the following appeared in orders:—

GARRISON MORNING ORDER.

HONG KONG, 21st June, 1860.

The mail steamer having arrived this morning with H.B. Majesty's Plenipotentiary for China, the Right Honourable the Earl of Elgin and Kincardine, the following disposition of the troops will be made on his landing:—

A Guard of Honour of 100 men, under a captain, with a due proportion of officers and non-commissioned officers, will be furnished by the Provisional Battalion, and will take post at Government House.

The Grenadier Company (21st Regiment Madras Native Infantry), with band and regimental colours, will form a guard of honour at the Parade Wharf—night resting near the sea.

The remainder of the 21st Madras Native Infantry will form a street on the road from the left of the Grenadier Company towards Government House.

The Royal Artillery will be prepared to fire two salutes of nineteen guns on the Plenipotentiary landing, in honour of the Ambassadors of England and France respectively, by battericoles to be in readiness.

The troops will parade in full dress, and will be held in readiness to march down at the hour which will be communicated to them hereafter.

The parade, as directed in this order, took place about noon, and before the arrangements were well completed his lordship landed and proceeded direct to Government House, where he now resides. The steamer *Feroze*, of the Indian navy, is lying in the harbour, ready to convey his lordship and suite to Shanghai, and thence to the scene of active operations. Mr. Boulby (the Special Correspondent of the *Times*) proceeds to the North in the *Feroze*—according to the present arrangements she is to sail to-morrow afternoon, at four o'clock.

The whole of the expeditionary force, with the exception of the *Melbourne* hospital ship, some store, horse, and cavalry transports, have left Hong Kong for the rendezvous in Talaenwan Bay, in the Gulf of Petcheli. Friday, the 8th inst., was a day of great activity in the harbour, columns of smoke rising in every direction, and at brief intervals steamers were seen leaving the anchorage for the north, generally with two transports and a gun-boat in tow. Amongst the vessels which left that day were—H. M. ships *Fury*, with the artillery transports *Rajah of Eveline* and *Euxine*, in tow. The *Mauritius* (hospital steam ship), with the artillery transports *British Flag* and *Tuleika* in tow; also the *Banterer*, gun-boat. The *Sir William Peel*, hospital steamer, also sailed the same day for Saiwan Bay, on the south side of the island, to take in tow two cavalry transports and a gun-boat. On the afternoon of the 7th the *Trimountanis*, transport, arrived from Madras with 63 men and horses of the King's Dragoon Guards, accompanied by 106 followers (natives). The troopers were divested of all their gay trappings, and were dressed in American drill (Karkee clothing), with wicker-work helmets covered with wadded calico, and a puggery (roll of light calico) round it. They were all armed with breach-loading carbines, and seemed a body of men that would do formidable mischief should the Tartar horse afford them an opportunity of crossing swords.

In all 29 transports sailed on the 8th June for Talienwan Bay. On the 9th the transport *Winnifred*, with 550 of the Chinese coolie corps, under the supervision of 140 men of the 2nd and 44th regiments, sailed for the north. The following officers accompanied the detachment:—Major Preston, 44th regiment; Captain Chalmers, 2nd Royals; Lieut. Parry, Chinese Coolie Corps; and Assistant-Surgeon Curson, 2nd Royals. The same day Admiral Hope left for the north in the *Inflexible* steamer, and on the 10th Sir Hope Grant and staff, including the heads of the medical and commissariat departments, sailed for Shanghai en route to the final rendezvous. On the 9th Sir Robert McClure assumed the duties of senior naval officer in Southern China, and on the 12th the *Chesapeake*, the flag ship of Admiral Hope, sailed for the north, leaving the *Esk* and some gunboats, the only vessels of war in harbour, the latter being left, owing to troubles being expected from pirates in the Canton river and islands in the neighbourhood. Fifteen gunboats now remain in South China waters. The garrison of Canton has been lately strengthened by the arrival of upwards of 1,000 French marines, making with marine artillery and mounted police over 1,500 men in Canton. On the 16th inst., the Regiment of Loodianah embarked from Cowloon in the steamer *Senobia*, and sailing transport *Iskandershan*. The *Cowloon Peninsula*, which is hired from the Chinese Government at a yearly rental of 500 taels of silver, equal to about £170 sterling, is now garrisoned by 150 men of the 21st Madras Native Infantry, and operations have already commenced for the construction of permanent huts for a European force, on the completion of which a portion of the Provisional Battalion will be detached there from Hong Kong. Though at present her Majesty's forces are the tenants of the Chinese Government, it

is generally supposed that the permanent cession of the *Cowloon Peninsula* will be one of the stipulations of the new treaty. It is a much healthier locality for the troops during the hot season than the town of Victoria, owing to its being exposed to the full influence of the south-west monsoon, while the latter is completely sheltered from it by the lofty amphitheatre of hills at its immediate back.

In my next I hope to be able to furnish you with some details from the scene of active operations in the north, culled from personal observation.

JAPAN.

Dates from Yedo and Nagasaki to the end of May have been received at Shanghai, but nothing in the shape of news has been published. From a correspondent we hear that business was improving, and the Government and people more quiet.

CHINA.

SHANGHAI.

The London mails of 26th of April (wrecked at Galle), were anxiously looked for.

Sir Hope Grant and Admiral Hope arrived here on the 16th of June, and were to leave for the Gulf of Pechalee on the 18th.

Nearly all the Allied forces, naval and military, have proceeded northwards from Chusan, and several French men-of-war have left this port with the same destination, there are thirteen still remaining here, and five British. Only three of H.M.'s ships and three companies of the 99th were at Chusan on the 11th, with two French ships.

TAKING OF SOOCHOW BY THE REBELS.

The *North China Herald* reports this event:—

The reports received since last mail place beyond a doubt the fall of Soochow. Rebel reinforcements, advancing, apparently in no great number, from the south, had raised the siege of Nanking towards the end of May. The Imperialist soldiery or militia, who, it is alleged, had been unpaid for some months, flung away their arms and retreated in disorder upon various cities along the canal in their rear; these they sacked. The authorities, dismayed, it is supposed, at the collisions between these deserters and the people whom they were pillaging, fled. At Soochow the struggle was most serious, and ended in the murder of the Governor of the province, as well as several others of official rank, and in the destruction of the wealthy suburbs of that city, with untold loss of life and property, the city itself was believed to be in the hands of these marauders, no longer amenable to the control of any one, on the 1st June, and to have been occupied by rebels from Nanking on the 3rd inst. The Governor-General Ho Kwei-tsing has taken refuge, with other high officials, at Shanghai. He has been in communication with the ministers of the treaty powers. It is reported that he entreated the British and French to send a force to retake Soochow and hold it for the Imperial Government, engaging, on his part, to urge the Emperor to accede to all our demands.

The case of Kinkce versus Beale is to be reported in the *North China Herald* for next mail.

NINGPO.

A correspondent, dating 25th May, writes:—

This place is perfectly quiet, though the natives are well aware that the allied forces are at this moment proceeding north for the purpose of compelling by force of arms, if need be, the ratification and exchange of the treaties.

Those who fled from the city, in consequence of the terror inspired by the taking of Hangchow by the rebels, have for the most part returned. The rebels seem to have had no object in view but plunder. After having slaughtered many thousands, "several tens of thousands," the Chinese say; causing multitudes of others to commit suicide; taking all the money and valuable property they could find; burning a large part of the city; and destroying temples and idols, the rabble hast departed with their booty, leaving behind them the threat to soon return again. This threat still keeps the city in suspense, and multitudes who had fled on the approach of the rebels, dare not return and resume their business.

The taking of Chusan by the English and French created a little excitement at Ningpo at one time, though it was nothing compared with that produced by the irruption of the rebels into the province.

Pirates are still numerous on the coast. A lorch, owned by an American at Ningpo, which was engaged in conveying, was

recently taken by pirates, and all on board, including three or four foreigners were put to death. The small opium vessels plying between Shanghai and Ningpo, have been attacked two or three times recently. One was attacked about two o'clock at night by two pirate boats, which had on board several passengers, including my wife. They were, however, happily driven off.

FOO-CHOW-FOO.

There are rumours of rebels in the neighbourhood, and that the Governor of the Province has asked to be relieved. The business in imports and exports on foreign account has not been interrupted, nor is any real alarm felt by the residents.

AMOY.]

Business at this port continues uninterrupted, and provided the Allies are successful at the Pehio, there will be no change in our relations with the Chinese at this place.

On the 28th of May, about noon, a firework manufactory blew up, killing seven persons, women and children. The fire communicated with some other houses, and about sixty were destroyed before it was got under. The fire-engines belonging to the foreign residents, and two good ones belonging to enterprising Chinese, did good service, as did also some men from the merchant vessels, Europeans and natives, headed by their respective captains. Some of the foreign community also worked hard, and assisted mainly to extinguish the fire.

Rumours of rebels being in the vicinity of this were current some little time ago, but we have latterly heard less of them; and if there was any truth in the report that they were a short time back in or near the Ankoï tea districts, they have probably gone south.

SWATOW.

The British Consul for this port, Mr. G. W. Caine, has been ordered to open the Consulate. This step has been taken in order to check the continued atrocities connected with the coolie trade.

HONG KONG.

The London mails of the 10th May and the saved portion of of the 26th April—the latter wrecked at Galle—arrived here on the 21st June, with Lord Elgin and Baron Gros, who proceeded at once to Shanghai.

The case of Caldwell *versus* Murrow has had a preliminary ventilation, but is postponed until next sessions. Mr. Murrow was obliged to defend himself, not being able to secure the services of a barrister, and it is intimated that two good barristers would find good employment in Hong Kong.

The screw steamer *Fungui*, to be called the *Fei Soong*, or Flying Dragon, arrived on the 10th of June from Glasgow, *via* Singapore, without any accident to spars or machinery, and is described as a most able craft.

The *China Chronicle*, under the editorship of Mr. M. MacLeod, has ceased, and the *Hong Kong Register* has been revived by its proprietor, Mr. R. Strachan.

Mr. Tarrant, the editor of the *Friend of China*, remains in jail. Security for the amount of costs is still refused, and it is believed that Mr. Tarrant waits the result of his appeal to the Queen in Council. The indignities which he has to submit to can be learned from the following letter addressed to the Chief Justice:—

"The colonial surgeon has recommended that I have more facility for open air exercise, but his recommendations are unheeded. Last week, so great was the heat when the sun struck on the part of the building appropriated to me that though I have a quarter of a century's acclimatization in the east, I thought I should have gone crazy. Yesterday after being in a fever all the day previous, I was attacked with something very like cholera, from which I am still suffering. As I write, the thermometer in the shade, with the door open, stands at 84 Fahrenheit, and what it will be when I am locked up in an hour's time I can only anticipate."

It is said that Dr. Bridges informed Mr. Tarrant's attorney that he would forego his costs if he would leave the colony, to which Mr. Tarrant replied that he would pay the costs and drop the appeal if Dr. Bridges would leave.

CANTON.

The *Register* says:—From Canton we have dates to 22nd June. Everything is quiet, but in uneasy suspense. The rebel movement has exhibited one of its fitful awakenings, resulting in the total defeat of the Imperialist forces, and the usual two days' panic occasioned by the expectation of a decided advance towards Canton. But, as has ever been the case, success in one direction is followed by long and purposeless inaction, so that the rebellion in the south can neither be said to advance nor recede.

The work upon the new foreign factory site, for a time im-

peded by the ingress of water into the canal (the coffer dam at the head having given way), is now actively resumed, and already the magnitude of the design is manifest. It will form one of the most airy, complete, and beautiful localities in the East, while the arrangements for protection against violence or fire are perfect. Few of the houses destroyed in the last bombardment have as yet been rebuilt, and wide areas of ruins are everywhere visible. The coolie emigration houses are all closed. At Whampoa there is little or nothing doing, except in the numerous dock-yards, all of which find employment.

PHILIPPINES.

MANILA.

Three vessels have arrived from England with gun-boats.

There is very little news to give you from hence. There has been a good deal of sickness here, and several sudden deaths. The state of the weather here indicates that there must have been a terrible blow somewhere, perhaps one of those periodical gales, to the northward.

The best part of the picturesque, rich, and populous town of Passig here has been burnt down not only; huts, but fine stone edifices, well furnished withal, have been utterly destroyed. The value of the property lost must be considerable.

COCHIN CHINA.

SAIGON.

No further intelligence has been received from this place, in confirmation or otherwise of the report which appeared in our last. The necessity of appointing a British Consul there has been suggested.

BORNEO.

From Sarawak we learn that Sheriff Mustapha, who was the leader of the last attempts on the lives of Europeans there, has gone into the Kayan country. Captain Brooke had decided on securing the head of this disturber of the peace, and as the Dyaks are at present in a friendly mood, it is expected that this will soon be effected.

The accounts from Banjer-massing, which are to the 12th May, do not show much progress in putting down the insurrection. Several encounters had taken place between detachments of troops sent out in different directions and parties of the enemy, which generally ended in the latter being put to flight, but the detachments in most instances ultimately fell back upon their entrenched posts, being too numerically weak to occupy the ground gained.

From Labuan there is nothing of interest to notice. A report had been circulated in Bruni that the Europeans intended to invade the country. Mr. Low, the Governor of Labuan, had gone to Bruni for the purpose of contradicting this report.

JAVA.

The merchants of Sourabaya have decided to erect a first-class floating dock at that port. On the completion of this undertaking, Sourabaya will offer greater facilities for the repairing of sailing vessels and refitting of steamers than any port in the East.

In addition to the large foundries and engineering establishments belonging to the Dutch Government, at which work for private parties may be done by permission of the authorities, there is a private foundry and engineering establishment, provided with first-rate tools and machines. This establishment has been in existence upwards of twenty years, and now employs several hundred workmen. Re-boring of cylinders and similar heavy repairs of steam machinery can be done as well as in Europe. Within the last few months the cylinders of the *Konigen der Nederlanden* have been re-bored, and the steam engines entirely re-fitted. The steamer *Oenarany*, formerly the *Lady Mary Wood*, belonging to the P. and O. Company, has just been provided with new steam boilers, made entirely at Sourabaya.

The new dock will be of sufficient size to admit not only the largest merchant vessels, but also the largest war steamers likely to find their way to the east. It will be capable of taking in vessels of 300 feet long, and drawing 20 feet water. It will lift a ship or steamer of 2,500 tons, with all her cargo and machinery on board. The pumping machinery will be worked by two steam engines sufficiently powerful to admit of vessels being docked, examined, and undocked in the course of a few hours. Mr. R. W. Thomson, Civil Engineer, proceeding to England, has been commissioned to contract for the dock in Europe. It will be constructed exclusively of iron. After being put together in Europe, it will be taken apart and shipped in pieces. It is estimated that it will be ready for use in October, 1861, and cost 300,000 rupees.

MALACCA STRAITS.

SINGAPORE.

The London mails of the 26th of May arrived here on the 29th June.

The Dutch steamer *Mucassar* (carrying the 10th of May

mails, hence to Batavia), having put back leaky, her mails were forwarded by the steamer *Shandon*, hired for the purpose.

The telegraph hence to Mintok was successfully repaired on the 19th of June, but on the following day a fresh rupture was found to have taken place between Mintok and Batavia.

The preparation of the temporary barracks for the European troops is being pushed on as fast as possible, and as they seem to be made of a good height, we have no doubt they will be found comfortable enough during the present hot weather.

Lord Elgin having very properly decided that the Sikh troops are to proceed on to China, they have ceased to supply guards to the convict gaol and other places where they were lately doing duty.

The following is an account of the *Hooghly's* movements on her last passage from this port to Pinang:—

On the 25th ultimo at eight o'clock, whilst proceeding towards Pinang, observed a small prahu pulling towards Pulo Brino, and accordingly steered for it; the Nakodah said he was from Battoo, but had no pass of any description; on search being made, the following arms were discovered:—1 spear, 6 new spear heads, 2 powder pouches, 1 large powder horn full of powder, 3 muskets, loaded; 2 blunderbusses, one being loaded, 3 krisses, 4 knives, 3 swords, and \$14 in cash, with a small quantity of birds' nests. They withdrew the charge from the blunderbusses, and found 5 tin bullets in it,—the Nakodah stated there were only three. The prahu started from it, Laddong, near Assulang, with seven men, but no cargo on board; the Nakodah said he first proceeded to Lingy River and from thence to Malacca; he afterwards returned to Lingy in search of his son, who had left that place; after which he sailed along the coast, and was then en route to Pinang. He acknowledged afterwards that his son was Jamedar Allum, at Pinang.

After the *Hooghly's* arrival at Pinang, she was despatched to the Pirate River; on the 23d ultimo, she left Pulo Krah; and having picked up the gun-boat, she steamed for her destination, where she arrived on the morning of the 30th; they then towed the gun-boat up the river as far as she was able (about 40 miles), and returned the same day to the Dinding, where she cruised amongst the island groups.

The Ambassadors of France and England to China, Baron Gros and the Earl of Elgin, arrived by the *Pekin*, and proceeded on their voyage to Hong Kong on the 14th June.

H.M.I.N. Steamer *Victoria* left this on the 5th June, bound to Acheen, having on board Captain Burn, secretary and aide-de-camp to the honourable the Governor. We have not heard the precise object of Captain Burn's mission. Captain Borradaile will act as secretary, &c., during Captain Burn's absence.

If I have not written lately, the reason is that I had only to chronicle the arrival of transports, with which you were already furnished by the local papers. The incidents connected with them consisted in the astonishment of the native population at the appearance of a vivandiere, and the readiness expressed by our gallant allies to thrash any given number of the Chinese animals, such as crowd our streets.

The French and English have departed, and the Russians have now appeared on the scene, and continental folks tell us that there is a large force of them on the way. You should be better informed as to this than we can be; only, if it is true, it is significant.

Just at present, we of the Straits Settlements are between two stools. The Colonial-office not having taken us over, the Bengal Government will do nothing; and where the one can't and the other won't, we are in danger of all kinds of evil, both inward and external.

Our fortifications are nearly finished, and, as I said before, guns, ammunition, and men are all that is required. We have had, however, an addition to our garrison, in the shape of a regiment of Punjaubees, who appear to be fine, good-natured, and dirty fellows. There is a talk of an European regiment being quartered here also, and the Engineers are busy preparing quarters for them. A large piece of ground has been bought about 2½ miles from town, for \$25,000, and it is now being cleared as fast as fire and axe can do it, and barracks are then to be run up for temporary use, pending the building of the more substantial and ornamental dwellings.

The Punjaubees will eventually be located at about two miles to the northward of the town, so as to divide the force as much as possible.

The news from Java is not of any importance. They are still fighting at Banjermassin, and are likely to have some trouble before the insurgents are finally disposed of.

From Sarawak the accounts are satisfactory, and matters are progressing as well as can be desired. The Borneo Company were raising large quantities of antimony ore, which tended to increase the revenue, and there is now some talk of obtaining gambas and pepper planted from this, in order to try that cultivation in that part of Borneo. Had this been done a long time since, or when the company first started, it would have proved very profitable to it.

COMMERCIAL REPORT.

The mails from China delivered this morning bring us advices from Shanghai to the 16th June, Hong Kong 23rd, and Singapore 3rd July.

In consequence of the rebellion and preparations for war, business at all ports in China was very much restricted.

EXPORTS.

TEA.—We have to confirm our last remarks as to the new crop finding its way to the various ports. At Foo-chow the opening of the market was announced; prices since then have fallen two taels for some descriptions. The settlements of new Congous since the market opened are reported as under:—40,000 chests and 13,300 half ditto at 11 to 12 taels for dusty and common, 15 to 20 taels for common to mixed leaf, 20 to 23½ taels for middling to flavoury, 22½ to 25 taels for Souchong kinds, 24 to 27 taels for second class Kysow, and 29 to 33½ taels for first-class do. In addition to these there have been 20,000 chests contract teas, and 2,000 to 3,000 chests shipped on Chinese account. The total quantity arrived is from 90,000 to 100,000 pkgs., whereof one-third are upon the market unsold. Three clippers have been despatched for London with new teas, two more are loading. To the United States the *Bene-factor*, loading on owner's account, is the only vessel on. Amoy: the total arrivals of new tea up to date were, 14,100 half-chests Orange Pekoe, for which \$17 were asked; 4,000 half-chests Congous, \$18 to \$20; and 2,400 half-chests Oolongs, \$25 to \$28; total, 20,500 half-chests, of which 9,000 were contract teas, and mostly inferior. The Oolongs were said to be badly manufactured, but fully better tea than last year. Congous were fair in quality. No ships for tea were on the berth but some shipments had been made to Fuchau. Canton: the new Oonams and Oopaks are expected in about a couple of weeks. The Tayshan Congous prove inferior in leaf to last season's yield, but quite equal in liquor. The following are the settlements reported; 1 chop old Oopack, at 32½ taels; 8,000 half-chop Tayshan Congous, 10½ to 22 for old, and 24 to 27½ new. Scented teas: 14,000 boxes Orange Pekoe, 24 to 40 taels; 24,000 boxes Caper 15 to 30 taels. The *Southern Cross* and *Griffin* have both proceeded to Macao to fill up for London, their cargoes consisted chiefly of Tayshan, Congous and scented teas. Shanghai.—Black: The settlements of the fortnight are reported at 300 chests flowery pekoe at 30 taels, 600 chests Ningchow Congou at 24 taels, and 400 chests very common ditto at 14 taels, the whole being Shanghai packed. These settlements appear to have swept the market. Regarding the new congous, however, there was more probability of their coming to hand than was generally supposed before the late Imperial disasters disorganised the government of the province; for it seems that one chop of Hoochow leaf had been settled by muster, price kept secret. As matters now stand all communication with the interior is destroyed, and it is of course simple guess-work to prognosticate when they will be restored. Greens: The transactions of the fortnight are restricted to 300 packages, the stock unsold being 2,500 packages China, and 7,000 Japan. There being no market it is useless giving quotations.

RAW SILK.—Shanghai.—The settlements of the fortnight have been about 500 bales, mostly Japan silk, making the total settlements for the season 66,500 bales, or 15,000 bales less than at corresponding period last season. Some musters of the new crop were exposed, and no doubt a few hundred bales will be shipped off next mail. The yield is good, but the transit dues and expense of carriage will be excessive, and will naturally check supplies. How far the anarchy prevailing will cause the destruction of the article, or stop its culture, is entirely a matter of conjecture. Cocoons have been hurried down to Shanghai in quantity, where they are being reeled under the superintendence of foreigners. If any contracts have been made for new silk they have been kept very secret. The transactions of the fortnight have been at such irregular rates, owing to the panic, that quotations cannot be given. The probability is that the silk men will obtain their own terms as the new silk arrives. Canton.—There is some excitement in the market. Contracts were made for first crop silk for shipment to London, which there is some difficulty in obtaining delivery of. The second crop is now coming to market, the yield of which is said to be large, but the quality is inferior. Settlements since last mail are reported at 300 piculs for the London

market, namely, Cumchook, No. 1, \$400, reeved \$420 to \$425. Loonkong, \$440 to \$445. Cowkong, \$395 to \$400.

DRUGS, &c.—The Albatross and Falcon are loading drugs for London; there is no vessel announced for the Continent; the *Prinz Regent* has sailed for that quarter. Canton: Cassia Ligna, no sales are reported; the rate quoted is \$18 to \$18.50; the stock being reduced to 500 piculs. Cassia Buds: \$36 to \$37; no sale. Cassia Oil, \$325 to \$353; no sales. Star Anniseed appears to be all directed to Macao, where it falls into one hand. At Canton it is scarce, and wanted at \$18 to \$18.50 per picul. Anise Oil, no stock, no sales. (At Macao the article can be had at \$180 per picul.) Rhubarb, 100 piculs indifferent quality is on the market, for which about \$40 per picul is asked. Matting: large contracts have been made for the United States. The quotations are—white, 11 cents., 12½ cents., and 15 to 16 cents.; red check, 12½ cents., 15 cents., and 17½ cents.; for best quality, four, five, and six quarter respectively. Vermillion, \$40 per box. Fire Crackers: contracts have been made to the extent of 100,000 boxes, at 80 to 85 cents. per box. At Shanghai.—Wool: No sales reported, 400 piculs are on the market, at eight taels five mace, short price. Rhubarb can be had at 40 taels for the best.

At MANILA: the *Julian de Unzueta*, from Liverpool, and the *Primera de Santander* and *Matilde*, from the same port, have arrived. The *Reina del Oceano* also, via Batavia. There is very little alteration to note in prices of produce, which are likely to be maintained higher than anticipated in consequence of a decline in freights counter-balancing the advance in exchange. Dealers refuse to sell current clayed sugar under \$5.50 per picul, and even at that price do not seem desirous to press sales, which have been made to a very moderate extent, shippers generally offering lower rates.

SINGAPORE.—The market for European imports generally has been quiet during the past fortnight; but considerable clearances have been made in grey manufactured goods, and mostly at rates previously ruling. The continued absence of supplies of exports suitable for Europe and the United States has restricted operations, and tended to sustain the high rates prevailing.

IMPORTS.

The state of the markets is generally unsatisfactory. The Shanghai market for imports is totally destroyed, and very heavy stocks are held by importers. Quotations for that market are out of the question. At the other ports very little business has been done, and stocks generally are heavy. The deliveries or sales of the fortnight are given for each port separately.

SHANGHAI.—Deliveries, 11,000 pieces gray shirting, 550 pieces white ditto, 3,520 pieces T. cloths, 2,000 pieces spotted shirtings, 1,450 pieces brocade, and 600 pieces American drills.

CANTON.—Sales 133 bales yarn, 7,000 pieces grey shirtings, 1,250 pieces white shirtings, 1,550 pieces damasks, 4,200 pieces American drills, 1,000 pieces American jeans, 1,500 pieces long ells, 90 pieces camlets, 150 piculs betel nut, 400 piculs lead, 60 flasks quicksilver, 840 piculs nail rod iron, 700 piculs hoop iron, and 76 tubs steel.

HONG KONG.—The sales have been chiefly damaged goods at auction, and are reported at 500 bales yarn, 15,000 pieces grey shirtings, 15,000 pieces T-cloths, 18,000 pieces American drills, and 600 pieces lastings. Rattans are scarce and wanted. Stock of iron excessive.

Sales of the fortnight at Foo-chow. 6,500 pieces grey shirtings at \$2.55 to \$3, 1,200 pieces white ditto at \$2.90 to \$3.15, 250 pieces dyed ditto at \$3.40, 1,600 pieces T-cloths at \$1.65, 2,000 pieces lead at \$8 to \$8.50.

SHIPPING INTELLIGENCE.

ARRIVED.

At NAGASAKI.—From Liverpool: May 16, British Empire.

At SHANGHAI.—From London: June 1, Jubilee, Challenger: 13, Salacia, Neville, Sunbeam, Milbrook. From Liverpool: 5, Rance; 13, Helen Ewing, Charmer, Bacchante. From Boston: 13, Magenta. From New York: 5, Competition.

At HONG KONG, MACAO, and CANTON: From London: June 18, Pioneer; 22, Sea Serpent. From Liverpool: 11, Derwent. From England: 5, Melbourne, steamer; 7, Khersonese, steamer. From Newcastle: 10, Empress; 15, Norna. From Plymouth: 15, Bankside. From Shields: 8, Earl of Windsor. From Sunderland: 8, Veturia. From Shields.—9, Glencoe; 17, Annie Lee. From Portsmouth: 10, H.M.'s gunboat Sparrowhawk. From Glasgow: 10, Panqui, steamer. From Newport: 15, Cornelius Houtman. From Swansea: 10, Boneto. From Cardiff: 5, Salem, Bertha; 10, C. J. Borgstede; 15, C. C. Fowler. From New York: 9, Seaman's Bride.

At SINGAPORE.—From Liverpool: June 24, Falk; 28, Conference. From Newcastle: July 1, Graces.

SAILED.

From KANAGAWA.—For London: May 7, Troas; 17, Georgiana.

From SHANGHAI.—For New York: May 2, Union.

From Foo-Chow-Foo.—For London: June 7, Ellen Rodger, Ziba; 9, Falcon.

From HONG KONG, MACAO, and CANTON.—For London: June 8, Mercedes. For Cowes: 10, Richard. For New York: 12, Waverley.

From MANILA.—For Cork: June 7, Casaa. For Boston: 8, Reliance; 13, Indiaman.

From SINGAPORE.—For London: June 18, Napoleon III., Jane Gray; 30, John and Isabella. For Liverpool: 27, Joshua Waddington; 30, Tigris, For Boston: 18, Hollander.

LOADING.

At SHANGHAI.—For London: Jubilee, Ukko.

At Foo-Chow-Foo.—For London: Julia. For New York: Benefactor.

At HONG KONG, MACAO, and CANTON.—For London: Griffin, Southern Cross. For New York: Judge Shaw. For Havana: J. Wakefield, Live Yankee, Santa Lucia. For San Francisco: Creole, Oracle.

At MANILA.—For London: Amoor, Ethereal. For Liverpool: Cervantes, Idas. For Cork: Parisian, P. de Santanda. For New York: E. P. Stringer. For Boston: Romance of the Sea. For Melbourne: Madras, Miletus. For Havana: Emigrante. For San Francisco: George Lee, Helen, W. Almy, Tuisco.

At SINGAPORE.—For London: Gala, Prince Alfred, Reward, William Stewart. For Liverpool: Versailles. For Falmouth: Imina Brons. For Boston: Borneo. For New York: Keystone, St. Louis.

FREIGHTS AND CHARTERS.

At SHANGHAI.—For London £4 tea, and £6 for silk. The demand for tonnage for commerce is quite destroyed, owing to the suspension of trade, but a good business has been done in removing the property of the Chinese at advanced rates. The Ukko has been chartered to London at £4 10s.

The *Jubilee* is laid on at £4 for teas and £0 for silks. The *Agra* has been chartered by the French at 21s. per ton.

At *Poo-Cow-Foo*.—For London £5 10s. For United States \$10. The *Cyclone* and *Julia* are loading it the above rate for Loudon, and the *Benefactor* for United States.

At *HONG KONG, MACAO, and CANTON*.—For London £3. For United States \$10. To San Francisco \$21 nett for passengers, and \$6 freight. There is less demand for tonnage, as the wants of Government have been supplied, and rice has fallen; but a good business has been done. The *Mauritius* has been chartered to London at £3, and the *Cornilia* at £3 10s. The *James Shepherd*, to Australia, at £3 15s.

At *MANILA*.—For London £3 2s 6d to £3 15s. For New York \$8 to \$9. The *Amoor* has been laid on for London, at the above rates, the first for unclayed sugar, and the latter hemp. The *Romance of the Sea* for Boston, and E. P. Stringer for New York, at \$8 for sugar, and \$9. for hemp.

At *SINGAPORE*.—For London £2 10s. to £3 for dead and light weights respectively.

CASUALTIES.

Hong Kong.—The French transport *La Reine des Clipper*s, has been completely consumed by fire, and nothing has been saved. No lives lost.

No hopes are now entertained of saving the transport *Assistance*. The stench from the rice (for the Coolie corps) rotting in the hold, became so intolerable that divers could no longer work at her.

The *Sea Serpent*, from London to Hong Kong, struck on a coral reef on the 29th December, and made much water, obliged to put into Rio Janiero with six feet water in hold. After which, was detained one month for want of a crew, in consequence of the yellow fever which prevailed to a great extent.

EXPORTS FROM MANILA.

Per *Reliance*, for Boston: Hemp, 3,844 piculs; sugar, 5,900 piculs; Sapanwood, 300; cigars, 587 piculs.

Per *Indiaman* for Boston: Coffee, 3,660 piculs; hemp, 320 piculs; cigars, 1,044 piculs; rice, 6,009 cases.

EXPORTS FROM SINGAPORE.

Per *Hollander*, to Boston: 865 bales gambier, 1,516 piculs; 719 bags black pepper, 510 piculs; 200 boxes pearl sago, 20 piculs; 16 bags cubebs, 8 piculs; 23,939 bundles rattans, 996 pieces sapanwood, 15 piculs.

Per *Napoleon III.*, to London from Sarawak: 1,037 boxes, 350 bags pearl sago, 1,432 piculs; 510 bags sago flour, 519 piculs; Antimony ore, 400 tons. From Singapore: 4,045 bags black pepper, 2,984 piculs; 534 white, ditto, 548 piculs; 3,700 blocks. 65 baskets, 1 bundle gutta percha, 440 piculs; 278 baskets, 49 bags India rubber, 534 piculs; 34 bags coffee, 30 piculs; 4,025 buffalo hides, 905 piculs; 310 cow hides, 32 piculs; 6,645 buffalo horns, 139 piculs; 64 bags cubebs, 30 piculs; 1 box, 1 bag tapioca, 2 piculs; 10,875 bundles rattans, 550 piculs; 4,571 pieces sapanwood, 578 piculs; 1 case cigars, 1 case personal effects, 324 boxes tea, 2 pieces wood, 5 boxes containing sundries, 1 box containing a clock, 1 gun barrel.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BENNETT—On the 18th May, at Singapore, Mrs. John Bennett, of a son.

CAMPBELL—On the 18th June, at Leonie Hill, Singapore, Mrs. T. H. Campbell, of a daughter.

GAMMELL—On the 26th June, at the residence of Mr. A. B. Gomes, "Sunnyside," the wife of Mr. J. H. Gammell, of a son.

HILL—On the 1st June, at sea, on board the *barque Stree Rajah Rajasworee*, the wife of Captain James George Hill, of a daughter.

MARRIAGES.

POWELL-FERNANDEZ.—On the 18th June, at Singapore, at St. Andrew's Church, by the Rev. A. D. Nicholson, Mr. C. D. Powell to Mrs. Floripa Fernandez.

TALBOT-ROBERTS.—On the 19th June, at St. John's Cathedral, Victoria, by the Rev. Mr. Beach, Henry Eustace Talbot, of Whampoa, to Emily Grace, second daughter of John Roberts, senior, late of Singapore.

DECIES-DENT.—On the 31st ult., by special licence, at Shortflatt Tower, by the Rev. J. Seton-Karr, vicar of Berkeley, and uncle of the bride, Lord Decies, to Catherine Anne, second daughter of Wm. Dent Dent, Esq., of Shortflatt Tower, Northumberland.

LAWRENCE-WOODS.—On the 8th inst., at St. Mary's, Hornsey, by the rector, the Rev. Richard Haevey, M.A., cannon of Gloucester, Frederick William Lawrence, Esq., of China, to Clara Agatha, second daughter of Henry Woods, Esq., of Grove House, Hornsey.

DEATHS.

FRITH.—On the 31st ult., of disease of the heart, William Frith, Esq., late of the firm of Frith and Co., Bombay.

MACKAY.—On the 8th June, on board H.M.S. *Hercules*, Hong Kong, Annett Maria, youngest daughter of Angus J. Mackay, Esq., M.D., H.M.'s Royal Regt.

SAMPSON.—On the 7th June, at Whampoa, — Sampson, late 2nd Master H.M.S. *Highflyer*.

COMMERCIAL POSTSCRIPT.

MONDAY AFTERNOON.

The ship *Norwood*, Bristow master, arrived at Demerara on the 23rd July from Hong Kong, after an unusually long passage of 133 days, with 316 immigrants; 14 died on the passage from, it was said, the excessive use of opium.

There is no change of any importance to notice in the tea and silk market.

ARRIVALS NOT INCLUDED IN TABLE.—August 5, off the Start, from Passarveang, Altona, for Amsterdam; 9, at Liverpool, from Rangoon

Seotsman: 7, at Bremen, from Rangoon, Richard Cobden; at Texel, from Batavia, Ida Elizabeth; at Flushing, from Akyab, Gustav; at Bordeaux, from China, Edmond Wulfranc; 9, at Falmouth, from Rangoon Geesemunde; 10, from Banslok, George and Henry; from Maulmain for Antwerp, Trig-a; from Akyab for Liverpool, Juanita; 9, at Clyde, from Manila, Suppho; 10, at Liverpool, from Rangoon, Helena; from Singapore, Caledonia; at Antwerp, from Akyab, Gustaf; 11, at Deal, from Manila, Spitfire; from Batavia, Rotterdam; 10, at Falmouth, from Hong Kong, Cidjifrom Batavia, Deasud; 11, from Akyab, Marianne; 8, at Coxhaven, from Akyab, Selene; 13, at Falmouth, from Akyab, Tower Hamlets; 11, at Plymouth, from Foochow-Foo, Antagonist.

DEPARTURES.—Aug. 8, from Liverpool for Singapore, Patrician, Isabella, Harnett; 4, from off Dover for Singapore, Maca; 10, Whirlwind, for Hong Kong, from Gravesend. Aug. 7, from Cardiff for Shanghai, Aallotar; 10, from Liverpool for Singapore, Mary Spencer; 5, Channel for Shields for Singapore, Heilige Willebrodus; 11, from London for Singapore and Penang, Irene; 8, from Newport for Hong Kong, Lernidas; 4, from off the Strait for Batavia, Baltimore.

LAID ON.—At Liverpool for Singapore, Isia.

SPOKEN.—Staatsraad van Bwyck and Tasmania, Batavia to Amsterdam, May 21, 10 S. 11 E.; Dionysia, Cahaarina, Newport to Singapore, June 22, 6 N. 25 W.; Queen of the Lake, American ship, for Singapore, lat. 4 N., long. 28; Brave Lourmel (French), Macao to Havana, May 18, 30 S., 37 E.; Johanna, Batavia to Amsterdam, and Doggersbank from Sourabaya, both August 4, 45 N., 28 W.; Alberdina, Batavia to Rotterdam, June 3, 35 S., 24 E.; Malchezen, Newcastle to Singapore, July 14, 10 N., 24 W.; Primula, Liverpool to Singapore, July 15, 11 N., 24 W.; Horizon (Am. ship), Liverpool to Woosung, April 30, 1 N., 25 W.

EXPORTS.—To Hong Kong, per *Mystery*, cleared Aug. 7: calicoes, plain, 505,370 yds., printed and dyed, 12,000 yds.; twist and yarn, 204,000 lbs.; B. linen, £25; woollens and cottons, flannels, &c., £343; long and short cloths, £2,422; beer, £700; bottled beer, £2,332; sail cloth, £610.

At *St HELENA*.—July 2, Amstel, Radenaker, from Banjoevangie, and sailed 3 for Amsterdam. Agnes, Leitzman, from Penang. City of Boston, Vickers, from Manila, and sailed 2 for Liverpool. Krveretta, Montgomery, from Manila, and sailed 4 for London. Three Cheribon colliers, from Batavia, and sailed 4 for Rotterdam. Sigisbert Cezard, Roussan, from Macao, and sailed 4 for Havana. Sofia Adelaide, Kaulmann, from Shanghai. Four Triton Adrianns, from Batavia. Stad Do kum, Vawerff, from Batavia. Staghound, Hussey, from Swatow. Mary Ross, Meyer, from Batavia.

IMPORT MANIFESTS REPORTED AT CUSTOM HOUSE.

From *SOORABAYA* to *PORT GLASGOW*, per *Macassar*, entered Aug. 7:—1,921 baskets sugar, 710 bundles rattans, 1 box sugar, 2 boxes 1 bag coffee, 1 box musters, 1 box sundries.

From *WHAMPOA, &c.*, to *LONDON*, per *Anna*, entered Aug. 4:—1,000 cases Cassia Lignes, ordered. From Canton: 1,042 packages, 75 boxes merchandise, 400 bundles canes, 33 casks soy, 58 cases cassia oil, 200 cases preserved ginger, order. From Hong Kong: 2 cases china ware, O. D. Elmerhorst; 22 cases aniseed oil, 300 cases star aniseed, 174 cases cassia, Donner and Co.; 1 box merchandise, W. E. Hunter; 12 packages merchandise—order.

From *SHANGHAI* to *LONDON*, per *Kamehameha IV.*, entered Aug. 4, 5,418 chests, 2,220 half-chests, 341 boxes, 246 packages tea, 25 packages sundries; 108 bales silk,—order, 224 chests tea, Elias and Co.

From *WHAMPOA* to *LONDON*, per *Osprey*, entered Aug. 6:—1,177 chests, 366 half-chests, 1,187 packages, tea; 40 packages bamboo-canes; 3 boxes Whanghae canes; 1 case crockery; 1 case silk, piece goods; 4 cases merchandise; 15 bundles wool; 1 box, 6 cases sundries; 9 boxes preserved ginger; 20 sets trunks—order.

From *MACAO* and *WHAMPOA* to *LONDON*, per *DOMINION*, entered Aug. 7:—800 half-chests tea, Forbes and Co.; 4,293 chests, 1,204 half-chests, 86 pkges., 1 box, tea; 20 bales silk—order. From Whampoa: 447 chests, 1,949 pkges., 8 boxes, tea; 20 boxes, paper; 70 casks, soy; 400 boxes preserved ginger; 2 boxes sweetmeats—order; 839 chests, 3 half-chests, tea, Reiss, Bros.; 30 box sundries, Hirth and Co.; 38 boxes sundries, Morris and Co.

From *CANTON* and *HONG KONG* to *LONDON*, per *Norman Morison*, entered August 7, 4,290 chests, 1,411 boxes, 709 packages tea, 5 boxes preserves, 15 casks soy, 54 packages sundries, 2 boxes ginger, 1 box lyche, 1 box China ware, 18 packages tea and sundries, 3 cases cigars, &c., 2 cases wooden ware, 9 cases contents unknown, 2 packages Japanese ware, orders from Hong Kong, 3 boxes fruit, 2 packages sundries, 539 chests tea, 1 horse—order.

From *SINGAPORE* to *LONDON*, per *CRISIS*, entered Aug.—21,419 bags sago flour, 400 boxes sago, Brocklebanks; 563 bags of sugar, Fielder and Co.; 4,968 peicet of Sapan wood, 1,086 bales of gambier, 833 bags pepper, order.

From *SOORABAYA* to *LONDON*, per *DOLPHIN*, entered Aug. 10:—2,733 baskets sugar, Richardson and Co.; 2,307 bundles battans—order.

HONG KONG STATISTICS.

THE Hong Kong *Government Gazette* of 2nd June last furnishes "returns showing the shipping and emigration at the port of Victoria, Hong Kong, during the year 1859, and such portion of its trade as could, in the absence of a Custom-house, be officially ascertained."

The result is that 1,158 vessels, viz., 918 with cargoes, and 240 in ballast, entered during 1859. Of these 66 were from Great Britain, and 10 from other parts of Europe, all with cargoes; 183 from the East Indies and Straits Settlements, and 56 from Australia; 42 from the United States, including California; 11 from South America; 69 all with cargoes from Siam; 38 with cargoes, and 2 in ballast from Manila; 21 from Japan, the same numbers from Java and other islands in the Indian Archipelago; one ship in ballast from the West Indies, and 634, of which 166 were in ballast, from the coast of China, including Macao, but exclusive of steamers running to and from Canton,

lorchas and junks from various ports of China. As to the nationalities of these vessels, we find them to have been, 560 British, 187 American, 161 German, viz., 9 Prussian, 26 Bremen, 101 Hambro, 11 Oldenburg, 8 Mecklenburg, and 6 Hanoverian, 51 French, 34 Dutch, 20 Spanish, 3 Russian, 20 Portuguese, 56 Danish, 2 Sardinian, 4 Belgian, 3 Peruvian, 6 Chilian, 4 New Granadians, 43 Siamese, 3 Swedish, and 1 Brazilian. The total number of vessels that have anchored at the ports of Hong Kong in 1859 was 1,583, of 791,270 tons capacity, with cargoes, and 596 of 373,370 tons in ballast, or altogether 2,179 vessels of 1,164,640 tons, exclusive of ships of war and vessels belonging to the Peninsular and Oriental Steam Company; for what reasons the vessels belonging to that company have been omitted we are unable to discover.

The next returns are not what they profess to be, viz., imports of opium and treasure; exports of raw silk and treasure; exports of opium and treasure to Shanghai; exports of silk and treasure from Shanghai for the year 1859.

These returns should have been headed, imports and exports of opium and treasure by the steamers of the P. and O. Steam Navigation Company, which, in fact, they only are. According to this it appears that these steamers brought 27,580 chests of Malwa opium, and \$18,683,532 in specie to Hong Kong, taking therefrom to Europe 50,184 bales of silk, and 1,725 for Bombay, and \$9,099,898, making \$27,733,430 in specie carried on freight by the line from Hong Kong to this side, whilst on the line from Hong Kong to Shanghai the steamers of that Company carried 16,001 chests of opium, and \$10,559,097, bringing in return to that colony 47,742 bales of silk, and in specie \$3,505,714, making a total of \$14,064,811 on freight to and from Hong Kong and Shanghai, or on both lines, \$41,798,241, on which the Compagni received freight.

The last return is a list of emigrant ships cleared out of Hong Kong, being in all 35, viz. 9 British, 24 American, 1 Bremen, and 1 Danish,—together of 36,850 tons burthen; they carried 10,168 adults, of which 567 were females, and 49 male and female children. Of these 742 male, and 56 female adults, with 23 children of both sexes, were for Demerara; for San Francisco 3,543 male, and 511 female adults, with 26 children, the rest being 5,316, all male passengers for the Australian gold-mines. The emigrants to California and Australia are free emigrants; those for Demerara are contract labourers, generally called coolies. On a future occasion we shall have an opportunity on a review of other statistics relating to Hong Kong to revert to this subject.

THE THIRD CHINA WAR.

(COMMUNICATED TO THE LONDON AND CHINA TELEGRAPH.)

From a communication in your paper of the 14th ult., I learn that Mr. Bruce hints that the indemnity to be enforced from the Chinese Government can by its functionaries be squeezed out of the pockets of the Chinese merchants—certainly a new diplomatic doctrine for a plenipotentiary whose mission is founded and defended only on the promotion and extension of trade. The debates on the Chinese vote have shown that the actual expenditure for the China war for the current year is nearer six than four millions, ergo the squeeze that the Chinese Government will be brought to to enforce may be ten and more millions; the French also have already been asking positively for an indemnity. The hint about the solvency of the Chinese commercial community may have originated in the French camp, but, even so, it is, after all, most probably due to a compatriot of Rob Roy, as it is said that the chief French diplomat in China, next to Baron Gros, is Caledonian.

That we cannot stop short of war unless such satisfaction is given as would satisfy us, if given by a Power of Europe, of that every one is aware who is acquainted with the Eastern world. I admit also that now we must have it for the sake of our fellow citizens in that country; the Chinese, when they cannot esteem and respect, must fear us. I have no doubt that with many, and particularly the Anglo-Chinese community, a Franco-Chinese community, except that of the priests, does not exist; the war, and the demand for indemnity, will be, and is, popular. The war gives employment to many Europeans and their ships, also many a good opportunity of making large profits. Indemnity is a favourite in China, and once tasted, ever remembered and longed for, able to cover a multitude of claims. Knowing, as we do, on authority of Lord Elgin, Mr. Bruce, and others, that the Chinese treasury is empty; that the defensive measures taken by the Chinese Government is already a burden on the people, and that the demand for indemnity will chiefly fall, as

indeed is suggested by the able promoter of commerce, on our customers, the Chinese merchants, further that rebellion, and other disturbances exist, and will be fostered by this war, embarrassing the Imperial Government more and more, and doing material injury to a vast number of the population. We must fear that as advantageous the present war, and the prospect of indemnity will be to some, it will do great injury to the regular trade, which of late years has been so greatly increased, and that our manufacturers and others will again complain and explain, which complaints and explanations will finally result, as in 1847, in the appointment of a select committee producing—after a tedious delay, when the question has lost its public interest—a Blue-book of over 600 pages, evidence and appendices, prefaced by a report, which, read by few, is soon forgotten by its promoters and the public at large.

Many rest satisfied with the idea that as the Chinese will finally have to pay the expenses for the war, the expenditure for its prosecution is but an advance, repayable in instalments, and therefore the taxpayers of this country will not, on this account, be out of pocket. Illusion! Suppose the war lasts some years, at an annual expense to us of six millions, the same to our allies, making in two years twenty-four millions sterling, does any man believe that we can squeeze this sum out of the Chinese, without injuring ourselves? We should be satisfied with a smaller indemnity, the rest of the expenses of course to be borne by the taxpayers of Great Britain for the support of the revenues derivable from our China trade. Whatever the amount is it will, as on former occasions, be paid at stated periods; and, therefore, till the last farthing has been paid, some points or parts of the Empire will be held by the allied forces, and for some years to come we will have to pay for its occupation, as at present we are doing at Canton.

We have brought our allies to these distant parts, and may rest assured that they will not be in a great hurry to get away. France does not go to war solely for an idea, although some one once said so. This time we are beforehand made acquainted with the fact that the French Government are asking positively for an indemnity, at other times it is only at the conclusion of a war that the world learns what kind of indemnity it requires. At the opening of the French Chambers, on the 18th January, 1858, the Emperor made the following speech, on which I shall comment in your next, if you can give me space.

"Our navy is occupied in its arsenals with those necessary changes which will enable it to maintain the honour of our flag on our every sea. In China it is acting in concert with the English fleet to obtain redress for common grievances, and to avenge the blood of our missionaries who have been cruelly massacred."

To be Continued.

THE THIRD CHINA WAR.

WE cannot look upon it otherwise than as a melancholy fact that we are always in hot water with the Chinese, and viewing the question calmly and dispassionately, we can come to no other conclusion than that there must be faults on both sides to account for the constant bickerings and disputes which have resulted, from time to time, in appeals to warfare. It cannot be advantageous to the English nation to be constantly quarrelling with a people with whom they carry on so large a trade, and therefore in prosecuting the present war it will be necessary for us to act with promptitude, and in healing up the breach to dictate such terms as we believe the Chinese will carry out, without interfering with those peculiar notions which they are known to possess, and which are held, more or less, by every nation upon earth. Taking into consideration that we are the most civilised nation in the world, we must not suppose that another nation, imbued with all the prejudices and peculiarities of the Asiatic character, can be expected to see things in just the same light as we do; that they can divest themselves of the idea that we have ulterior objects in view, other than those of commerce; or that we can imagine that we have any desire to be of real service to them in a social, moral, or religious sense. Herein, we believe, lie the chief causes of our disputes with the Chinese. We have from time to time sent out men who have been ignorant of their characteristics; who have acted despotically whenever called on to decide any important subject, and who have accordingly been treated by them as a determined enemy. Surely if we are desirous of not being held up as a reproach by the nations of the earth, we shall take care that as soon as this unhappy struggle is over, the diplomatic and commercial relations of this country with China will be entrusted to men who know better than to quarrel because the name of the English Sovereign is not placed on the same line as that of the Emperor of China.

The letter from Mr. Bruce, dated Shanghai, February 6th, the British *ultimatum*, and the reply of the Chinese Government, is now before us, and keeping the above remarks in view, and remembering the policy we have advocated ever since we received the news of the fight at the Taku forts, we are anxious to interpret these documents with a real desire to place the matter before our readers in a proper light. The first paragraph of Mr. Bruce's letter to Lord John Russell leads us to believe that the British Government has at last recognised the necessity of exhibiting to the Chinese a calm and decisive policy, instead of the domineering tone that has been hitherto followed out, for we find that Mr. Bruce received instructions to make his demand contingent on the *ultimatum* being rejected. It would appear, however, that Mr. Bruce does not approve of this course, but advises stricter measures, adducing as an incentive that the war party will "strain every nerve to render nugatory the stipulations destined to facilitate intercourse with this country." We confess we cannot see the force of this argument, for it is admitted on all sides that the Chinese are fully alive to the immense pecuniary advantages arising from their commercial relations with this country, and however strong or energetic the "war party" may be, we do not for one moment believe that they would commit themselves to a policy that would materially injure that trade. And here it is necessary to make one comment on a prominent point in this letter. We believe it is a great mistake to attempt to show that our interests are identical with those of France. We have, on more than one occasion, deprecated this style of argument, and we have done so because we will never admit that the French have anything like the *status* in China that we have ourselves. Compared to our trade, that of France is a mere flea-bite, and if we do not now, we may one day regret that we have allowed Louis Napoleon to effect the standing in China that he has within the last four or five years. With regard to the *verata questio* of a residence for our Ambassador in Peking, which would really seem to be a considerable cause of offence to the Chinese Government, there seems to be some mistiness in the third clause of the *ultimatum*, and the Chinese certainly appear to have the best of it in their reply. It has always been understood that the fight at the Taku forts put an end to the far-famed Elgin treaty. In that treaty the residential clause was inserted, and yet, although it is acknowledged in the *ultimatum* that that treaty is abrogated, the British Government reserves to itself the right of putting that clause in force. To do this we must necessarily carry out a most arbitrary policy, for amongst all civilised nations it is only by mutual agreement that ambassadors are exchanged, and the Chinese reply is certainly most just as set forth in the words "the revocation of this compromise now (announced) is even more unreasonable than all the other propositions." We now pass on to the last clause of the reply, and omitting any comment on the bombastic verbiage in which it is wrapped, we cannot help thinking that the requirements there named are both moderate and reasonable. The case should be put in a proper light, and we should ask ourselves what would be our decision if two belligerent nations were to place these documents and facts before us, and ask us to become arbiters between the two. The decision, we have every reason to believe, would be to the one:—Make an ample apology and pay reasonable demands for the injury you have committed, and ratify a treaty that shall be the basis of future commercial and social intercourse. And to the other:—Accept the apology and payment, go by way of Peh-tang to ratify and exchange treaties, give up the residential clause, and bury the war hatchet for ever.

When we noticed the conduct of Mr. Bruce in our 23rd number, we took occasion to remark that "the ground the Chinese will assume will be to the effect that the large force which accompanied Mr. Bruce was sufficient to warrant the action of the forts, especially as he was requested to proceed by another route." This is precisely the principal argument of the reply to the *ultimatum*; it brings up the analogy made use of by several members in the House of Commons in the earlier part of the debate in the present session, of a foreign force making its way up the Thames, and the probable action of our Government in such a contingency. What is a correct interpretation of international law in the one case holds good in the other. Mr. Bruce's proceedings at the mouth of the Peiho are now considered, even by his own supporters, as rash and hasty, and on him falls the responsibility of this third contest with the Chinese. ■

Continental Intelligence.

RUSSIA.

(FROM OUR OWN CORRESPONDENT.)

St. Petersburg, August 1.

We are here in possession of advices from Kiachta to May 22, which give an unfavourable account of the state of trade and augur no good for the future. The revolutionary movement was gaining ground in China, fresh disturbances having broken out in several districts, which have a baneful influence on the mercantile operations between the two countries. The insurgents had obtained the mastery of some new provinces, and were making active preparations to march upon Peking, where it was expected they would arrive in another fortnight, so that the next mail may bring important intelligence from that capital. They had succeeded in gaining possession of Zin-djan, which commands the crossing of the Imperial Canal, and had destroyed Wan-djan an important spot on the Yellow River, considered as the key between the Northern and Southern provinces of China. According to the description of this place, as given by the Chinese, they consider it as the air-valve on the opening or shutting of which depends the life or death of the Northern part of the Celestial Empire. At the destruction of Wan-djan, large quantities of tea and silk were burned, which had considerably tended to raise the prices of those commodities, as the Chinese understand perfectly well the art of profiting by adverse circumstances. It is, therefore, no wonder that the Chinese Government in their shattered finances had raised the duties, both on exports and imports, which tended still more to lame all commercial enterprise. The merchants of Kiachta fear that the supplies of tea from Foo-Chow will be cut off, and the trade suffer still further embarrassments.

At Tschita 180 large flat-bottomed boats have been constructed to convey grain down the Amoor, and a large number of similar ones at Binkina and at Sretensk for the same purpose. The inhabitants have discovered the advantages to be derived from the navigation of the Amoor, and have built vessels capable of loading 1,000 poods, or 20 tons. According to the latest accounts 2,000 emigrants were shortly expected to arrive at Tschita, which, together with some large speculative purchases, had tended to raise materially the price of food. There are at present no less than fourteen large commercial firms, or companies, established at Tschita for the sole purpose of trading on the Amoor. At Nicolajefsk articles of consumption had considerably risen; the price of fresh meat was 8 rouble per pood, tea 5 roubles per pound, and wheat-flour 15 roubles per pood.

The new monster line-of-battle ship, the *Emperor Nicholas I.*, lately launched from the Admiralty Dockyard in this city, is about to be floated down to Cronstadt, where she will be rigged, armed, and fitted for service.

According to the new regulations for trade foreigners are at liberty to enter into every commercial guild, equally as subjects of the empire, and then to enjoy all commercial rights hitherto appertaining to native subjects. (Sections 77 to 107, Commercial Code.) Note.—Jews, subjects of foreign countries, distinguished by their social and commercial position, may, by the existing regulations, viz., by special authorisation of the Ministers of Finance, Interior, and Foreign Affairs, trade and found banking offices by inscribing themselves in the first guild. To such Jews, also, the establishment of manufactories and the acquisition and hire of landed possessions are allowed upon the conditions set forth in this ukase. The habitations and shops of foreigners, and all the lands thereto appertaining, are under the protection of the existing laws. The searching of them, or the investigation of mercantile books, can only take place under conditions precisely the same as are prescribed by the laws in reference to subjects of the same class. Foreigners may purchase, and acquire by inheritance, or by gift, or from the crown, every description of moveable or immoveable property.

HOLLAND.

AMSTERDAM, August 6.

(FROM OUR OWN CORRESPONDENT.)

In one of the last sittings of the second chamber of the States General, the member, van Hoevell, in accordance with the programme of the Opposition, took the opportunity of moving a double interpellation with the consent of the Chamber. He brought to the recollection of the House his former motion which met their approval, that the Government, before issuing new regulations for the cultivation of sugar in Java, were bound to lay before the legislative body the correspondence that had been carried on on the subject between the Colonial Governor-General and the Home Government. He there-

fore again moved for the production of this correspondence. His second interpellation was to obtain from the Minister for the Colonies information as to the truth of the report generally circulated that a new sugar contract had been entered into with the native chieftain, Pangka, thus affording very extensive advantages to a new contractor, to the detriment of others and to the prejudice of the public interests. The Colonial Minister, in reply, denied the right of the Chamber to insist on the production of the correspondence in question, but said he could have no objection to produce it, and would lay it on the table at the next sitting. With regard to the much-talked-of Pangka affair, it was perfectly true that a contract had been entered, but so far from its being prejudicial to the public interests, he maintained the conditions were exceedingly favourable for the country.

By Royal Decree, No. 60, dated 28th July, the King has ordered the Dutch screw steam corvette *Harlemmer Meer* to be commissioned at Flushing for service in the East Indies. Lieut. P. Koning, R.N., is appointed to the command.

The Netherlands Trading Company, having advertised for sale by sealed tenders on the 28th ult. 500,000 lbs. of old copper coins returned from India, with a guarantee that they will bring no more copper into the market within three months from the date of sale, numerous tenders were received, and the contract was awarded to Messrs. L. J. Enthoven and Co., at the very high figure of forty-nine florins per fifty kilogrammes.

In consequence of the melancholy intelligence received from the Levant of the massacre of the Christians, and the brutal murder of the Dutch Consul at Damascus, a squadron consisting of the *Vice-Admiral Wassenaar*, the *Zealand* and the *Evertson*, under the command of Commodore H. Wipff, have been sent to the coast of Syria to co-operate with the expeditions sent by other countries to restore peace and prevent any further attack on the Christians, as well as to obtain satisfaction for the stain thrown on the Dutch flag. The sailing transport *Heldin* has also been despatched from Nieuwe Deep to Malta and Beyrout, to supply the squadron with ammunition and live stock.

No further embarkations of troops to India have taken place since my last, and it appears not to be in contemplation to send any more for the present, as the latest batches of recruits arrived at the East India Depot at Harderwyk have been provisionally incorporated with the 5th Regiment of Infantry, in garrison at Leyden.

Messrs. W. O. Arntzenius and J. H. Minton, having creditably passed their examination in mining, have received appointments as Mining Engineers in Netherlands, India.

The Council of the Royal Institute for Ethnography and Geography of Netherlands, India, at Delft, has appointed the following gentlemen to be its representatives in India:—Mr. L. W. Keuchenius, Member of the Supreme Council in India; Mr. H. D. Leysohn Norman, and Mr. N. P. van den Berg, Secretaries of the Factory of the Netherlands Trading Company at Batavia.

SPAIN.

The following circular has been sent by the Spanish Government to their Consuls abroad:—

"Her Majesty's Government have had their attention drawn to the abuses committed by many foreign vessels in bringing to the Island of Jolo a large quantity of munitions of war and other prohibited articles, in contravention of the Custom-house regulations in force in the Philippine Islands. For this reason the Government of the Queen of Spain wish it to be generally known that no other ports but those of Manila, Sual, Iloilo, and Zamboango are open to foreign commerce, and that foreign vessels are not permitted to trade with Jolo and the surrounding islands that form part of the Archipelago of the Philippines in conformity with the stipulations contained in the Treaty of the 30th April, 1851."

UNITED STATES.

NEW YORK, July 28.

(FROM OUR OWN CORRESPONDENT.)

One of the last acts of the Japanese embassy was to give \$20,000 to the police in acknowledgment of "their efficiency" in protecting the donors from the intrusion of the public.

The New Yorkers are summing up the cost of the entertainment of the Japanese with some dismay. The *Herald* says:—"The committee are really ashamed to make the accounts public until they are compelled to do so, and refuse to show them to any one. At the meeting which they held on Friday evening, it is said that bills were presented amounting to \$125,000, which they managed to cut down to \$109,000. The Metropolitan Hotel bill is \$91,000—pretty good for two weeks' board for seventy Japanese, who, when at home, live chiefly on rice at a cost of less than a dime a day. Among the items are 10,000 bottles of champagne."

FINANCIAL AND COMMERCIAL.

Our money-market keeps quite easy, and the supply of capital is abundant. We quote loans on call at 5 per cent., and on good endorsed four to six months paper at 5½ to 6 per cent.

Sterling Bills closed to-day on London at 109½c. to 110c., and on Paris at 5f. 13½c to 5f. 13½c.

Since my last the transactions in East India and China goods have been less active. Both gunny cloth and gunny bags have been dull of sale. We quote the former at 15½ cents. A sale of 3,000 bags Calcutta linseed sold in Boston at 16½ cents. Java coffee, in mats, sells freely at 16 cents. Sugars have advanced ½ cent to ¼ cent per lb., but we have no sales of moment to announce in Manila. Hemp is quiet; the stock of Manila is yet large, and not saleable readily above 6 cents. Spices are firm, with moderate sales. Cassia continues firm, with transactions at full prices. The export of ice from the port of Boston for the month ending June 30 has been as follows:—To East Indies, 2,455 tons; Australia, 863 tons.

FIRE CRACKERS.—Sales have been made of 1,100 boxes Canton, No. 1, at \$1 42½c. to \$1 47½c., 6 mos.

HEMP remains inactive, and no sales to report. The stock of Manila in first and estimated stock in second hands on the first of July in Boston was as follows:—

	First Hands.	Manufacturers.
In Boston.....bales,	39,763.....bales,	15,000
„ New York	„ 36,136.....	„ 16,500
Total.....	75,898	31,500

This gives us a supply in first and manufacturers' hands of 107,000 bales. 300 bales damaged Manila sold on private terms, and 300 bales Jute in Boston to come here, at \$90, 6 mos., delivered here. At Boston, 600 bales Jute, sold \$92 50c. to \$95, 6 mos.

TEA.—The market is generally quiet, but remains firm; 2,000 half-chests Green sold at full prices.

INDIA RUBBER.—Para remains very quiet, but continues to be held with firmness. It is said that the recent advance in the price of Fine at that port makes the cost, laid down here, 75c.; 68 bags Central American, and 27 do. Guayaquil, sold on private terms. The European advices are favourable, and importers continue firm, but we hear of no transactions, the views of buyers being below those of holders.

RAW SILK.—Imports: Jan. 1 to June 30, 1860, 2,189 cases and bales China and Canton against 3,815 do.; same time 1859. Deliveries: Jan. 1 to June 30, 1860, 2,382 cases and bales, against 2,678 do. same time 1859. Stock unsold, about 700 cases and bales. Market steady, with sales at quotations to some extent lately.

SPICES are very quiet, and we have only to note 100 bags Pepper at 8½c., 6 mos. Cassia is held at 23c., without important sales since our last. Imports from Jan. 1 to June 30, 1860: From foreign and coastwise ports, Pepper, bags, 19,324; Pimento, bags, 6,591. Same time last year: Pepper, bags, 38,182; Pimento, 11,452.

TIN.—Pig is quiet, and we have but to notice sales of 200 slabs Straits at 30½c., cash.

SALTPETRE.—A sale of 800 bags Crude has been made, to arrive here, at 11½c. 6 mos. A cargo of Nitrate of Soda arrived at the Del Breakwater, has been ordered here, being owned in this city. At Boston 300 bags Crude sold at 10½ to 11c., 6 mos.

SEEDS.—In Calcutta Linseed we know of no transactions. In Boston 3,400 bags and 7,000 packets are reported sold \$170c., but this is believed to be a repetition of the report of the sale made three weeks since.

ARRIVALS.—Ship *Belle of the West*, Howes, at Boston, July 6, from Manila. Ship *Beaver*, Smith, at New York, July 9 and 25, Red Gauntlett, from Shanghai.

SAILED.—Cyclone, Ingersoll, from Boston, July 3, for Batavia. Tzar Townsend, from New York, July 13, for Shanghai.

Parliamentary Intelligence.

HOUSE OF LORDS.

COAST OF AFRICA, &c., ACT AMENDMENT BILL.—(July 30.) Earl GRANVILLE moved that the House go into committee on this Bill *pro forma*, in order that it might be re-printed with amendments. The Earl of DERBY hoped that the Bill would be rendered more intelligible. After a few words from Earl POWIS, the Earl of BLENBOROUGH said the history of this short Bill illustrated the manner in which business was conducted, perhaps unavoidably, at the end of the Session. This measure, to which there had been so much objection, did not apparently originate with any member of her Majesty's Government, but with an under-secretary in the Colonial Department, who had thought it expedient to insert a provision by which it was possible for her Majesty to put under any law which she pleased the whole of British India, with all its dependencies, with the single exception of one place. The Bill seemed to have been put into the hands of the noble earl opposite without a word of explanation. He had the curiosity to inquire how many white faces there were in the island of Labuan, and found the number was thirty-one, including the governor and commander-in-chief, the deputy-governor, and the treasurer; and what was rather remarkable was that for this very small congregation there was a bishop. (A laugh.) It was said that communications were going on for the transfer of Singapore from the Indian Government to the Colonial-office. Singapore was very remote from the Colonial-office and very near to India, and it was practically much more convenient that if any difficulty occurred in that colony it should be able to have recourse for assistance to an authority that was pretty close at hand. This was much more important as a military than as a commercial question. If we were compelled to send a military force to China, the greatest portion of that force must proceed from India, and take Singapore in their way, and Singapore must be their depot for supplies. There would, therefore, be an obvious advantage in the place being under the same authority as that which sent out the troops. When he had himself to send an expedition to China, Sir George Bonham, a very able man, was at Singapore, and not a single ship had to wait an hour for supplies. If, however, Singapore were transferred to the Colonial-office, considerable delays might in such cases arise. The Bill then went through committee *pro forma*. (Aug. 2.) The Bill as amended passed through committee.

HOUSE OF COMMONS.

THE INDIAN ARMY.—(26.) On the order for going into committee on this Bill, Mr. HENNESSY moved that it be an instruction to the committee that the half of all vacancies to be filled up in the ranks of the European commissioned officers of her Majesty's line or local troops serving in India be allotted to the sons or orphans of officers, line or local, or the sons or orphans of her Majesty's civil service in India, who have served in India, and who shall have passed the prescribed examination, and that the remaining vacancies be filled up by open competition, the successful competitors to pass through one of the royal military colleges. The motion was opposed by Mr. SIDNEY HERBERT, and after some discussion negatived. Sir J. ELPHINSTONE moved that it be an instruction to the committee that they have power to make provision for the future regulation, discipline, and patronage of the European forces serving in India. Sir de Lacy Evans, Sir M. Farquhar, and Mr. Roebuck having addressed the House, Lord Palmerston, referring to the length at which the discussion had been carried on, expressed his readiness to sit till Christmas in order to pass this Bill. Mr. HORSMAN assured the noble lord that he would not be able to joke away the opposition to the Bill. Mr. Milnes, Mr. J. B. Smith and Colonel Sykes also spoke in opposition to the Bill.—(27.) Mr. ROEBUCK, in a speech of some length, opposed the Bill, and was replied to by Lord J. RUSSELL. After some remarks in support of the Bill from Colonel Dickson, the "instruction," moved by Sir J. ELPHINSTONE, was negatived without a division. Mr. MILNES moved another "instruction," with the view of vesting all military appointments, other than staff appointments, in India in the Governor-General and his Council.—(30.) Mr. H. STIMOUR, in a brief speech, seconded the motion made by Mr. Milnes. It was supported by Colonel SYKES, and opposed by Mr. RICH and Sir C. WOOD, and was ultimately negatived. A motion made by Sir J. FERGUSSON, "That it is inexpedient to proceed further with legislation respecting the European troops in India until the whole plan of the Government for the regulation of the military force of that country shall have been submitted to the consideration of Parliament," was negatived upon a division by 88 to 50. After some discussion on a motion for adjournment, in which Sir H. Willoughby, Lord Palmerston, Lord C. Hamilton, Mr. Vansittart, Colonel Herbert and other members took part, the House went into committee on the Bill, when Mr. HENLEY moved to insert the following proviso at the end of clause I:—"Provided that the same or equal provision made for the sons of persons who have served in India, and the advantages as to pay, pensions, and allowances, privileges, promotion, and otherwise, secured to the military forces of the East India Company by the Act of the 21st and 22nd years of the Queen, cap. 106, shall be maintained in any plan for the reorganisation of the Indian Army." The clause, as amended, was agreed to, and the Bill, which consists of one clause only, passed through committee. (7.) On the order of the day for the third reading of the Bill, Mr. DONSON opposed it on the ground that India would run great risk of being denuded of troops altogether. Mr. Vansittart, Sir H. Willoughby, Sir T. Colebrooke, Sir J. Elphinstone, Mr. J. B. Smith, Sir de Lacy Evans, and Sir H. Verney, renewed their opposition to the Bill. Mr. HORSMAN repeated the arguments by which he had in previous stages sought to persuade the house to reject the Bill. He cited the authority of many Governors-general and other high officials and officers of great experience in Indian affairs, who had expressed their disapproval of the proposition for destroying the local army in India. After a few remarks by Sir M. Farquhar and Mr. Hadfield, and some observations, in reply, from Sir C. Wood, the Bill was read a third time and passed.

INDIAN BUSINESS.—(26.) The East India Stock Transfer Bill was read a second time and passed through committee *pro forma*. The Senior Member of Council (India) Bill, the Superannuation Act (1859) Amendment Bill, and the Admiralty Jurisdiction (India) Bill, were read a second time.—(30.) The Senior Member of Council (India) Bill, the Superannuation Act (1829) Amendment Bill, and the Admiralty Jurisdiction (India) Bill were read a third time and passed.

Spirit of the Press.

OUR POLICY TOWARDS CHINA.

TIMES.

§ By this time the Plenipotentiaries and armaments of England and France must have reached that well-known spot where, eighteen months ago, Lord Elgin and Baron Gros were deliberating upon the best means of obtaining a treaty with China. In that same yellow, shallow sea, scarcely in sight of the low Dutch-looking coast, yet with only a few inches of water under their keels, English and French men-of-war are once again gathered together. Some of them must have been there a considerable time, for the correspondence of the *Moniteur* tells us that the *Dryade*, the *Jura*, and the *Rhone* left Shanghai for the Gulf of Pecheli on the 31st of May, and the information which reached Shanghai on the 23rd of June gives the names of forty-six British and eighteen French vessels of war as being then "at the North." As Sir Hope Grant and Admiral Hope were to leave Shanghai for the Northern rendezvous on the 18th of June, and as so large a force had already preceded them, we may fairly conclude that on the first of July there was a force assembled in the gulf which was fully equal to every requisition which Baron Gros and Lord Elgin might make. There can be no dispute upon the score of promptitude this time. This time, at least, the men of war will have to wait for the men of peace. Of course, there will be delays in the transport service; but on the 1st of July there was quite as much force in the gulf as could be put to any good service. The diplomatists probably arrived at the general rendezvous about the first or second week in July, and we may calculate, therefore, that Lord Elgin has already had for one month the services of the very powerful army and navy by which he is supported. Henceforward we must expect the mails from China with very great interest. We shall now soon learn whether Lord Elgin's instructions bind him to action or delay—a matter which, when we consider that this expedition is costing us very much more than £10,000 a-day, is not without its importance even to a country so rich as this. Lord Elgin has reached China at a time which certainly ought to be favourable to the easy and speedy attainment of his objects. The Chinese Court is, or at least ought to be, in deep humiliation. The rot-

teness of the Imperial Government is now bursting forth and threatening dissolution. The great Imperial pedant, with his circling councillors, can no longer discharge the humblest and most commonplace functions of a ruler—he can no longer even make semblance of defending the lives and property of his subjects from open violence. Embezzlement has attained such a head that no money at all reaches the public service for which it is issued. It used to be lessened, now it is absorbed. There always were in China, from time immemorial, brigands calling themselves rebels, and living by pillage upon land and water. Judging them rather by their acts than their professions, the Western Powers have dealt with them as pirates when they have met with them at sea, and have purged the ocean of them. On land, however, they are flourishing in complete impunity. They have passed from city to city, devouring and destroying, leaving only ruin and death behind them, and rather directed and diverted than ever effectually stayed by the Imperial troops. These Imperial armies were paid from the duties collected at the foreign ports, and principally from those collected at Shanghai. Now, however, it appears that these funds have ceased to go to their accustomed purpose. The Imperial soldiers have been left without their pay. Any one who knows the character of the Chinese soldier knows what the immediate consequence of this was. They did not grumble or mutiny—they quietly passed over to the rebels, and increased the bands of depredators. They were always upon very good terms. Some years ago, when the Imperialists were besieging the rebels who held possession of the Chinese city of Shanghai (not the European settlement), the city and the garrison ran short of food, and the besiegers were naturally short of cash. So there was a market held every day at the foot of the walls by means of pulleys and baskets. The Imperialists, having the country open behind them, ravaged it, and, collecting everything which a Chinaman considers esculent, brought it to the foot of the walls for sale; the garrison, having at their command the bankers' shops inside the city, plunder them day by day of that copper cash which is too ponderous to be called currency, and lowered it down to the needy Imperialists. Thus the siege went on, with no other effect than that the open country was eaten up inside the city, and the bankers' hoards were dispersed outside the city. A very similar process has taken place in every large city of China, with the sole exception of Peking. Shanghai escaped a sack because the English and French were near, but in other cases, whenever this game has been played sufficiently, and all the ready cash has been drained, the rebels make their assault and finish up the place with fire and sword. Nankin, the ancient capital, has been for eight years in the hands of these brigands, and it is the only city they have cared to retain after they had depopulated and burnt its homesteads. Hankow, the great emporium of the empire—Liverpool and Manchester, and Leeds and Nottingham, and all their surroundings rolled up into one—Hankow, which was a province of houses divided into four quarters by the confluence of two mighty rivers—Hankow, which with its dependent towns numbered eight millions of souls, has been five times taken and plundered, and some of its suburbs were so utterly destroyed that Captain Sherard Osborn's sailors flushed pheasants among the ruins of the habitations. In those days there was an Imperial army. Now, however, the banditti walk up and down the land without even the semblance of opposition. Cities which were held sacred by conquerors in all times have now fallen. Hangchow was to a Chinaman what Grenada was to an exiled Moor; there was the same fond idea that Heaven hung just above it. What is more practically important in British and French eyes, it was the metropolis of the silk districts. Hangchow, with its riches, its antiquities, its yamuns, its vast temples, and its silk looms, has disappeared like a green field under a swarm of locusts. Soochow was to China what Paris is to Europe. Everything ornamental came from Soochow. Did a stranger or a native want a drawing, a screen, a fan, a piece of embroidery, an article of furniture? He must wait till it could be got from Soochow. This great city, within easy water communication of Shanghai, was the object of admiration to all the Europeans of that community, and proud is the man who has succeeded in smuggling himself into Soochow. The last telegram tells us that this city also has gone. What civilization there was in China is being burnt out and trampled out. The industrious emmets will rear their hovels again, and when the rebels have departed those who survive—for they cannot kill all—will till the earth, and eat, and live; but the arts of civilization will not grow again. This is the Government to which Lord Elgin now goes, commissioned to deal tenderly with it, and to do no act which can weaken it. Some people in China, and some in England, say that these daily slaughters of tens of thousands of human creatures call for our interference in favour of the Government, and that we should support it in stead of coercing it at such a moment. We do hope that this, at least, is not in Lord Elgin's instructions. The Tartar is now very sick. Russia sits by his bedside and awaits the last extremity. He is much more sick than the Turk was, and that Tartar never was a friend of ours. It would cost us much more to keep him alive than it has cost us to keep the Turk alive, and the task is much more hopeless. There are in the shrewd, common-sense character of the Chinese some of the elements of self-government. In their guilds and their municipalities they govern themselves, and govern themselves well. The Cotton Guild of Canton has, according to the last veracious story from Hong Kong, offered a bet of 30,000 dollars that the French and English will again be repulsed from the Taku forts. That guild is quite capable of coming forward with ten times that sum for any purpose it might think desirable, and is in itself a proof that Chinamen are capable of governing themselves. But these guilds can do nothing so long as the present Imperial system presses upon them. If the progress of our expedition to Peking should have the effect of breaking up that Imperial system, it will effect a greater good to humanity than even if it enabled it to put down the innumerable swarms of banditti which it has created. It will be a scandal to humanity if, in the face of the facts before us, the policy of this empire should be diverted from the pursuit of our own plain rights and interests in order to sustain a despotism so faithless, and so feeble, and so dreadful in its effects as this. It would be at once humane and politic that the nations of the West should maintain the police of the Yangtze; but it is plain that neither humanity, nor policy, nor civilisation can have any interest in preserving a form of government which is habitually co-existent with similar horrors to those which are now devastating successively every city of China.

THE SPANISH AND CHINESE COOLIE TRADE.

TIMES.

Among the mishaps incident to this period of the session is the withdrawal of Mr. Buxton's motion for coercing Spain into a suppression of the slave trade from Africa to Cuba. If the slave trade does not flourish to as great an extent as it ever did, we fear we must not attribute that fact to our exertions. If America wanted slaves, we may depend upon it she would have them, and she would not be long in discovering that there is no real distinction between buying a slave from his captor on the coast of Africa and buying one from his breeder in the State of Kentucky to import him into Louisiana. But the fact is that, notwithstanding the noisy threats of some of the press in the Slaveholding States, America does not want the Slave Trade. She finds it answer better to breed her own slaves, than to import savages. Virginia and Kentucky breed, and Alabama and Louisiana buy. This system answers their purpose much better than catching and transporting wild negroes, and under its operation the United States have in forty years increased their slave population from a million and a half to three millions and a quarter. It is not the interest of the United States to revive the slave trade. If it were, that trade would go on in spite of anything we could do to stop it. Times have somewhat changed since England was sole mistress of the seas, and since France and Spain were the only two maritime Powers who could hope to keep the seas against her, even they only uniting to be annihilated. A Power is responsible for crimes only so long as it has the means of preventing them. That is not now our case. Although we keep up the ancient form of suppression, we have dropped every pretence of effective jurisdiction over the acts of other nations. What we are doing aggravates the horrors and increases the profits of this trade; it does not suppress it. We say these things not to slacken the zeal of those who continue with hereditary energy to urge this good cause, but to account for Mr. Buxton's attempt to reargue this question, and to explain that it is through no shortcomings of ours these things have happened. Spain is, it seems, the only country which now finds her account in an active encouragement of this traffic. She imports her slaves from Africa to Cuba, thereby breaking her engagements with this country, and depriving us of the only advantage we bargained for in return for £400,000 advanced. Mr. Buxton now urges our Government to punish her by demanding a return of the £400,000, and by suspending diplomatic relations with her until the treaty is fully carried out. It is to put down the slave trade by putting it in competition with free labour. Cuba, with its productive power, would be a paradise to a colony of Chinamen, and you might draw them over in a continuous stream if you would give them security for good treatment on the voyage, good wages on the island, and full facility to return to their own land. The Cuba planter might get Chinese labour cheaper than he now gets slave labour, and save himself the expenditure of capital which now goes to buy the black man. The Chinese Government, always hitherto adverse to emigration, and casting every obstacle in its way, are now beginning to open their eyes to the advantage of easing the pressure of population in the crowded provinces upon their south-eastern coast. Unfortunately, the crimping and kidnapping scenes, and the tragedies upon the high seas with which they have been followed, have operated to deter this cautious and sensible people from being easily induced to embark in an emigrant-ship. We ourselves have vainly appealed to Mr. Buxton's friends to turn their attention to this White Slave Trade as an evil capable of practical suppression, and an enterprise upon which their energies would not be wasted. If, however, their sympathies are so jealously confined to slaves whose skins are black that they are incapable of feeling for a Mongolian stifling in the hold of a slave-ship, we ask them to look at this subject in their own peculiar point of view, and we think they will arrive at the conclusion that, instead of vain attempts to coerce Spain, the most effective means of extinguishing the Black Slave Trade will be first to abolish the White Slave Trade. A hundred English cruisers will not be half so effective as a hundred emigrant-ships from China, and a quarrel with Spain will not be nearly so useful as a competition against the slaver. The remedy for the evil which Mr. Buxton sees is to meet the slave-dealer in the Cuba labour-market and undersell him by the labour of free Chinese emigrants.

GLOBE.

The "Correspondence respecting Emigration from Canton," which has just been printed by order of Parliament, and which closes with a despatch from Lord John Russell to Earl Cowley, will be read with the interest due to the subject, and to the prospect of final success in superseding the African Slave Trade by the free emigration of Chinese with their families, held out by our Foreign Minister as realisable, if European and American Governments will co-operate in good faith for its realisation. There is the difficulty. Faith and good faith are both pre-requisites to the success of any scheme for superseding slave by free labour in tropical climates, and in those products—principally cotton and sugar—for which the demand of all commercial countries continues rapidly progressive. That is the strong ground of the American cotton-growing and slave-owning interest. They tell England and France—as Mr. William Beach Lawrence, of Rhode Island, United States, told the latter in a pamphlet, entitled "*L'Industrie Française et l'Esclavage des Nègres aux États Unis*"—"It would be industrial ruin to you to lack our supplies of cotton, and it is a climatical and social necessity to us to produce those supplies by slave-labour." There is really no answering this argument *ad maiorem*, while the facts stated subsist. Lord John Russell shows his sense of this in the following passage of his despatch above cited:—"No doubt the difficulties of suppressing the slave trade arise mainly from the demand which exists in Cuba and similar countries for labourers suited to a hot climate; and if this demand could be lawfully supplied, the incentives to engage in an illegal traffic in African labourers would be greatly diminished, and the price of a slave might be enhanced far beyond that of a free labourer." Mr. Lawrence said very truly that the abolition of slavery in the English and French West Indian Colonies had not drawn after it consequences so widely affecting commerce or manufactures as must follow from a similar proceeding in the United States. "The sugars of Jamaica and Martinique are not a product of which those islands have the monopoly, and the losses resulting from these experiments have fallen on the planters themselves, and have turned to the sole profit of Brazil and Cuba." Thus by a curious incidental consequence of the abolition of slavery by England and France, slave-labour has received a fresh stimulus in Cuba, and the contraband trade in men from Africa a fresh reinforcement of motive.

OUR NATIONAL DEFENCES.

MR. BRIGHT has made a great speech. Those who read it in the newspapers will not fail to remark the "Hear, hear," "Laughter," and "Cheers," so freely interspersed; but they will, nevertheless, have only a faint notion of the effect the orator produces in the House of Commons. If an unfortunate member rises with Mr. Bright he finds in a moment that it is best to "give way." Honourable members like to be amused, and no one can amuse them better than the member for Birmingham. His success in the "Fortification" debate was even greater than usual. Every one was abused who presumed to entertain a contrary opinion to that of Mr. John Bright. He abused military men for knowing anything of the army—he abused nautical men for their knowledge of the navy—he abused the Defence Commissioners for collecting evidence on which to base their conclusions, and he abused their report because it was in accordance with the evidence they had collected—he abused Lord John Russell (a month ago his "own familiar friend whom he trusted") for presuming to know aught of foreign policy, and he abused Lord Palmerston for promulgating the opinions of those whom he himself claims especially to represent the vast majority of his countrymen. And yet, after all the abuse, and all the "laughter," and all the "cheers," Mr. Bright found himself, in a house containing 307 members, at the head of a miserable minority of thirty-nine. The House of Commons thought as the country thinks, that the stern truths told by Lord Palmerston, in the statesmanlike speech with which he opened this question, are not to be set aside at the arrogant dictation of a clique whose foreign policy (if, indeed, "policy" it can be called) has been proved over and over again to be impracticable and absurd. Mr. James White made his maiden speech as member for Brighton in support of the views of Mr. Bright, and was rather unfortunate in eliciting one of the Prime Minister's best jokes. Indeed, Lord Palmerston was throughout in his happiest vein; the anecdote of Sir C. Napier's taking the fort at Valencia was in its way as great a success as his "retort courteous" upon Mr. White. After two evening's debate the Government proposal to expend £2,000,000 upon fortifications within the next twelve months has received the sanction of the House of Commons. The country is thus committed to the commencement of works which will doubtless cost, in order to their completion, at least four times that amount. Now, although we are not anxious to enlarge our national debt—and, like our neighbours, we wince at taxation—we have not one word to say against the vote. On its military aspect we propose not now to dwell, but we would add our hope that the expenditure will lead to fewer "jobs" than usually accompany these Government schemes. We cannot forget that Lord Palmerston has never been an "alarmist," nor has he been distinguished for hostility to the Emperor of the French, but (as his Imperial Majesty says) *he knows him*; and when, as the leading and responsible minister of this country, he emphatically tells us that he deems this expenditure absolutely necessary, our reply is, "Two, or ten, or twenty millions are as dust in the balance compared with our security, our happiness, and our honour."

PRUSSIAN MISSION TO CHINA, &c.—Accounts have been received that Count Eulenburg and the other members of the Prussian embassy to China and Japan were seen in the Red Sea, and expected to arrive at Singapore by the 1st of August. The Prussian transport *Elbe*, one of the ships belonging to the expedition, was spoken on the 4th of June, in 16 deg., 1 min. S. L., and 32 deg., 44 min. W. L. The Government have further received intelligence of the frigate *Thetis*, 42, Commodore Sundeswall, which vessel passed the Equator for the first time—at least since she has belonged to Prussia—on the 28th of April last. The ancient ceremony of Neptune coming on board and shaving all those who had never crossed the line before was duly performed with all the usual mummery and indulgence, without relaxing the discipline of the navy, to the great amusement and edification of the ship's company. From Rio de Janeiro we learn that the Prussian frigates *Ancona* and *Thetis* sailed from that port early in June on a scientific expedition to China and Japan, calling at the Cape.

TROOPS FOR INDIA.—In addition to the reinforcements that have recently embarked for Madras, Bombay, and Calcutta, numbering, in the aggregate, nearly 5,000 cavalry and infantry of all ranks, orders have been received at Chatham garrison directing 460 non-commissioned officers and men of the 1st battalion 5th Fusiliers, 1st battalion 24th Regiment, 37th Regiment, and 73rd Regiment to be held in readiness to embark for Calcutta, at Gravesend, on the 17th and 18th inst., in the two vessels taken up by the Hon. Council of India.

It is said that the Ordnance Select Committee have reported unfavourably on the Whitworth guns.

THE sloop *Elk*, 12, Commander Hubert Campion, from Australia, arrived in Plymouth Sound yesterday afternoon.

A TRIAL of Mr. Ward's (U.S.) signals for use at sea proved that a message could be read two miles off.

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

Suggestions for the insertion of information required by our subscribers will have due attention and acknowledgment.

A REGISTER is kept of the addresses of all persons connected with the FAR EAST, and reference can be made to the same by personal application at the office or by letter. Passengers arriving by either Overland route or sailing vessels, in England or on the Continent, are requested to forward their address, in order that inquiring friends may be informed.

We beg to call attention to the extension of our news from the United States from our special correspondent, including commercial and shipping intelligence, and we shall be happy to receive suggestions for any further information which may be desired. We intended giving the export manifest of vessels, but regret that our correspondent finds considerable difficulty in procuring the same in detail, as the Customs do not publish them.

In our present number will be found a Tabular Statement of the Exports from China, in addition to our Tea and Silk Table, but as the published statements in China contain a large proportion of packages entered as "Sundries," we intend giving another statement of the cargo, compiled from the vessels' report to the Custom House at the port of her arrival in Great Britain, as also the consignees.

Our OFFICES in this City have been REMOVED from 337, Strand, to 7, George-yard, Lombard-street, E.C. Newspapers and literary communications should be addressed to the Editor. Correspondence relative to Advertisements, Subscriptions, and the general business of the Paper should be addressed to the Manager, and not to the Editor.

Correspondents and Newspaper Publishers in INDIA, CHINA, JAPAN, and the EASTERN ARCHIPELAGO are requested to address all communications, newspapers, &c., to the Editor, Box No. 70, General Post-office, London, E.C., via Marseilles, which has been opened specially for the same.

Books sent by post and not prepaid are charged letter rate.

Post-office orders payable at Lombard-street, to MORTIMER WRIGHT.

The London & China Telegraph.

LONDON, MONDAY, AUGUST 13, 1860.

THE KING OF BURMAH AND THE QUEEN OF ENGLAND.

COMMERCE WITH WESTERN CHINA.

ALAUNG-B'HU-RA the Conqueror, founder of the independence of Burmah and of its present dynasty, great-great-grandfather of his present Majesty King Mendoon-Men, ninth king in succession from Alaung-b'h'u-ra, wishing to establish direct relations between himself and our King George II., addressed a letter to his Majesty in 1757, written on a sheet of the purest gold, enriched with the very finest rubies. The truly royal letter was entrusted to an Englishman named Dyer to convey from Rangoon to the British monarch, but it never reached its destination; nor has the manner of its disposal ever become known. Its non-delivery may have been caused by the vicissitudes of a voyage at that time between Rangoon and England, by the death of Mr. Dyer before reaching our shore, or by the decease of George II. in 1760 before he arrived; while the death of Alaung-b'h'u-ra in the early part of the same year may have caused no inquiries after the letter to have been made by the Court of Burmah. The historical incident regarding a Burman Sovereign is thus alluded to in a pamphlet before us advocating the establishment of intimate friendly relations between our Court and that of the "Golden Throne." "But, alas! that letter of gold and rubies never reached its destination, or the direct intercourse which the King Alompra (Alaung-b'h'u-ra) and his royal successors have ever desired with the Sovereign of England might, happily, have been at that period established, and Western China opened to our trade."

That Alaung-b'h'u-ra had every right to consider himself the sovereign equal of the King of England must be admitted from the style adopted by English Governors of the period in India, in addressing his predecessors on the Burman throne; one of which Governors commenced a letter to the Burman Sovereign, Mara-Wara, in these terms:—

"To his IMPERIAL MAJESTY, who blesteth the noble city of Ava [the then capital of Burmah] with his presence, Emperor of Emperors, and excelling the Kings of the East and West in glory and honour; the clear firmament of virtue, the fountain of justice, the perfection of wisdom, the lord of charity, and protector of the distressed; the first mover in the sphere of greatness, ever wise in council, victorious in war; who feareth none, and is feared by all; centre of the treasures of the earth and of the sea; lord proprietor of gold and silver, of rubies, of amber, and of all precious jewels; favoured by heaven, and honoured by men; whose brightness shines through the world as the light of the sun, and whose great name will be preserved in perpetual memory; GREETING:—

'The fame of so glorious an Emperor, the lord of power and riches, being spread through the whole earth, all nations resort to view the splendour of your greatness; and, with your Majesty's subjects, to partake of the blessings which Almighty God has bestowed on your empire above all others; which I pray may ever continue,' &c. &c. &c.

We now publish these incidents of early intercourse between England and Burmah, because the present excellent occupier of the "Golden Throne," King Mendoon-Men, has very recently resumed the effort made by his illustrious progenitor and predecessor to establish friendly intercourse with the British Sovereign, independent of the Governor-general of India and his War-Council, as the Burman Court considers the governing Council of British India to be. His Majesty has embraced the opportunity of the return to England of Mr. Thomas Spears, a British merchant long resident at his capital, to send a "Royal Letter" to Queen Victoria. And as this interesting document, whether written on gold adorned with rubies or on less worthy material, will not have, while in Mr. Spears' charge, the fate of Alaung-bhu-ra's letter to King George II., we anxiously hope that it will equally escape the perils of the costly pigeon-holes of Downing Street, be promptly presented to her Majesty, and receive from her right royal hand, irrespective of ministerial routine and circumlocution, such a frank and gratifying acknowledgment as her Majesty's heart will naturally prompt—such as her subjects the world over have recently had the high gratification to read as written by her to the President of the United States of America on the subject of "her son" the Prince of Wales' visit to him.

Mr. Thomas Spears, the bearer of the letter from Amara-poor, has resided, with short interruptions, upwards of twenty years at that capital, as a merchant; and has returned to his native Scottish home after, we believe, an absence of thirty years from Europe. He is, of course, master of the Burman language, and conversant with the customs of its Court. He witnessed during his residence at Amara-poor the succession of three kings, is much respected by the present Sovereign, who considers him almost as his own subject; and he naturally feels in return a strong regard for his Majesty, without forgetting that he is a subject of Queen Victoria. Thus, he always refrained from interfering in Burman politics, or in the intrigues of natives or foreigners at the Court of Amara-poor, restricting himself to maintaining honourably the high character of a British merchant pursuing legitimate commerce in a foreign land. Such an opening as this "Royal Letter" presents will, we trust, lead to a correspondence on State matters with Burmah being conducted direct between her Majesty's Secretary of State for Foreign Affairs, and the King of Burmah's Egga Maha Thina-padi Ayé-baing, i.e., Minister for Diplomacy, as is desired, instead of through the Governor-general of India, as heretofore. Considering that Lancashire and Yorkshire are now advocating direct commercial intercourse with the Western half of China from our north-eastern Pegu frontier, and how important it has become to our manufacturers of every class to obtain the additional supply of raw materials which that large and rich moiety of the Chinese empire would then yield them, this spontaneous and very laudable approach of the King of Burmah to our Queen cannot be too highly estimated. All the benefits which the Chambers of Commerce of those two industrial counties are now memorializing her Majesty's Ministers for, by means of a direct trade with Western China from British Eastern Pegu, may unquestionably be promptly realized to them, if our Foreign Secretary—eschewing the routine and circumlocution of handing the Burman "Royal Letter" over to the India Secretary for reply, to be first sent by him out to the Governor-general of India, wherever he may happen to be, for consideration; and from him, perhaps, to Rangoon, to be reported upon by the Commissioner of Pegu—avails himself of the opening to establish direct friendly correspondence between Downing-street and the Minister of the "Golden Throne." We recommend some member of our manufacturing districts to move, before the House of Commons rises, for a copy of this letter from his Majesty of Burmah to our Queen. There are not likely to be in it any State proposals deserving immolation in the secret waste-paper department of the Foreign Office. Of the production of silk, hemp, the Dom Rhssa fibre or Chu Ma (China grass), cotton, and other materials, in Western China and in the country between it and Eastern Pegu, along the proposed route, we shall treat in an early following issue.

SINGAPORE AND HONG KONG.

The Times' special correspondent's letter from Singapore, dated 14th June, has some comments on that island, which will be found below. The census of the Island of Singapore taken on 1st May last, shows a total population of 81,792, of which 2,445 are Europeans and Eurasians; what the exact numbers of Europeans is not stated in the return before us, and we take it therefore on the authority of *The Times* correspondent to be 450, leaving therefore 1,995 to be Eurasians, a general term for all sorts of half-castes, as Indo-Britons, Indo-Portuguese, and Indo-Dutch. The Chinese population amounted to 50,043, of which only 3,248 are females, Klings, 11,735, viz., 10,772 males, and 963 females; Malays, 10,888, of which 3,740 are females; the rest is composed of Bengalese, 1,236; Burmese and Siamese, 14; Bugis, 916; Javanese, 3,408; Arabs, 117; making a total of 70,120 males, and 11,672 females. There existed 13 schools, 70 temples and pagodas; 13 hotels and taverns; 570 fishing-boats; 589 hack-carriages; 600 carts, and 1,180 passenger-boats; 26 pawnbrokers; 87 spirit, and 144 opium licenses—as well as 11 toddy taverns. Besides this the islands surrounding Singapore, and lying within the jurisdiction of the Supreme Court of Judicature, or within thirteen miles of the main-land, contain a population of about 1,500, possessing as estimated 300 fishing-boats; this would make the population of Singapore and its dependencies about 83,300.

The local press finds great fault as to the manner in which the census is taken. It certainly does not give the proportions of adults and children, nor the number of the various creeds and sects, neither does it inform us as to the number of children visiting the schools, or what are the trades, professions, and occupations of the various inhabitants. The fact is, the taking of the census seems to have been left to 3 police inspectors and 4 serjeants and zemedars of police, instead of being intrusted to the charge of one responsible and competent person.

The revenue, including \$36,000 from Quit Rents derived from lands, is about \$600,000—of which \$384,000 from opium, \$57,600 from spirits, \$5,250 from toddy, \$14,400 from markets, and \$96,000 municipal taxes. On three items, namely, opium, spirits and markets, the increase on last year's income is \$120,000, or a fifth of the whole revenue estimated for the current year.

Hong Kong is a quarter of a century younger than Singapore, and first taken possession of in 1841, when it consisted of only a few miserable fishing huts—it was created a British colony on July 1, 1843, and numbers now a population of over 90,000. The revenue of 1859 amounted to £65,225, or at the Government rate of exchange at 4s. 2d. per dollar, to \$313,080. Taking the population of Hong Kong in 1859 to be the same as at Singapore on 1st May last, say 83,000, it follows that the rate of taxation was respectively more than \$7 for Singapore and less than \$4 for Hong Kong per head, a fact on which we are happy to congratulate our friends round Victoria Peak.

We may here remark that we generally agree with the opinions expressed in the colonial service in Hong Kong by the *China Mail* of 31st May last, "that purely local matters, which do not affect imperial interests, should be left to the local residents." Sir John Bowring, in 1855 and 1856, proposed to her Majesty's Government to introduce the representative element into the government of Hong Kong, but that proposal was rejected by the Colonial Secretary, Mr. Labouchere—to a municipality we should think her Majesty's Government could have no reasonable objections. For one thing Singapore and Hong Kong are at par with each other, and that is the want of a regular supply of fresh water—in both places through the neglect of the officials.

"THE TIMES" SPECIAL CORRESPONDENT'S LETTER FROM SINGAPORE.

When the Government required volunteers for China the 11th Regiment was the first to come forward. Although a young corps, it had already given proof of steadiness and attachment to its colours, particularly at Mooltan, when the 62nd and 69th Native regiments mutinied. After a tedious voyage they arrived at Singapore about the middle of May, and were informed by the Brigadier commanding at the station that the regiment was to disembark and proceed no further. Such were the orders received from Calcutta, and no explanations were given.

The mail which takes this letter to England will carry a fortnight's later news from China. According to our last advices there seems little doubt that the war is assuming larger proportions, and that the Emperor is preparing for a desperate resistance. The proposals of the Allies have been rejected with scorn, the French receiving the larger dose of Imperial contumely. All the troops have left for the North. The British Commissariat alone has engaged some 80,000 or 90,000 tons of shipping, and so great are its demands for money that exchange has risen considerably in consequence of the large amount of bills drawn upon England. Mr. Gladstone must look to it, for the £850,000 voted for the war will be expended before a blow be struck. I had an interview yesterday with Mr. Whampoa, a well-known

Chinese merchant. He speaks English fluently, educates his son at Edinburgh, and seems to have emancipated himself from the trammels and prejudices in which every Chinaman is bound. He says that the Chinese population of Singapore take no interest whatever in the war. For his own part, without discussing the question of right or wrong, he holds that in the interests of China it is most desirable that a decisive blow be struck before Peking. The Emperor is in the hands of the war party, inflated beyond measure by their success last year at the Taku forts. A disastrous defeat would bring them to reason and lay the basis of a solid peace. The story goes that the Emperor objects "to the very bad habit you English have got. When you go to war you always want money. You ask me to pay for the gunboats you lost. Who is to pay me for my forts which you destroyed at Canton and elsewhere?" Mr. Whampoa's property on the hill has been bought by Government. It is now being cleared, and barracks will at once be built for an European regiment, to be stationed at Singapore. A few years ago but a fishing village Singapore now boasts of a large and increasing trade. Its population is thriving and numbers some 80,000 souls, of whom 50,000 are Chinamen and 450 Europeans. It has never been garrisoned by Queen's troops, but is evidently the place where a reserve should be stationed. In six days a regiment could be forwarded to Hong Kong, in twelve to Calcutta, and in three weeks to Australia or New Zealand. It is by no means unhealthy, the temperature ranging from 80 degrees to 90 degrees, while the Penang Hills, within two days' voyage, afford the climate of England and an excellent sanitarium.

P.S.—I am happy to say that Lord Elgin has availed himself of his powers as Ambassador-Extraordinary, and has requested the Governor to forward the Sikh Regiment to China by the first opportunity.

EMIGRATION FROM CANTON.—We noticed the subject from the "Blue Book" in our last issue, which no doubt has received the full attention of the local papers in China. In Lord John Russell's despatch to the French and American Ministers, he says, in reference to emigration from China:—"These fair prospects will be marred if the various European and American governments interested in Chinese emigration do not combine to enforce stringent regulations upon those who are engaged in conducting it; and her Majesty's Government earnestly hope that the French government will take the necessary measures for this purpose. By judiciously promoting the emigration from China, and at the same time vigorously repressing the infamous traffic in African slaves, the Christian governments of Europe and America may confer benefits upon a large portion of the human race, the effects of which it would be difficult to exaggerate."

THE FALSIFIED AFGHAN DESPATCHES.—The Newcastle foreign affairs committee have published a pamphlet showing the disgraceful manner in which these despatches were mutilated in 1839, which they prove by the correct despatches issued after years of efforts by members of Parliament. The report says:—"The most important part of this correspondence, being that which related to the mission of Sir Alexander Burnes to Cabul, in 1837 and 1838, was declared by Burnes himself, as soon as he saw it, to be 'a fraud,' and after his death his relations published his despatches with the object of proving that they had been garbled. In Asia we have pursued a career of lawless aggression in the name, not of 'liberal principles,' but of 'civilisation'; and when this pretext has not been sufficient, the necessity of counteracting Russia has been put forward. The result has been to turn India from a source of wealth into a drain upon our finances, from a secure possession into our greatest danger. As our attacks upon Persia and Afghanistan have made the inhabitants of those countries our enemies, so our annexations and our assaults upon the religion and customs of the inhabitants of Hindostan have made them our enemies. From the Caspian to the Indian Ocean we are without friends. In China we have acted the part of pirates from the day when the direction of our relations with that country came into the hands of the Foreign-office in 1833, and we are now invading China in conjunction with France, at the very time when we are called to arms to protect ourselves against a French invasion. It occurs to no one that a French force in China is available for India; and that France and Russia are united. The history of England for the last twenty years is the history of the impunity of the authors of the Afghan war, the disasters of which did not even teach us the lesson not to attempt to counteract Russia through a dishonest Minister."

A JAPANESE FEMALE COLONY.—Once a Week has the following story:—"At no great distance from Japan the natives had discovered certain islands nearly peopled by women, and that they might be said to be Amazons, inasmuch as they were expert in the use of arms. To these islands the Japanese went annually in vessels freighted with merchandise, for exchange with the natives, and for some time there had been an interchange of tenderness between the Japanese seamen and the fair inhabitants of those islands, leading, of course, to the result usual in such cases—"et pour éviter entre eux a tout inconvenient," the following rules were laid down:—"Directly the Japanese vessels arrived at these islands, two messengers landed, for the purpose of informing the king or queen who ruled over these fair nymphs of their arrival, and of the number of men in the vessels. A day was then appointed on which the Japanese, "blue jackets," were to be allowed to land. On that day a bright troop of young ladies, equal in number to the Lotharios from Nipon, sallied down to the strand, each carrying a pair of shoes or sandals, carefully marked with the name of the proprietress. These sandals were then, in sight of the visitors, thrown indiscriminately together upon the sands of the sea-shore, and the nymphs again retired. "Alors!" says the good priest, in racy old language, "les hommes sautant a terre chausseront chacun les premiers souliers qu'ils encontreont, et incontinent approcheront les femmes." Each of the fair dames of this Eastern Amazonia then claimed for her admirer the Japanese sailor who bore her sandals in his hand. All remonstrance, chide, or exchange was out of the question, whether the lady was ugly, hump-backed, or deformed; and each Alphonso was fain to be content with his fair Imogene—an arbitrary proceeding upon the part of the ladies, only to be justified in Amazonia. Great care was taken to register the names and residences of all parties, in order that when the Japanese vessels returned in the following year, the sweet pledges of affection which should have been ushered into the world in the meantime might be duly presented to their blushing fathers, and that the rule might be carried out of allowing the boys to return to Japan whilst the girls were detained with their mothers."

Naval and Military.

Coals and stores continue to go forward by merchant vessels to Hong Kong for the expedition, but no further reinforcements for the army and navy.

The *Tribune*, 31 screw frigate, has arrived at Portsmouth from her commission in India, China, and the Pacific. The *Retribution* paddle frigate is ordered home.

The *Army and Navy Gazette* calls attention to the want of a scale of promotion for chaplaincies in the service, considering that civilians rise to bishoprics, &c.

His Royal Highness the Duke of Cambridge and Lord Clyde reviewed the first battalion of Coldstream Guards. The men composing the battalion left the Wellington barracks at a few minutes before ten o'clock, and marched up Constitution hill to that portion of Hyde Park in which her Majesty reviewed the volunteers a few weeks since. The review, which lasted an hour and a quarter, was a most interesting sight, all the evolutions having been gone through with the utmost skill.

The number of new regiments of the line to be added to the army, in consequence of the extinction of the local European force in India, will be nine altogether, of which, three will be cavalry, and six infantry. In these regiments, promotion will not be regulated by the purchase system in operation in the rest of the line. It will be more on the old Indian system of pure regimental seniority, tempered however by selection, especially in the higher ranks. We believe it is not at present contemplated to interfere with the organisation of the Bombay and Madras cavalry.

Captain Blakely last week tried some of his cannon near Liverpool, where they were made by Messrs. Fawcett, Preston, and Co. With another gun 6½ inches in bore and 11 feet long the firing was better than any before. At five deg. elevation the enormous range of 2,740 yards was attained with a hollow shell weighing only 65 pounds. Mr. Whitworth's solid 80 pound shot only ranges 2,600 yards with this elevation, and Sir William Armstrong's only 2,400.

The particulars of the new fortification scheme have been published. The works will be carried on at nine places—Portsmouth, Plymouth, Pembroke, the Thames, Medway, and Sheerness, Chatham, Dover, Cork, and Cannock Chase. The cost of the whole is estimated at £4,960,000, including the purchase of land. It is only, however, intended to ask for £2,000,000 at the present time, and this sum includes £350,000 for works already sanctioned by Parliament, and £150,000 for the purchase of land at Cannock Chase.

Mr. Henry Fane Travers, military store service, now at Woolwich, has been appointed military store officer in charge of Point de Galle, vice Assistant Military Storekeeper Fretz, ordered to Colombo. The appointment of Assistant Military Storekeeper Munro to that station has been cancelled, that officer having already served at Trincomalee, Ceylon.

An important alteration is about to take place in the police arrangements of our naval arsenals and dockyards. The whole of these national establishments will, it is expected, soon be placed under the supervision of the metropolitan force.

The 2nd battalion 14th Foot will embark at Cork about the 20th inst., in the *Robert Love* and the *Donnerstag*, sailing vessel, for New Zealand. The 2nd battalion is to be augmented to 1,200 men by volunteers from the 65th Regiment.

The Commander-in-Chief has proposed a plan, by which in future all first appointments to commissions in the Cavalry, Guards, and Infantry, will be made from a military college.

Lieut.-Colonel S. N. Lowder has been appointed to the Chatham division of Royal Marines, having been permitted by the Admiralty to exchange divisions with Lieut.-Colonel H. Marriott, who has been appointed to Woolwich.

An order has been issued that soldiers are to salute chaplains, paying them the compliment due to their relative rank.

By the death of Major G. M. Stopford, Royal Engineers, which event took place at Brompton Barracks, Chatham, a vacancy has arisen in the adjutancy of the Royal Engineers. The deceased officer, who was the son of Admiral Stopford, served throughout the whole of the campaign in the Crimea, and was present at the battles of Alma, Balaklava, Inkerman, and Sebastopol, where he served as aide-de-camp to General Sir John Burgoyne. He also superintended the laying down the field electric telegraph in the Crimea. Major Stopford was twelve years in the corps of Royal Engineers, his commissions bearing date,—second lieutenant, Oct. 1, 1847; first lieutenant, July 14, 1851; captain, Feb. 23, 1856; and major, Sept. 22, 1858. In addition to the Crimean medal, the deceased officer was decorated with the French war medal, the Sardinian medal, the 4th class of the Medjidie, and the Turkish medal.

By the arrival of Captain A. R. Lempriere, R.E., at the Royal Engineer establishment, from North America, intelligence has been received of the boundary expedition now employed in British Columbia, under the command of Lieut.-Colonel Hawkins, R.E. The Royal Engineers have made great progress in surveying and planning the boundary between the British possessions and the United States, both officers and men exerting themselves to the utmost in the prosecution of the work. The camp, for the present, is at Dallas, in the state of Oregon, but the depot from which the officers and men drew their supplies, and which forms the base of their operations, is at Esquimalt, Vancouver Island. Capt. Lempriere has brought home with him some men of the expedition, who have been invalided, and are unfitted to continue their surveying duties.

We have to announce the death of General Gustavus Nicolls, of the Royal Engineers, at his residence near Southampton. The deceased general, who stood third on the list of his branch of the service, obtained the rank of second lieutenant in 1794, and of Major-Gen. Hassell R. Moor, formerly in the Royal Artillery, who died at his residence near Farnham. The deceased general served in the Peninsula from January, 1811, to October, 1813.

NAVY.

PROMOTIONS.

COMMANDERS TO THE RANK OF CAPTAINS.—J. G. Bickford of the *Victory*; W. E. A. Gordon, recently commanding the *Hermes*; E. G. Hore,

recently commanding the *Dasher*; and C. Vesey, of the *Styx*; H. Trollope, J. A. P. Price, W. Armitage, R. H. Riak, T. M. S. Pasley, and the Hon. F. A. Foley.

LIEUTENANTS TO BE COMMANDERS.—J. Simpson, commanding the *Jackal*; D. Herbert, of the *Hogue*; H. West, of the *Marlborough*; W. Strickland, of the *Royal Albert*; J. W. Pike, recently commanding the *Antelope*, 8; and J. T. M. Nicholl, of the Cambridge gunnery ship; J. B. Field, L. C. H. Robinson, P. Saumarez, S. J. Greville, C. M. Buckle, E. C. Symons, C. H. Simpson, L. J. Moore, E. Nares, A. J. Kingston, J. E. Bickford, R. H. L. Ray, C. T. Jago, C. J. Wray, C. Fairholme, F. R. Purvis, W. H. Edye, L. H. Verasturine, the Hon. E. G. L. Cochrane, C. R. F. Boxer, and J. S. Graham.

ACTING LIEUTENANTS TO BE LIEUTENANTS.—Edward Pilkington, Henry John Carr, and Richard Henry Duckworth King.

MASTER.—John Waye, to the *Jason*.

MATE TO BE LIEUTENANT.—Mr. A. T. Powlett.

APPOINTMENTS.

COMMANDERS.—J. H. Cave, to the *Styx*; J. Dayman (additional) to the *Figuard*.

LIEUTENANTS.—R. H. D. King, to the *Orion*; Lord Walter Talbot Kerr, to the *Emerald*; Frederick Harvey, to the *Gorgon*; Joseph E. N. Wilson, to the *Conqueror*; Cuthbert Le Mesurier, to the *Orion*; George Powys, to the *Royal Albert*; Archibald C. S. Blackett, to the *Neptune*; Edward Pilkington, to the *Diadem*; Henry J. Carr, to the *Trafalgar*; Francis Durrant, to the *Centaur*; the Hon. Richard Hare, to the *Hornet*; William St. J. Hornby, to the *Algers*.

MASTERS.—R. L. B. Williams, to the *Indus*, for the *Desperate*; J. Waye, to the *Indus*, for the *Jason*; J. Jarvis, to the *Imaum*; H. W. C. Wise, to the *Gorgon*; T. A. Hull, to be additional to the *Firefly*.

SURGEONS.—James Vaughan, to the *Royal Adelaide*.

CHAPLAIN.—The Rev. Nathaniel Proctor, to the *Indus*.

PAYMASTERS.—James Moore, to the *Wellington*; E. Harris (additional), to the *Impregnable*.

ASSISTANT-SURGEONS.—Croft G. Symons, to the *Cumberland*; Robert Hogue, to the *Emerald*; and Bradley Gregory, confirmed in the *Amphion*.

SECOND MASTERS.—John Riches, to the *Asia*; Ramsey Cooke, to the *Dee*.

MASTERS' ASSISTANTS.—F. Seaton, to the *Gorgon*; W. Taylor, to the *Geyser*.

ASSISTANT PAYMASTERS.—J. Moore, to the *Wellington*; John Harvey, to the *Royal Adelaide*.

ACTING ASSISTANT-SURGEON.—R. Burrows, to the *Royal Adelaide*.

ASSISTANT-ENGINEERS.—Second Class: J. Hansford, to the *Russell*, as supernumerary. Third Class: H. Duncan, to the *Indus*, as supernumerary; W. Miller, to the *Industry*.

ACTING ASSISTANT-ENGINEERS.—Third Class: Henry William Masterman, to the *Arrogant*, for disposal; James Imrie, George Purkis, and John Warner, to the *Asia*, as supernumeraries.

MIDSHIPMEN.—W. F. Boughey, to the *Mersey*; Charles J. H. Bliss, to the *Orion*; Harry V. Smith and H. C. Walker, to the *Barracouta*.

BREVET.—Major-General Sir Harry David Jones, K.C.B., to be lieutenant-general, vice Sir George Judd Harding, K.C.B., deceased. Colonels Henry Sandham, of the Royal Engineers, to be major-general, vice Sir H. D. Jones; Sir Joshua Jebb, K.C.B., retired full-pay Royal Engineers, to be major-general, in consequence of the promotion of Colonel Sandham, who stood below him in the corps at the date of his retirement; Charles Gostling, retired full-pay Royal Artillery, to be major-general, the rank being honorary only; Colonel Second Commandant George Evans Hunt, retired full-pay Royal Marines, to have the honorary rank of major-general, under her Majesty's order in council of Nov. 13, 1858; Lieut.-Col. Edward S. Browne, retired full-pay Royal Marines, to have the honorary rank of colonel, under her Majesty's order in council of 13th Nov. 1858; Paymaster William Summerfield, depot battalion, to have the honorary rank of captain under the royal warrant of the 27th January, 1860.

The Brevet Commissions of the following officers to be antedated, and the undermentioned promotions to take place consequent on the promotion of Colonel Charles Wight, Royal Engineers, to be major-general, in succession to Major-General D. Bolton, Royal Engineers, who died on the 16th May, 1860:—To be antedated to 17th May, 1860—Brevet-Lieut.-Col. C. B. Ibbetson, captain, half-pay 89th Foot; Brevet-Major E. T. P. Shewen, Royal Marines. To be antedated to 3rd June, 1860—Brevet-Col. F. A. Whimper, lieutenant-colonel half-pay unattached, major of the Tower of London; Brevet-Lieut.-Col. H. C. Somerset, captain half-pay 27th Foot, staff officer of Pensioners; Brevet-Major C. E. Thornton, half-pay unattached, staff officer of Pensioners. To be antedated to 15th June, 1860—Brevet-Col. G. A. F. Sullivan, 5th Light Dragoons; Brevet-Lieut.-Col. F. Carey, 26th Foot; Brevet-Major G. Lambbrick, Royal Marines. To be antedated to 19th June, 1860—Brevet-Col. H. B. McGee, 3rd West India Regiment; Brevet-Lieut.-Col. H. J. Savage, 91st Foot; Brevet-Major C. B. Astell, half-pay 45th Foot, Staff officer of Pensioners.

Brevet-Lieut.-Col. Hector Harvest, major half-pay unattached, to be colonel.

Major William Little Stewart, of a depot battalion, to be lieutenant-colonel.

Captain James Baillie, half-pay unattached, staff officer of Pensioners, to be major.

The undermentioned promotions to take place consequent on the promotion of Colonel Henry Sandham, Royal Engineers, to be major-general, in succession to Lieut.-General Sir George Judd Harding, K.C.B., deceased, 5th July, 1860:—Major and Brevet-Lieut.-Col. William R. Preston, 45th Foot, to be colonel; Captain and Brevet-Major Arthur Pigott, half-pay 20th Foot, staff officer of Pensioners, to be lieutenant-colonel; Captain James Duncan McAndrew, 78th Foot, to be major.

The undermentioned promotions to take place consequent on the death of Major-General Godfrey Charles Mundy, colonel on the staff, and Lieut.-Governor of Jersey, which took place on the 10th July, 1860:—Brevet-Col. Richard French, from lieutenant-colonel half-pay unattached, to be major-general. Lieut.-Col. Thomas Conyngham Kelly, C.B., 47th Regiment, to be colonel; Major Abraham Collis Anderson, half-pay unattached, fort-major at Edinburgh, to be lieutenant-colonel; Captain Barclay Lawson, Royal Artillery to be major.

The undermentioned promotions to take place consequent on the death of Lieut.-General Arthur W. M. Lord Sandys, Colonel of the 2nd Dragoons, on the 16th July, 1860:—Major-General Edmund Finucane Morris, C.B., colonel of the 97th Regiment, to be lieutenant-general; Lieut.-Col. and Brevet-Col. William Parlbay, lieutenant-colonel half-pay 10th Light Dragoons, serving on the staff of the army in Ireland, with the temporary rank of major-general, to be major-general; Lieut.-Col. Alexander Essex F. Holcombe, 1st Foot, to be colonel; Major Charles Murray, half-pay unattached, to be lieutenant-colonel; Capt. Andrew Pellett Scrimshire Green, Royal Artillery, to be major.

London Gazettes.

The Queen has been pleased to appoint Jeremiah Thomas Fitzgerald Callaghan, Esq., to be Chief Magistrate for the colony of Hong Kong.

The Queen has been pleased to appoint William Baly, Esq., M.D., to be a member of the General Council of Medical Education and Registration of the United Kingdom, vice Sir James Clarke resigned.—The Queen has been graciously pleased to give orders for the appointment of George Lloyd Hodges, Esq., C.B., late her Majesty's Chargé d'Affaires to the Free Hanseatic Cities of Hamburg, Bremen, and Lubeck, to be an ordinary member of the Civil Division of the Second Class, or Knights Commanders of the Most Honourable Order of the Bath.

ANNOUNCEMENTS.

Major-general R. P. Douglas is appointed Lieut.-governor of Jersey.

Monetary and Commercial.

At a meeting of the Mediterranean Extension Telegraph Company the report stated that, in order to supply the want of direct telegraphic communication between Malta and Corfu, a proposal has been submitted to the Government and subsequently accepted to lay down a new line from Corfu to Otranto, by which the two islands will be connected *via* Italy and Sicily. As long as the new cable is in working order the Government will pay the company the second moiety of the subsidy—viz., £3,600, thus renewing the entire payment of £7,200 per annum. This will not facilitate the transmission of messages to India and China.

At the meeting of the Ottoman Bank, to be held on the 29th, a dividend will be recommended at the rate of 8 per cent. per annum, free of Income-tax, together with an addition to the reserve fund of £15,196, being the profit result of the close of the bank's operation on their Turkish loan account.

A new department, entitled "the India Department," is established at the Bank of England. It will take charge of the business connected with the various India Government loans, which has been removed from the India-office.

The extraordinary general meeting of the Ceylon Railway Company was adjourned until communications should be received from the Ceylon Government with respect to the propositions made by the directors, viz., either that the proprietors should be paid off at par, with a release from all liabilities, or that the company should prosecute the works on an uniform guarantee of 6 per cent. over the whole capital.

The expediency of a bill to regulate Chinese immigration, with, among other provisions, a poll-tax of £10, has been affirmed by 15 to 5 in the Assembly at Sydney.

The P. and O. Company have received advices from Galle that the *Malabar* will be a total loss, as also the cargo. The specie will, it is expected, be all saved.

At the half-yearly meeting of the Bank of Egypt a dividend, at the rate of 7 per cent. per annum free of income-tax, was carried unanimously. It was stated that the business of the bank has been carried on profitably during the past half-year, and the rate of exchange, the fluctuations in which last year caused the directors some uneasiness, has since been unprecedentedly steady, showing that trade has resumed its usual course.

At a meeting of the creditors of Messrs. Freeland and Brothers, who lately failed at Manchester, the report of the committee stated that the present firm commenced business a year and a half ago, not only without capital, but with a virtual deficiency of £1,000; that they have since been large buyers of goods for exportation on a constantly increasing scale, and the private expenditure of the senior partner has, "throughout his mercantile career, been on a scale of magnitude totally unwarranted by the state of his affairs."

The LABUAN COAL COMPANY have sent out engineers, &c., by the present mail for the purpose of reopening the coal mines at Labuan.

The telegraphic committee have the following report on the Red Sea Telegraph Company:—

With respect to the Red Sea and Indian Telegraph Company, it is stated that the company was formed in August, 1858, under the Joint-stock Companies Act, and incorporated by a special Act of Parliament in July, 1859. The present capital is £800,000, in 4,000 shares of £20 each, of which £700,000 has been called up. Of this amount £15,000 has been paid for concessions, £18,000 for the necessary buildings, &c., for the stations up to this time, and the remainder expended in the construction and laying of a telegraph between Alexandria and Kurrachee. The line being not yet open to the public, no account of annual receipts and expenditure can be given, or of messages sent. The shareholders have, however, received three payments of interest, under an agreement with the Treasury, by which 4½ per cent. is guaranteed for fifty years on the paid-up capital (not to exceed £1,000,000), viz.:—Feb. 11, 1859, £3,065 17s.; August 11, 1859, £8,463 12s. 1d.; Feb. 14, 1860, £12,927 6s. 10d. The line consists of 220 miles of land line between Alexandria and Suez, and 3,048 miles of submarine line from Suez to Kurrachee, with five intermediate stations. The staff to be employed has not been at present fully decided upon. On the opening of the line it is proposed to fix the tariff at £4 10s. for a single message of thirty words.

The project noticed some time since of running a line of large screw steamers to India and China round the Cape is likely to receive important support from the Calcutta community and in a short time a company will be announced, and the necessary capital subscribed.

The specie by the last mail was as follows:—For Alexandria, gold, £6,500; Madras, gold, £3,296; Calcutta, silver, £21,335; Hong Kong, silver, £30,630, and gold, £12,500; Foochow, silver, £2,060; and Shanghai, silver, £13,833.

ARTICLES OF IMPORT.

TEA.—Our market has been very quiet, the amount of transactions having been far below the average, and prices of Congou have given way. The demand for common Congou for Export has been very limited, and prices must be quoted ¼d. to 1d. per lb. lower, which also applies to the good ordinary and broken-leaf kinds; in fair to good flavoured kinds the decline amounts to 1d. per lb. In common to fair Hows, up to 1s. 7d. per lb., we quote a reduction of about ¼d. per lb., the supply being comparatively small. In good Ning Chows and second class Monings and Wopaks the decline is fully 1d. per lb., and the demand very limited; fine descriptions are without inquiry. Tayshans have participated in the general dullness. In Oolongs and Souchongs business has been limited, and prices are with difficulty maintained. In Flowery Pekoes there is but little to notice; the inquiry is limited, and prices in a measure nominal. Scented Capers and Orange Pekoes remain much as last month, with the exception of Common Capers, which are 1d. per lb. lower. In Green Teas there continues to be a moderate business in most descriptions under 2s. per lb., at about previous prices, but in the finer kinds sales are only with difficulty effected, the supply being large, and the demand for these, as for all kinds of Black Tea, being very limited. Canton make remain much as before. The stock of the 1st of August of all descriptions of black was in London, 50,418,723 lbs.; green, 7,390,138 lbs. At Liverpool, black 2,989,695 lbs.; green, 155,591 lbs. The total deliveries in London for the present year have been 46,389,915 lbs. The imports were in London from the 1st of January to the 1st of August, 52,166,332 lbs. of black, and 7,189,022 lbs. of green; and at Liverpool 3,754,399 lbs. of black, and 288,134 of green.

SILK.—We have had a very quiet month in silk—heavy market and drooping prices. The reduction, however, has been nothing of moment. The stock is small, and may now be expected to be continually diminishing for the next few months. This has enabled the importers to realize the small quantity that has come forward without any decided concessions—nothing exceeding 6d. to 9d., and in some cases 1s. per lb. Within the last days a better feeling seems to be growing up, although the home-trade is still bad, and the foreigners generally continue to act as if expecting lower prices. The strike at Coventry, which has been going on for some weeks, unfortunately still continues—causing a large diminution in consumption. In Chinese-thrown silk the demand has again relapsed to the minimum rate of the early months of the year—of this class the stock is unfortunately large:—

	s. d.	s. d.	Superior.	s. d.	s. d.
Tastlee, No. 1 and 2	23 6	25 6			
" No. 3 and 4	21 0	23 0			
" No. 5	21 0	21 6			
Tayseam	17 0	19 0	20 6	22 0	
Ditto, long reel	17 0	18 0	18 0	19 6	
Canton	9 0	15 0	17 0	19 0	
Chinese thrown	17 6	21 0	22 0	22 6	
Japan	18 0	20 0	22 0	30 0	
Yuenfa	14 0	24 6			

The sold stock on the 1st inst. amounted to 8,792 bales of China and Japan, and the unsold stock to 11,476 bales.

SUGAR.—In Clayed Manila only limited transactions have taken place, importers mostly refusing to accept offers of the previous value, which is now considered comparatively moderate. Unclayed has been inquired for, and would command our extreme quotations, but by reason of the absence of supply sales have been prevented. A small parcel of Siam, in the early part, brought stiff prices. In Java but little has been done, 2,500 baskets recently offered by auction having been held above the relative value, and withdrawn. Further liberal supplies of Penang, at public sale, the week after our last advice, met free buyers at a pretty general improvement of 6d. per cwt.; since when, nothing has been offered by auction, and very little business done. Sales have been made of 12,000 bags Penang, ordinary to fine brown, at 32s. to 37s. 6d.; low to good yellow, 38s. to 41s. 6d.; clayed Manila 10,000 bags, at 36s. 3d. to 37s.; Siam 1,600 bags, low to good middling white, 44s. to 46s.; grey, 42s. to 42s. 6d.; Java, 300 baskets fine white, 52s. to 52s. 6d.

COFFEE.—Notwithstanding the large supplies of plantation Ceylon, the demand and sales have been good. Plantation Ceylon has fetched 66s. 6d. to 72s. for low middling, and 78s. to 77s. for middling to good middling; native common good ordinary, 60s. to 63s. 6d.

RICE.—The continued heavy rains caused a spurt in this market yesterday. The stocks are light, and prices have an upward tendency. Low middling to good Rangoon is quoted 9s. 3d. to 10s. 6d.; fair Necranzie 9s. 9d. to 10s. 3d. The sale of a Rangoon cargo afloat is quoted at 10s. 9d.; white Java, 13s.

PEPPER.—Export kinds have again been in fair request during the month: the total sales are 7,000 bags, common grey to good Singapore, 4d. to 4½d.; Penang, 3½d. to 3½d.; and a few Alleppy at 4½d. Only limited purchases of white have been made at former rates, viz., 250 bags Penang, common, at 6d.; good, 6½d. to 6½d.; 120 cases Tellicherry have been sold: fine, 1s. 0½d. to 1s. 0½d.; Coriander kind, 9½d. to 10d.

SAGO.—Market dull: sales 2,000 boxes sup. large pearl (Borneo Company), 22s. 6d. to 24s.; medium, 18s. to 19s. Sago flour, 1,000 bags, middling quality, 16s. 6d. to 17s.

SPICES.—Cinnamon: the quarterly sales comprised 1,657 bales of Ceylon, which mostly sold at a decline of 1d. per lb., being 1s. 5d. to 2s. for first sorts, 1s. 2d. to 1s. 7d. for seconds. Cassia lignea, common to good, 83s. to 90s., sales 1,200 boxes. Cloves: sales of 23 cases, Penang, fair to good, at 1s. 2½d. to 1s. 4d. Mace, common to good, bright, 1s. 1d. to 1s. 5d. Nutmegs: small and middling, 1s. 3d. to 1s. 9d.; good middling, 2s. to 2s. 3d., demand small.

HUMP.—Market quiet, and no change in quotations.

COTTON.—Market heavy. Surat, ordinary to good, 2½d. to 4½d.; Madras fair Tinneveli, 4½d. to 5d.

JAPAN WAX.—Dearer. 126 cases sold. Saucer, 65s. 6d. to 75s. 6d.

TOBACCO.—Manila leaf is quoted 6d. to 1s. 6d.; Cheroots, 6s. to 7s.; Java, 7d. to 8d.

TIN.—Market steady. Sales of Straits at 132s.; Banca, 135s. to 136s.; Regulus of Antimony, £52.

MISCELLANEOUS.—India-rubber, flat, 82 baskets at auction, retired at 2s. 2d.; camphor, moderate sales at 165s.; rattans, sales of Siam at 5s. 1d.; sapanwood, sales of Siam at £3 7s. 6d., a quantity of Manila retired; soy, sales of China at 3s. per gal. for ordinary, and Japan at 21s. 6d. per case; rhubarb, no sales and no demand; mother-o'-pearl and shells, firm at last quotations; tortoise shell, 2 cases of Manila retired at auction; star aniseed, small sales at 86s. to 88s.; elephants' teeth, Siam sorts, 70 lbs., £42 to £44; 40 lbs. to 60 lbs., £38 to £43; stic-lac, Siam sales at 50s. to 64s. gum Benjamin, good quality in demand at £13 to £15.

ARTICLES OF EXPORT.

IRON.—Mr. Griffiths, in his circular, says:—The general demand for manufactured iron continues steady. Orders for thin sheets, boiler plates, hoops, and nail rods of a superior brand continue to arrive in South Staffordshire, and fixed rates are rigidly adhered to by all the makers of the best marked brands. The amount of business being done in this district is quite up to the average, and although the trade is not considered buoyant, a very large quantity of finished iron finds its way to London, Liverpool, and Bristol, every week from this locality, and the Birmingham Canal Company, which is the canal used by all the ironworks, has carried one-fourth more material during the past month than it did during the corresponding month of July, 1859. Two gentlemen from Russia visited South Staffordshire this week, and gave out several orders for best Staffordshire iron, to be sent to the works on the banks of the Neva. The trade in Shropshire, Derbyshire, Middlesborough, North Staffordshire, and North Wales, continues satisfactory. Quarter-day's prices being well maintained. The prices in London are the same as last quoted.

STEEL.—Swedish Keg, £19 to £20.

COPPER.—Sheating, 11½d. Yellow metal, 9½d.

TIN. 136s. for block; 137s. for bar. Tin plates, best charcoal, I. C., 31s. to 32s. 6d. per box.

LEAD.—English Pig, £21 5s. to 21 15s.; shot, £25; sheet, £22 5s. to £22 15s. Spelter, £20 to £20 10s. Zinc, English Sheet, £27. Quick-silver, £7 per bottle.

EXPORT OF METALS TO CHINA.—The exports for July have been 865 tons of bars and nail rod; 6 tons of copper sheating; 27 tons of yellow metal pig-head, 129 tons; 4 tons of sheet lead; 25 tons of spelter, and 307 bottles of quicksilver.

MANCHESTER MARKET.

The market is fully as quiet as at any time during the past week, and prices continue to droop. The letters received by the India mail are generally found to be unfavourable from Bombay and Calcutta, as well as from China. They have consequently rather tended to weaken prices than otherwise. A comparison of prices with what they were at the commencement of last month shows a very heavy decline in yarns and cloths of all descriptions; but against this must be placed a fall of ¼d. to ½d. in the value of raw material. 7-8 printing-cloth, which still holds about the strongest position of any kind of cloth (though calico-printers are by no means as busy as they were a short time ago), is about 1½d. per piece lower; 9-8 ditto, 1½d. to 4d. per piece lower. In T-cloths there is some irregularity, but they may be quoted 1½d. to 3d. lower; and longcloths have given way to the same extent.

CASUALTIES.

The Solides (French ship), Forneau, which arrived at Havana on June 26, from Macao, with coolies, had been on shore on Cape Verde, near Meritas, but got off with the assistance of a boat's crew from the Crusader.

The O'Thyen, Addicks, from Sourabaya to Rotterdam, put into St. Helena June 7, very leaky, and was ordered by the surveyors to discharge the cargo between decks. A further survey has been held, and the leak found to have decreased five inches, the vessel making then only four. She has been recommended to have her top sides caulked, and proceed for her destination. The cargo landed is to be forwarded, and is being loaded by the Renshaw and Circassian (schooners).

The Admiral de Ruyster de Witt, from Passaverang to Amsterdam, put into Simon's Bay June 8, leaky, and with part of cargo thrown overboard, and is discharging the cargo to get at the leak.

The Tellus (Hambro ship), from Batavia, was spoken, June 8, in lat. 35 S., long. 21 E., with loss of fore and main-topgallant masts. Helvoet, July 29.

The Henriette Elizabeth Susanna, Meyboom, bound to Sourabaya, has anchored near Goree, after being aground on the North Pampers.

The Red Gauntlet, Lucas, which arrived at New York, July 25, from Shanghai, reported having passed May 23, in lat. 36 S., long. 24 E., during a heavy gale from N.E., large quantities of wreckage, consisting of wheel-houses, bulwarks, deck-houses, &c., apparently but a short time in the water.

MAURITIUS, June 14.—Hurricane, Campbell, from Singapore for Bombay, with loss of sails, yards, &c., during a hurricane, in lat. 7 S., long. 83 E.
June 29.—Borderer, Shewan, from Akyab, to stop a leak in her upper works; she sailed July 4, for Falmouth.

July 7.—The Mary Sparks, Chase, from Akyab to Liverpool, put in here June 12, having been thrown on her beam ends, and had to cut away her main and mizen masts, during a hurricane, May 30, in lat. 14 S., lon. 79 E. She has also discharged nearly all her cargo.

The Harlequin, Singer, from Batavia to Rotterdam, put in here July 3, leaky, and was discharging cargo.

FREIGHTS AND CHARTERS.

Messrs. Seymour, Peacock, and Co. say:—Berth freights are offered at 50s. to 52s. 6d. per register ton for Bombay; 32s. for Calcutta; 43s. 9d. for Kurrachee; 60s. for Madras, &c. For coals rates are still low, and must improve materially before any extensive business can be done. The quotations are:—Aden, £45; Bombay, £36; Kurrachee, £40; Calcutta, £44; Singapore, £37; Andamans or Rangoon, at charterer's option, £35; Madras, £40; Hong Kong, £58; Shanghai, £63, &c. &c. Bristol Channel to Hong Kong, 57s. 6d. is freely offered, and the rate is very firm; and for Manila ready ships are worth 54s. From St. Nazaire to the Shanghai River, 75 francs per ton is offered for stores, weight and measurement, with the option of retaining the vessels on time charters at 75 centimes per register ton per month.

Messrs. W. S. Lindsay and Co. say:—At this season of the year there is usually a certain degree of flatness in the freights from London to the East, and in the present instance it has been increased by the unfavourable advices from abroad as to the markets for our manufactures. The Government have, however, been sending out both troops and soldiers' families, which operation has relieved the market considerably, so that we have now a very small supply of shipping on the berth; and as by last advices the markets showed symptoms of recovery, we expect outward freights will again look upwards.

Homewards, quotations have been well maintained, and a fair business has been done at 80s. Teak from Moulmein to United Kingdom, and 50s. to 82s. 6d. U.K.; 85s. Continent; 90s. Mediterranean. For rice there has been an active business at 62s. 6d. U.K.; 65s. Continent from the usual range of ports; orders at Amherst. In the Australian trade there is rather more readiness to charter, but no perceptible advance has taken place in the rates. Rates of freight current for vessels on berth to Shanghai, 60s. per ton dead weight; 45s. per ton of 40-foot measurement. To Hong Kong, 50s. weight, 45s. measurement. To Singapore, 35s. to 40s. weight or measurement. To Manila, 35s. and 40s. To Japan, £5 weight, 90s. measurement. To Batavia, 50s. weight, 40s. measurement. At the United States—to Shanghai, coal and measurement goods, \$9 to \$10.

INSURANCE.

No change in our last voted rates.

At MAURITIUS.—June 29, Rubens, Harraneder, from Singapore. 7, Julien, Edouard Loizell, for Singapore. 19, Deux Jumeaux, Bernard, for Shanghai (after repairing). 30, Ville de Cannes, Barbe, for Singapore. July 2, Lebanon, Hamilton, for Woesung.

At St. Vincent, C.V.—July 16, Ly-ee-Moon (s), Hill, from Southampton, and left 19th for Hong Kong. June 23, Lavinia, from London, and sailed 27th for Siam. 28, Lewevan Neyenastein, Lamers, from Amsterdam, and sailed 30th for Batavia.

NOTICE TO PASSENGERS BY THE OVERLAND ROUTE, via EGYPT.

PHILIP ZECH, Proprietor of the two well-known Hotels in Alexandria, the Hotel d'Europe, and the Peninsular and Oriental Hotel, begs to inform his friends, and Travellers in Egypt in general, that he has purchased the celebrated HOTEL in CAIRO, which will still continue to bear the same name; and in returning thanks for the extensive patronage enjoyed by his two houses in Alexandria, hopes that the preference may likewise be extended to his house in Cairo, which will be managed in first-rate style, and in a manner intended to give every satisfaction to its frequenters, both as far as table, wines, internal and external service are concerned. Many alterations and ameliorations are being carried out at the present moment.

Curtis on Manhood.—New Edition.—A Medical Essay on Nervous Diseases.

Just published, the 120th thousand, with numerous plates in a sealed envelope, price half-a-dollar.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE, with plain directions for perfect restoration to health and vigour. By J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

CONTENTS:

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhoea and Impotence; Early Vicious Indulgences; Dangers of Neglect.

CHAPTER III.—A Review of the various Disqualifications of Marriage—whether resulting from the Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection.

CHAPTER IV.—The Author's plan of Treatment, Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhoea and other Urethral discharges by microscopic examination.

CHAPTER V. and VI. on the modern Treatment of Gonorrhoea and Syphilis.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

"We feel no hesitation in saying, there is no member of society by whom the book will not be found useful—whether such person hold the relation of Parent, Preceptor, or Clergyman."—Sun.

Mr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by letter, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Mr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty Years; nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINMAN, QUEEN'S ROAD, HONG KONG.

To prevent disappointment be sure of asking for Piesse and Lubin's Perfumery.

HOLLOWAY'S PILLS are renowned as a safe and salutary remedy for Indigestion, Liver Complaints, and all manner of eruptions and skin diseases. Pains in the stomach after eating, evictions of wind, pains in the back, aching of the right shoulder, weakness, languor, and tawny hue of the skin all disappear under the purifying powers of these admirable Pills. They contain no ingredient which could by possibility hurt the feeblest frame. They effect a momentous change throughout the system by thoroughly expelling all impurities, and imposing on every organ its natural functions. Many testimonials of their efficacy can be produced, the latest of which has been forwarded by Edward Smith, of Newport, Monmouth, who was cured after wasting under Dyspepsia fifteen years.

COPLAND AND CO.,

Original Preservers of

JAMS, JELLIES, MARMALADE, Etc., in Hermetically Sealed 1 lb. and 2 lb. Tin Cases. WHOLESALE AND EXPORT OILMEN, 80, Bury-street, St. Mary Axe, London, E.C.

JOHN GOSNELL AND CO.'S PERFUMERY, PATRONISED BY HER MAJESTY and the ROYAL FAMILY.

Among the celebrated articles for the Toilet prepared by J. G. and Co., the following are of the choicest kind, and universally admired:—

JOHN GOSNELL and Co.'s COURT PERFUMES.—Queen Victoria's Bouquet, The Bride's Bouquet, Jockey Club, Guard's Own, Ess Bouquet, Military, Royal Yacht Club, New Perfume—Extract of Flowers, Eugenie, Napoleon III., Frangipani, Wood Violet, Opera Bouquet, &c.

JOHN GOSNELL and Co.'s FOUNTAIN PERFUMES for the BALL-ROOM.—A most elegant and useful invention, which cannot fail to be appreciated by the Ladies.

JOHN GOSNELL and Co.'s TREBLE DISTILLED LAVENDER WATER possesses in the highest degree the full fragrance of the flowers.

JOHN GOSNELL and Co.'s REAL OLD BROWN WINDSOR SOAP.—A Toilet Soap of the finest quality and very superior fragrance. It differs so widely in composition from the ordinary Alkaline Soaps, that its frequent use is highly beneficial in removing all harshness and redness of the skin.

JOHN GOSNELL and Co.'s MOELLINE, GOLDEN OIL, for the Hair.

JOHN GOSNELL and Co.'s INSTANTANEOUS HAIR DYE.—The only Hair Dye which produces a good natural colour with perfect certainty, and with the least possible trouble.

JOHN GOSNELL and Co.'s PATENT TRICHOSARON.—The obvious utility and improved construction of the Trichosaron Hair Brush adapt it for general use, and render it the most suitable Hair Brush for the Toilet. Sold by all Perfumers, Chemists, &c.

JOHN GOSNELL and Co.'s STEREOESMIC TOOTHBRUSHES, highly recommended by the most eminent Dentists.

JOHN GOSNELL and Co.'s ESSENCE of GINGER.

Merchants and Shippers supplied on liberal terms. 12, THREE KINGS COURT, LOMBARD-STREET LONDON.

Orders received through Mr. GEORGE HOLMES, Hong Kong; Messrs. SMITH, TAYLOR, and CO., Bombay; Mr. J. HUGGINSBOTHAM, Madras.
MANUFACTURERS TO THE GOVERNMENT, BANK OF ENGLAND, &c. ILLUSTRATED CATALOGUES ON APPLICATION.

BLAIR'S GOUT and RHEUMATIC PILLS.

Price 1s. 1½d. and 2s. 6d. per box.

This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century to demonstrated by unsolicited testimonials from persons speak of a cure for the Gout was considered a romance; but now the efficacy and safety of this medicine is so fully in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age. These Pills require no restraint of diet or confinement during their use, and are certain to prevent the disease attacking any vital part.

Sold by all medicine vendors. Observe "Thomas Prout, 229, Strand, London," on the Government Stamp.

FOR FAMILY ARMS.—Send Name and

County to the Royal Heraldic Studio and Library; in a few days you will receive a Correct Copy of your Armorial Bearings. Plain Sketch, 3s.; in Heraldic Colours with written description, 6s.; Large Size, 12s. Family Pedigrees, with original grant of Arms, to whom and when granted, the origin of the name, all traced from authentic records, fee Two Guineas. An Index, containing the Names of nearly all persons entitled to use Arms, as extracted from the British Museum, Tower of London, Herald's College, &c. &c. The Manual of Heraldry, 400 Engravings, 3s. 6d., post free, by T. CULLETON, Genealogist, Lecturer on Heraldry at the Mechanics' Institute, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C. The Heraldic Colours for Servants' Liveries, 6s.

ARMS, CRESTS, &c., Engraved in the Best

Style. Crest on Seals or Rings, 7s. On Steel Die, 6s. Initials, 1s. 6d. per Letter. Book Plate, Engraved with Arms, 10s.; or Crest, 5s. Postage and Registered Letter, 1s. extra.—T. CULLETON, Heraldic Engraver by Appointment to the Queen, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

SOLID GOLD RING (18 Carat, Hall

Marked), Engraved with Crest, 42s.; Large Size, for Arms, 75s. On receipt of P. O. order the size will be sent to select from.—T. CULLETON, Seal Engraver, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

STAMP YOUR OWN PAPER—with Arms,

Crest, Initials, or Name and Address, by means of CULLETON'S PATENT EMBOSSEING PRESS, 15s. Best Make, 21s. Any person can use them.—T. CULLETON, Die Sinker to the Board of Trade, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

WEDDING CARDS—For Lady & Gentle-

man—5s. each. 50 Embossed Envelopes, with Maiden Name printed inside, 13s. Visiting Cards—A Copper Plate engraved in any style, with name and 50 Card, printed for 2s., post free. N.B.—All orders executed by return of post, for stamps or cash. T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

FAMILY ARMS, &c., Emblazoned for Paint-

ing on Carriages or Needlework, 6s.; Best Style, 12s., Gothic and Modern Monograms Designed, 5s. Arms Quartered, Impaled, and Painted on Vellum, according to the laws of Heraldry. By T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

THE PEN SUPERSEDED.—Mark your

Linens. The best and only method of Marking Linens, Silk Stockings, Coarse Towels, or Books, so as to prevent the Ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATES. By means of this novel invention a thousand pieces of linen can be marked in a few hours. Initials, 1s. each; Name, 2s. 6d. Set of Moveable Numbers, 2s. 6d.; Crest Plate, 5s., with the necessary directions for use. Post free. Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c.

"Several trials with Mr. Culleton's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters are beautifully marked in a deep black colour, without blotting, and after a long boiling, with either potash or soda, they remain unaltered. Other plates which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Culleton's Plates are incorrodible, and will not hurt the finest fabric.—(Signed) "SHERIDAN MUSPRATT, "College of Chemistry, Liverpool."

"May, 15, 1864."

All orders to be sent to the Patentee and Sole Maker. T. CULLETON, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

All Orders executed by Return of Post.

List of Passengers.

PASSENGERS INWARD.

From Hong Kong.

For Singapore.—Mr. C. H. Williams. For Alexandria: Mr. H. H. Warden. For Marseilles: Mr. and Mrs. Tilton, and child, Miss E. Garrett, Messrs. W. Hutchinson, Francis Porter, F. M. Harrast, and G. Anderson. For Gibraltar: Messrs. J. M. Castilla, and D. Andie Sauchey, and European servant. For Southampton: Mrs. H. Dent, child, and servant, Mrs. Major, child, and European servant, and Mr. Alex. Kerr; Mr. Westphal, 2nd class.

PASSENGERS ARRIVED OUTWARD.

At Hong Kong.—Per Henry Moore, from Madras: Major Slade, Lieut. Dogan, Sidney, and Hubbuck. Assistant-Surgeon Birkett, and sixty-two non-commissioned officers and men of the King's Dragoon Guards, twelve men of the 44th regt. Foot, and 103 native followers.

Per Fairy.—From New York: Messrs. Thomas A. Morris, Courtland Wood, Edmund De Grul, and Benjamin Priche.

Per str. Cadiz.—From England: Major Snel, Surgeon Palmer, Messrs. Coffen Wallis, D. Dickens, jun., La'au, Rusden, Reiden, Ewing, Mr. and Mrs. Merceden and son. For Shanghai: Messrs. Croix and Plate.

PASSENGERS OUTWARD.

Per P. and O. str., 20th August.—From Southampton to Singapore: Mr. and Mrs. Mohr and child, Mr. Imneron. To Shanghai: Mr. Bryan, Mr. W. Watson. To Hong Kong: Mr. and Mrs. C. T. Steel, Mr. W. H. Harton, Mr. C. Hagen, Mrs. Hanley, Mr. W. Durbrom, Mrs. Rutherford, Mr. E. Carpenter, Dep. Comy. Gen. Napier, Messrs. F. Egan, G. Muir, and G. V. Hart. From Alexandria to Hong Kong: Mr. J. F. Trautman. From Marseilles, 26th August, to Singapore: Mr. W. Van Oimmeren, Miss E. Fortiguier, Miss Kool, Mr. and Mrs. Paddy. To Penang: Mr. H. Paddy and Mr. H. L. Smith. To Hong Kong: Staff-Surgeons Hanley, Cunningham, Burdon, McNab and Cross, Rev. Mr. Halfen, Messrs. F. Cholmley, J. G. Austin, W. C. Austin, Roney. To Shanghai: Messrs. E. Cordier, A. Daler, A. Philippe, and E. Boussehat.

Per P. and O. str., 4th Sept., from Southampton to Hong Kong: Mr. T. F. Collaghan, Mr. C. H. Platt, Rev. G. and Mrs. Wyde, Vet.-Surgeons J. M. Wilson, W. Appleton, and R. Marshall, Lieut. Pauli, Mr. L. Wicse. To Singapore: Mr. and Mrs. H. Dielwart. To Shanghai: Mr. H. W. Hardy. From Marseilles, 12th Sept.—To Singapore: Madame Mathey, Mr. C. Deelman and son.

Per P. and O. str., 12th Sept.—From Southampton to Hong Kong, via Bombay: Mr. C. Lynill.

Per P. and O. str., 20th Sept.—From Southampton to Singapore: Mrs. Bernard and infant. To Hong Kong: Mr. H. Dickinson, Mr. A. H. Roberts, Capt. Cahill, Mr. and Mrs. W. Cole and daughter, Mr. Maslin. To Penang: Mr. A. Cree. From Suez to Penang: Mr. E. J. Leveson and friend.

Per P. and O. str., 27th Sept.—From Southampton to Shanghai: Mrs. Marshall, Mr. Maclean. From Marseilles, 5th Oct.—To Hong Kong: Mr. and Mrs. T. Borrodale.

Per P. and O. str., 4th Oct.—From Southampton to Hong Kong: Mr. G. Smith, Miss Harmer, Mr. and Mrs. Dixon. To Shanghai: Mrs. Davies. From Marseilles, 12th Oct. For Hong Kong: Messrs. J. D. G. bb, E. F. Parker, and R. Westall. To Singapore: Mr. Matzen, M. and Madame Deschaux and infant. To Shanghai: Mr. and Mrs. J. P. Tate. From Alexandria to Singapore: Mr. R. B. Reid.

Per P. and O. str., 20th Oct., from Southampton to Singapore: Mr. and Mrs. Gemmell, Mr. L. van Pabst. To Hong Kong: Mr. F. Pereira. From Marseilles, 28th Oct., for Singapore: Mr. and Mrs. C. Hill and infant, 3 children, Miss Symons and governess.

To Hong Kong: Mrs. Murray. From Alexandria to Hong Kong: Mr. J. Hogg.

Per P. and O. str., 12th Nov.—From Marseilles to Singapore: Mr. and Mrs. Hennecken and infant, one lady, and two children, Mr. and Mrs. E. Cunningham.

Per P. and O. str., 20th Nov.—From Southampton to Hong Kong: Mr. Padder, Miss Alexander. From Alexandria to Penang: Mr. and Mrs. C. J. Leveson. From Marseilles, 28th Nov.—To Hong Kong: Mr. L. Josephs.

Summary of News from the Far East.

THIRD CHINA WAR.

GULF OF PECHILI, June 24th.

(FROM A SPECIAL CORRESPONDENT.)

We have just arrived here, after a most tedious passage from Hong Kong. About half way the north-east monsoon—which seems to have had a most remarkable antipathy to the Allied forces—commenced to blow with such strength that we could make no headway, encumbered as we were with two large sailing vessels and a gun-boat in tow. We therefore took refuge in Lam-yet Bay, and whilst there I was enabled to jot the following remarks upon it:—It is skirted by a sandy beach, which rises in irregular masses, hills apparently composed of large, loosely-connected boulders of dark grey stratified rock—not, however, exceeding in height 250 feet, and at places the shore rising but a few feet for many miles inland. From the shallowness of the water we were unable to approach within two miles and a-half of the shore. This peculiarity seems to extend along the whole coast of China, and I am informed that at the Gulf of Pecheli (where we are now anchored) the water is so shallow that, at those seasons of the year when northerly winds prevail, it is little better than a mud flat, where vessels of any tonnage are unable to find sufficient water. The continuance of the north-east monsoon until the present time has no doubt had an influence upon the movements of the fleet, and the delays which have occurred are perhaps more to be attributed to a judicious foresight than to red-tape influence. That such will be the published reason, I do not doubt, but I shall accept it with a certain mental reservation, not doubting but that some of our former British admirals, such as Nelson, Howe, St. Vincent, and a few other notable impetuosities would have looked with "the blind eye" at such obstacles.

To return to Lam-yet Bay, having described the natural features, I may add that by the help of a powerful glass we were enabled to distinguish some marks of humanity, though so far different from that which a telescope would have discovered on an English shore, as perhaps almost to justify an opinion that they were caused by the partial settlement of migratory tribes.

There were wanting those signs of cultivation which so distinctly mark the approaches of a coast inhabited, as I was given to understand, by the most industrious race of the East; we saw indeed green patches of verdure, but beyond that and a few huts hardly worthy to be compared with an English barn, there seemed to be desolation as primitive as the rocks which were washed by the slightly breaking water. It required remembrance of the Rhenish vineyards to fully estimate the labour which had taken advantage of each partially levelled space to transform them into the lines of emerald green, which, crossing the sides of the hills, revealed the hand of man. Around our ship occasionally passed shoals of fish, and the numerous stakes driven into the mud flat, and visible as forming a continuous line along the coast, showed how much the inhabitants of this inhospitable region depended for support on the fish which abound on this coast and furnish almost all the animal food consumed by them.

With this exception I have nothing to send you, for the mail is leaving only two hours after our arrival and I have only time to cast a hasty glance around the bay where at least fifty vessels are waiting the arrival of Lord Elgin. We have no news from Hong Kong, and are, therefore, rather behind hand with you, who will have heard by the last mail from there the really important information,—when we left he had not, though hourly expected, arrived, and we are, therefore, in *statu quo*. By the next I hope to be able to afford you some really valuable news, as by that time we shall have heard something definite I presume about future operations. We are now only at rendezvous, and, of course, our ulterior destination has not been published.

TA-LIEN BAY, 24th June.

Another correspondent reports arrival at this place. Admiral Jones was there, with over 100 craft of various descriptions. Admiral Hope left Shanghai on the 20th, and was hourly expected, as also Sir Hope Grant. The villagers are shy, and indeed have mostly gone in the interior. Junks cannot be hired, the crews all decamp. "The land around is bold, hilly, and looks very barren, with few villages, and those very small. One large mountain—'Sampson Peak,' rises to the height of 2,213 feet, and is useful, in clear weather, as a guide for ships making the land. The bay itself is a noble sheet of water, and tolerably well protected; it is ten miles deep, running north and south, and is not in the Korea, as Horsburgh makes it, but in the ancient province of Liau-tung, from whence came the Manchu dynasty which at present rules China. Its entrance is protected by the San-shan-tau Islands, which rise to about 500 feet; and from the larger bays, there branches off smaller bays, in one of which the greater part of the fleet is lying. The centre of the mouth of the bay is in latitude 38.52.54 N., and longitude 121.48.48 E.; it is about twelve miles to the westward of the place assigned it in the Admiralty charts."

CHUSAN, June 20.

The forces collected here have sailed for the Gulf of Pechelli in the *Imperieuse*, *Pearl*, *Scout*, *Adventure*, &c. The Marines embarked on board the *Pearl* and *Scout*; the Engineers, Artillery, and horses, on board the *Adventure*; the 67th were on board the *Cressy* and *Tasmania*, never having landed, while the 99th, with the exception of three companies, left behind until the Sikhs, who are to take their place, shall arrive, were distributed between the *Imperieuse* and the transport *Mars*, every hundred men taking ten of the Coolie corps with them.

The town is to be given up as far as we are concerned shortly. The Marine barracks are to be put in repair. A magazine and treasury has been constructed on Joss hill, and the various weapons of war surrendered by the Chinese have been removed to it. Four Canton braves were beheaded on the morning of the 8th at the North Gate. The execution was attended by several military officers. After seven blows one head was severed from the body. The executioner, on the completion of his bloody task, yelled with triumphant joy. The local prison, a veritable chamber of horrors, is now hardly less attractive than the Baker-street museum, or Mrs. Jarley's famous Wax-work show. The prisoners, wretched and dirty, crouch in heavy irons, and before their eyes is the *tcha*, the cage, and the bamboo. The troops are less healthy than they were, but one case only has proved fatal. Ophthalmia is very prevalent. It is the old story, and its propagation puzzles the doctors. Chin-ti, the chief military Mandarin, has given a dinner to some of his English friends. The dinner consisted of twenty-seven courses, and there was champagne to the mast head.

HONG KONG, July 8.

Lord Elgin left this for the North in the afternoon of the 23rd June, in H.M.S. *Feroze*; and Baron Gros, on the 24th, in H.M. steamer *Saigon*. They arrived at Shanghai on the 29th and 28th of June, respectively; and would leave for the North immediately.

JAPAN.

Dates from Kanagawa and Nagasaki reach to the middle of June, but nothing in the shape of news is reported through either Hong Kong or Shanghai.

CHINA.

PEKING.

No intelligence, directly or indirectly, is reported from the Capital, and nothing is known. The impression remains that the utmost resistance is to be shown at the Taku forts.

SHANGHAI.

The U.S. frigate *Powhattan* paid a visit to Howulhi on her way to San Francisco. After some official correspondence between Mr. Borden, the United States Commissioner, and Mr. Wylie, Minister of Foreign Relations of the Sandwich Islands, it was arranged that the ambassadors should be presented to the King and Queen at their palace. The purport of the visit is not announced. The British resident paid a tribute to Commander Tatnall, of the *Powhattan*, for his conduct at the Peiho last year.

The London mails of 26th April and 10th May arrived on the 27th June.

The *Norfolk China Herald*, of 23rd June, has the following in connection with the expedition. H.M.S. *Coromandel* (tender to the flag-ship), chartered steamer *Granada*, and H.I.R.M. gunboat *Djight*, arrived on Saturday last, whilst we were preparing for the press. The *Coromandel*, with Vice-Admiral James Hope, C.B., on board, left again on Wednesday morning, to join the *Inflexible* at the Amherst Rocks, in which ship he will hoist his flag and proceed to the rendezvous at Ta-lien-Hwan, Gulf of Pecheli. The *Granada*, which also arrived on Saturday, left yesterday morning for the same destination, having on board Lieutenant Sir H. Grant, commander-in-chief, and suite.

The Members of the Russian Legation who arrived by the *Djight* are—General Ignatieff, of the suite of his Majesty the Emperor of Russia and his Envoy Extraordinary in China; Aide-de-Camp, Captain of the guards, Balluseck; Chinese Secretary, Mr. Tatarinoff; Secretary of Legation, Mr. Wolf; Attaché Capitaine en second of the guards, Seifart. The Squadron is commanded by J. Tchikhatchof, Capitaine de Vaisseau. There now remain in port, of H.M. Ships, the *Furious*, fitted for the accommodation of the British Envoy and Suite. The *Cruiser*, to take up the next mail to the Gulf, the *Roebuck*, the one following; the gunboat, *Kestrel*, to convey the next mail to Chusan, and the *Nimrod*, to remain here for the present. Also the *Octavia* (15 W.) and *Thunder* (15 R.) transports. Of the French forces there are in port and at Woosung—*Alon*, *Prah*, *Dragonne*, *Du Chayla*, *Forte* (in dock), *Hongkong*, *Kien-chau*, *Loire*, *Marne*, *Meurthe*, *Mitraille*, *Prigent*, *Renommée*, *Sabne*, and *Vengeance*. In addition to the above, there are H.I.R.M.S. *Djight*, *Japanese*, *Sveltana*, and *Passanadia*, and U.S.S. *Hartford* and *Saginaw*. The force on shore for the protection of the city and settlement remains as before. A fleet of upwards of 200 Chinese boats, large and small, which had collected together off the city, being viewed with suspicion by the authorities they requested the foreign consuls to assist in examining them, and on Tuesday last, they were ordered to proceed down the river. They passed the settlement displaying various flags, and firing guns, proceeded to Woosung, where some were overhauled by the French Naval Authorities. They then stood out and were lost sight of, it not being ascertained if they went northwards up the Yang-tze, or southwards.

H.I.M.S. *Forte*, of 60 guns, was hauled into the Old Dock. It was very dark and foggy, but the operation was successfully performed without the least damage or difficulty, a circumstance reflecting great credit on all those engaged in the work. The entrance and blocks carried 17 feet 3 inches, great labour and expense having been incurred in deepening it. This event is important as marking the progress of Shanghai.

A meeting of Land-renters had been held, at which Mr. Consul T. T. Meadows said:—

"With reference to the barriers to be erected, he had received a communication from the district magistrate stating that certain leading Chinese in the settlement had presented a petition setting forth their desire to establish what

he (the consul) would shortly describe as a police-station with a police force or separate armed body of Chinese under the control of Chinese only. To this he had returned a decided negative, and had requested the magistrate to direct the proposers of the scheme at once to desist."

The *North China Herald*, on this, takes occasion to make the following comments:—

"Mr. Meadows is regarded by some, who have not attended to all he has said, as an extremely ardent partisan of the Taepings. This is, however, a mistake. It has been induced, not unnaturally, perhaps, by his steady defence of their position, rights and conduct. But the real object of that defence has always been to prevent interference with the internal affairs of this country, in the only shape in which interference has hitherto threatened to take place, viz., as an attack on the Taepings. In one or two places in his work on Chinese rebellions, he does, indeed, express a qualified desire for their ultimate success. But his avowed reason for this is but another proof of his true position; which is not that of an ardent admirer, still less of a hater of either of the parties struggling for power, but that of a friend of the Chinese nation. In the adoption and publication by the Taepings of a foreign missionary translation of the Christian Bible, he saw a hope, if they should establish themselves in power, of an assimilation of national fundamental beliefs and of a consequent growth in our relations with the Chinese, of a spirit of friendliness and, above all, of justice, rendering possible a peaceable extension of free intercourse and of commercial privileges."

It is reported that the U.S. frigate *Hartford* arrived at Shanghai, but left almost immediately to avoid, it is said, the responsibility of protecting American citizens which they could not properly do.

PROGRESS OF THE REBELLION.

There is no news that indicates positively any change in rebel affairs. The presence of the Taepings in Soochow is put beyond doubt by a visit of some missionaries. They were well received. Chin-kiang is stated to be still in the hands of the Imperialists, and the rebels are said to be excluded, not by the Government, but the people, from some other places along the canal. Long-haired men have however been seen as near Shanghai as Tai-tsang, and the whole country south of the latter to within a few miles of the former city has been disturbed by outlaws whom, whatever their denominations, there are neither troops nor civil power to keep in check. At the other end of the canal, at and in the neighbourhood of Hangchow, government is evidently stronger. Chang Yuh-liang, the only Imperialist general of note who has survived the Nanking disaster, is said to have collected a force in that neighbourhood. Kia-hing is notwithstanding still in the hands of the rebels. Ho Kwei-tsing has been degraded, and is to go to Peking a prisoner. He is succeeded as governor-general of the Kiang provinces by Tsang Kwoh-fan who is supposed to be, also with a force, at some place west of Hangchow; and as Imperial Commissioner for the superintendence of trade by Sieh Hwan, formerly associated with Ho, as assistant commissioner. Alarms in this neighbourhood induced the Allied commanders to detach strong parties of their force to places some miles inland, and it is probably owing to this that Kia-ting (Kading) is quiet again. We understand that these posts will be all called in on the 30th.

NINGPO.

No further intelligence has reached us from this port. By last accounts everything was quiet.

FOO-CHOW-FOO.

A correspondent of the *China Mail*, under date 30th June, writes:—

The Dragon-boats have been exhibiting lately, and on the 22nd their celebrated day came off in a race between some Canton lorchamen and a party of Chinchew sailors. Somehow or other the boats of the two parties came to a collision in midriver, which led to squabbling and fighting. This scene of turmoil continued occasionally through Saturday the 23rd, resulting in the Chinchew people breaking the heads of some of the Cantonese, which, of course, the latter resented. During the 23rd and 24th the injured party determined to take vengeance, and having (we presume) numerous connections among the pirate-lorchas outside and the West Coast fry, telegraphs were issued to them to come up the river forthwith to the rescue of their countrymen the Canton boatmen. During the early part of Monday the 25th, from nineteen to twenty lorchas, manned and armed, arrived and anchored in battle array in the middle of the stream, just below the great bridge, with cannons primed, warlike streamers flying, and perched on mainmasts those what-do-you-call-'em pots. Notice had been given early in the morning that the Cantonese were bent on a pitched battle. All this looked like it, and the natives too began to think that it also looked so. At one o'clock in the afternoon they realised their worst fears, for off went the lorchas guns, boom-boom-boom. The shot fell recklessly at first, but subsequently they were directed towards the north bank of

the river, battering houses down, and bruising, they say killing many of the peaceable inhabitants.

During all this while the Chinchew natives—against whom, it was alleged by the Cantonese, this stroke of vengeance was meant—seemed to be quiet; but they acted quietly in kidnapping Canton passengers, maiming them, and robbing them. Tuesday and Wednesday, threatened attacks were rumoured, and capturing of Cantonese went on, so that no Canton servant dared to walk through the street or across the bridge; and then from the terror inspired by the Canton lorchamen, shops all in the neighbourhood were closed, no business done, families and valuables were removed, and the most strict watch kept everywhere. Fortunately this state of uneasiness in the public mind has now nearly subsided; but at one time it looked rather distressing.

During all this, what did the Mandarins do? The Prefect and others came down to Middle Island, and held a conference for one or two days. They applied to the Foreign Consuls for aid, but were told that foreign powers could only interfere when either party molested or injured a foreigner or his property. They confessed themselves afraid of those Canton lorchamen, &c., and in proof thereof, on Tuesday after, bolted right into the city, leaving Middle Island deserted, and of course increasing the panic among the people, who at once left the locality in crowds.

During all this, what did Foreign Consuls do? They held their meetings and their confabs; but the long and the short was the American man-of-war *John Adams* had her men brought up, some eighty of them, ready for any emergency. This allayed the somewhat anxious fears of foreigners. It was a good thing we had the *John Adams* here, but it would have been better to have had an English gun-boat also.

And what was the cause of all this row? The officials in their public proclamation speak of the occasion being merely a quarrel in words, and are prompt in the exclamation, "Behold, how great a matter a little fire kindleth!" But the Canton party has probably two reasons for this rude assault. They admit the fight in words on the 22nd; but that very likely was taken as the opportunity for demanding or trying to enforce two demands. The first of these two demands, one that the Cantonese openly acknowledge too, is the redress of wrongs done them last year—redress which they say was promised them, and has not been conceded yet. The other demand they have not themselves acknowledged; but we learn it of the natives—that some of their comrades, pirate companions, had been seized last month, and were now in the city prison. They demanded their being given up. The Mandarins not only refused this, but, to put their release out of the reach of possibility, they immediately beheaded them. It is more probable that these two are the real grounds of this assault. For it appears very strange that nineteen or twenty armed lorchas should be hanging about the mouth of the river, to prepare for any contingency like that named in the Mandarin's notice, as "a war of words in a race for dragon boats."

The greater probability is the affair has been concerted, and the plot has been to revive the quarrel, which occurred between the same parties exactly this time last year. They know well the weakness and timidity of the local authorities, and that they are powerless with all their parade of a Tartar general and a Tartar garrison. We believe that, but for the apprehension of getting themselves embroiled with foreigners, these Canton lorchamen would have proceeded further than they have done, and not quietly laid down their arms as they seem to do for the present.

AMOY.

There is nothing further than the usual Market Report from this place. Business was proceeding satisfactorily.

SWATOW.

The British Consul, Mr. G. W. Caine, has proceeded to this port, and next mail will probably bring intelligence of the Consulate having been opened.

HONG KONG.

The London mails of 26th May, arrived on 6th July, 41 days *en route*.

The Earl of Elgin and Baron Gros left for Shanghai on the 23rd and 24th June, and nothing remains here now connected with the expedition.

The opposite shore of Kowloong is now being studded with mathouses for the accommodation of troops. This place, or rather the small village of Cheem-sa-choey, has long been the resort of robbers and pirates, where they could concoct their

designs without let or hindrance; and is also sufficiently near Hong Kong to afford them every facility. But they have lately been rather sharply dealt with, our authorities having made a raid upon the houses there, and taken away all their arms.

A seaman was murdered on board the British ship *Epsom*, at Whampoa, and the criminal was tried here. An extra sitting of the Supreme Court took place for that purpose, when the jury returned a verdict that the prisoner was insane.

Mr. Rawlings, whose plans were accepted for supplying the town with water, goes to England shortly, to make arrangements for the works. No plan for draining has yet been fixed on.

A meeting of the Legislative Council was held on Monday, June 2nd, pursuant to notice. The subjects submitted for discussion were two ordinances—one, an ordinance to establish a marine court of inquiry in Hong Kong, about which we shall have something to say in next issue; and the other to procure and regulate a supply of water for the city of Victoria. The Governor stated that arrangements had been made for the carrying out of Mr. Rawling's plans, and that the ordinance appropriated £30,000 to defray the expenses of the works. The report of the committee which approved of Mr. Rawling's plans, had estimated the cost at £25,000, and Mr. Cleverly had estimated it at £23,000, but it was desirable to provide for contingencies. A rate of two per cent. would be levied, after the water was brought into the colony, to provide for the annual expenses of the works, which were estimated at £1,200. This rate would bring in between £2,000 to £3,000, but the Governor said that the surplus would be bare interest for the original outlay. The Ordinance empowered the Governor to raise a loan if requisite, but he remarked that there would be no necessity to resort to such a measure, as the revenue of the colony was in a most satisfactory state—that the expenditure for this year would not amount to more than £75,000, while it was estimated at £90,000; while, on the other hand, the income would be much in excess of that estimated. In reply to the Acting Chief Justice, the Governor said that the rate of 2 per cent. did not provide for the water being supplied to individual houses—that that would be a matter of private arrangement.

THE BRIDGES-TARRANT DIFFICULTY.

The *Daily Press* says:—

It is true that Dr. Bridges did say that if he received the amount of costs from Mr. Tarrant that he would give it to the charities. It is equally true that Dr. Bridges subsequently offered to forego the entire amount if Mr. Tarrant would quit the colony—and it is also equally true that Mr. Tarrant in reply offered to allow all matters between Dr. B. and him to drop, if the learned doctor would leave the colony and never return to it.

This is bad play on the part of Dr. Bridges. It illustrates most conclusively that the incarceration of Mr. Tarrant is entirely an affair between him and Dr. B., and simply indulged in for the gratification of the vindictiveness of the latter.

We are happy to say that a subscription list is being set on foot to relieve our contemporary from his present distressing position. The principle on which this subscription is based is the following—that the amount of bill of costs for which Mr. Tarrant is incarcerated is excessive, and that he has already suffered as much as the court and jury intended he should—that the proper amount he ought to be made to pay should be the same as that in the case of the *Queen v. Tarrant*, when the verdict was in his favour, the subscribers paying the difference."

A *fracas* has occurred with Mr. Tarrant, in consequence of a desire to remove him to another cell. He refused, and inflicted sundry blows on the guard attacking him.

The *Daily Press* has the following comments on the rebels at Shanghai:—

The Governor-general of the two Kiang provinces made the city of Chang-chow his temporary head-quarters, in order to be near the scene of action. It turned out, however, that both the resources and the prowess of the rebels had been entirely underestimated—for they actually left their entrenchments at Nanking and utterly routed the Imperial force, the remains of which shut itself up in Chang-chow with the Governor-general, which city the rebels were by last advices hotly besieging. Should Chang-chow hold out (which there appears little hope of) until reinforcements arrive, (which do not seem to be expected) the Imperial cause may in a measure be restored—otherwise Soo-chow, which for commerce and manufacture is the first city in China, must fall. So imminent is the danger, that the authorities have destroyed all its numerous bridges, and its valuable and extensive suburbs, in

order to remove any shelter outside the walls. Soo-chow is only about eighty miles from Shanghai, which latter is little more than its dependency.

Such an anomaly as the *solicitation* of the authorities addressed to an invading force to take possession of a large seaport, is perhaps without a parallel even in the incongruous disjointed records of foreign relations with China—and certainly if common sense and a sound judgment of probabilities are to be the guiding elements in prognosticating events, the circumstance can be made available to place the negotiations of the allied plenipotentiaries on a basis which must lead to a speedy and satisfactory solution of existing difficulties. That the insurgents possess resources is abundantly clear—that they have administrative capacity and a fixed polity there can no longer be any doubt about—and that their movements have been accelerated and devised from the contemplated Anglo-French attack on the Peiho, hardly admits of an argument. The effect of the movement of the allied powers on Peking will therefore clearly be to abandon the valley of Yangtze to the rebels—whilst the success of the allied arms at the North must inevitably destroy the present dynasty.

On the other hand, the knowledge of the Allied Powers eschewing all sympathy and connection with the Nankin insurgents, should, and probably will, tend to induce the Peking cabinet to listen to wise councils and meet conciliatory diplomatic advances in a proper spirit. The difficulty consists in satisfaction for the Taku attack, which, whilst it reflects disgrace on the allied arms, has elevated the ardour of the war party at Peking to an extent which may form a stumbling block to future relations, and render all concessions nugatory. The serpentine Peiho river is known to be fortified to such an extent as to make an attack upon its face out of the question.

There is, therefore, a hope that this disastrous war may be brought to an amicable adjustment. In so far as England is concerned, its origin reflects dishonour on her name—its progress discredit to her diplomacy—and, whilst the anarchy it creates destroys her import trade, her commerce is saddled with the expenses of the enemy, her exchequer drained by her own.

The following description of the acts of the Imperial Government in connection with the rebels has been published:—"Crossing the bridge, we saw a number of boats of all sizes, in which were whole families of refugees from Suchao and the vicinity. They don't seem on the whole to be badly off, except in the matter of exposure to the weather. But should the state of their native places compel them to stay here for any time, we may look out for no little misery. On the middle pier of this bridge hangs an awful memento for the edification of the passers by. The loving Government of China not only punishes but warns. Twenty-five human heads, but newly severed from the bodies, grace a stone pillar. Some are rudely suspended by the tail; some are placed in baskets. The executioner has evidently done his office in a clumsy manner, and, in not a few instances, the work must have been finished by the assistant's knife. The Chinamen seemed to regard the sight with feelings akin to satisfaction. They crowded around us to see what we were going to do; but, unless commiseration can be expressed by hearty laughter, there was none in their hearts for their ill-fated country."

CANTON.

The rebels appear to have dispersed into the interior. A mandarin force has arrived, which, it is believed, are intended to act against the Allies, if an opportunity offers.

PHILIPPINES.

MANILA.

The weather has been very boisterous during the last week, but now appears to be clearing up.

It was reported here that Spain is in a state of revolution, and the critical state of affairs in Europe has given rise to a good deal of speculation, and which has at length apparently settled down into the belief entertained by all good Catholics, both churchmen and laity, that England will in the end terminate all questions by adopting a policy utterly at variance with that of the present Great Influencer of affairs, and, in union with the Great Catholic Powers, take up the cause and fight the battle of the Pontiff King, and re-establish peace and order on a firm and enduring basis.

The crew of an English vessel, name unknown, had mutinied while off the coast; no particulars have reached.

COCHIN CHINA.

The accounts of repeated attacks by the natives on the French at Saigon is confirmed, and their position is considered hardly tenable.

SIAM.

BANKOK.

The Siamese, under safe cover of their friendly treaties, evince no interest in the China war, beyond a pecuniary growl from shipowners, anent what they style a stupid bobbery; but the complete conquest of China is looked upon as certain.

It is thought an observatory will be established here, with teaching to instruct naval cadets in navigation. Mongkat, the King, has no Consuls abroad. This is a want which must soon force itself upon attention in the direction of China trade, intercourse being greater with that country than the sum total of all other nations with Siam. The communication between Bankok, Pakenham, and the shipping at the bar, is somewhat irregular and expensive at present, being solely performed by the tardy means of rowing; there is some prospect, however, of a steamer being put upon the passage for the regular conveyance of mails and passengers.

The study of the Siamese language has been greatly facilitated by the lexicons of Bishop Pallegoix, who has been thirty years in Bankok. Mr. Chandler has left and Mr. Goodall has taken his place in the U. S. Consulate. Cholera was raging; twenty fatal cases in one night were reported in the same locality.

MALACCA STRAITS.

SINGAPORE.

Telegraphic communication with Batavia was restored on the 9th July, but again broken on the 13th by a fresh rupture of the cable between Mintok and this place, which has not yet been repaired.

The Dutch mail steamer *Palembang* arrived here on the 15th current, bringing dates to the 9th. Banjermassing is being fast brought into order. The execution at Martapura of 54 prominent insurgents, by hanging, had produced a salutary impression on the population.

On the morning of the 30th May, the 2nd company of the 5th battalion of infantry stationed at Macassar, deserted in a body and marched off in the direction of Goa. The major in command of the troops followed and took them. The deserters offered no resistance, but were led back to their quarters.

The Governor-General had set out on a tour of inspection to the western districts of Java. Mr. J. H. Lion, Editor of the *Handelsblad*, has been released from prison, on his asking the pardon of the Governor-General for libelling him.

The *Straits Times* has the following on the capabilities of Singapore as a depot:—

The circumstances by which we are surrounded at the present moment suggest to us not a few thoughts of a practical nature which it were well, in the event of the occurrence of war in this part of the world in future, to take zealous advantage of. Here we have Singapore constituted the seat of *entrepot* for the introduction of the food of considerable portions of two armies of two countries about to be engaged in a deadly conflict, and upon the result of pre-arrangements in this respect depends, in a great measure, the success or unsuccess of the war itself! On the arrival of the first portion of the soldiers in their passage to China no arrangements whatever appear to have been made for the reception, whether in the shape of supplying food now, and keeping up the supply of food during the progress of the campaign, or in the shape of those equally necessary arrangements relative to the housing of troops, &c., so as to avert a repetition in some degree of the misfortunes of the Crimea. The nature of the climate, however, and the vacillating character of the policy of the British Cabinet, which even after the troops had started to the scene of action were sufficient to arrest the progress of events, and prevent any evil consequences, from measures badly conceived, had the effect of arresting any of those direful results which in the war just referred to cast for the first time an imperishable tarnish on the warlike operations of England. The tendency of our present observation is simply to show that, notwithstanding what might be the scarcely expressible importance of Singapore as the sort of granary and storehouses of the world (from which the great demands of a campaign in the East might be at all times satisfied) it yet required the occurrence of the events to impress upon the minds of our local merchants and contractors, and of speculators at a distance, a lively idea of what immense wealth might be acquired by taking advantage of those tides of fortune which so frequently visit Singapore. It is not always a war that will create results of this kind. Locality must, of necessity, at all times keep up demands of an analogous nature, but wars are sometimes useful as pointing out and opening up sources of supply previously unknown.

COMMERCIAL REPORT.

The mails delivered this morning reached the Post-office at 11 P.M. on Saturday. The dates are, from Hong Kong 8th, Shanghai 1st, and Singapore 17th July.

At Shanghai business in imports was quite at a stand. The bankers have mostly shut up, and the large bankers and merchants are not attending to trade.

The duty on Imports has been reduced one half until further notice.

The following announcements have been made:—

Mr. Richard Rowett is authorised to sign for the firm of Messrs. Hoiliday Wise and Co., at Hong Kong. The interest of Mr. Gustav Behre, of the firm of Messrs. Dreyer and Co., at Canton, ceased on the 30th March. Also Mr. William Dent, of the firm of Messrs. Dent and Co., Hong Kong, ceased on the 30th June, and Mr. Henry W. Dent is admitted a partner from the 1st July. Also Mr. G. Findlay, of the firm of Messrs. Fletcher and Co., ceased on the 30th June, and Mr. A. J. Campbell was admitted a partner from the 2nd July. The business of Mr. Adam Scott, of Canton, will in future be carried on under the style of Messrs. Adam Scott and Co. Messrs. Buchanan, Hamilton, and Co., of Glasgow, and Mr. Robert Jarvie and William Thorburn, of Shanghai, have established themselves as merchants and commission agents at Shanghai, under the style of Jarvie, Thorburn, and Co., from 1st July, 1860.

EXPORTS.

TEA.—Foo-chow-Foo: A large business is reported during the fortnight in Congous for England, and in Oolongs, some for London, but principally for the United States. For fine Congous the quotations continue the same as those given last mail. Common and medium are 1 to 2 taels dearer, on account of a demand for Australia.—At Canton: The article continues scarce and wanted for shipment to England, United States, and India. Both the first and second crops turned out deficient and inferior. The settlements of the fortnight are reported at 100 piculs reeled Cumchook for the United States, and 50 piculs Loonkong and Gowkong for England. The quotations are—Cumchook reeled \$465 to \$470, usual reel \$415 to \$420; Loonkong \$450 to \$460 for No. 1, \$435 to \$400 for No. 2, Gowkong \$400 to \$410; Orange pekoe, 910 half-chests at \$14 to \$17½ for mixed and dusty. Congon, 982 half-chests at \$16 to \$19½ ord. to good ordinary. Ningyong, 2,674 half-chests at \$21 to \$27 mixed Ankio to fair cargo. Ankoi, 1,336 half-chests, at \$13½ to \$16 common to good. Canton.—Ten chops of the new Oonam and Oopick Congou have arrived, and seven more are close at hand. The statements regarding the quality are contradictory, and no settlements are yet reported. Shanghai: Supplies of Congou from the Hoochow district have come forward in fair quantity, and settlements are reported at 1,500 chests, at 28 to 28½ taels, and 500 chests old common Congou, at 16 to 17 taels.

RAW SILK.—Notwithstanding the state of anarchy prevailing, about 1,000 bales of new silk have come to market. This consisted entirely of Tatlee, and nearly all of No. 3. It caused considerable competition, and was eagerly taken at 375 to 380 taels, which may be deemed the opening rate for No. 3 Tatlee. Two Frenchmen ventured into the country, and had succeeded in bringing to Shanghai 100 bales, which they had purchased very cheap. Their success had encouraged others to follow their example, or to send money into the silk districts to purchase; but as the late incursion of the rebels into the silk districts was made at the reeling time, there can be no question that a proportion of the cocoons have been lost, burnt, and injured.

IMPORTS.

At CANTON, a very small business has been done during the fortnight, notwithstanding the opening of communications into the interior, and the discomfiture of the rebels.

At HONG KONG, dullness has characterised the fortnight, and stocks generally being heavy, prospects are decidedly gloomy.

At MANILA.—The Conception arrived from Liverpool on the 25th June, with a general cargo of manufactured imports. The good passage she had made, combined with the detention of the *Reyna del Oceano* at Batavia and the long passages of the other vessels, have caused the supplies intended for several months to reach in as many weeks; and this, especially happening as it does at the commencement of the wet season, would, under ordinary circumstances, have a most injurious effect on the market. Stocks, however, had got so much reduced before these late arrivals, that though a considerable proportion of their cargoes were sold to arrive, dealers are still anxious to purchase most descriptions of suitable goods at fair prices.

At SINGAPORE.—There has been rather more business done in piece goods during the fortnight, more especially in grey goods, of which the sales have been to fair extent both in the place, and for arrival. Prices of produce have undergone little change, and most of the principal articles of export continue rather scarce, although more business has been done than during last fortnight.

SHIPPING INTELLIGENCE.

ARRIVED.

At HONG KONG, MACAO, and CANTON.—From London: June 22, *Euphrates*; 24, *Northfleet*; July 2, *Spirit of the Deep*. From Newcastle: 4, *Sea Bird*. From Cardiff: 5, *Cornelius Smidt*. From Shields: June 24, *Planter*. From Swansea: 29, *Griefswald*. From Boston: July 5, *Argonaut*. From New York: June 24, *Hotspur*; 30, *Magnet*; July 5, *Fairy*.

At SHANGHAI.—From London: June 21, *Morayshire*; 24, *St. Claire*. From Liverpool: 18, *Electric*; 21, *British Empire*; 25, *Bald Eagle*. From Cardiff: 18, *Rosetta*; 22, *May Queen*; 28, *Branscombe*. From Swansea: 24, *Ida*. From Newcastle: 18, *H. Luduina*.

At MANILA.—From Liverpool: June 16, *Natilde*; 25, *Conception*.

At SINGAPORE.—From London: July 9, *Prince of Wales*. From Liverpool: 8, *Victor*. From Newcastle: 9, *Germanina*.

SAILED.

From Foo-chow-foo.—For London: June 20, Cyclone; 21, Julia; 27, Chrysolite; 29, Leichard, Glencune.

From Hong Kong, Macao, and Canton.—For London: June 23, Griffin; July 2, Southern Cross.

From Manila.—For London: June 17, Etherial. For Liverpool: 24, Cervantes. For Boston: 22, Romance of the Seas.

From Singapore.—For London: July 2, John and Isabella; 8, Commodore. For Falmouth and Cork: 14, Imina Broun. For Cowes, 14, Reward.

LOADING.

At SHANGHAI.—For London: Jublee.

At Foo-chow-foo.—For London: Crest of the Wave, Polmaise, Hero, Robin Hood. For Liverpool: Koh-inoor. For New York: Benefactor.

At Hong Kong, Macao, and Canton.—For London: Epsom, Falcon, Alliance, Ardville, Janet Willis, Mauritius. For Liverpool: C. Chisholm. For Europe: Antoinette Seraphine. For Cardiff: Johanna Lange. For New York: Contest, Annie Bucknam, Judge Shaw. For Havana: Wakefield, Live Yankee, Santa Lucia. For Sydney: Dannebrog. For Melbourne: Helvetia, Rembrandt. For San Francisco: C. C. Fowler, Creole, Meta, Oracle.

At Manila.—For London: Amoor. For Liverpool: Idas, Matilde. For Cork: Parisian, P. de Santanda. For New York: E. P. Stringer. For Havana: Emigrante. For Melbourne: Miletus. For San Francisco: George Lee.

At Singapore.—For London: Ga'n, Prince Alfred, William Stewart. For Liverpool: Conference, Versailles. For Continent: C. Brockelmann. For Boston: Borneo, Dolphin. For New York: Keystone, St. Louis.

FREIGHTS AND CHARTERS.

At SHANGHAI.—Trade with Great Britain and the United States having ceased, there is little doing to those parts. The principal demand for tonnage has been for the shipment of pens and bonas to Canton and Swatow, which articles are being taken by foreigners against imported manufactures. The Excelsior is reported to Kanagawa and London for £3,000.

At Amoy.—In consequence of the rice trade having fallen at this port, there is a large amount of tonnage disengaged, owing to which, the lately current rates cannot now be obtained.

At Hong Kong, Macao, and Canton.—For London, £3 10s.; United States, no quote on given. From the list of settlements a fair business has been done. The amount of tonnage unemployed is very heavy, and most of the charters lately being terminable at these ports, there will soon be a great plethora of shipping. The following are from the list:—Thomas Sparks, from Foochow to London, at £3 10s.; Caroline Chisholm, from Whampoa to Liverpool, at £3. The Euphrates, Bankside, and C. T. Bagstedt have been added to the Government charters, at 17s. 6d. per ton per month, to take up cargo. The French have added the steamer Contest at \$8,000 per month; charterer finding coals.

At Manila.—For London, £3 10s. to £3 15s. The Matilde is reported for Liverpool with unclayed sugar at £2 15s. and £3 5s. for hemp. The Julian de Unzeta with unclayed sugar, at £2 15s. for Cork; £3 5s. for Liverpool, and £3 10s. to £3 15s. for any other port in Great Britain with 100 tons hemp.

At Singapore.—For England, £2 10s. to £3. The demand for shipping is very dull, and should any quantity arrive unemployed lower rates will have to be accepted. The Grace is chartered from Akyab to a port in the United Kingdom at £3 15s. per ton, and 10s. extra for the Continent. The Emma and Matilde also at £4 per ton, and 5s. extra if to Holland or Belgium.

CASUALTIES.

SHANGHAI.—The French ship, Alexandre Ralli, stranded on the north bank of the Zangtoze Kiang, and became a total wreck, nothing being saved. She was freighted with coals and provisions for H.I.M.'s forces. The captain not being able to obtain a pilot attempted to take the vessel into the river himself.

HONG KONG.—It is rumoured that the Davao has been taken outside Amoy, and all hands murdered by pirates. Four Chinese carpenters belonging to the Amoy do k were on board.

The B. barque Vargie, from Saigon to Hong Kong, encountered a heavy squall when off Cape St. James, and was compelled to anchor, being close in shore. The master, officers, and 2 apprentice, worked the vessel to Hong Kong, 6 of the crew being off with fever.

PASSED STRAITS OF SUNDA.

From England and Continent to China: June 24, Charlotte Ann; 27, Verbena; 29, Kate Veronica, Anglo Saxon; 29, Assyrian, Mirage, Queen of the Ocean; 30, Troy; July 1, Gauntlet, Lstel Gastzer; 2, Lammermuir. From New York: June 23, Fairy; 24, Haze. From China to England and Continent: 27, Beverley. From England and Continent to Singapore: 21, Graces; 25, Germania, Haemstede; 29, Prince of Wales; 30, Victor. From Melbourne: 19, General Wyndham. From Singapore to England and Continent: 24, Sebastian Cabot; 26, Kate Carnie. From Liverpool to Batavia: 27, John Bibby.

EXPORTS FROM MANILA.

Per Etherial for London: Sugar, 9,737 piculs; hemp, 3,360; sapan wood, 331; cigars, 2,554 mils; indigo, 13 quintals.

Per Cervantes, for Liverpool: Sugar, 15,216 piculs; hemp, 4,140.

Per Romance of the Seas, for Boston: Sugar, 8,003 piculs; hemp, 9,650; sapan wood, 600; cigars, 653 mils.

Per Madras, for Melbourne: cordage, 978 piculs; cigars, 500 mils; and loads sugar from Hoilo.

EXPORTS FROM SINGAPORE.

Per L'Olivier, to Nantes: 744 slabs tin, 400 piculs; 607 bales gambier, 1,572 piculs; 100 cases pearl sago, 107 piculs; 1,255 bags coffee, 1,168 piculs; 575 bags black pepper, 434 piculs; 186 bags white pepper, 169 piculs; 23 cases tortoiseshell, 10 piculs; 4,406 bundles rattans, 144 piculs; 8,863 buffalo horns, 200 piculs; 47 bundles canes (9,400); 1,066 slabs tin, 782 piculs; 411 bags gambier, 1,017 piculs; 4,425 bags sago flour, 4,933 piculs; 1,564 bags, 1,856 boxes, pearl sago, 4,171 piculs; 174 bags white pepper, 164 piculs; 5,004 bags black pepper, 3,674 piculs.

COMMERCIAL POSTSCRIPT.

MONDAY AFTERNOON.

ARRIVALS NOT INCLUDED IN TABLE.—August 25, at Deal, from Manila Everetta.

DEPARTURES.—Aug. 24, from Portsmouth for Batavia, Maria Adolphine; 21, from Cardiff for Hong Kong, Pioneer; 20, Jan Hendrik, for Singapore, Nederland, and Oranje; 24, from Shields for Hong Kong, P. C. Hinich.

SPOKEN.—James Lemon, London to Shanghai, July 22, 2 H. 22 W.; Eliza, Cardiff to Hong Kong, July 17, 9 H. 24 W.; California, Liverpool to Batavia, July 23, 12 H. 25 W.

IMPORT MANIFESTS REPORTED AT CUSTOM HOUSE.

From MANILA to GREENOCK, per Sappho, entered Aug. 9:—15,278 bags sugar—order.

From SINGAPORE to LIVERPOOL, per Caledonia, entered Aug. 10:—98 pieces buffalo hides, 699 bags sago flour, 536 bags pepper, Fielden Brothers and Co.; 342 bales gambier, 227 bags pepper, R. and J. Henderson; 731 bales gambier, 2,802 bags sago flour, 50 bags tapioca, 5,230 pieces sapan wood—order.

From MANILA to LIVERPOOL, per Carmen, entered Aug. 12:—20,600 bags sugar, 326 piculs sapan wood—order; 5 boxes shawls, 6 pieces linen, 1 bundle silk goods, 26 fans, 2 boxes shells (in transit), J. J. de Urbinaso.

From SINGAPORE to LIVERPOOL, per Athelstan, entered Aug. 13:—2,349 bags sugar, 218 bags white and 358 bags black pepper, 1,064 pieces buffalo hides, Fielden Brothers and Co.; 1,119 bales gambier, F. Huth and Co.; 152 bales gambier, C. Shaw and Co.; 23½ tons sapan wood, 3,763 bags sago flour, 1,480 bundles rattans, 330 bags white pepper, 178 boxes gum dammer, 812 bags coffee, 14 cases preserved ginger, 1 box chutney, &c.—order.

From MANILA to LONDON, per Spitfire, entered Aug. 13:—12,600 bags sugar, 800 bales hemp, 42 bales buffalo hides, 15 tons sapan wood—order, 1 case segars, T. C. Leslie; 3 boxes tea, Richardson and Co.

From BANGKOK to LONDON, per George and Henry, entered Aug. 14:—7,934 bags sugar, 2,855 pieces sapan wood—order.

From SINGAPORE to LIVERPOOL, per Calder, entered Aug. 16:—147 bags white pepper, 1,125 pieces sapan wood, R. & J. Henderson; 176 bales gambier, 398 bags black pepper, F. Huth & Co.; 1 box segars, D. Macfie; 2,250 bales rattans, 1,348 bags sago flour, 579 bales, 157 baskets, gambier, 117 boxes gum dammer, 50 bags white pepper—order.

From SINGAPORE to LIVERPOOL, per Oceanica, entered Aug. 16:—300 bags sago flour, C. Shaw and Co.; 10 casks buffalo tallow, Chalmers, Guthrie & Co.; 2,660 bundles rattans, J. Morris; 159 slabs tin, R. & J. Henderson; 1,490 bales gambier, 200 bags sago flour, 236 slabs tin, 30 baskets gutta percha, 1,302 bags pepper, 909 buffalo hides, 1 box sundries, 5,465 pieces sapan wood—order.

From MANILA to LONDON, per Julia, entered Aug. 18:—950 bales hemp, 12,896 bags sugar, 12 tons sapan wood, 14 cases plants—order; 2,200 bags copper ore, 1 bale orchella weed, and 1 case silk for export.

From Foo-chow-foo to LONDON, per Antagonist, entered Aug. 18:—6,250 chests, 791½ chests, 4 packages, tea; 3 packages sundries—order; 383 chests tea, Feacon and Co.; 301½ chests tea, Cima and Co.

From SHANGHAI to LONDON, per Countess of Seafield, entered Aug. 20:—98 bales silk, Elias and Co.; 903 chests, 7,805 packages tea, 57 packages sundries, 10 cases plants—order, 154 packages tea, C. Scholefield.

From MANILA to LONDON, per Joaquina Victoria, entered Aug. 21:—299 cases mother o' pearl shells, 1 case tortoise shell, 45 cases segars, Borneo Co.; 30 cases segars, Martin and Co.; 5 cases segars, Horstman and Co.; 84 cases segars, 10 tons buffalo horns, 1 case segars cas's, 15,220 bags sugar, 13½ tons sapan wood, 68 bales buffalo hides—order; 9 silk shawls (in transit), and 4,000 cocoa nuts, Ma-ter.

From HONG KONG to LONDON, per Marchioness of Londonderry, entered Aug. 22:—36 boxes, 68 cases oil, 26 packages sundries, 2 boxes preserves, 24 chests tea, 28 cases silks, 1 box China boxes, 566 boxes drugs, 205 cases sundries, 1,400 boxes cassia, 4 boxes China ink, 170 bags mother o' pearl shells, 4 boxes segars—order, 120 rolls matting, G. W. Andrews; 100 rolls matting, 6 cases sundries, Moore and Co.; 50 cases dry ginger, Croase and Co.; 1 case sundries, C. H. Lawrence; 1 case sundries, G. Dent; 6 cases sundries, Franberger.

From HONG KONG to LONDON, per Saxonville, entered Aug. 22:—6,000 bags sugar, 104 cases woollens, 300 rolls matting, 2 cases silk piece goods, 22 cases silks, 30 cases, 500 packages and 48 boxes merchandise, 57 boxes aniseed oil, 50 packages and 1 box tea, 200 cases and 4 boxes ginger, 10 packages bamboos, 13 cases Japan ware, 10 boxes essential oil, 57 cases sundries—order, 13 packages sundries, Bradley and Co.; 10 packages sundries, J. Stewart; 6 packages sundries, D. T. Robertson; 700 boxes cassia, 160 boxes star aniseed, Chalmers and Co.; 93 boxes soy, Oxford and Co.; 20 cases cassia oil, Reas Brothers and Co.; 10 cases cassia oil, Angus and Co.; 137 bundles bamboos, Rangel, Woollett, and Co.; 200 cases merchandise, 200 rolls matting, Moore & Co.

THE THIRD CHINA WAR.

(COMMUNICATED.)

(Continued from our last.)

"To obtain redress for common grievances," as the Emperor our august Ally said, was what, undoubtedly, induced Sir John Bowring, to seek, even before his departure from Europe (he had, if I remember right, an audience of his Imperial Majesty), the co-operation of the French, and other Treaty Powers, not for the purpose of making war, on the contrary, to induce the Chinese Government to yield to united diplomatic pressure, grant the demands made on it, and to remedy common grievances. That such were the hopes of Sir John Bowring, I firmly believe, and doubt those who seem to have been inclined to think him to have been eager for strife. Most likely he reasoned that the Chinese Government would not resist demands, when made simultaneously by the greatest powers of the west—of the world. The "Arrow" affair was the real cause of the Canton difficulty, the question as to right or wrong, need not here be discussed, but I may be permitted to remark that it is my conviction that the Chinese authorities were decidedly and knowingly wrong; the vessel was, to all intent and purpose, English, and her pass or register had not expired, as erroneously asserted by different parties. The right of free access to the city of Canton, and to the authorities within it, Sir John Bowring was bound to insist upon, whenever the opportunity should offer. This right of free access was a treaty right, and the opportunity for enforcing it was given by Yeh's proceedings in the "Arrow" affair. The Lorch affair concerned only ourselves; but the demand of free access to the city of Canton, founded on the treaty, secured Sir John the co-operation of his diplomatic colleagues, and the active co-operation of the French forces in China. So desirable the one, so objectionable is the other, giving Sir John Bowring credit for believing that by united force he would obtain more easily and without great loss of time and life what he had failed to obtain from the diplomatic union. He will yet, I fear, regret that we ever induced our gallant neighbours to assist us in laying another sick man on his bed, and now providing him with a college of doctors at Peking, who will never agree as to the dose which the patient shall have, each wishing to physic him according to his own peculiar method, endeavouring to keep him alive till it suits their respective purposes, killing him in the end, accusing each other as to the cause, and finally quarrelling about the "Intestate Estate" as to the share which shall be awarded to each of the professional giant-killers. Let us beware how we attempt to have what some people are pleased to call "an ambassador at Peking." He would be a mere hostage, or at the best a diplomatic hen, "hatching more quarrels than we have had even at Canton," and Sir J. Davis, in a letter to the *Times*, in March, 1857, says:—"There is an alliance in name but not in feeling;" there is certainly 'a rivalry, but not a generous rivalry,' writes the correspondent of a London paper from Hong Kong on the 29th December last, and similar ideas have since been communicated by the correspondents of the daily papers. This rivalry will be as long as man is that being he has ever been. Differences in character, opinions, ideas, religion, and interest, will always exist between nations—ambition, rivalry, and discussion ending in war, which even treaties of peace and everlasting friendship, or those of commerce, will not prevent from recurring. I am neither an advocate nor friend of war, but have no faith in doctrines which "are not fitted for the events of real life." Very recently we have had ample opportunity to observe that members belonging doubly to peace societies are but creatures of passion, ready for strife and war whenever they think their interest is at stake. England's interests in China, being not those of Imperial France, I regret that to the latter Power the opportunity has been given to restrict us in our free actions. Common grievances, no doubt, do exist, but, says the Emperor, "France has to avenge the blood of its missionaries, who have been cruelly massacred." He means the execution of Father Chapelaine in the province of Kwangsi, who refused to be handed over in accordance with Treaty stipulations to the next French Consul, and claimed to be considered as a citizen of the Middle Kingdom. I do not think that since the conclusion of the Treaty of Nanking, or since the one concluded on behalf of France, by M. de Lagrenée, another instance is on record, that missionaries, be they Protestants or Catholics, have been ill-treated by the Chinese authorities. Morn. Chapelaine was executed in a province, disturbed by rebellion. Far be it from me

to justify either the execution, or the law sanctioning it, but doubt that it took place on account of M. Chapelaine being a missionary.

It will be admitted that missionaries, and particularly Catholic missionaries have, and are enjoying—even notwithstanding the war—more liberty and security in China than they do in other countries not so highly civilized as Europe and America, certainly they do more so, than, for example, Protestant missionaries or colporteurs in Spain, or even in that country, in which its chief on a certain occasion said "were the Lutherans, Protestants, and Jews pay their proportion of taxes to the State, and are equally protected; but he forgot to say, where lending a Protestant book to a Catholic subject, is punished by fine and imprisonment, where their meetings are subject to severe police regulations, if permitted at all, and where an English church is closed, and its re-opening only permitted on condition that the service shall not be conducted in the language which is that of diplomacy. No class of foreigners has transgressed the Treaty so often and systematically as missionaries have done; we do not blame them for it, we only record facts. The Blue Books "Insults in China," amongst other information, shows that the Chinese authorities handed over to the next Consul, in accordance with the Treaty stipulation, several missionaries who were transgressors, that is such as to whom no doubt they had to take notice, as we are all aware that Catholic missionaries are spread through the length and breadth of the Empire, it is gratifying to find that these missionaries, whilst in charge of the authorities, were treated as no travellers would be treated on the Continent if he was found without a passport. Instances are, the Rev. M. Huc and his companions, and our own most indefatigable Rev. W. C. Burn. In fact, the Chinese Government, and I advisedly mean, the Tartar Mantchou Government, is more tolerant in religious matters, than the Catholic countries and some of the Protestant countries of Europe. Huc, in the preface to his "Chinese Empire," says, "There exist in all the provinces a very considerable number of Mussulmen who have their Korans and Mosques." We also know that Jews are tolerated.

The cabalistic phrase "Insults in China" (the title of the Blue Book above referred to), as Mr. Gladstone called it, in March, 1857, has, as the then Secretary of State for the Home Department said, "its origin in the nature of things, although the book does not consist of a string of insults inflicted upon the British by the Chinese." It is, in fact, a collection of offences committed in China by foreigners—Americans, Spaniards, British—and others, against subjects in China; and by the latter upon the former.

OPENING OF WESTERN CHINA.—Of course, after receiving the memorial we print in another column from such an important manufacturing and trading body as the Leeds Chamber of Commerce so effectively represents, Her Majesty's Ministers cannot have neglected to dispatch to Lord Elgin their instructions to obtain in the new Treaty, he will negotiate all that the Leeds and other Chambers of Commerce have so laudably desired of the Ministers, so far as China has to do with it. Our manufacturers and merchants and their M.P.'s must, however, look after Ministers herein, or "the great pooh pooh" will cause them to be disappointed.

CHINESE MAHOMMEDANS.—We notice (says the *Hong Kong Daily Press*) in the Straits journals an account of a band of Chinese who arrived in Netherlands India last February to work in the tin mines of Banca. Among them were 27 Mahomedans from the Island of Hainan. They say they are the descendants of men who four centuries ago were wrecked on that coast. That two years ago pirates from Canton came to Hainan, conquered one of the tribes, Li Buan, in the interior, and then joining the tribe slaughtered 9,000 men, women and children of the Mahomedan colony. The remnant, about 1,000 in number, escaped in different directions. Four Imams were slain. There are still towns in Hainan wholly inhabited by Mahomedans. They belong to the Haniz sect, and read the Koran in Arabic very fluently without understanding it. Like the small colony of Jews in the interior of China, who have the Law, but to whom it is a sealed book.

CHINESE IN AUSTRALIA.—The *Sydney Morning Herald* says:—"If we are to have a Chinese Bill, we hope, at all events, it will be stringent; that is, prohibitory. If we repeal the Chinese we commit an injustice, and there is an end of it; if we admit and then persecute them, we accumulate many crimes. The best plan, perhaps, would be to blow up the ship, captain, crew, and passengers. Such strong examples would be worthy of a Government zealous for liberty of trade and liberty of conscience, and such would be the course, we have no doubt, of the Chinese themselves. Having once spread the tidings through the Chinese Empire that such awaited the next cargo, it is very probable that they would go to Moreton Bay rather than Port Jackson. There will be tribulation in Victoria, one of these days, for the treatment of the Chinese. The time will come when their labour will be missed from the weekly escort, when their industry, which has set so much besides in motion, will pass into some other territory, and when a languishing commerce and treasury will enforce the great truth, that the prosperity of a State depends not on the races subject to its sway, but on their skill, their number, and their thrift. Already if we may credit report, the opinion is gaining the ascendancy that Victoria has lost a golden opportunity, never to return."

Continental Intelligence.

HOLLAND.

AMSTERDAM, August 22.

(FROM OUR OWN CORRESPONDENT.)

The Government has received the gratifying intelligence from Lisbon that the treaty between Holland and Portugal for settling the line of demarcation between the boundaries of the two States in the Island of Timor, in the East Indian Archipelago, has been ratified after receiving the sanction of the Portuguese Cortes, which, however, was not obtained without a series of long and fiery debates, and a considerable show of opposition. According to the stipulations contained in this treaty, the Netherlands obtain full and undivided possession of the following islands lying to the north of Timor:—Flores, Adonaro, Solor, Lomblem, Patare, and Ombai, as well as all the islands constituting the so-called Archipelago of Solor. The sum to be paid by the Netherlands to Portugal for the transfer of her rights of sovereignty of the above possessions to this country is fixed at 200,000 florins.

Within the last few days Mr. W. Heinke, the eminent English diving engineer, has been here and inspected the wreck of the *Lutine* frigate, for account of the underwriters at Lloyds. He found that the sand in which the wreck is imbedded has shifted very considerably, leaving a large part of the hull of the frigate exposed, and considers this a very favourable period for renewing the diving operations which were commenced last summer, but suspended during the winter, by a Dutch company formed in this city, of which undertaking I gave you some particulars in a former letter. If the weather remains favourable for diving operations, and should no material alteration take place in the position of the shifting sand, the recovery of a very considerable quantity of the treasure known to have been engulfed when the frigate was lost—now more than sixty years ago—may confidently be expected.

The Minister of Marine has advertised for engineers for the Dutch steamers of the Royal Navy. They must be furnished with reliable certificates of being practically and theoretically acquainted with the construction and management of steam engines. Foreigners who may wish to enter the naval service in this capacity must be under forty years of age.

A report is current here that General van Swieten, who so successfully commanded the late expedition to Boni, and is now the military Commander-in-Chief in Netherlands India, has resigned his appointment on the ground of ill health, and is on the point of returning to Europe.

Great satisfaction is everywhere expressed in this country at the important intelligence received by the last Overland mail, announcing that the whole of the territory of Banjermassing, in the south part of Borneo, has been annexed, and is now formally incorporated with the foreign possessions of the King of the Netherlands. The Governor-general has received the thanks of the two Chambers of the States General, and the Home Government has sent him the fullest powers, and impressed on him the necessity of taking such prompt and energetic measures as he may deem necessary for the maintenance of order, the consolidation and prosperity of new territory, and the honour of the Dutch flag.

The following vessels have been chartered by the Netherlands Trading Company: *Macassar* and *Admiral de Ruyter* to sail from Amsterdam, and the *Dorothea Henrietta* from Rotterdam. The same company advertises for more tonnage for India, under the following conditions: the vessels to be either new ships launched before last December, or else such as have been previously chartered by the company, and known to be seaworthy. They must be ready to sail on the 10th of September next from the port which may be fixed on by the company, and those vessels now on their passage out, if tendered and accepted, must be placed at the disposal of the factory at Batavia by the 10th of January next.

The Railroad Bill, as brought forward by the Government and accepted by the Second Chamber, has now been the subject of much discussion in the First Chamber. On the very first day fourteen members spoke in favour of the Bill, chiefly agreeing to the measure on the principle that railways were wanted, and if constructed by the Government it was better than having none at all. Two members opposed the Bill, and two more reserved their opinion. On the 17th inst., however, the Bill was passed by 34 votes to 5, and in the same sitting the sum of two millions of florins was voted by the Chamber to be

placed at the disposal of the Government for the expenses of the preliminary works.

By Royal decree of the 10th inst. (No. 86), the King has ordered the screw steam corvette *Rete*, now lying in the dockyard at Amsterdam, to be commissioned for immediate service in India, and to be ready to sail by the 16th of September. The command has been given to Lieutenant of the first class H. P. de Kok.

UNITED STATES.

NEW YORK, August 11.

(FROM OUR OWN CORRESPONDENT.)

Preparations are making in this city for giving his Royal Highness the Prince of Wales a warm and enthusiastic reception. Lord Lyons, her Majesty's Minister at Washington, left on the 21st ult. for Lennudon, to join the Prince on his arrival there.

The exhibition of the *Great Eastern* has been a success. During several days, the last and previous week, the number of visitors increased to 17,000 and 18,000 per day. Having been on a delightful excursion to Cape May, she proceeds on an excursion to Norfolk, Chesapeake bay, and anchor in the roads of Annapolis, below Baltimore. She is advertised to sail for Milford Haven on the 16th inst.

The excitement produced among the Americans, and the interest they take in this monster ship, is beyond belief. On the 30th inst., it was supposed the number who turned out to witness her departure (on land, and on water craft of all kinds) could not have been less than 100,000. There were ten times as many spectators to see her leave for Cape May as there were to witness her arrival.

The visit of the *Great Eastern* to the States has afforded another opportunity of showing the elasticity of its citizens. They are ever on the stretch, straining to perform some almost impossible thing; but when an American says, "it's got to be done anyhow," you may be sure it will; at least nothing short of the roaring cataract of Niagara will wash out their resolves. I fancy your folks of the old slow and sure country—to whose enterprise, however, we owe existence—must expect, surely, that, with our social and political demonstrations, we shall some of these days collapse. What do you think of £25,000 sterling being spent in this city alone on the Japanese Embassy? Where does the money come from? I will not attempt to enlighten you on this point, further than by assuring you that—as your late wit, Albert Smith, used to say—"it's done somehow." The *Great Eastern* was asked to visit Baltimore. Won't pay, say the Directors. "Throw you in a load of real bituminous screaming coal," answer the enterprising citizens of that State, and over she goes. Now show me the town in the old country that would do this. There is no mistake about it—an American, to a certain extent, does "beat all creation." It appears that there was some more solid reason actuated them than mere curiosity to see the ship, and that was a prospect of opening up a direct traffic with England, a feeling which has been gaining ground with the Southerners in consequence of the anti-slavery principles of the Northern States. A good many stories are current as to the *Great Eastern's* trip to Cape May, about passengers sleeping on deck, &c. The following is about the truth:—

TRIP OF THE GREAT EASTERN

Contrary to their first intention, the directors were induced to consent to the ship making a short excursion, to enable visitors to see the machinery in motion, and to judge of the capabilities of the ship for ocean navigation. The point selected was Cape May, the southern point of the State of New Jersey, at the mouth of the river Delaware. The number of tickets was fixed at 2,000, and their price at 10 dols. each. The fare did not include provisions, which were to be provided on board, at reasonable rates; and gentlemen were notified that the only facilities which could be afforded them for sleeping were mattresses in the lower saloons and cargo spaces of the vessel. The state rooms were to be appropriated to ladies. The ship was advertised to leave New York in the afternoon of Monday, July 30th, to reach Cape May about eight o'clock in the morning of the 31st, giving passengers an opportunity of spending the day in this little watering place, and to return at six o'clock the same evening, arriving at New York on the morning of Wednesday, August 1st. Some fifteen or sixteen hundred persons availed themselves of this opportunity of going to sea in the *Great Eastern*. Those who slept on deck did so from choice. The compartments and saloons retained the temperature they had acquired during the day in New York, and those who went below from the cool air of the night found the change so unpleasant that they preferred, in many cases, to re-ascend rather than remain to get accustomed to the heat. Comfortable sleep was obtainable in both situations—perhaps less so on deck than below, because numerous groups, too excited by the novelty of their situation for repose, indulged in vocal harmony, cheering, witticisms, and extempore oratory, that

rather interfered with the somniferous efforts of the more peaceably-disposed in their immediate neighbourhood. These amusements were diversified by good-natured scrimmages, which, as no more formidable weapons than mattresses were employed, were productive only of fun. Practical joking was quite the order of the day, or rather of the night. A very favourite proceeding of this kind was to make a rope's-end fast round the mattress of a sleeper, get half a dozen stalwart jokers to haul, and on the signal being given, rouse with such hearty good-will that the unhappy recipient of these deliberate attentions would roll over half-a-dozen times, clutching frantically at everything he encountered, in the belief that the *Great Eastern* had blown up, gone down, run a-kinst an iceberg, or encountered some other casualty equally fraught with peril to life and limb. If speedily relieved from all apprehension on these points by the laughter of those who witnessed his discomfiture, it tended in nowise to restore the equanimity of the unfortunate jokee, to distinguish amid the hoarse exclamations of his tormentors the clear merry ring of woman's mirth; for—tell it not in Gath!—ladies sanctioned the fun by their presence, and seemed to derive a more exquisite satisfaction from the blank dismay of the victims, than the perpetrators of these venial outrages themselves. These, and a dozen similar scenes of good humoured enjoyment were the pleasant features of the trip. Unfortunately, less agreeable facts remain to be recorded.

It became evident, almost before the ship got under weigh, that there was an entire absence of anything like system in the arrangements for the accommodation of the excursionists. The very obvious course of allotting berth and state rooms to ladies only, as the tickets were sold, seems to have been followed only to a slight extent. More cabins were occupied by gentlemen than ladies, and, as a consequence, many of the latter had to rest content with mattresses in the grand saloon and the ladies' cabin; some even attempted to sleep on deck. In more than one instance it happened that, out of the few allotted at the time of selling the tickets, the same stateroom was claimed by a party of ladies and of gentlemen, both of whom presented tickets bearing the same numbers. One case of this kind occurred, in which it is said—certainly not much to the credit of American gallantry—that the ladies were forcibly dispossessed, and compelled to pass the night on the floor of the grand saloon. Mr. Yates and Mr. Bold exerted themselves to the utmost to satisfy the demand for berths; but with fifteen hundred eager applicants this was impossible, and all but a fortunate few resigned themselves to the inevitable mattress, pitched down wherever fancy indicated or chance led. An ample supply of the necessary articles was provided; but being piled pell-mell into two of the cargo spaces, and everybody being allowed to help themselves, they ran short before all were accommodated: and two or three hundred unfortunate either did not sleep at all, or had to pick for the softest plank. The very simple plan of putting these in charge of one or two of the ship's company, with orders to give one only to each applicant, or of sending round an officer to dispossess those who had appropriated three or four, would have prevented this annoyance and hardship. The feeding arrangements failed entirely, from inadequate means of distribution. The provisions on board were very fair in quality, and adequate in amount, but the attempt to accommodate one hundred hungry guests in each saloon seated at the tables, with twice that number standing round ready to seize the first vacant chair, through the agency of two or three miserable negro waiters, who had to obtain their supplies from a buffet, tended by another sample of the same interesting race, to cut meat, and dribble out coffee by the cup, would have been ludicrous if people had been in a frame of mind to appreciate the joke.

The same miserable inadequacy of means existed to meet the demand for ablution, and even for water to drink. Washhand stands could be found by diligent search, but no water. When water was forthcoming, there was no soap, and as to towels, people accepted their absence as a matter of course, and supplied their places with pocket-handkerchiefs. It is of small moment to inquire who was responsible for such mismanagement; it is quite sufficient to know that large numbers of the excursionists reached home pretty well disgusted with what might have been made the most memorable pleasure trip on record, and that, to use their own expressive phraseology, the *Great Eastern* is "played out" in New York.

P.S.—The *Great Eastern* arrived at Old Point Comfort on the 3rd inst., and at Annapolis on the 5th. The excitement was very great. Complimentary resolutions were passed by the passengers relative to the ship, her officers, management, fare, &c. The President visited the ship on 9th inst. A suit has been brought against the owners of the *Great Eastern* for an infringement of an American patent in the combined use of the ratchet wheel and screw as the motive power. The damage, were laid at \$50,000.

COMMERCIAL AND FINANCIAL.

The Money Market has continued quite easy. The supply of capital seeking in estment has been large. We quote loans, on call, at 5 per cent., and on good paper, 60 days to run, at 6 per cent. The balance in the United States for the Treasury in this city (all in specie) amounts to about \$5,250,000. Exchange on London: We quote sixty days' sight bills 109½c. to 109½c. Some bankers asked 110c. without, however, readily finding purchasers.

Freights continue firm. A cargo of 600 tons of coal for Shanghai was taken at \$9 per ton, and 100 tons dead weight by another vessel, for Hong Kong at \$12.

The changes in China and East India goods have not been important. Spices have been well sustained, though without activity in sales. We quote Cassia at 24c. Gunny cloth opens dull this week, with limited sales. Manila Hemp is quiet and dull. Coffee has become scarce and high. Java, in mats, sells at 16½c. and old Government, do., in bags, at 18½c.; Ceylon sold last week at 15c. to 15½c. (1,300 bags). We quote Mace at 40c.; Pepper at 8½c. Our stock of coffee is low, and prices firm.

TEA.—The market continues firm for all descriptions, and there is a fair business going forward, mostly, however, in a jobbing way, no sales of consequence, from first hands, having taken place for some time past. Since our last, however, sales have been made of 1,200 half-chests, Green, and 800 do., Oolong; also 700 Souchoing, on terms we did not learn.

FIRE CRACKERS.—500 boxes have been sold, Canton, No. 1, at private terms.

HEMP.—The market remains very quiet, and with the exception of 3,000

bales of Manila sold last week, to arrive per *Ringleader*, at 6½ cents, 8 mos., and 50, do. Jute, here, \$97 50c., 6 mos. At Boston, 800 bales Jute sold at \$95, 6 and 9 mos.

INDIGO.—Within a few days there has been considerable movement in Manila, and the sales have been very large, say 384 cases at 45c. to 50c., mostly 45c. to 47½c., 6 mos. The stock is now much reduced, and the market is decidedly firmer. The transactions beside are 10 chests, Madras, at 85 cents., and a few ceros, Guatemala, \$1 15c., 6 mos.

RAW SILK.—Received 120 bales China per late arrivals. Deliveries, July 1, to date, 30 bales and 150 cases, with stocks reduced to about 500 cases and bales, unsold, the market has been rather firmer.

SPICES.—The market still remains quiet; the stock of Cassia has been concentrated by the speculative purchasers, and held firm for higher prices. Sales of a small lot cloves at 8c. cash; 100 cases Penang nutmegs, and 10 of mace on private terms.

TIN.—Steady and in fair demand, while prices are unchanged.

ARRIVALS.—Red Gauntlet, Lucas, at New York, July 25, from Shanghai; General Nowell, Nowell, at New York, July 27, from Calcutta; Azzan, Morgan, at New York, July 28, from Singapore; Ringleader, White, at New York, Aug. 2, from Manila.

SAILED.—Southern Eagle, Caldwell, from New York, July 17, for Melbourne; Tonguin, Smith, from Boston, July 23, for Calcutta; Sarah H. Snow, Higgins, from New York, July 26, for Melbourne; Art Union, Norton, from Boston, July 27, for Calcutta; Waverley, Thompson, from Boston, July 27, for British East Indies; Edwin Forrest, Crocker, from New York, August 1st, for Hong Kong.

Parliamentary Intelligence.

HOUSE OF LORDS.

THE INDIAN ARMY.—(Aug. 10). The Duke of ARGYLL, in moving the second reading of the European Forces (India) Bill, stated at great length the reasons which induced the Government to recommend that the local European force in India and the royal army should be amalgamated.—The Earl of ELLENBOROUGH entered his protest against the measure as one which, in his opinion, was fraught with danger to the future of British rule in India.—Lord DE GREY and Lord LYDEN replied to the noble earl, and contended that the Government had not proposed the measure without due reflection, and a thorough conviction of its necessity.—The Duke of CAMBRIDGE submitted that the measure was but the natural and inevitable consequence of the changes which had been lately introduced into the system of Indian administration. It was impossible longer to maintain the old distinction between the local and the Queen's forces, and the time had arrived when an amalgamation could not be further postponed.—The Earl of DUNELM observed that it was not his intention to vote against the measure; but he confessed that he could not help regarding it with much anxiety and apprehension.—Lord CLYDE asserted, from personal experience, that there was a most dangerous absence of discipline in the local Indian army. The noble lord strongly urged the necessity of having one European force in India.—Earl GRANVILLE supported the Bill, and the Bill was read a second time without a division.—(14). After a short discussion between Lord Lynden, the Duke of Argyll, Lord WYNDHAM, and Lord DE GREY, this Bill was read a third time and passed.

THE CHINA WAR.—(10). In reply to the Earl of ELLENBOROUGH the Duke of SUMMERSET said that the transports which had been engaged in England cost £15,932 per month, those engaged in India £9,500, and those in China £32,000; therefore the noble earl would see that the Government had control over only the smallest portion. The cost of the expedition from the June 1, 1860, had been £164,000 per month. The noble earl was mistaken in supposing there was a deficiency of coal. Large quantities had been sent to Singapore and Hong Kong, and more if necessary could be obtained from Japan.

TELEGRAPHIC COMMUNICATION WITH INDIA.—(14). Lord WOLFELOUSE, in reply to Lord STANLEY of ALDERLEY, explained the present state of our telegraphic communications with India and the measures which were on foot to improve it. The Red Sea line had been laid down, but had proved unserviceable, and there was but little hope that it would be repaired. The line by Bagdad and Bussorah was being constructed by the Turkish Government, but some difficulty had arisen with respect to the formation of a part of it, and communications upon the subject were now going on between the Porte and her Majesty's Government. Now that the Red Sea line had failed, it was doubtful whether that between Gibraltar and Alexandria would be carried out, her Majesty's Government would consider whether it was still desirable that this cable should be laid down between Rangoon and Singapore, or whether it might not be more usefully employed at some other portion of the line of communication with India.

THE INDIAN BUDGET.—(13). The House of Commons having resolved itself into a Committee upon the East India Loan, Sir C. WOOD proceeded to show the state of the Indian finances. Taking the last two years together, he had last August estimated the aggregate deficiency at £23,988,010, and the actual deficit in those years turned out to be £24,168,000, a difference of only £180,000. The deficiency of Indian revenue for the present year was £6,196,000, or, including guaranteed interest on railroad capital, £7,472,000. No one, he observed, could be sanguine enough to suppose that this deficiency could be met by a reduction of the military expenditure, in which, however, there had been a reduction in the last two years of this branch of the expenditure to the amount of £6,000,000. The Government of India had resolved to meet the exigency by a system of increased taxation, including an income-tax, and, although the result of this experiment might be contemplated with some anxiety, there was no alternative, and he thought the Home Government and Parliament ought to give its best support to the Government of India. He proposed to provide for the immediate deficiency without having recourse to borrowing money by means of the balances in the Treasury, and from the payments on account of railroads in

India, which would amount to £7,000,000 this year, of which £5,000,000 would be disbursed in India; and he moved the resolution empowering him to raise a sum not exceeding £3,000,000 by way of precaution only.—Mr. H. SEYMOUR considered the statement of Sir C. Wood most un-pleasant.—Mr. W. Ewart was of opinion that the military expenditure of India might be diminished by the reduction of the army and the establishment of an efficient police.—Mr. GREGGON approved the course pursued by the Indian Government.—Sir H. WILLOUGHBY, on the other hand, thought the state of the Indian finances most alarming.—Mr. ROBERTS complained of the principle upon which compensation for losses during the mutiny had been made as unjust.—Sir DE LACY EVANS asked what could be the object of keeping up such an immense military establishment in India, native as well as European, now that the mutiny was extinct.—Mr. VAN-ITTART doubted whether the produce of the income tax would be so large as Sir C. Wood anticipated.—Mr. CRAWFORD threw out suggestions for a modification of the system of Indian railway guarantees.—Mr. T. G. BARING replied to Mr. Seymour, and said with respect to the military expenditure, that the Indian Government were fully convinced of the necessity of reducing the army in India, and were taking every practicable means to effect its reduction, which must be a work of time.—Mr. AYRTON objected to the course of giving to the Government of India what was asked without examination; a course of unlimited credit that would produce unlimited extravagance. He urged the abolition of what he termed the "mock Parliament," the Legislative Council of India, and the establishment of separate governments in India.—After some further discussion on the resolution it was agreed to.

CHINA CONSULAR EXPENSES.—Mr. BRUCE'S SALARY.—(17.) On the vote being proposed in Committee of Supply for £23,320 for the establishments in China, Japan, and Siam, Mr. WHITE called attention to the expenses for consulars at Newchong, Tanchong, Chinkeng, and Swatow. The consuls in these places were to have been appointed as the result of the ratification of the treaty of Tientsin, which treaty had not yet been ratified. He believed that at Swatow they were content to have a consul sent there, but in the other places there could not be consulars until the result of the Chinese war became known. In that new war, he contended, they should never have engaged. Had Lord Elgin done what he was urged to do by every one practically acquainted with China, the war would never have been rendered necessary. The East India and China Association impressed on Lord Elgin the necessity of staying in China until he had finished the work for which he went out. Had he followed that advice, an immense expenditure and a loss of life would have been spared. Had the distinguished Admiral (Sir M. Seymour), had the prestige of aristocratic rank, power might have been conferred upon him to arrange affairs in China; and from the sagacity and justice he had displayed in his dealings there, he would, in all probability, have been successful.—Mr. LAING said the estimate was prepared upon the supposition that the treaty would come into operation.—Mr. AYRTON was disposed to concur in the observations of the hon. member for Brighton. He wished to know what arrangement had been made as to the expenditure of the two envoys, who were actually now in China? Was Mr. Bruce to receive the salary of envoy still?—Mr. WILLOUGHBY said, if Mr. Bruce was the person receiving the salary of £3,600, he thought in common justice that sum ought to be rejected altogether. To call the conduct of Mr. Bruce a blunder would not properly express the nature of that conduct. To call it a blunder and insolence would but very faintly characterise it. (Hear, hear.)—Sir GEORGE CORNWALL LEWIS said he understood that substantially a vote of censure was proposed in committee of supply on Mr. Bruce in China. If it were desirable to bring the conduct of Mr. Bruce under the notice of the House, a more fitting opportunity might have been taken than upon an incidental item in committee of supply upon the 17th of August. He felt the entire impossibility of entering without notice upon a full discussion of the question. But he wished to call attention to the fact that the treaty was negotiated by Lord Elgin during the Government of Lord Derby, and the circumstances which gave rise to the war were the stipulation that there should be a resident ambassador at Peking, and that the treaties should be exchanged. It did not appear to him that Lord Elgin's remaining in China could have made any material difference. So far as he was concerned, he had completed the work he was sent out to undertake. The late Government sent out instructions to Mr. Bruce, whom they appointed as their permanent ambassador, and it did not seem to him that Mr. Bruce had acted contrary to the spirit of those instructions. He did not see why any strong terms of censure should be employed towards Lord Elgin, or against Mr. Bruce, for acting according to the spirit, if not according to the letter, of the instructions he had received.—Sir J. GRAHAM asked if the estimate had been framed on the assumption that we were at peace with China? Was Mr. Bruce to receive the salary of £3,400 a year when we were at war with China, and an envoy extraordinary had been sent from England?—Mr. LAING said, no doubt the estimate proceeded on the assumption that we were at peace with China.—Mr. AYRTON asked whether any understanding had taken place, before Lord Elgin left this country, as to the amount of the expenditure for his mission?—Mr. LAING could not give any account of what the expenditure would be. The expense of the former mission was £6,035 14s. 6d. included under the head of civil contingencies.—Sir G. C. LEWIS said that at this moment he apprehended we were not legally at war with China. The moment war was regularly declared, the rule then in existence would be at once applied to the salary of Mr. Bruce.—Lord CLAUDE HAMILTON regretted that the Government did not seem to know whether we were at peace or at war. He also regretted that Lord Elgin had not remained in China until the treaty had been ratified.—Sir J. GRAHAM said the subject was in a labyrinth of hopeless uncertainty. If war was declared, what a fearful aspect the case presented. If he was not mistaken, without a declaration of war, any British subject who should put an end to the life of a Chinese was by statute guilty of murder. Were, then, the 20,000 Englishmen now engaged in the Chinese expedition to be involved in all the legal penalties of murder without war being declared? On the other hand, if war had been declared, why, then, were they asked to vote this salary upon an assumption, directly opposed to the fact, that amicable arrangements were existing?—Sir GEORGE CORNWALL LEWIS said if the Government knew that there had been a war in China, and that it would continue till April next, it would be very unreasonable to submit this estimate. Certainly war had not been declared, but war might be commenced without a declaration; it had happened before, and possibly might happen in this case. (Hear, hear.) According to the

last information with which he was acquainted, no actual state of hostilities had yet been established between England and China. Possibly such a state of this might at this moment be established, but the Government had not yet received an account of it. Assuming, however, the war did take place, it would not be unreasonable to suppose that it would be of short duration, and for that reason Government felt bound to include the charge in the estimate.—Sir G. BOWYER said it was true that a declaration of war was not necessary to constitute a state of war. But we had sent out 20,000 men with the intention of landing them in China. That was an act of hostility, and the moment they landed in China we would be at war with that country.—Sir J. GRAHAM wished to know whether the House of Commons had ever yet sanctioned the addition of £1,000 a year to the Chinese envoy, over and above £1,000 a year paid to him as our agent in China. He was prepared to prove that £8,900 a year was an extravagant amount to pay for the services of Mr. Bruce.—Mr. AYRTON proposed to reduce the vote of £3,000 for Mr. Bruce to £1,000.—Mr. LAING said that £4,000 had been voted last year, and this was the second time the vote was proposed.—A few observations having been made by Mr. P. O'BRIEN and Mr. WHITE, the committee divided:—For the amendment, 32; against, 35: majority against amendment, 4. The vote was then agreed to.

RED SEA TELEGRAPH.—(17.) In reply to Sir H. WILLOUGHBY, Mr. LAING said the Government had intelligence that the Red Sea telegraph had failed in several places. Attempts were being made to restore it: he knew not with what success. It was true that a convention had been signed with the Austrian Government, binding this Government to pay £15,000 for 25 years for the use of the telegraph to Alexandria. The contractors, being unable to carry out their undertaking, had asked for a guarantee for fifty years; but the Government doubted the propriety of entering into these prolonged guarantees.—(18.) On the vote in Committee of Supply for £20,000 for submarine telegraphs, Mr. AYRTON said there were three grants comprised in this vote—the Mediterranean extension, the Channel Islands, and the Red Sea Telegraph Companies. In the two former cases the payment of the grant was contingent on the telegraph being kept in working order. In the case of the Red Sea Company it was not so; but the company agreed to enter into a contract with some responsible person to lay down an efficient telegraph from Egypt to India. He wished to know whether they had done so, and whether the contract not being performed, the company had taken any steps against the contractor.—Mr. LAING said that the arrangement with the Red Sea Telegraph Company, as it had turned out, had been a most unfortunate one. When the first two contracts were entered into there was reason to believe that deep-sea telegraphs might be worked with perfect success; but recent failures had rendered necessary a variation in the terms of the contract with the Red Sea Company, and a guarantee had been given them irrespective of the success of the undertaking. He did not say that this was a satisfactory arrangement, but the Government, being anxious to obtain a telegraphic communication with India, had no alternative at the time.—Mr. WHITE acquitted the Government of blame in this matter. If they had not promoted telegraphic communication with India and China they would have received many remonstrances from the merchants in the City.—After some further discussion the vote was agreed to.—(23.) Mr. LAING, in reply to Mr. S. FITZGERALD, explained the position of affairs in relation to oceanic telegraphic communication, with particular reference to the convention with Austria, and also to the state of some of the cables, showing the increased risk attending submarine telegraphy.—(24.) In reply to Sir H. WILLOUGHBY, Mr. LAING said he was not aware whether the Red Sea Telegraph inspectors had yet made any report; but information had been received from some officers of the company who had just returned which would lead to the belief that the cable was not in quite such a hopeless state as it had been considered some time ago to be.

RIKON AND SINGAPORE TELEGRAPH.—(18.) In committee of supply a vote was taken for £87,000 on account of £350,000 for telegraphic communication between Rangoon and Singapore.

AUSTRALIAN POSTAL SERVICE.—(22.) In reply to Mr. HENNESSY, Mr. LAING said that there was already a contract by which the mails were conveyed via Suez, a route which was considerably superior for Imperial purposes to that via Panama. If the Panama route were taken, Sydney instead of Melbourne would be the first Australian port of call. That was a colonial object, but it was not one which would justify the Imperial Government in doubling the subsidy at present paid, and when the increased expenditure would only secure a second and decidedly inferior service. If the Australian colonies wished for the establishment of a line of their own, no doubt the Imperial Government would be disposed to facilitate the accomplishment of that object.—(24.) Mr. LAING, in reply to Mr. HENNESSY, expressed an opinion adverse to the granting any further subsidy to the Australian mails.

THE SUEZ CANAL.—(23.) In reply to Mr. H. Seymour, Lord PALMERSTON said it was quite true that the unfortunate Pasha of Egypt had been induced to take a large number of shares in the Suez Canal Company, one of the greatest and most remarkable attempts at delusion which had been practised in modern times; and that he had contracted in his private capacity a loan with a French firm, which, though he had not obtained the sanction of the Porte, was no infraction of the Convention of 1840.

THE DARIEL SHIP CANAL.—(23.) In answer to inquiries by Mr. BRADY, Lord PALMERSTON stated that there were no political difficulties in the way of the project for the junction of the Atlantic and Pacific Oceans by a ship canal across the Isthmus of Darien; but the result of surveys as to the practicability of the project had not induced her Majesty's Government to give it encouragement by pecuniary aid.

THE CASE OF MR. TARRANT.—(23.) Mr. JAMES asked the Under-Secretary of State for the Colonies whether Mr. Tarrant, the Editor of the *Friend of China*, was still detained in prison in Hong Kong, as the suit of the 'Crown' v. Sir G. C. LEWIS said the Under-Secretary of State for the Colonies was not present, and therefore he hoped that the hon. and learned gentleman would repeat the question on the following day.—(24.) Mr. C. RUSSELL, in answer to a question put on the previous evening by the hon. and learned member for Marylebone, said that Mr. Tarrant, the editor of the *Friend of China*, had been convicted of a libel upon the late Lieutenant-Governor of Hong Kong, and sentenced to six months' imprisonment. Soon after the sentence the Governor, after consulting with the Chief Justice, determined to reduce the imprisonment by one half, which he did before re-

ceiving an order to that effect from the Government at home. When the day for Mr. Tarrant's liberation arrived that gentleman was arrested upon civil process. The Governor did not state the nature of the debt, but he (Mr. Fortescue) believed it was the costs of the proceedings for libel; but, at all events, it was a matter with which the Government had nothing to do.

MERCHANT SHIPPING.—The following is an extract from the report of the Select Committee:—"The British shipowners who carry on the present restricted and scarcely tolerated intercourse with the Colonies of France, Spain, and Portugal, find their ships placed at an immense disadvantage in the unequal competition which they have to encounter, while they have the mortification to see foreign ships resort to our own colonies, and secure higher freights than our own ships when chartered to a port in Europe." The injustice thus inflicted, and its consequences, are neither denied nor palliated in the report, while the persistent policy pursued by the United States in excluding us from their coasting trade is stigmatised by the committee as producing, in their minds, a sense of "deep disappointment;" and while they are not disposed to recommend a resort to a policy of retaliation, they do not hesitate to express their opinion of the conduct of successive Governments in reference to the question. The refusal of certain nations to reciprocate, and the unfair competition to which the British shipowner had been thus condemned, is but one, though the chief, of the causes of the condition of the shipping interest into which it has been the duty of the committee to inquire. As regards the Chinese Passenger Act, the Committee content themselves with observing that the abuses of the Chinese coolie trade occur on board foreign, chiefly American, ships; that the provisions of the existing law are salutary, and do not need amendment; but they throw out the suggestion, that the prohibition of British vessels to carry Chinese coolies to the "slave-holding States of America, or to any country where slavery is tolerated, is a subject well worthy the consideration of the legislature."

THE FRENCH IN CHINA.—The *Morning Post* says:—"For once, indeed, we seem to have completely outstripped our active and ingenious allies. Not only in point of strength, but in organisation, matériel, and transport, we have altogether distanced them. If the enemy with whom we have to deal were a distinct and palpable one, we should expect to find the third Chinese war brought to prompt conclusion; but in the present instance, no doubt, Lord Elgin and Baron Gros will have great difficulties thrown in their way by the extraordinary internal condition of the Celestial Empire at this moment. It has been suggested that even if we should occupy the capital, thus inflicting what must be the last and most fatal blow in the case of a civilized country, the Emperor and his Ministers would retire to some distant and unapproachable part of the empire, or commit suicide—a remedy which obtains much favour among municipal statesmen in these parts, and leave us to the enjoyment of a *damnosa hereditas* in the possession of Peking."

SIR CHARLES TREVELYAN.—Sir Charles Trevelyan, says a contemporary, has arrived in town, has had an amicable interview with Sir C. Wood, and has, it is said, received an assurance that his opposition to the taxation scheme of Mr. Wilson will not be a bar to his receiving a colonial governorship or other high employment under the Crown. It appears that there was an old feud between Sir Charles and Mr. Wilson, which had its origin when the latter was financial secretary to the Treasury, and Sir Charles was permanent under-secretary. Danby Seymour tells a very good story of a conversation which Sir Charles Trevelyan, just before he went out to assume the governorship of Madras, had with a friend. Sir Charles was enlarging on the regret he felt on leaving England, and the sacrifices he was making. His friend endeavoured to console him, by reminding him that "at all events he would not have Mr. Wilson near him." When Mr. Wilson's Indian budget arrived in Madras, the old rivalry and antagonism broke out, and Sir Charles sat down and wrote his celebrated minute, although he was warned by his council, and very well knew he was really penning his own recall, and probably ruining his prospects.

THE GREAT "POOH-POOH!"—The following is from the *London Review*:—"We live in the age of the great 'Poo-h-poo!' Talleyrand's advice to a young diplomatist was, above all things, to avoid zeal. The Tories and Whigs—or Conservatives and Liberals of our islands—as represented by their leaders in Parliament, act upon Talleyrand's dictum. If they ever show zeal, it is in the struggle for office; and the earnestness which they sometimes display is not in the discussion of public questions, but in the desire to keep their places. Earnestness in the management of public affairs went out of fashion when, amid a burst of excitement too hot to last, the first Reform Bill was carried. Lord Melbourne—good easy man—set the example of Poo-curantism, and installed the great Poo-h-poo on the Treasury benches, where it has ever since been enthroned as the guide and the exemplar of all our Ministers, actual or expectant. The last of the earnest ministers was Sir Robert Peel, and his earnestness ruined his party and saved his country. Now-a-days, to elicit laughter in the House is the highest achievement of the governmental mind; or, if laughter be not always to be had, personal invective, keen and polished, supplies its place. But principle, or a real fight in its support, is not to be thought of. Principle is troublesome. Its pursuit may involve personal or party sacrifice. It may make things unpleasant; and is it not wiser to adjourn unpleasantness to the Greek Kalends, and do homage to the great Poo-h-poo, king of men and solver of difficulties?"

REMOVAL OF THE EAST INDIA BOARD.—The work of removing from the old India House to the Victoria Hotel, in Westminster, will commence on the 1st of September. The rent to be paid for the portion of the hotel to be occupied by the various offices is £6,000, in addition to one-half of the rates and taxes. In consequence of recent alterations in the government of India, the accommodation required is at present much less than was formerly the case. The transfer of the accounts to the Bank of England, and the payment of the dividend by that establishment, has rendered unnecessary a large portion of the accountant and audit office. The amalgamation of the Indian with the Queen's army has transferred the military department to the Horse Guards, and the management of the small Indian navy will in future be carried on at the old stores of the company. Nothing is yet known as to what is intended with respect to the museum. The furniture for the new offices at the hotel, with the exception of the carpets, which are to be provided by the company, will be supplied from the present India House. The cost

of the removal will be £6,000, and the upholstery work has been undertaken by a firm in the city, under the superintendence of Mr. Digby Wyatt, the clerk of the works to the Indian Council.

THE NEW GOVERNOR OF MADRAS.—The *Times* has the following comments on Sir H. Ward:—"The new Governor of Madras, then, has studied his business in the very best school that can be found. Of all tropical countries, whether under the dominion of any European State or of their own native rulers, there is probably no one so well and so mildly governed as Ceylon. Of course, the island, the reputed seat of Adam's Paradise, possesses enormous natural advantages. The situation is central, and easy of access to all the Eastern world, so that it has been selected, on grounds which are quite distinct from its soil, climate, and productions, as the converging point for the traffic of India, China, and Australia. The people are not difficult to control, and if they show little energy in the pursuits of industry they are equally ill-fitted for success in war or rebellion. The neighbouring coast of India affords an inexhaustible labour-market; a considerable amount of English capital has been brought into the island; and a community has been formed somewhat similar to that of the English planters of Bengal and the North-West, only with a more ascertained position, a better administration of justice, and a fairer and more impartial Government. The abortive rebellion of twelve years ago, put down with the most perfect ease and without the loss of a single life in the field, under the administration of Lord Torrington, revealed both to Europeans and natives the strength of the Government and the security of the position of its English settlers. With a justifiable pride Sir Henry Ward, on resigning his government, renders an account of his stewardship to the Legislative Council of Ceylon. The results are such as any Governor might well be proud of. In 1854 the revenue of the Colony was £310,000; in 1859 the revenue was £551,000, having increased on an average, during these five years, by a sum of £48,000 per annum. This sum represents the present surplus in the treasury. These results are due to a liberal and judicious expenditure on public works, accompanied with tangible improvements in the condition of the people."

THE STEAMER "HIMALAYA."—The *Army and Navy Gazette* has the following:—"Mr. Mare did his country good service when he constructed that very fine specimen of naval architecture, the *Himalaya*; and the Lords of the Admiralty of the day, who purchased her from the Peninsular and Oriental Steam Navigation Company, completed one of the best bargains ever effected by any public board, and are therefore deserving of the best thanks of all who take an interest in the united services. We say united services, for the *Himalaya* has from the time she was first brought into the Navy been, with the slight exception when she conveyed the Astronomer Royal and party to the coast of Spain, employed in conveying troops and supernumerary seamen from one end of the world to the other. She has steamed to the east and to the west, to the north and to the south; and it has been our pleasing duty, from the time this journal has been established up to the present moment, to record a series of brilliant passages made by her. We have scarcely time to note her movements. On the 18th, she sailed from Portsmouth for Plymouth, and her arrival there is reported simultaneously with her departure. We hear, again, she has left the latter port for Liverpool, and a few hours later the telegraph flashes up a notice of her safe entrance into the Mersey. We cannot say too much in praise of this noble vessel. She has always done the work cut out for her in an admirable manner; and with this staring us in the face we ask, why have we not a dozen *Himalayas*?"

THE NEW POSTMASTER-GENERAL.—The *Globe* says:—"The appointment of Lord Stanley of Alderley to the office of Postmaster-General, in succession to Lord Elgin, has the effect of bringing into the Cabinet an old and tried Liberal, and placing at the head of the Post-office an old, tried, and excellent administrator. Although not one of those public men placed very prominently before the world in a popular sense, he has been long recognised by all those who have opportunities of forming an estimate as one eminently steady, clear headed, and industrious in office, and in the several posts which he has filled he has left behind him an excellent reputation in this respect. Altogether the Ministry could hardly receive, at the present moment, a happier or more serviceable reinforcement, although no doubt names more dazzling, and associated to a greater extent with the leading questions of the day, might be added to the list of the Cabinet. In the office most recently filled by him—that of President of the Board of Trade in Lord Palmerston's last Administration—Lord Stanley of Alderley was conspicuous for his sensible and clear-headed direction of one of our most important public departments, and the qualities which he then showed that he possesses may be brought to bear upon the Post-office most opportunely and advantageously at the present moment. We are sure that on the one hand the interests of the public will not suffer in his hands as regards economical and efficient management, and we are quite confident that the causes of the discontent which unfortunately prevails to so great an extent among the subordinate officers of the department will receive from him the fairest consideration and attention."

THE CALCUTTA ENGLISHMAN states that the decision of Government regarding the disgraceful affair in the Mosque at Cairo is, that the two senior officers are dismissed the service, and the others have had a reprimand. The names are not given.

THE RIGHT REVEREND Lord Auckland, Bishop of Bath and Wells, took the chair at Dr. Macgowan's lecture in the Town-hall of Wells on the 20th and 21st inst.

ST. HELENA.—The detachments of the Royal Artillery, Royal Engineers, and the St. Helena Regiment selected to proceed to St. Helena will embark at Gravesend on Thursday next, on board the chartered vessel *Akbar*, which will convey fifty-one men of the Royal Artillery, twenty-three Sappers of the Royal Engineers, and 182 non-commissioned officers and men of the St. Helena Regiment, from the depot of that corps at Chatham.

SIR W. ARMSTRONG is to resign, and it is supposed that a Direct-General of Artillery will be made and filled by Col. Tulloh. It is also stated that the superintendence of the royal gun factories will be assumed by Mr. John Anderson, the present assistant superintendent.

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

Suggestions for the insertion of information required by our subscribers will have due attention and acknowledgment.

A REGISTER is kept of the addresses of all persons connected with the FAR EAST, and reference can be made to the same by personal application at the office or by letter. Passengers arriving by either Overland route or sailing vessels, in England or on the Continent, are requested to forward their address, in order that inquiring friends may be informed.

Our OFFICES in this City have been REMOVED from 337, Strand, to 7, George-yard, Lombard-street, E.C. Newspapers and literary communications should be addressed to the Editor. Correspondence relative to Advertisements, Subscriptions, and the general business of the Paper should be addressed to the Manager, and not to the Editor.

Correspondents and Newspaper Publishers in INDIA, CHINA, JAPAN, and the EASTERN ARCHIPELAGO are requested to address all communications, newspapers, &c., to the Editor, Box No. 70, General Post-office, London, E.C., via Marseilles, which has been opened specially for the same.

In our present number will be found a Tabular Statement of the Exports from China, in addition to our Tea and Silk Table, but as the published statements in China contain a large proportion of packages entered as "Sundries," we intend giving another statement of the cargo, compiled from the vessels' report to the Custom House at the port of her arrival in Great Britain, as also the consignees.

Books sent by post and not prepaid are charged letter rate.

Post-office orders payable at Lombard-street, to MORTIMER WRIGHT.

The London & China Telegraph.

LONDON, MONDAY, AUGUST 27, 1860.

THE VOTE FOR CHINA.

THE proposal of the vote of £23,320 for consular and diplomatic establishments in China, Japan, and Siam, has afforded perhaps the best test yet of the feeling of the House of Commons on the acts of Lord Elgin, Mr. Bruce, and our policy in China. It will be seen in our Parliamentary intelligence that on this vote being proposed Mr. Ayton moved an amendment, lost only by four, to strike out the sum of £4,000, the half of Mr. Bruce's salary. Sir James Graham remarked that it (£8,000) was an extravagant salary for his services. Mr. Williams said that he thought the whole sum should be rejected, and that "to call the conduct of Mr. Bruce a blunder would not properly express the nature of that conduct. To call it a blunder and 'insolence would but very faintly characterise it.' Mr. White, late of China, said if Lord Elgin had remained in China and ratified the treaty, or if Admiral Seymour had been appointed to succeed him, we should not be now at war. To this Sir G. C. Lewis, the Home Secretary, whose ignorant speech at the Mansion House last year will be in the remembrance of our readers, said, "that the circumstances which gave rise to the war were the stipulation that there should be a resident Ambassador at Peking, and that the treaties should be exchanged. It did not appear to him that Lord Elgin's remaining in China could have made any material difference." Now that the facts of the case are exactly opposed to this, there is abundant evidence in the Blue Book of Lord Elgin's mission, wherein it is shown that the Chinese Commissioners at Shanghai, under Lord Elgin's written promise to return, waited at that port for his lordship in order to definitely settle the point about a resident minister at Peking, and other items left undecided in the treaty. But what resulted? Lord Elgin leaves China for England, in order to fill a place in the Whig Government, which he had been advised would shortly succeed to the Derby Government. Before leaving China (Canton) he wrote, however, to the Commissioners as follows:—"To this end the undersigned has decided to proceed to Canton, where it is possible that the accomplishment of what he proposes to effect may detain him a few weeks. He will then return to Shanghai to discuss with the Commissioners the various questions of which a settlement is still pending."

How Mr. Bruce kept this engagement we all know. The Commissioners very naturally took alarm at this glaring breach of faith on the part of our Ambassador, especially when they heard of the preparations making to accompany Mr. Bruce to the Peiho, and the consequence was that the Imperial Government could only believe that in taking so large a force simply to accompany our Ambassador to procure the ratification of a treaty, we must have ulterior views and demands which we intended to enforce when at Peking, and under these circum-

stances they ordered the ambassadorial fleet of such gigantic proportions to be stopped at the mouth of the Peiho. In spite of this we have one of H.M.'s Ministers stating in the House that it did not appear to him to make any material difference whether Lord Elgin stayed in China or not. The most charitable conclusion we can arrive at is, that Sir G. C. Lewis knows nothing of the Blue Book of Lord Elgin's mission, and again talked at random. Somewhat akin to this is the Chancellor of Exchequer's announcement—given in our last—that owing to the omission in the Elgin Treaty for any specified time and place for the payment of indemnity, we had not received any portion of it; but, he continued, the French had taken this precaution, and by virtue of it had received an instalment of £400,000, which statement, however, is, we believe, incorrect.

But we will forgive Lord Elgin his abandonment of pledged duty in China to run after office at home, and his brother, Mr. Bruce, his involvement of us in the expenditure and bloodshed of Chinese war the third, if they together effect a treaty with China such as we may hope will endure beyond the recall of our fleet and army from the Chinese waters, and which shall throw open to our home merchants, and to those of India, the hitherto unapproached and otherwise unapproachable Western half of China, by obtaining the frontier town of Esmok to be made an open mart with a Consular establishment, arranging also for the setting up and due maintenance of the electric telegraph from Esmok, by the high road therefrom, to Canton; and for its maintenance thence, still by land, unto all the other Consular ports. These two points, promotive (as being equally beneficial to the Chinese) of peaceful future trade, if obtained from the China negotiators, must indeed prove, as the journals of our manufacturing districts state, far more valuable to us than any new territorial acquisition on the Chinese coast, than any amount of pecuniary compensation capable of being extorted for the costs of the war, and then the residence in succession at Peking of a hundred of our Foreign-office Ministers. Nay, more, if anything can do so, such additions to the treaty of Tientsin would atone also for the Taku forts blundering discomfiture, and best vindicate the many gallant lives there so discreditably sacrificed.

HONG KONG.

WE have been frequently applied to for information about this distant colony, and more particularly about its salubrity. Hong Kong had, like Chusan, acquired great notoriety as an unhealthy place, particularly so for Europeans. In both places the troops were the greatest sufferers, on their first occupation, and of Europeans, the military have, and are, as far as our information goes, to this day greater sufferers than civilians, reasonable cause for which we are unable to assign, and think that as yet no satisfactory explanation on this subject has been elicited. The military buildings in Hong Kong would be an ornament to any city in Europe; barracks and hospital, in our opinion, leave nothing that could be desired for their purpose. Some doubts have existed as to the situation of the barracks, particularly the rear building not being what it should be; but the vast improvements, planting bamboos and trees, and making the road up to Government House, on the one hand, as no doubt the regulating of the bed of the stream coming down the Hui, so as to prevent any stagnant waters remaining, must by this time have had a beneficial influence. This, conjoined with some occupation for the men, not taking into account those who will come to Hong Kong from other parts of China with the germ of disease in them, will, no doubt, enable the health returns of the military to be as satisfactory as are those of the civil population.

The mortality in Hong Kong in the early part of its existence as a British colony was no doubt great; many of our readers may remember that saying, "You may go to Hong Kong," was almost synonymous with saying, you may go to that place, which none of us like to go to. The fact is, the colony has greatly improved in salubrity; but here in England the character it bears in that respect is still very bad, and that in our opinion unjustly so. Of course we will not for a moment maintain that Hong Kong, to a European constitution, is as healthy as merry England; but, on the whole, we have no hesitation in asserting that it is as healthy as any place in the East, and more healthy than most of them. True, the summer months, from the vast quantity of moisture in the atmosphere, are oppressive, but nothing can surpass the winter months. So far back as the 25th April, 1845, Sir John Francis Davis, the then Governor, wrote to Lord Stanley:—"With reference to the first point, that of imputed unhealthiness, I consider the climate of Hong Kong to be precisely that of

Macao, from which it is only 40 miles distant, and where, for many years, I and numbers of others enjoyed as good health as in England. Major Caine, now the oldest resident in Hong Kong (from its very first possession), states it to be better than any part of India, and Sir Henry Pottinger will say the same." Sir John Davis then explains that the great mortality among the military, and, at the very first, among civilians, must be attributed to circumstances and causes sufficiently obvious to save the character of the climate. To persons of all ranks being housed in dwellings progressing gradually from mere mat sheds to wooden and brick hovels of a somewhat better description, and to the pernicious system of ground-floor apartments, which was universal at first, he ascribes the mortality amongst civilians. How the native regiments were lodged, in miserable mat huts on wet ground, can only be believed by those who actually saw them. Sir John Davis acquiesced in the request of General d'Aguilar to appropriate ground for the construction of permanent and proper accommodation for the troops. Sir John Davis, in the above quoted despatch, says:—"As the lodgment of all classes improves in this colony, I will pledge myself for the improvement of the general health. During the last summer the civil portion of the population were as healthy as in most other countries, and particular cases could be traced to bad dwellings, or the too early occupation of new houses." As it is now proved, Sir John Davis's opinion as regards Hong Kong, both as to its salubrity and the progress it would otherwise make, have been amply proved to have been correct, although at the time he was "pelted with a handsome storm of vituperation," from which neither his predecessors nor successors have been exempted. The worst we can say of the climate of Hong Kong is, that it seems to have a baneful influence on the temper of gentlemen addicted to literary pursuits in that place. The latest official returns for 1859, meagre and incomplete as they are, still afford us good data to lay before our readers and inquirers. In former years the reports of the colonial surgeons, published by the local government, were of particular interest, and we hope that they will be soon again so.

The rate of sickness and mortality in Victoria gaol—a place which, from all accounts we lately have seen, is not particularly favourable to health,—has been, out of a total number of 2,484 prisoners confined therein during the year, on an average 239—of which, of course, some of longer, and some for shorter periods, 116 patients and 4 deaths, the latter being 0.16 per cent. to the total number, and 1.67 per cent. to the average number of prisoners. The police force, 307 in number, a body exposed to all changes of the weather and the night air, had six deaths during 1859, viz., 1 European and 5 coloured, the Chinese force, consisting of 70 members, escaping without a single loss; the rate of mortality in the force therefore was near 2 per cent. The military force have a greater percentage of deaths to strength, it being 3.05; it is, however, remarkable that the Royal Artillery, out of an average strength of 298 men, lost 4; and the Royal Engineers, out of 218, 3 men, about $1\frac{1}{2}$ per cent., whilst the mortality amongst the 2nd Battalion of 1st Royals, numbering on the average 725, has been 31, of which 12 deaths were from fever, 15 from diseases of stomach and bowels, 2 from disease of lungs, and 2 from other diseases, being 4.27 per cent. in this force, or nearly 3 per cent. in excess of the mortality amongst the Royal Engineers and Artillery, a difference for which we are unable to account, except it be that the men in the artillery and engineers take better care of themselves, employing their leisure hours more profitably than the men of the line are generally given to. One thing our readers will have observed from these abstracts of the returns, that the "Hong Kong fever," which had given the place the bad character which still hangs to it, is not to be feared any more. The improved buildings, excellent drainage (we do not know if we may yet justly except that part of the town which is almost entirely inhabited by the natives at the west of Victoria), good streets and roads, no doubt have brought about this favourable result, predicted with great confidence by Sir J. F. Davis, at a time when all the world was crying down the place.

We regret that the returns published do not enable us to ascertain the number of deaths which occurred amongst the Europeans and Americans, 1,034, and the 477, of mixed blood, including Indians, Manilamen, &c. Information regarding them is particularly desirable, and no doubt easily obtainable in Hong Kong. A return "furnished from each house occupied by Chinese in the colony, stating number of persons resident therein and mortality," informs us that out of 49,627, 406 individuals

died in the colony, whilst it is estimated by the Registrar-General that 496 (1 per cent.) died out of the colony, meaning that on becoming ill they had removed to their native place and died there, making in all 902 deaths, or about 1.82 per cent. on the Chinese population. If people will use ordinary precaution, avoid to make living too much "uncommon pleasant," they will find the air agree on the whole very well. Exceptions are everywhere, even with us here in England.

COMMERCE WITH WESTERN CHINA, FROM RANGOON TO ESMOK.

SINCE our last issue the Chambers of Commerce of Leeds, Manchester, Halifax, Huddersfield, and Bradford, have severally memorialized Her Majesty's Ministers, very earnestly, to arrange with the Governments of China and Burmah, for the opening of Overland trade from our north-east frontier of Pegu to the Chinese south-western frontier city of Esmok, and for the extension of the telegraph by the land route to Canton, and the other consular ports of China. The rapid successive failures of the Mediterranean, Red Sea, Arabian Coast, and Singapore and Batavia submarine cables, certainly make it now most desirable that Captain Spry's proposition to Government of old date, to extend the land telegraph of Eastern Pegu, *via*, Kiang-Tung, Kiang-Hung, and Esmok, to Canton, should have the serious consideration of Ministers, and though a vote was taken in Parliament on the 18th instant, for £87,000, part of the £370,000 which was proposed to be sunk in laying a cable between Rangoon and Singapore as a stage, by the ocean, to Hong-Kong, we cannot believe that, so long as Mr. Gladstone is at the Exchequer, such a sum, or any part of it, will be thrown after the million sunk with the Red Sea cable. At any rate, if such must be the case, we still strongly urge upon Government to give every encouragement to the extension also of the land wires to Canton.

The following is the Memorial of the Leeds Chamber of Commerce, as published in the *Leeds Mercury* of the 14th instant, and was transmitted to Lord Palmerston, by the Leeds Chamber of Commerce. It was presented to his lordship by Mr. Baines, M.P., and his lordship promised the subject should receive due consideration:—

To the Right Honourable the Lord Viscount Palmerston, M.P., G.C.B.,
First Lord of Her Majesty's Treasury.

The Memorial of the Council of the Leeds Chamber of Commerce, through their President.

Sheweth,—That the attention of your Memorialists has been drawn to the practicability of securing an extensive mart for goods the manufactures of the United Kingdom in the direction of the western inland provinces of China.

That being fully sensible of the desire of her Majesty's Government to employ all possible and just means to promote the extension of British commerce, they have every confidence in bringing the following suggestions under your Lordship's notice, that they will receive the consideration which your Memorialists feel convinced they deserve.

Your Memorialists learn that the extensive Yunnan and six other western inland provinces of China, covering a territorial space of 650,000 square miles, with a population of 126,000,000 of souls, having districts where the finest teas are produced, as well as many articles of first importance to our manufacturers and merchants, present an interesting and extensive field for British commercial enterprise, both as regards the products of those provinces and for trade in British manufactures.

Hoping for a favourable and speedy termination of the present rupture with China, they would respectfully urge that in the negotiations that will necessarily follow, the British Government should stipulate that British merchants shall have properly defined and full privileges accorded by the Emperor of China, to be faithfully observed by all Chinese authorities, to trade in the interior of their country, as well as at their outposts, and more especially that a traffic may be allowed to be carried on by British merchants with the provinces referred to overland from her Majesty's port of Rangoon, in the Bay of Bengal.

In order to reach the Chinese frontier from that direction, the route which your Memorialists (from what they have been able to ascertain) regard as the most favourable, would be: across Eastern Pegu to our extreme north-eastern frontier, on or near the banks of Salween river, at which point they believe it would be highly advantage us to form a permanent trading settlement, or commercial emporium, which would be about midway between the port of Rangoon and the city of Kasmok, on the frontier of the Chinese Yunnan province, and accessible to numerous caravans and traders from various tribes, as well from the Burman States as the provinces already referred to.

For this purpose, seeing that a portion of the kingdom of Burmah would have to be traversed, your Memorialists beg to submit to the consideration of her Majesty's Government, the expediency of sending a Civil Envoy to his Majesty the King of Burmah, to announce to him the fact of Her Britannic Majesty having now assumed direct rule over the Asiatic portion of her empire, and to offer to his Majesty her Royal friendship, expressing the hope that the people of Burmah and those of the United Kingdom and British possessions may enjoy permanent peace with each other, and be privileged to traffic to mutual advantage in the two countries, as also with the Chinese, under the protection of the two Crowns.

Your Memorialists would further suggest that in any new treaty with

China and arrangement with the King of Burmah, provision may be duly made for the extension of land telegraphic communication over the route thus suggested, to be continued forward from Kamok to Canton, and from the latter city onward to all the Consular ports.

Your Memorialists therefore pray your Lordship to submit the above allegations and suggestions to her Majesty's Government, and trust that after due consideration the Government will be led to see the wisdom of using every effort to secure for British merchants and manufacturers what your Memorialists believe to be a very important route and outlet for trade in the direction of Western China.

And your Memorialists will ever pray. DANTON LUTON, President.

The *Leeds Mercury* of the 14th August supports that memorial with one of its usually able leaders, from which we make the following extract:—

"There is a great blank in commerce. A vast region, almost as populous as the whole of Europe, lies cut off from communication with the world almost as effectually as Robinson Crusoe in his desert island. Its commerce, if opened, would be worth more than the most favourable French treaty, or than the establishment of free-trade in all the countries of Europe. It grows fine teas. It abounds in mineral wealth. It produces wool, flax, grasscloth fibre, and other raw material, for which our manufacturers are crying out, in almost inexhaustible quantities. It is a country alive with internal commerce, traversed by endless caravans and carriers maintaining, indeed, an immense population engaged in nothing else than the transport of goods. It is not separated from us by broad seas, or by wide deserts, or by prohibitive tariffs, or by national hatred. The people are as willing to trade with us as we are to trade with them. There would be little difficulty, probably, in getting a treaty stipulation by which our merchandise might freely enter into this district. Only 250 miles of inhabited country divides this 'land of promise' from our own possessions, and these 250 miles are already traversed by numerous caravans. There would be no difficulty, as far as has yet been ascertained, in inducing the sovereign of that intervening strip of country to grant our merchants and our merchandise transit through his dominions. Yet for all purposes of trade with England or with any other European nation, this rich and vast district might just as well be a huge Dead Sea, with nothing but the mythical apples growing on its margin. Scarcely any merchandise from it steals its way across the intervening territories, or reaches any port to which our English vessels are accustomed to trade. This 'land of promise' is Western China, a district removed many hundreds of miles from the nearest open port, but within two hundred and fifty miles of the north-east frontier of our province of Pegu.

A new treaty will have to be made, unless the war is to last for ever, and in this treaty the insertion of terms opening Western China to European commerce might reasonably be inserted. Such a clause, while less offensive to the Chinese, while more consistent with the view of the war taken by a large number of our countrymen, and while less likely to lead to subsequent dispute with the Government of China, would be infinitely more profitable to us as a nation than any amount of compensation which the treaty may compel the Celestial Emperor to pay for the violation of the last treaty and the injury inflicted upon our fleets at the Taku forts. It would be no injury to China to insert such a clause, while it would be an immense benefit to our own country. Indeed, so far from being an injury to the Chinese, it is the very thing for which, according to such testimony as we have, they are most anxious.

Such are the chances now before us. If the present opportunity is seized, a simple clause of the treaty may open to English commerce the largest field which perhaps any single transaction has ever placed at its command. While the empire is threatening to fall to pieces of its own rottenness, while the rebels are burning and sacking every town of any mercantile importance in the country, while Hankow is turned into a wilderness, and Soochow, the great emporium of the silk trade, is filled with bloodshed and plunder by the army of the freebooters, Peking court may well be glad to escape further humiliation by granting us valuable mercantile concessions instead of a burdensome pecuniary compensation. And to us a single year's trade with Western China through Kamok, would be more valuable than the largest sum that our fleets and armies could wring out of the exhausted exchequer of the empire. Every other facility exists. The establishment of an emporium for British goods at the north-eastern boundary of Pegu is one preliminary which our Government can easily supply, and which our merchants would eagerly support. A treaty with the King of Burmah, a prince said to entertain unusually enlightened views, by which, the commerce between England and China should pass through his territory, is also a point about which little difficulty can exist. A moderate transit duty will more than reconcile him to such an arrangement, and will not materially interfere with our commerce. All these are points which Lord Elgin ought to know. Now or never is the time for completing such an arrangement with China. If it does not form a part of the treaty which we trust his lordship will soon negotiate, we shall have to get up another war before we have a chance of making such a stipulation again; and as war is an expensive mode of procuring a treaty, it will be much better to seize the present favourable opportunity. Let, then, the Chambers of Commerce urge it on the Government, and let the Government instruct Lord Elgin, so that the great chance which now offers may not be thrown away, and 'the inner land' of China may become commercially known to the world."

THE RED SEA CABLE.

Much discussion has been promoted in and out of Parliament on the inoperative Red Sea Cable. The disappointment is great, and, as usual, there are not wanting those who are ready at all times to condemn Government proceedings, and distract attention to the real difficulties. There are enough of real grievances against Government without getting up unjust ones. The intended Rangoon and Singapore cable adds impor-

tance to the subject. These cables have been constructed on the same principle as those which are now satisfactorily working in different parts to the extent of 3,000 miles.

The fact is, that cable making is almost a monopoly, and those who have patents and interests alien from this monopoly are naturally anxious that the public and the Government should experimentalise in their own interests. In such a new and important science as telegraphy, many errors must be committed before *certainty of success* is attained, but nothing has yet transpired to dishearten one from ensuring success—on the contrary, every failure can be traced to imperfect manufacture, and that is a mechanical question which experience can alone overcome. A great advance has already been made in this direction, as the Rangoon cable tests very much better than the Red Sea Cable, just as the Red Sea Cable, when made, tested better than any cable manufactured up to that date.

The contract for the Red Sea and Rangoon cables both were put up to competition. Messrs. R. S. Newall and Co. got the first, and Messrs. Glass, Elliott, and Co., the second; and they may be considered as the first and most competent houses. The class of cable for the Red Sea line was adopted after consulting the late Mr. R. Stephenson, who approved of it. The Rangoon cable has been approved of by most of the engineers and electricians to whom it was submitted prior to being adopted by the Government. Both these cables are made on the same principle as every cable hitherto laid, viz., a copper conductor, gutta-percha covering, and an iron shield on the outside. Any other class of cable, if adopted, must be adopted as an untried experiment. The repairs of the Red Sea Cable are to continue upon the only section where any serious interruption exists. Those repairs are confined to the Dhalac bank, 150 miles north of Perim, and are all in shallow water. All the faults are traceable to bad manufacture, and laying the cable too tight, and the contractor is responsible for them. It is announced that Messrs. Newall and Co., the contractors, have entered legal proceedings against the Red Sea Company for the outstanding balance due them. The Rangoon and Singapore Cable will leave England in November in two steamers, which are building and fitting specially for the service.

Mr. Lionel Gisborne and staff of electricians returned from their tour of inspection on the Red Sea Cable a few days since, and we find the following notice in the *Malta Times*, which confirms our view, that the failure is owing to imperfect manufacture of the cable:—

"In regard to the subject of insulation, the conclusion arrived at by the gentlemen appointed to report on the matter is said to be that the exterior of the cable, which is composed of eighteen iron wires, is of much too perishable a material. In this case a twelvemonth has sufficed to destroy the whole number in a great many places. It is certain, however, that this occurs on the muddy bottom, and scarcely, if at all, on the beds of coral. But, distinct from this rapid deterioration, the cause that necessitates the underrunning and repair of the cable is small holes or faults in the gutta-percha. The interior ring is formed of the seven copper wires in close contact with each other; the second circle is a first covering of gutta-percha; the out circle is the second and last covering of this material, which is supposed to be sufficient to insure insulation. Notwithstanding this presumed completeness, it is conjectured that there has occurred imperfect adhesion of the gutta-percha, which is, during the manufacture, laid on in a soft state, much in the same way as you would endeavour to cover a lead pen with narrow tape, applying a spiral motion to the pencil. The consequence has been that the electric currents have increased these faults until they allowed the electric fluid to escape laterally through the gutta-percha. With respect to this imperfection, the committee are of opinion that a greater number of layers must be applied to the manufacture of such cables, and perhaps copper wires outside to maintain the strength required to stand underrunning."

Mr. J. Macintosh makes the following comment:—

"Permit me to remark that the cables that have been laid were constructed upon principles which answer very well across the Channel, or such like short lengths; but which, in long lengths, become perfectly useless, from the fact that India rubber and gutta-percha are absorbents. It is not the incorporating tar or rosin with gutta-percha, or in outer covering of such like soft materials, that will assist in rendering the core perfectly insulated, but by applying to the insulating material a pressure of seven or eight tons per inch at the time it is encased round the conductor, which consolidates the insulator and thoroughly closes up all pores, and, to prevent absorption, a coating of collodion (which is known to be as impervious as glass) is applied, without which no deep-sea cable can be thoroughly insulated. It remains to be seen what effects the application of this system will have upon the future destinies of deep-sea telegraphy. The old system is clearly proved to be useless."

The *Times* has the following in its City article:—

"A Government statement was made in the House of Lords that the Red Sea telegraph has failed. 'It has proved unserviceable, and there is little hope that it will be repaired.' The Company by which this work was undertaken had a capital of £800,000, on which the British Government have guaranteed 4½ per cent. interest for 50 years free from all contingencies. There is every prospect, therefore, that the payment will prove a dead loss to the country. Whether this disastrous conclusion is to be attributed

to a total impossibility in the present state of telegraphic sciences of laying submarine cables, or to ignorance or mismanagement in this particular case, will, perhaps, be ascertained when the evidence taken before the Telegraphic Committee shall be laid before the public. At present it is reported that the Government continue in telegraphic matters generally to defer to the opinion of one or more of the parties originally connected with the promotion of the Red Sea line, and it is, therefore, to be assumed that they feel perfectly satisfied. If this conclusion is correct, there must be an end of all submarine attempts until some entirely new processes shall have been discovered. Among the public, however, a very strong impression exists that the operations hitherto have not been conducted with such strictness as to settle the question, and that if all the records of submarine telegraph contracts could be produced they would furnish information on that point of considerable value to the public service. That the directors of the Red Sea Company individually have fairly exerted themselves to conduct the enterprise in a satisfactory manner is at the same time generally believed. The fault of selecting this costly line in preference to the land route by the Euphrates rests altogether with the Government. They are now again communicating with the Porte on the latter project, and no redress has been accorded to the shareholders who were sacrificed, nor is there any prospect of rapid progress under Turkish auspices. Meanwhile it appears doubtful whether even the cable originally destined for Falmouth and Gibraltar will be laid, as since proposed, between Singapore and Rangoon. Two months back it was intimated that if anything was to be done this season a prompt determination must be made, but Lord Wodehouse announced that the question is still 'under consideration,' the Red Sea failure having produced complete discouragement."

The following letter has also appeared in *The Times* on the subject, and, we think, presents a most fair and rational view of the case:—

"The highest authorities pronounced the cable selected and used by the Red Sea Telegraph Company as, at that date, the most perfect which all past experience could suggest. Later experience shows that a modification of the cable is desirable, and will be attended with greatly increased ultimate economy.

"The chief cause of the difficulties in all telegraph cables appears to have been the supposed necessity of a heavy iron covering, causing increased cost in construction, in paying-out machinery, in unerrunning, lifting, and repairing; in fact, at every stage entailing augmented expense and risk. The early cables weighed several tons to the mile, the Red Sea Cable barely one ton; and the future character of cable will probably not exceed one-fourth of this, or, at most, such a weight as shall be sufficient for deep submersion.

"From the experience acquired in laying the Red Sea cable three important facts have been ascertained—one, that under the existing state of the science, the distances between the stations should not exceed about 500 miles; secondly, that the iron coating is not only not indispensable, but that the additional cost and risks attending it are not compensated by the small service it partially performs, and that it may with advantage be dispensed with; and, thirdly, that wherever the copper conducting wire has been properly protected by the gutta-percha, or other insulating material, it has worked well, and has been unaffected by the corrosive action and other influences which have destroyed the iron covering. The apprehension of difficulties from the coral rocks, originally urged against the enterprise, has proved utterly unfounded. The practical results of these facts, as applied to the Red Sea Telegraph, are simply that the undertaking should not only not be regarded as a failure, which it certainly is not, but that, profiting by the valuable experience acquired, it may be successfully completed at a very early period.

The capital remaining is ample for all purposes, and the application of the best existing description of light cable—with or without a covering of pliant and heat-resisting material, and dispensing with the iron coils—to repair the broken communication and connect the portions of the original cable which remain perfect will accomplish the object. The line once laid and working for one or two years would, it is now known, prove so remunerative that a second line would be requisite, by which time the improvement in cables may be considerable, and the original line would have well subserved its purpose, as a temporary work, to prove the value of rapid communication between England and India and China. Let us not be a laughing-stock to Europe as a nation who desired the attainment of a great national object and dared to attempt it, but, scathed by unsubstantial shadows, lacked the resolution and shrank from the perseverance necessary for its accomplishment.

THE CANTON BET.

AMONG the many anomalies in the present war with the Celestials, we think the most striking one is the announcement which we noticed in our last, of a wager offered on the part of the Cotton Guild of Canton, for the sum of \$50,000—about £11,500 sterling—"that the allied forces would be again repulsed at the mouth of the Peiho." Now, the Chinese merchants seldom do a foolish thing, especially in the betting way, on a scale of such magnitude. We conclude, therefore, that they have been directed to do this by their Government, in the hope of deterring us from proceeding to the Peiho. From what we know of the arbitrary Government of China, there is nothing surprising in this piece of bombast; but what will our readers think of the patriotism of our countrymen in China, when we tell them that only \$1,500 of this sum was taken up by Englishmen, while large amounts have been taken by foreigners, who, it appears, have more confidence in the prowess of our arms?

Now there is something very extraordinary and not very cheering in this little episode. What can be the cause of this

lack of confidence and spirit in Hong Kong and Canton, possessing wealthy communities of a decidedly sporting character, some of whose members think nothing of betting \$500 on a horse or a boat? The true secret is want of confidence in our commanders. Our correspondent's letter from Hong Kong, which was published in our issue of the 6th inst., fully explains this, as also the press of Hong Kong. The mal-administration of the transport service, under charge of Admiral Hope, appears to have been most reprehensible. We feel certain that if Admiral Seymour had had charge of the expedition the bet would not have been unchallenged an hour.

Literature.

The Englishman in China. . . . Saunders, Otley, and Co., 50, Conduit Street, Regent Street, 1860.—We have read this book through. If there be any person living endowed with sufficient patience to follow our example, he will understand how well entitled we are to boast of so wondrous an achievement. Our first feeling, on closing the volume, was one of astonishment; not, indeed, at the authorship, for we know that even intelligent travellers often write very silly letters to their friends at home, more particularly when they indulge in constant references, as in the case before us, to "the girl they've left behind them." Nor, on the other hand, are we greatly surprised at "the compiler's" want of discretion in publishing these communications, for intimate friends are seldom the best judges of literary excellence; but our wonder is great that publishers of the high-standing and well-deserved repute of Messrs. Saunders, Otley, and Co., should have permitted their names to appear on the title-page of so worthless a production. It would, speaking generally, be unjust to visit the sins of authors on their innocent publishers, especially when we are able to say, as we are now, that the mechanical part or "getting up" of the book is commendable. Indeed, if this work were only worthless, we would not blame the publishers, but we submit that as the author and compiler wisely withhold their names, some one is answerable for the misstatements and gross vulgarities with which it abounds. Of the *Frenchisms*, the colloquial phraseology, the exquisite samples of Pidgin English, and the other beauties of style, we forbear to speak; we will only say that it is abundantly evident that although this Englishman, during his four years' residence in China, learnt some things he ought not to have learnt, he did not mature his judgment, improve his taste, or add to his very scanty knowledge of English composition.

NOTES.

Dr. James B. Ballantyne (of the College at Benares), the candidate for the Boden Professorship at Oxford, has received the appointment of librarian at the East India House, vacant through the death of Professor H. H. Wilson.

The fourth edition of Baron Forrester's "Portugal and its Capability" is about to appear. It will contain the new regulations of the Portuguese Government for the free export of the wines of the Douro to England.

We are glad to welcome a new authoress in the field—not that authoresses are scarce. Miss Macready, daughter of the great tragedian, has just finished a volume of poetry.

The *Star* was the title of the first daily evening paper. But there were cheaper things above a hundred years ago, now forgotten. The *Intelligencer* appeared in 1723, and though no less famous than those of Dean Swift and his friend Dr. Sheridan supported it, only twenty numbers were issued at "the small price of one half-penny."

Messrs. Puttick and Simpson announce the sale of the effects of the late Mr. Joseph Sans. These are a very extensive collection of books, MSS., antiquities, pictures, and autographs. The sale will occupy many days, and will prove highly interesting to collectors.

A new work, by Count de Montalembert, entitled "Les Moines d'Occident," has appeared in Paris. An "authorised" translation will soon be published by Messrs. Blackwood and Sons.

The speeches and miscellaneous writings of the late Henry Drummond are announced for publication.

Mr. Hawkins has tendered his resignation as Keeper of the Department of Antiquities in the British Museum. Great changes are likely to take place in the administration of the various branches of our antiquarian collections.

Her Majesty has appointed William A. Ross, Esq., the author of "An Old Road and an Old River," to which we have recently called our readers' attention, to the Colonial Secretaryship of the Gold Coast.

A movement is on foot for raising a monument to the memory of the late Augustus Walby Pugin; and we are glad to hear that it is taking so practical and useful a form.

Messrs. Trubner and Co., of Paternoster-row, are shortly to publish the very valuable "Results of a Scientific Mission to India and High Asia," by Hermann, Adolphe, and Robert de Schlagintweit; undertaken between the years 1854 and 1858, by order of the Court of Directors of the Honourable East India Company. The work will consist of nine volumes of scientific text, and of an atlas in three volumes folio, containing views and maps, with explanatory letter-press.

Naval and Military.

The French are sending to Hong Kong about 350 men as reinforcements by the P. & O. steamer *Alhambra*, chartered for that purpose.

In addition to the 350 men, per *Alhambra*, the correspondent of the *Times* reports that the steam frigates *Ulloa* and *Eldorado* sailed from Toulon for Alexandria on the 24th, with troops, which are to proceed to China through Egypt.

We have no movements to record in connection with the English Expedition, excepting the shipment of stores and coals, which continue. The *Marchioness of Londonderry* arrived on the 17th inst. from Hong Kong and the Cape, at which latter port she was detained some fourteen days by a gale. She brought the following naval and military invalids:—

Royal Artillery, 2 men, 1 woman, and 1 child; Royal Engineers, 4 men; 2nd battalion 1st Foot, 3 men, 4 women, and 6 children; 3rd Foot, 1 man; 12th Foot, 2 men; 45th, 1 man; 67th, 3 men; and medical staff, 2 men; and about 50 seamen and marines in charge of staff assistant-surgeon Gascoigne, and Lieut. Brand, R.N. Nineteen deaths took place between Hong Kong and the Cape, but no casualties have since occurred. Mr. Braunscombe, of the War Department, from Hong Kong; and Mr. Lamont, Assistant-Engineer, late of her Majesty's ship *Alcon*, from Ascension, both invalided, have arrived as passengers in this ship.

Her Majesty's sloop *Elk*, 12, Commander H. Campion, which was paid off at Chatham, has been in commission upwards of four years, during which period she has seen a great deal of active service both in China and in other distant parts of the world.

Hornet, 17, screw sloop, Commander William B. Elphinstone, tested her speed at the measured mile, in Stokes Bay, on Tuesday. At the conclusion of the trial she came into harbour to prove her compasses, take in stores, &c. It is supposed her destination is China.

The *Herald*, 8, Captain Henry M. Denham, is ordered home from Sydney, and is to survey the lines of deep soundings for electric cables and chronometric distances, to be measured from Sydney to Timor, Singapore, Ceylon, Mauritius, Cape of Good Hope, St. Helena, and Ascension.

The *Gibraltar*, 101, was safely launched at Devonport, by Mr. Peake, master builder, in the presence of Rear-Admiral Sir Thomas Pasley, the French Ambassador and the Countess de Persigny, Lord Churston, and others. The ceremony of christening was performed by Miss Edgcombe, daughter of the Hon. George Edgcombe.

We hear, says the *Army and Navy Gazette*, that Major-General Lockyer is likely to be succeeded in the Ceylon command by Colonel O'Brien, now assistant Quartermaster-General at the Horse Guards. Colonel O'Brien, although never engaged actively in the field, has rendered useful service in almost every part of the globe. He is a capital linguist, an efficient administrator, and a popular officer.

The officers commanding Royal Artillery at the stations and in the districts concerned, will obtain the sanction of the officers commanding the troops for the following removals of officers, viz.:—Lieut. Colonel Middleton, C.B., from India to England; Lieut. Colonel Gibbon, C.B., from India to England; Captain and Brevet-Major Penn, from Guernsey to Bengal; Captain W. Morris, from Aldershot to Bengal; and Captain Carr from China to Guernsey.

The Government having decided on strengthening the fortifications at the Island of St. Helena, and adding to the strength of the troops and native regiment garrisoning the island, arrangements have been completed for despatching a body of Royal Engineers and Royal Artillery, together with nearly 200 other troops of the line to that island. The batteries will be supplied with 68-pounder guns, and manned by Royal Artillerymen, fifty-one of whom have been selected to proceed.

We regret to announce the death of Col. Arthur John Reynell-Pack, C.B., which took place on the 17th inst. at Cork, after a few hours' illness, at the early age of 43.

THE MALABAR.—The report from Galle, dated June 2, which no doubt has been published in the East before this, has been made public here. The *Times* says:—"No doubt the harbour of Galle is a bad one. We have examined that point on a former occasion. But, as ships must make the best of a harbour, whether bad or good, that fact does not enter into the present inquiry. It must have been perfectly notorious that vessels in Galle harbour required two bower anchors to make them safe, otherwise the rule would not be described as 'essentially necessary,' nor would the practice have been adopted 'invariably.' It is also clear, from the history of this very equal, that the practice is not only a prudent but an effectual one. The *Fides*, another vessel in port at the time, dragged an anchor just like the *Malabar*, but as, unlike the *Malabar*, she had two anchors down, though she dragged one, she was brought up by the other. If the *Malabar*, therefore, had had adopted a similar precaution, she might have had a similar escape. Two anchors were the rule of the port, and the vessel which obeyed the rule was saved. The Peninsular and Oriental boats systematically disobey it, and now one of them is lost. They have succeeded, no doubt, in economising time and labour on many an occasion, but at last comes the unlikely chance, and a vessel in the forfeit."

CHANGES AND PROMOTIONS IN HER MAJESTY'S ARMY AND NAVY.

WAR OFFICE, PALL-MALL.

14th Regiment of Light Dragoons—Major-Gen. Allan T. Maclean to be col., vice Gen. the Hon. Sir Henry Murray, K.C.B., deceased.
4th Regiment of Dragoon Guards—Duncan Anderson Farquhar, gent., to be cornet, by purchase, vice Roys, promoted.

Military Train—Ensign Edward William Henry Webb, from the 58th Foot, to be lieut., by purchase, vice Bodkin, who retires.

2nd Regiment of Foot—William Edward Montague, gent., to be ensign, by purchase, vice Bennitt, appointed to the 6th Dragoons.

3rd Foot—Surgeon Alfred Crocker, from the Staff, to be surg., vice Barker, appointed to the Staff.

4th Foot—Ensign James Henry McEwen, to be lieut., without purchase; Lieut. Henry Arthur Grey Todd, to be adjt., vice Ensign Francis Robert Sandys, who resigns the adjutancy only; Charles Greenlaw Leggett, gent., to be ensign, by purchase, vice Sudder, promoted.

12th Foot—William Stewart Hamilton, gent., to be ensign, by purchase, vice Wallace, appointed to the 6th Dragoons.

16th Foot—Heratist John Thomas Walpole, gent., to be ensign, by purchase, vice Bell, promoted.

18th Foot—Assist.-Surg. William Orr, from the Staff, to be assist.-surg., vice Hyde, appointed to the Staff.

19th Foot—Charles Gilbert Fryer, gent., to be ensign, by purchase, vice Rogers, promoted.

20th Foot—Stewart Abercrombie Wroughton, gent., to be ensign, by purchase, vice Gibaut, promoted; Charles Ramsay Gibb, gent., to be ensign, by purchase, vice Vernon, promoted.

21st Foot—James Whifton, gent., to be ensign, by purchase, vice Thorburn, promoted.

25th Foot—William Bigsby Brown, gent., to be ensign, by purchase.

29th Foot—Richard Alexander Oswald, gent., to be ensign, by purchase, vice Fawcett, promoted.

34th Foot—Ensign Thomas Howard McDougall Murray, to be lieut., without purchase, vice Rutledge, deceased; Ensign Philip Walker, from the 3rd Foot, to be ensign, vice Murray.

London Gazettes.

The Queen has been pleased to approve of Mr. John Frederick Capelle as consul at Rangoon for the Free Hanseatic city of Hamburg.

The Queen has been pleased to approve of Mr. C. Brodersen as Consul at Hong Kong for his Royal Highness the Grand Duke of Oldenburg.

The Queen has been pleased to appoint Stair Douglas, Esq., to be Colonial Secretary for the Island of Mauritius.

ANNOUNCEMENTS.

Lord Stanley of Alderley will succeed Lord Elgin as Postmaster-General. Lord Stanley has had long and varied official and Parliamentary experience, and is an excellent man of business. We trust that in his hands the Post-office will redeem its character, and that the scandals which have so long disgraced its administration will cease.

The Right Hon. the Secretary of State for War has been pleased to make the following appointments in the account branch of his office:—Mr. William Brown, Accountant-General, vice Mr. R. C. Kirby, C.B., retired; Mr. John Milton and Mr. H. W. S. Whiffin, Assistant Accountant-Generals.

The Queen has been pleased to appoint Sir Charles Justin MacCarthy, Knight, to be Governor and Commander in Chief in and over the Island of Ceylon and its dependencies.

- RUTTER**—On the 13th inst., at Kew-green, Mrs. Elizabeth Rutter, widow of the late Mr. Thos. Rutter, of Windsor Great Park, in her 83rd year.

Monetary and Commercial.

Letters this morning from Point de Galle announce that the whole of the specie of the *Malabar*—about £280,000—has been recovered. The diving apparatus used was Heinke's patent.

The report of the Ottoman Bank, to be presented on the 29th inst., states the available balance for the half year (including £1,343 brought from last account) to be £31,341, out of which £20,000 is recommended to be appropriated as a

dividend, at the rate of 8 per cent. per annum, leaving, after payment of income-tax, £10,154, to be carried forward. The profit from the issue of the Turkish Loan of 1858 is ascertained to have been £15,196, and this exceptional sum is to be added to the reserve, which will then be raised to £63,196. The present accounts do not include any results from the Beyrout branch, the disturbances in Syria having interfered with the receipt of the ordinary statement. The bank has subscribed £250 to the fund for the relief of the sufferers in that province.

The Agra Bank have declared an *ad interim* dividend of £2. 10s. per share for six months, to the 30th June, on account of profits of the current year.

The directors of the Chartered Mercantile Bank of India, London, and China, have declared a dividend of 5 per cent. for the half year ending 30th June last, payable to the shareholders on the London register on and after Friday, the 14th inst., and to the shareholders on the Bombay register three days after receipt of the outward mail of the 3rd proximo.

It appears from the Parliamentary report that it is not the intention of Government to call for any tenders for the Australian service by the Panama route at present, nor are there any negotiations going forward having that object in view.

The *Money Market Review*, in calling attention to the requirements of India and the probable bad crop, says:—"We ask our readers to put together these and a few other considerations which will readily occur to them at the present juncture, and to see if they do not warrant our conclusion, which is—that the value of money is probably at its lowest point for the present year, and that there is a reasonable prospect of a rise this autumn. We see no grounds whatever for the slightest alarm, but a well-judged caution will probably be found useful."

THE CEYLON RAILWAY.

We take the following from *The Times* :—

"Lord Torrington has put forth some suggestions on the vexed question of the Ceylon Railway. Seven or eight years ago the colony expected to get a line from Colombo to Kandy for a sum ranging from £800,000 to £1,200,000, and they gave a guarantee of 6 per cent. on the first amount, and of 5 per cent. on the remainder. Subsequently it was alleged that £2,250,000 would be requisite, and £1,800,000 seems now to be the lowest total the directors contemplate. All has been confusion on the subject, and the colonists are inclined to protest against having any railway whatever on such ruinous terms. Lord Torrington believes that the great mistake has been in the route chosen, and that, instead of a line terminating among the Kandy mountains, which would benefit only the coffee planters, the course should be to carry it from Colombo in a direction which, while it would admit of a branch towards Kandy, would form a trunk line across the island to the magnificent port of Trincomalee."

The specie by the last mail is as follows :—For Alexandria, gold, £7,440 ; Aden, silver, £100 ; Madras, gold, £2,352, and silver, £2,000 ; Calcutta, silver, £426 ; Penang, silver, £1,020 ; Singapore, silver, £10,400 ; Hong Kong, silver, £173,896 ; Foochow, silver, £728 ; Shanghai, silver, £125,971.

ARTICLES OF IMPORT.

TRA.—Since our last there have been two public sales, a small one on the 10th, and one of nearly 29,000 packages on the 16th inst., of which 9,900 were offered without reserve. The announcement of this sale of course checked business by private contract, and the little done showed prices to be in favour of the buyer. The result of the public sales was about 16,000 packages sold, including the 9,900, without reserve, at the previous reduced rates. Since then the market has continued very dull, and any endeavour to effect large sales would still further lower prices. Ordinary to good common Congou may be quoted at 1s. 1d. to 1s. 4d. per lb., with large parcels offering out of recent arrivals. There is fair inquiry for medium sorts of green at and below 2s. per lb. for immediate wants ; the supply is, however, equal to the demand. Since the delivery of letters this morning the market is more active.

SILK.—Business since our last has been on a moderate scale, and prices are decidedly firmer.

SUGAR.—The market has been dull, sales by private contract of 14,000 bags played Manila, at 37s. to 37s. 6d.

COFFEE.—Supplies abundant, and the market firm. Sales of fine ordinary and low middling Plantation Ceylon, at 63s. to 71s. The demand for Native has been active, and sales for common to fine ordinary, at 60s. to 63s.

RICE.—Owing to the state of the weather transactions have been important, and the demand active. 3,000 tons of Negerie, at 11s. to 11s. 1½d., and 1,500 of Maulmain, at 11s.; Benal Common, 10s. to 10s. 6d.

PEPPER.—Sales by private contract of 600 bags, which fetched 4½d. to 4½d. for Singapore; black, 3½d. to 4d. for Penang.

SAGO AND TAPIOCA.—Sago: Market dull; 160 boxes at auction all retired. Tapioca: A sale of white Penang at 3½d. to 4½d.

SPICES.—Cinnamon: sales to a fair extent at the following quotations—1st, 1s. 4d. to 2s.; 2nd, 1s. 1d. to 1s. 7d.; 3rd, 8d. to 1s. 2d.; 4th, 6d. to 8d. per lb. Cassia lignea is again 2s. to 3s. per cwt. cheaper, and 1,171 boxes at auction, all sold at 80s. to 86s. per cwt. for 3rd to 1st pile; 71s. to 77s. mouldy and broken. 450 packages Cassia Vera, half sold at 6s. to 19s. for very low to good. Cassia buds: Small transactions at 170s. to 180s. for good clean. Cloves: Market dull; no sales to report. Mace: Of 17 cases of Penang, a few sold at 1s. 2d. to 1s. 4d. for middling. Nutmegs: sales of about 30 cases Singapore and Penang, at 1s. 4d. to 2s. 7d. for ordinary to fair bold.

HYMP.—The market has continued inactive, but holders firm at £22 10s. to £23 for fair Manila roping.

COTTON. continues in good demand, and about 4,400 bales have been cleared off at the extreme rates of last week, viz., 1,300 bales Surat, middling fair extra to good new broach, 3½d. to 5½d.; and 3,100 bales Madras ordinary to good fair Tinniveli, 3½d. to 5d.; middling fair to good fair Western, 3½d. to 5-10ths.

JAPAN WAX.—1,450 cases, part sold; block, 60s.; saucer, 64s. to 70s.

TOBACCO.—No change.

TIN.—For Banca the market is inactive. Fair sales of Straits at £132.

MISCELLANEOUS.—India Ru her contracts have been made for arrival at 2s.; Camphor market, slack at 160s. to 165s.; Rattans, sales of 4,000 bundles of Akyab at 3s. 8d. to 3s. 10d.; Sapanwood, slight improvement in last quoted rates, but demand slack; Soy, in demand, sales at 4s. to 4s. 1½d. per gallon; Ribarb very dull, 135 cases at auction all retired. Mother o' Pearl Shells, firm at 125s. to 140s. for Singapore, and 105s. to 125s. for Manila; Tortoise Shell, no sales. Star Anniseed, prices lower, a few lots at auction fetched 88s.; Elephant's Teeth, sales are advertised for the 5th proximo; Stic-las, no present demand; Gum Benjamin, sales of 40 chests, Sumatra, at £5 2s. 6d. to £3 12s. 6d. for ordinary. Run Sales of 120 qucheons Penang, at 1s. 5½d.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh Bars, £6 5s. to £6 12s. 6½.; nail rods, £6 15s. to £8; hoops, £9 to £9 10s.; sheets, single, £9 10s. to £10; Staffordshire bars, £8 to £8 10s.; rails, £5 5s. to £7.

STEEL.—Swedish keg, £18 10s. to £19 10s.

COFFER.—Sheet and Sheathing, 11d.; yellow metal, 9½d.

TIN. 130s. for block; 137s. for bar. Tin plate, best charcoal, I.C., 31s. to 32s. 6d. per box.

LEAD.—English Pig, £21 10s. to £21 15s.; shot, patent, £25; sheet, £22 to £22 10s.; Spelter, £20 15s.; Zinc, English Sheet, £26 to £27. Quicksilver, £7 per bottle.

MANCHESTER MARKETS.

Advices from China are unfavourable. The consequence is that in this market all the current staple cloths for the East have received a check. The market closes in all India goods exceedingly flat. Printing-cloths are lower, and long-cloths and T. cloths more difficult of sale, the latter if pressed on the market having to be sold at a concession.
